Facility:	2,535 a	19,727 c	1,820 a	21,808 c				Earmark	59,638
From:	1,100 c		16,283 c					0 / 0 / 100	
To:								<b>Total Funds:</b>	<b>59,638</b>

Description: The Riverwalk is a multi-use trail along the east and west sides of the Anacostia River. It will serve as a recreational amenity and transportation alternative for a wide range of users, including bicyclists, inline skaters, pedestrians, people with disabilities, and others. It will connect 16 waterfront neighborhoods to the Anacostia National Park and the Anacostia River. 3508

- South Capitol St.: includes trail connections from the South Capitol St. Bridge to Oxon Cove
- Kenilworth Parkside and River Crossing to Maryland: includes a new bicycle/pedestrian bridge across the Anacostia River and associated trails to connect the National Arboretum and the Kenilworth Rec Center to Maryland Ave. to the Metropolitan Branch Trail
- Kenilworth: includes trail connection from the Benning Rd. Bridge to the Bladensburg Marina Park on the east side of the Anacostia River
- East Bank Trail: runs along the east bank of the Anacostia River between South Capitol St. and CSX Railroad Bridge over the Anacostia River
- Buzzard Point and Virginia Ave. Connections: includes on-street facilities (bicycle lanes and signed routes) and waterfront trails to connect other segments of the Riverwalk Trail to the National Mall, downtown Washington DC, and other regional trails
- Bridges: provide two bridges and associated trail connections to cross the railroad tracks on the east and west sides of the Anacostia River near Massachusetts Ave.
- West Bank: is a 2.5-mile section of trail on the west bank of the Anacostia River between 11th St. SE and Benning Rd.

To:									<b>Total Funds:</b>	<b>645</b>

Description: The Department of Parks and Recreation through the D.C. Recreational Trails Advisory Committee proposes to construct and restore the pedestrian/biker trails throughout the District of Columbia. Funding for the National Recreational Trails project is provided by the Federal Highway Administration to the D. C. Division Department of Transportation. The funds are then transferred to either the D. C. Department of Parks and Recreation or the National Park Service after projects are jointly obligated. The scope of work includes assessing the design and engineering requirements of different trails; developing plans and specifications; cleaning and grubbing the trail of invasive weeds, re-paving sections that are cracked, providing additional widths; repairing pedestrian bridges to correct safety hazards and improve accessibility as required under the Americans with Disabilities Act; furnish and erect fencing to prevent trash dumping; construct safety lighting; furnish and erect directional signs and information waysides; and furnish and install trail sides, such as benches.

Agency Project ID:		Title: <b>Bridge and Tunnel Security</b>							Complete:	
Facility:		750 a	2,900 c						BR	2,900
From:									80/ 20/ 0	
To:									<b>Total Funds:</b>	<b>2,900</b>

Description: This project provides a consultant contract for the assessment of risk of the loss of critical bridge and tunnel structures from terrorist incidents. The inventory of the District's highway structures will be prioritized to identify likely targets. The most likely candidates will be subjected to a risk analysis to determine the structures' vulnerabilities. Countermeasures will then be designed to reduce the vulnerabilities by deterrence, denying access, detecting the presence of threats, or designing hardening measures. These solutions will be implemented in accordance with the level of risk and available budgets.

Description: This project modifies and improves vehicular and pedestrian traffic control systems, such as traffic signals, channelization, signs, pavement markings, and other traffic control measures on and off the Federal-aid highway system. Includes installation of a variety of traffic engineering devices and construction of nominal geometric alterations. The project will preserve and promote the efficient use of existing city streets through changes in the organization of vehicular and pedestrian traffic flows. Improved traffic flow on arterial streets will improve air quality. Projects include:

- a. Traffic Signal Maintenance
- b. Traffic Signal System Communications and Control Enhancements
- c. Traffic Signal System Operational Support
- d. Traffic Signal Control System Support
- e. Traffic Signal Bulb Replacement
- f. Moveable Barrier System
- g. Corridor Signing
- h. Guidesign Replacement
- i. Hot Thermoplastic Pavement Markings/Two-Way Plowable Prismatic Pavement Markings
- j. Raised Reflective Prismatic Markings
- k. Traffic Signal Improvements
- l. Consultant Design Services
- m. Wayfinding Signage
- n. Sign Inventory and Management System
- o. Transportation Management Center
- p. Traffic Signal Uninterruptible Power Supply**

<b>ARRA Administrative Modification</b>	<b>Approved On:</b>	3/18/2009

From:									0/ 0/ 100	
To:									<b>Total Funds:</b>	<b>25,920</b>

Description: Roadway resurfacing, roadway reconstruction and roadway upgrading are combined in this project. Each contract is developed by ward to perform resurfacing, reconstruction and upgrading within the respective ward. This produces a comprehensive improvement plan and a systematic work order that reduces disruption in the community. A detailed coordinated plan is prepared for the entire neighborhood with participation from community leaders prior to the beginning of construction. This plan includes when streets would be closed, parking issues, movement and flow of vehicular traffic, temporary bus routes, and other mitigation measures to facilitate access into and out of the neighborhood. Upgrading and reconstruction involves removal of existing roadway pavement and miscellaneous structures and replacing them with new pavements, new curbs, gutters and other structures. Handicap access ramps to sidewalks, improved streetlighting and storm water drainage system are also a part of this work. Resurfacing involves milling of existing roadway surface to approximately two inches and repaving. Work also includes replair or replacement of new curbs, gutters and other structures. Handicap access ramps to sidewalks, improved streetlighting and storm water drainage system are also a part of this work 5341

2965

Description: This project reconstructs streets and highways on the Federal-aid highway system and other streets with poor pavement condition, drainage, or other reconstruction needs. Total roadway reconstruction is required when the highway pavement has reached the end of its useful life and can no longer be resurfaced. The life of street pavement is extended by cost-effective resurfacing whenever possible. When street pavement has reached the end of its useful life and can no longer be resurfaced, the street is reconstructed. Streets must be reconstructed once the base deteriorates or the crown becomes too high, creating an undesirable slope from the center line to each curb. The scope of work includes the removal of deteriorated base and pavement, repairing the sub-base, replacing or reconstructing pavement and base within the roadway area and resetting or reconstructing curbs and sidewalks. Additional work includes the installation of wheelchair ramps, bicycle facilities, safety features and landscaping improvements. This project is in the Transportation Planning Board's Long-Range Transportation Plan for the National Capital Region.

Description: Safety improvements provide a safe traveling environment for vehicular traffic, pedestrians and bicycle circulation within the District on Federal-aid and local roads. Work includes elimination or relocation of roadside visual obstructions; elimination or relocation of roadside obstacles; skid resistance resurfacing; modifications to traffic channeling; median replacement; traffic signals, signs, and lighting upgrades; installation of pavement markings to eliminate or reduce accidents; and installation of safety fences at overhead structures. Safety improvements are systematically identified through analyses of accident records, inspections, surveys, and citizen requests. The District maintains an inventory of locations with the highest number of reported accidents.

Description: This program's mission is to reduce mobile source emissions by reducing the number of vehicle miles traveled, and supporting other Transportation Control Measures. The project provides funding to the Metropolitan Washington Council of Government's Commuter Connections Program for the following projects:

- a. Employer Outreach
- b. Guaranteed Ride Home - subsidizing free emergency rides home for commuters who use transit or ridesharing options to work
- c. Commuter Operations Center- ride-matching services to commuters through a central toll-free number "1-800-645-Ride"
- d. InfoExpress Kiosks - kiosks located in DC.
- e. Clean Air Partners - The purpose of the Air Quality Public Education Project is to educate the public about congestion and transportation-related air pollution with specific actions and commute alternatives to reduce existing air quality problems.
- f. Monitoring and Evaluation

From:										
To:									<b>Total Funds:</b>	<b>8,710</b>

Description: Work under this contract consists of performing preventive maintenance activities to rehabilitate and maintain roadway and roadside assets, within the rights-of-way on the District's portion of the National Highway System (NHS). The majority of the work will consist of resurfacing various roadway segments. Resurfacing will include either the full roadway width, lane by lane or spot locations. The work also includes, but is not limited to, performing repairs or replacements of existing structures, including curbs, gutters, sidewalks, driveway entrances, base pavements, and corner cut backs, replacing or resetting stone and concrete curb; replacing perimeter fencing; furnishing sewer-water manhole frames and basin tops; constructing wheelchair/bicycle ramps; cleaning catch basins and connecting pipe; and weed control; necessary grading and excavating; and other miscellaneous and incidental work needed to complete the project.

Description: Roadway resurfacing improvements prevent extensive deterioration and potholes. Improvements extend the useful life of the original construction and diminishes the frequency of more costly reconstruction. Work includes the restoration and rehabilitation of distressed highway pavements through resurfacing improvements on roads eligible for federal aid. Work includes the removal of existing asphalt wearing surfaces; replacing deteriorated portions of pavement base; rehabilitating curbs, gutters, and sidewalks; installing curb/bicycle ramps; construction asphalt surface overlays, signage, pavement markings, street lights, upgrading traffic signals and new trees as needed.
