

Briefing on the Draft Round 8.0 Cooperative Forecasts

Metropolitan Development Policy Committee

**Paul DesJardin
Gregory Goodwin
COG/DCPS Staff**

November 12, 2009

Background

Cooperative Forecasting

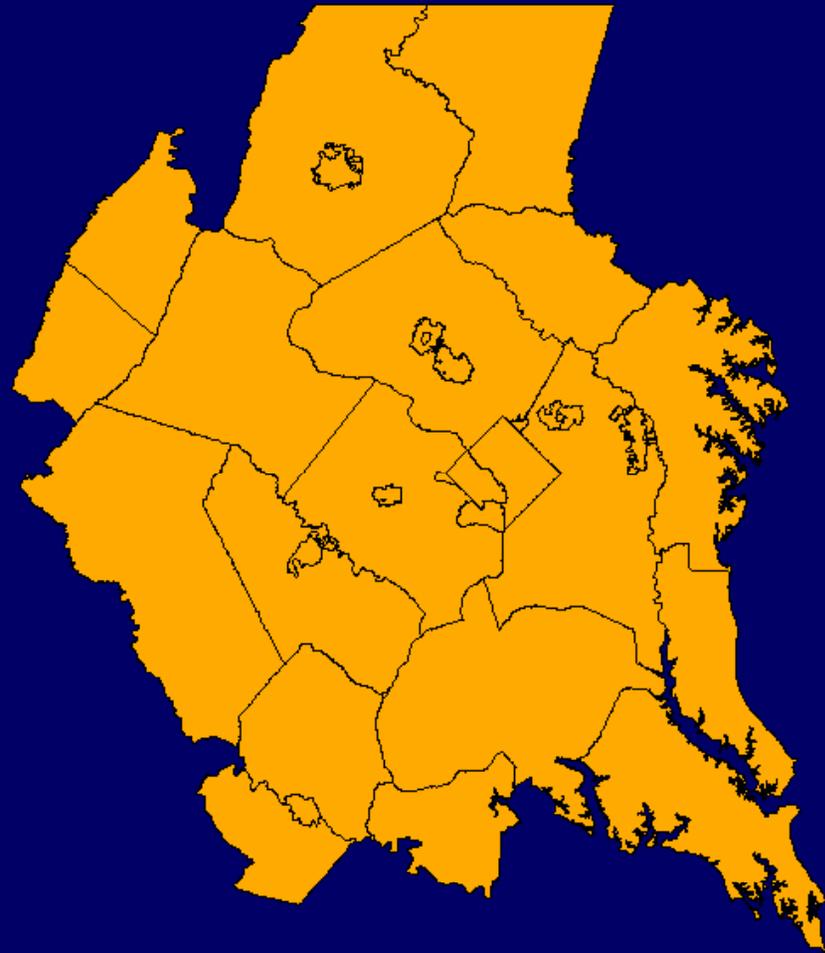

- Established by COG in 1975 to develop a consistent set of local and regional household, population and employment projections based on common assumptions about future growth
- Forecasts are prepared under the direction of the Planning Directors Technical Advisory Committee (PDTAC) and reviewed and approved by the MDPC and COG Board
- Cooperative Forecasts are inputs for transportation, water and air quality modeling by COG and TPB, local government planning, and private sector market analysis

The Round 8.0 Cooperative Forecasts . . .

- . . . will be used in conjunction with a new Household Travel Survey and a new Transportation Model
- . . . include a new econometric benchmark forecasts based on revised assumptions of the U.S. economy
- . . . include a new Traffic Analysis Zones (TAZs) structure (TPB TAZ 3,722) nearly double the number of TAZs from the previous Round 7 series
- . . . will be used in upcoming Air Quality Conformity Analysis through the 2040 forecast period
- . . . will be the basis for the next update to the COG Regional Activity Centers and Clusters

Forecasts for all jurisdictions in the TPB Modeled Area are included in Round 8.0.

Round 8 Cooperative Forecasts Key Factors

- Short-Term Forecasts Given Economic Cycle
- Long-range employment forecasts by NAICS from Global Insight
- Employment / Household Relationship including in-commuting

Employment/Households

- Scenario 1 – Adjust Households and Population in Later Years, Not Enough Households to Supply Workers for Projected Jobs – Implies Significant In-Commuting. Household Growth Constrains Potential Job Growth (“Household-Constrained Scenario”)
- Scenario 2 – Employment is the Driver, and More Households Needed to Provide the Workers for the Jobs (“Employment-Driven Scenario”)

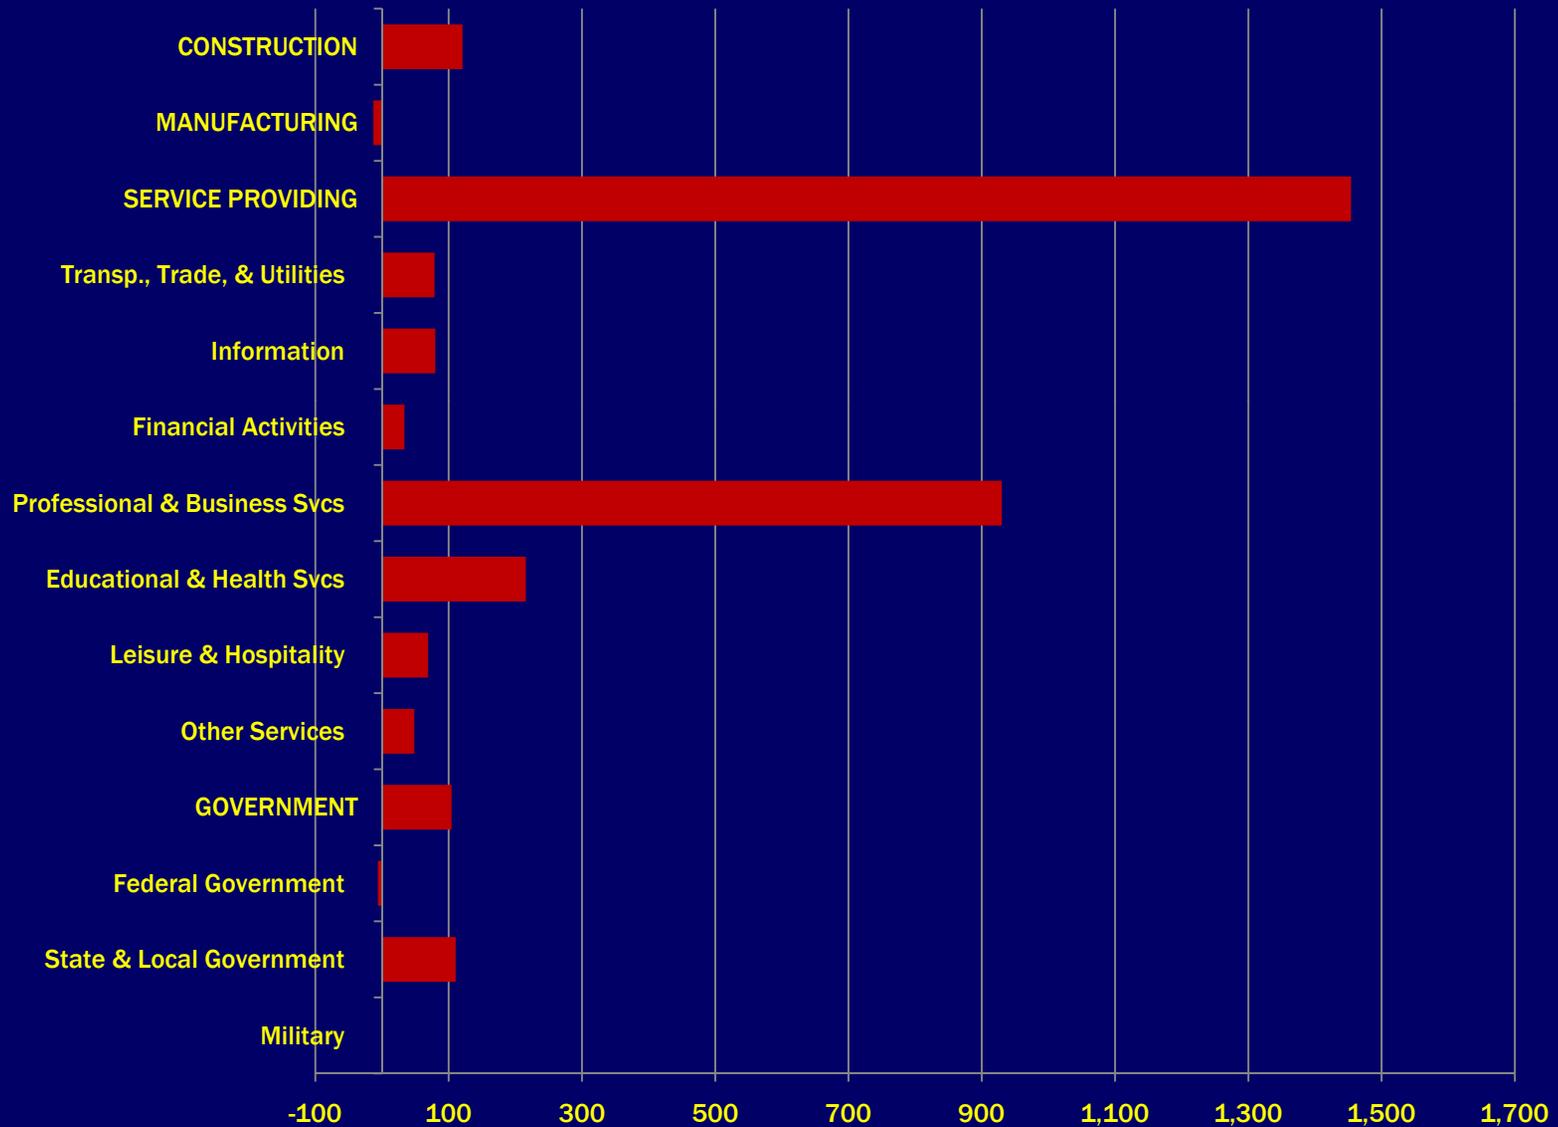

For both Scenarios, $E/HH = 1.70$ is Assumed
In Adjusting the Forecasts
