

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM

FOR THE

WASHINGTON METROPOLITAN REGION

FY 2005-2010

October 1, 2004

The preparation of this report was financially aided through grants from the District of Columbia Department of Transportation, the Maryland Department of Transportation, the Virginia Department of Rail & Public Transportation, the Virginia Department of Transportation, Federal Highway Administration, and the U.S. Department of Transportation, Federal Transit Administration, under the Urban Mass Transportation Act of 1964, as amended.

I. INTRODUCTION

The Transportation Improvement Program (TIP) is prepared each year by the National Capital Region Transportation Planning Board (TPB), which is the designated metropolitan planning organization for the Washington region. The sixth TIP prepared under the Transportation Equity Act for the 21st Century (TEA-21) which became law in June 1998, it was developed according to the final metropolitan planning regulations issued by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) on October 28, 1993. As a product of the urban transportation planning process, it outlines the staged development of the area's financially-constrained Long-Range Transportation Plan (CLRP), with priority projects selected for programming by the TPB, the states and the transit agencies presented in the first year of the six-year program. State, regional and local transportation agencies update the program each year.

The first CLRP was adopted by the TPB on September 21, 1994 to comply with the final metropolitan planning regulations. On July 15, 1998 the TPB approved the second update. On October 18, 2000 the TPB adopted the third three-year update. On December 17, 2003, the TPB adopted fourth triennial update: the 2003 Financially Constrained Long-Range Transportation Plan for the National Capital Region.

On September 17, 2004, the TPB is scheduled to adopt the 2004 CLRP. In updating the plan, the TPB and the transportation implementing agencies made use of a set of formal goals and objectives known as the Policy Element, which considers the seven planning areas identified in TEA-21 and reflects the policy goals and action agenda in the Vision Statement that the TPB adopted in October 1998. This CLRP contains the highway and high occupancy vehicle (HOV) facilities, public transit and bicycle improvements, major studies, and transportation strategies proposed through the year 2030.

The TIP serves several purposes. It is an expression of intent to implement specific facilities and projects in the CLRP through the selection of priority projects during the initial six-year period of the plan. It provides a medium for local elected officials, agency staffs, and interested members of the public to review and comment on the priorities assigned to the selected projects. It also satisfies one of the requirements of FHWA and FTA for the continuing transportation planning process of this region. These requirements form the basis for certification of the process which is essential to insure continued federal financial assistance for Washington area transportation improvements. Finally, the TIP establishes eligibility for federal funding for those projects selected for implementation during the first program year, known as the **Annual Element** of the program.

II. FEATURES OF THE TRANSPORTATION IMPROVEMENT PROGRAM

This document is a multi-modal listing of the public transit, highway and HOV, bicycle and pedestrian improvements as well as ridesharing programs and transportation emission reduction measures for which the obligation of funds has been programmed. It documents the cost, implementation phasing, sources and types of funds, and describes each project included in the program.

This TIP covers the six-year period FY 2005 to 2010. It identifies a priority list of projects and project segments to be carried out with federal funding under TEA-21. It is normally updated every year by the TPB.

The TIP includes a financial plan that shows the total dollars programmed by the District of Columbia, Maryland, Virginia, and WMATA for the TEA-21 funding categories for each year. The plan shows the funding programmed for the priority projects in the first year, which is consistent with the anticipated federal funding for FY 2005 that each state has authorized for the region. It also shows the funding programmed for the second through sixth years, which is also consistent with the anticipated federal dollars authorized by each state.

This TIP and the CLRP were developed under procedures to involve citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, and other members of the public. Draft versions of the project submissions for the air quality conformity assessment of the 2004 CLRP and new TIP were made available to interested members of groups and the general public at the TPB Citizens Advisory Committee meeting on February 12, 2004 and at the TPB meeting on February 18, 2004. The implementing agencies prepared CLRP project description forms, which together with TIP project information provide a complete project description, including its purpose, contribution to regional goals, and estimated cost. Copies of the TIP and major project submissions were accessible on the COG web page and were available for no charge at the COG Information Center. The complete sets of description forms for the projects in the update of the plan and those included in this TIP are available in three volumes, which can be obtained or reviewed at the COG Information Center, or purchased as part of the TIP and CLRP documentation.

Citizens and other interested parties had several opportunities to comment on the proposed plan amendments, the draft TIP, and the air quality conformity analysis at the TPB meetings on February 18, March 17, April 21, July 21, and September 14. A summary of the public comments and responses will be included in Chapter VI.

The TIP is not intended to be a capital improvement program (CIP). A CIP shows the estimated expenditure on projects over the program period. The TIP, on the other hand, programs the advancement of projects through the obligation of federal funds. Once

federal funds have been obligated for a project, it might not appear again in a subsequent TIP. A project would appear in a CIP, however, as long as funds are being expended on it. With regard to the TIP, a project would be programmed for several different years if it was contemplated that the obligation of federal funds would be sought for different implementation phases of the project during those years.

Project Selection

Projects on the National Highway System (NHS) and projects funded under the Bridge and Interstate Maintenance programs of TEA-21 are selected by each state in cooperation with the TPB from the approved TIP. Projects funded under the Surface Transportation Program (STP), the Congestion Mitigation and Air Quality (CMAQ), and the Transit Program (Title III) of TEA-21 are selected by the TPB in consultation with each state from the approved TIP and in accordance with the priorities in the TIP.

Priority Listing of Projects in the Annual Element

The first year of the program contains a priority listing of those projects selected for funding. These are shown in the "Annual Element FY 2005" column in the tables. Each transportation improvement project must be included in the Annual Element at key stages in its implementation (preliminary engineering, right-of-way acquisition, and construction) as a basis and condition for all federal funding assistance. This includes all TEA-21 funding under Title I (Surface Transportation) and Title III (Transit) to state, local, and regional implementing agencies for highway, transit, bicycle and pedestrian capital improvements and transit operating assistance. For this reason, the Annual Element is the most important part of the TIP.

The program tables emphasize the Annual Element, the projects scheduled for implementation in FY 2005. Projects are grouped according to the agency or jurisdiction responsible for implementation.

A series of codes and notes has been used for the Annual Element to indicate the funding sources and which phases of the projects are planned for implementation. Identification of the funding source is for programming purposes only, and does not necessarily represent approval from the appropriate federal agency. Highway projects may appear in programs as many as three times: when applications for federal funds are made for preliminary engineering, right-of-way acquisition, and/or construction. Codes and symbols for these phases and for funding sources appear under **KEY TO CODES** at the end of the improvement tables section.

All projects in the Annual Element come from the CLRP. In addition, a number of projects appear in the TIP which are minor in nature, but are shown in order to establish eligibility for federal funding assistance. Also, some non-federally funded projects are shown, which

are either recommended in the Plan, or are considered regionally significant and important to identify for air quality analysis and informational purposes.

Grouping of Projects

Some projects in the program are considered to be inappropriate in scale for individual identification in the Annual Element. These include signalization, traffic engineering, safety, noise abatement, modernization projects that do not change the use or scale of existing facilities, and certain small-scale highway and transit projects. These types of projects are grouped together under type of project, funding source, and programming agency. In February 1994, the TPB approved a set of criteria for grouping projects based upon those project types that are exempt in the EPA air quality conformity regulations.

Amendments

The Annual Element of the TIP represents a best estimate of the projects that are planned for advancement during the first program year. However, there must be some flexibility to change the Annual Element during the one-year interval between the publication of successive TIP's. Conditions will change, such as changes in priorities and funding availability, which will dictate modifications such as adding a new project, expanding the scope and/or funding level, changing the source of federal funding, or changing the phasing of a project. Accordingly, action may be taken to amend the Annual Element.

Proposed amendments are submitted to the TPB staff. Staff presents them to the TPB Program Committee for review and placement on the next TPB meeting agenda for informational purposes and public comment, with subsequent action at the following TPB meeting.

Status of Environmental Review

The TIP tables include a column with information on the status of environmental review as required for projects pursuant to the National Environmental Policy Act (NEPA). For example, a project undergoing environmental review as a study to prepare a draft environmental impact statement, is designated "DEIS (2)". Identification of the type of environmental work is for programming purposes only, and does not necessarily represent approval from the appropriate federal agency. Projects cannot be constructed until the appropriate review document has been approved. The abbreviations used in this column are as follows:

CE -	Categorical Exclusion
EA -	Environmental Assessment
FONSI -	Finding of No Significant Impact
DEIS -	Draft Environmental Impact Statement

FEIS - Final Environmental Impact Statement
4F - Determination of Environmental Impact on Parkland.

Subscripts are also used to indicate the status of environmental work:

- 1) - Proposed for Preparation
- 2) - Under Preparation
- 3) - Prepared for Review
- 4) - Approved

III. PROGRAM ANALYSIS

The TIP integrates projects proposed by state and local transportation agencies into a program consistent with the current regional long-range transportation plan and policies. In the development of this program, individual agency inputs are evaluated for consistency with the plan and policies. The TIP includes projects within the boundary of the Washington Metropolitan Area.

Relationship to the Long Range Transportation Plan

The financially constrained Long-Range Transportation Plan (CLRP), which was updated in 2003 to comply with the metropolitan planning regulations, is known as a constrained plan because its scope is limited by the financial resources expected to be available. In updating the CLRP, the TPB and the transportation implementing agencies made use of a set of formal goals and objectives known as the Policy Element, which include the TPB Transportation Vision adopted in October 1998 and the seven "planning areas" that were established by TEA-21 in June 1998.

The CLRP contains specific highway and high occupancy vehicle (HOV) facilities, public transit and bicycle improvements, and multi-modal studies proposed to be completed by 2030. In addition, the plan contains a set of transportation emission reduction measures (TERMs), including expansion of ridesharing incentive programs, telecommuting support, and construction of bicycle and pedestrian facilities, which are needed to reduce future emissions and help ensure that the plan meets the requirements of the Clean Air Act Amendments of 1990 (CAAA). The plan also incorporates a congestion management system (CMS), which will assess congestion and provide information for updating future plans. Through the planning process, specific projects and strategies are refined and selected from the plan, consistent with the Policy Element, the financial resources, and the air quality requirements, and scheduled for implementation in the TIP.

Air Quality Conformity of the Long Range Transportation Plan and the TIP

The CAAA specifies dates by which clean air standards must be attained and requires preparation of a plan identifying the measures to be employed and an implementation schedule for attainment. The act also specifies that revised conformity procedures be used. The U.S. Environmental Protection Agency (EPA) and the U.S. Department of Transportation jointly issued final regulations originally on November 24, 1993, with amendments on August 7 and November 14, 1995 and August 15, 1997, and additional guidance published by EPA on May 14 and by the FHWA and FTA on June 14, 1999 regarding the criteria and procedures to be followed by metropolitan planning organizations in making conformity determinations.

Based upon these regulations, TPB staff conducted the analyses needed to provide the basis for a finding of conformity of the 2004 CLRP and FY 2005-2010 TIP with the requirements of the CAAA. The results of these analyses are included in a report entitled: *Air Quality Conformity Determination of the 2004 Constrained Long-Range Plan and the FY 2009-2010 Transportation Improvement Program for the Washington Metropolitan Region, 2004.*

Compliance With Regulations On Providing Transit Services to Persons With Disabilities

In July 1990, the Americans with Disabilities Act (ADA) became law, providing persons with disabilities full access to transportation, housing and employment as a basic civil right. The ADA affects not only the Washington Metropolitan Area Transit Authority (WMATA), which operates federally assisted transit services in the region, but all of the bus, paratransit, and commuter rail services in the region. On September 6, 1991, the U.S. Department of Transportation issued final rules, which called for significant changes to the existing regulations on providing transit services to disabled persons. Under these rules, all purchased buses must be accessible, and all lifts and securement devices must accommodate all types of commonly used wheelchairs. In addition, complementary paratransit services have to be available to persons who cannot use the fixed route service. The paratransit service has to be comparable to the fixed route services in terms of fares, response time, hours of operation, service area and other criteria.

To address the ADA paratransit regulations, WMATA and the local jurisdictions established the Regional Paratransit Coordinating Committee (RPCC) in January 1991 to provide a forum for an exchange of information, ideas and strategies. WMATA contracted with a consultant to assist it and the RPCC in preparing a regional plan for submission to FTA by July 26, 1992. This plan defines how WMATA will arrange for new paratransit services and how the existing paratransit services funded by each jurisdiction will be changed, improved, or coordinated with the other services in the region in order to meet the requirements of the new legislation. Frederick County and the City of Frederick also prepared an ADA paratransit plan to complement their fixed-route bus services. On July 15, 1992, the Transportation Planning Board certified that both plans are in conformance with the Long Range Plan for the region.

By January 1997, both WMATA and Frederick County ADA Paratransit services were operating as planned in conformance with the regulations. Thus, according to 1997 FTA rules, the Transportation Planning Board is no longer required to annually certify that these plans are in conformance with the Long Range Plan for the region.

Other programs in the Washington region also contain special efforts to serve elderly persons and persons with disabilities. The Annual Element identifies the projects using FTA Section 5310 funding.

Compliance with Requirements of Urban Mass Transportation Financial Capacity Policy

FTA Regulations

On January 30, 2002, the Federal Transit Administration (FTA), issued Circular 7008.1A clarifying how FTA, when making grants, will assess the financial capacity of applicants. The circular identifies two aspects of financial capacity:

The general financial condition of the public transportation operating enterprise and its non-federal funding entities, and the financial capability of the agency and its funding entities which includes the sufficiency of their funding sources to meet future operating deficits and capital costs.

The circular describes how financial capacity reviews will be conducted as follows:

A determination of financial capacity is required at the stage where commitments to finance projects are made by the grantee and FTA. For Capital Investment grants, FTA will assess financial capacity both at the stage when TIPs are approved and when selecting projects Full Funding Grant Agreements. For Urbanized Area Formula grants, FTA will assess financial capacity at the TIP approval stage and grantees will be required to make their own self-certifications at the grant application stage.

The following guidance is provided with regard to the preparation of TIPs:

In preparing TIPs, local officials are encouraged to examine proposed programs of projects (as contained in the CLRP) for sufficiency of funds to cover total capital, operating and maintenance costs over the lives of the projects, as well as the operating and maintenance costs of the current system. FTA will evaluate TIPs based on these factors.

Financial Capability to Meet Future Requirements of the Region

From an historical standpoint, the ridership growth and general financial condition of the region's extensive public transit systems are good. Ridership on both Metrorail and Metrobus services showed dramatic growth over the past decade. Ridership increased on the local bus services operated by Alexandria, the City of Fairfax, Fairfax, Loudoun, and Prince William counties in Northern Virginia; and by Montgomery, Frederick, and Prince George's counties in Maryland. Over the past decade, the local jurisdictions and the state and District governments have addressed the challenges of providing the necessary funding for expanding Metrorail, implementing regional ADA paratransit services, maintaining Metrobus services, and operating local bus systems.

In the near future, as required by the metropolitan planning regulations, the TIP is financially realistic by year from FY 2005 through FY 2010. WMATA, the District of Columbia DOT, the Maryland DOT, the Virginia Department of Rail and Public Transportation, the Northern Virginia Transportation Commission, the Potomac and Rappahannock Transportation Commission, and the cities and counties within the region have identified existing revenue sources for the numerous bus, paratransit, commuter rail, and rail transit projects programmed in the TIP. The identified revenues are expected to cover the costs associated with these projects.

During 2003, Cambridge Systematics, Inc. prepared a financial plan for the update of the CLRP which estimated the financial resources for transportation through 2030. The projected revenues, maintenance/operating costs, and capital costs for the highway and transit systems in the District of Columbia, Suburban Maryland, and Northern Virginia in this plan were used by the implementing agencies to assist in the development of financially realistic inputs for this FY 2005-2010 TIP.

Under the financial analysis for the 2003 CLRP update, the funding identified by the implementing agencies for system preservation and for accommodating ridership growth on the WMATA rail system was less than requested by WMATA. Concerns also were expressed regarding the adequacy of funding identified for preservation of the highway system.

Due to the concerns about the near-term financial crisis, the TPB directed that the new study be conducted and completed in February 2004. This study produced a brochure entitled "Time to Act," that quantified the region's near-term transit and highway funding needs and priorities and identify specific revenues needed over the six-year period 2005 to 2010. The TPB called for a partnership effort to engage all levels of government to address these critical funding needs. The brochure was widely distributed to the region's Congressional Delegation and the legislative bodies of the District of Columbia, Maryland and Virginia and it was featured in an article in the *Washington Post*.

During the past year, WMATA and the state and local governments have acted to fund the ongoing repair and rehabilitation of the transit system and address the financial capability to meet the transit needs of the region. Facing significant fiscal pressures, the state and local governments continue to commit general or dedicated funds for transit.

With funding for completing the 103-mile Metrorail system identified, the region is addressing the funding needs to rehabilitate, preserve and operate the Metrorail, Metrobus and local bus systems. The TPB, WMATA, and the state and local governments have acknowledged the fiscal challenges facing the regional transit system and have taken steps to identify new funding for rehabilitation and ridership growth. Considering both financial condition and capability, the region has the financial capacity to operate and maintain an expanded public transportation system.

Transit Private Provider Participation

FTA Regulations

Sections 5309(e), 5303(o), and 5307(f) of the Federal Transit Act, as amended, require the involvement of private transit operators in the planning, programming and provision of public transit services to the maximum extent feasible.

Section 5303(o) states: "Private Enterprise.- The plans and programs required by this section shall encourage to the maximum extent feasible the participation of private enterprise. Where facilities and equipment are to be acquired which are already being used in service in the urban areas, the program must provide that they shall be so improved (through modernization, extension, addition, or otherwise) that they will better serve the transportation needs of the area."

On April 26, 1994, the Federal Transit Administration (FTA) published in the Federal Register (59 FR 21890) a "Notice of Recision of Private Enterprise Participation Guidance," which rescinded the FTA 1984 Private Sector Policy and the FTA 1986 Circular 7005.1 on the required documentation of private enterprise participation. The notice emphasized that FTA continues to support the participation of private enterprise, and indicates that two requirements in the Federal Transit Act, as amended, represent a comprehensive and thorough approach to the consideration of private enterprise at the local level.

The two requirements include:

- the Section 5307(f) process which mandates a public participation process for local transit systems (recipients of FTA funding) in the development of the Section 5307 program of projects; and
- the new Section 5303 metropolitan planning regulations issued in October 1993 which have extensive requirements regarding public participation in the development of transportation plans and programs by metropolitan planning organizations (MPOs).

The notice further states: "FTA's findings will be based on such criteria as the efforts a grantee or MPO has made to notify and consult with the private sector in its Section 5303 or section 5307(f) planning process; the effect of public mass transit service proposals on existing private mass transit operation; and any other steps or processes the grantee or MPO has taken to encourage private sector involvement. FTA believes that such factors will allow it to determine whether the program developed under Section 5303 involves the private sector "to the maximum extent feasible," given particular local circumstances, both in connection with grant making Sections 5309, 5307 and 5311."

On September 21, 1994, the Transportation Planning Board (TPB) adopted its "Public Involvement Process" to fulfill the requirements and criteria in the Section 5303 metropolitan planning regulations issued October 1993 for access to information and involvement in the programming and planning process. This policy describes in detail the TPB's proactive process for involving "... citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, other interested parties..." in the development of TPB plans and transportation improvement programs (TIPs).

Bus Transit Providers in the Region

WMATA, which is the principal public transportation provider in the region, is a recipient of FTA funding. The local governments who are co-signatories of the WMATA compact oversee WMATA's plans, policies and operations for rail and bus services. These local governments regularly review the costs, revenues and benefits of Metrobus routes in their jurisdictions.

Alexandria, Fairfax County, Fairfax City, and Montgomery and Prince George's Counties have introduced bus service which replaced or supplemented Metrobus service. Privately contracted operations are fully considered and employed when appropriate by each of these local governments. As part of their contracting process, the local governments solicit bids from qualified private providers. Currently, no federal funding is used in these services.

Prince William County, the City of Manassas, Stafford County, the City of Manassas Park, and the City of Fredericksburg are members of the Potomac and Rappahannock Transportation Commission (PRTC). Until 2004, PRTC had contracted with WMATA for the management, maintenance and operation of express bus services to the Pentagon, Crystal City, the Vienna Metrorail station, and the District. After conducting a competitive procurement in 2003 PRTC selected a private firm to provide these services. PRTC also provides "free" fare local bus service to the Virginia Railway Express stations. It operates an innovative route deviation service in eastern Prince William and Manassas, which involves USDOT Intelligent Transportation Systems funding to test high technology equipment for digital communications, automated routing and scheduling, and global positioning satellite tracking.

Loudoun County also contracts for express bus service to the Pentagon, Rosslyn and the District.

Background on the Development of TPB's Private Enterprise Participation Policy

On June 17, 1987, in response to Circular 7005.1, the TPB adopted its Private Enterprise Participation Policy. Until July 1995, COG/TPB staff implemented this policy, which

included:

- C Documenting public transit operator efforts to involve the private sector.
- C Convening a Private Providers Task Force (PPTF) which meets regularly, identifies opportunities for greater private provider participation in mass transit in the region, and reviews documentation submitted to the TPB by transit operators describing how private enterprise procedures have been followed. The PPTF Chairman also serves on the TPB as a nonvoting member.
- C Establishing a complaint resolution process.

In December 1994, in response to a request from the PPTF, the TPB referred the task of reviewing the TPB Private Enterprise Participation Policy to the TPB Bylaws Task Force. This task force met on January 25, April 5 and May 24, 1995 with the PPTF members, WMATA and local bus transit agency staff to review the TPB policy and the FTA April 1994 guidance, to discuss the issues raised, and to recommend revisions to the policy. The proposed revisions to the TPB policy were presented to the TPB in June, and the TPB approved a revised policy on July 19, 1995.

This revised policy simplifies the consultation process, ensures a channel of information between the transit agencies receiving FTA funding and the private providers, and removed the complaint resolution process. The policy includes:

- C Conducting an annual forum where key public transit staff from state and local jurisdictions meet with interested private providers to discuss their plans for new or restructured bus services.
- C Supporting the Private Providers Task Force (PPTF) which meets regularly, identifies opportunities for greater private provider participation in mass transit in the region, and provides comments to the TPB on the CLRP and on the transit element of the TIP. The PPTF Chairman also serves as a nonvoting member on both the TPB Technical Committee and the TPB.
- C Notifying the members of the PPTF when new or restructured public transit services are proposed by agencies or jurisdictions that are designated recipients of FTA funding.
- C Documenting the activities and actions taken by transit operators receiving FTA funding to involve private transit operators.

Activities During FY2004

During FY2004, WMATA and local government staffs have worked cooperatively with the PPTF and COG/TPB staff to accomplish the following:

Consultation with Private Providers

To facilitate consultation, TPB conducted the fifteenth annual public transit forum on May 4, 2004 where key transit staff from the local jurisdictions and WMATA met with interested private providers to discuss in general terms their plans for major bus service and paratransit changes and expansions.

Notification of New or Restructured Transit Services

During FY2004, no information was provided by WMATA regarding new or significantly restructured bus services.

Documentation

The annual narrative progress reports of activities and actions taken by transit operators receiving FTA funding to involve private transit operators will be submitted to FTA.

Conclusion

This region, through local government initiatives, continues to contract with private firms for a considerable amount of bus services. During the past year, the local governments, working cooperatively with the PPTF and WMATA staff, have exercised their roles and responsibilities in the private enterprise participation process as described in the TPB's Private Enterprise Participation Policy and Procedures as adopted July 19, 1995.

7 Facility: New York Avenue Left Turn Traffic Lanes From: Brentwood Road To: 6th Street, N.E. Jurisdiction:				250 a					NHS 80/ 20/	250	EA
Description:	New York Avenue is a major arterial carrying approximately 65,000 vehicles/day. Safety is a major issue as a result of left turns into local streets without having separate turn lanes. A study is proposed to determine the impact of having traffic make left turns at two locations (Fenwick and Kendall Streets) and to prohibit left turns at 16th and Fairview Streets. The left turns would be made by exiting New York Avenue to the right in advance of each of the two intersections, following a curbing alignment, and then cross New York Avenue as a through movement at each signalized intersection.										
									Total:	\$250	
8 Facility: New York Avenue/I-395 Tunnel From: To: Jurisdiction: District of Columbia				1,000 a					NHS 80/ 20/	1,000	EA
Description:	The New York Avenue/I-395 intersection is highly congested and is the fourth worst accident location in the District. A left-turn movement from New York Avenue to I-395 is one of the reasons for the congestion. The left-turn movement carries a high volume of traffic throughout the day and into the evening. The eastbound through movement also carries a high volume of traffic. To alleviate the congestion, a four-lane tunnel is proposed to provide a direct connection between the east and south approaches. This will remove some of the traffic from the signalized intersection resulting in less congestion and increasing safety.										
									Total:	\$1,000	
9 Facility: Street Rehabilitation Program From: K Street Transit Way Implementation To: Jurisdiction: District of Columbia	625 a		2,100 a	15,000 c	20,000 c				SP 80/ 20/ STP 80/ 20/	35,000 2,100	
Description:	This project is also listed under the Transit element. This project will provide for the redesign and reconstruction of a major east/west arterial roadway serving the downtown area. The new roadway will provide improved transit and vehicular mobility, reduce congestion and air pollution and improve transportation safety. The reconstruction of K Street will strengthen the economic vitality of the downtown core of the city.										
									Total:	\$37,100

Secondary											
11 Facility: Georgetown Southern Entrance From: To: Jurisdiction: District of Columbia	3,900 c										EIS(4) 4F Approved
Description:	This project will provide an efficient and safe motor vehicle access into Georgetown University near the C & O Canal. The project will provide an improved intersection with Canal Road, N.W. and the existing entrance to Georgetown University which is approximately 2,000 feet west of Key Bridge. The scope includes the design option of constructing an elevated and/or depressed roadway and/or ramps with connections to both eastbound and westbound lanes of Canal Road. This project was included as a demonstration project pursuant to Section 149(a)(14) of the Surface Transportation and Uniform Relocation Assistance Act of 1987.

Description: The purpose of this project is to provide transportation improvements to targeted areas as a means for stimulating private-sector activity and to improve the quality of life in District neighborhoods for its residents. This project will strategically target capital investments required to improve local and regional access to economic activity centers, foster downtown development and revitalization through a combination of operational and safety improvements. New commercial development or revitalization projects may require improved access, channelization, turning lanes, traffic signals, new signage, lane markings, lighting and parking. Selected improvements that facilitate truck traffic and transit access help to serve and stimulate private-sector activity. Improved access and upgraded facilities can greatly enhance economic activity and revitalization. Efficient access from principal arterials, Interstate System and freeways allow trucks to deliver goods and services to economically disadvantaged areas as well as economic centers of the city. This project supports infrastructure revitalization by improving intermodal linkages between truck commerce, bus, rail, pedestrians and roadways.

New government centers will be constructed in selected neighborhoods throughout the city. The purpose of this initiative is to provide the necessary improvements to the transportation infrastructure to support the additional employment and customer traffic that will be attracted to these government centers. The proposed government centers include:

- a. Petworth Metro Station area
- b. Minnesota Avenue Metro Station area
- c. Anacostia Business District (Martin Luther King Avenue and Good Hope Road, S.E.)

The scope of work includes sidewalks, curbs, gutters, streetlights, repairing tree boxes, replace litter boxes and other streetscape improvements at the three proposed government centers. Improved traffic channelization, signage, new traffic control signals and other traffic and streetscape improvements.

Description: The purpose of this project is to provide transportation improvements to targeted areas as a means for stimulating private-sector activity and to improve the quality of life in District neighborhoods for its residents. This project will strategically target capital investments required to improve local and regional access to economic activity centers, foster downtown development and revitalization through a combination of operational and safety improvements. New commercial development or revitalization projects may require improved access, channelization, turning lanes, traffic signals, new signage, lane markings, lighting and parking. Selected improvements that facilitate truck traffic and transit access help to serve and stimulate private-sector activity. Improved access and upgraded facilities can greatly enhance economic activity and revitalization. Efficient access from principal arterials, Interstate System and freeways allow trucks to deliver goods and services to economically disadvantaged areas as well as economic centers of the city. This project supports infrastructure revitalization by improving intermodal linkages between truck commerce, bus, rail, pedestrians and roadways.

This project will provide neighborhood commercial streetscape improvements on the Federal-aid Highway System. The neighborhoods will be determined through coordination with the D.C. Office of Planning. Proposed locations include:

- a. 14th Street, N.W. - Improve the streetscape on 14th Street between U Street and Thomas Circle (M Street, N.W.) - Improve sidewalks, curbs, gutters, street trees, street lights, traffic control signals and litter boxes. Repair roadway
- b. Georgia Avenue
- c. New York Avenue
- d. Anacostia (Martin Luther King Jr. Avenue, S.E.)
- e. Takoma (Piney Branch Road, Blair Road and Carroll Street)
- f. Brookland (12th Street, N.E., Michigan to Rhode Island Avenue)
- g. Pennsylvania Avenue
- h. U Street, N.W. 7th Street to 13th Street, N.W.
- i. P Street, NW.

Description: The purpose of this project is to respond to transportation project emergencies. It is not always possible to plan for emergencies such as roadway vibrations, sunken pavement, falling steel and concrete from bridges, and other urgent needs. This will enable the District the ability to quickly respond to emergencies without delay.

Description:	<p>The TEA-21 High Priority Projects Program provides designated funding for specific projects mandated by the U.S. Congress. The District has ten (10) High Priority Projects out of a national total of 1,850. TEA-21 limits the amount of obligational authority over the six-year period beginning at 11% in FY 1998, 15% in FY 1999, 18% in FY 2000 and FY 2001; and 19% in FY 2002 and FY 2003. The High Priority Projects are:</p> <ul style="list-style-type: none"> a. Theodore Roosevelt Bridge -TEA-21 funds has been allocated to conduct design alternative analysis for the future rehabilitation of the Theodore Roosevelt Memorial Bridge. Environmental assessments are currently underway. b. Geographic Information System - TEA-21 funds have been allocated to complete GIS data integration, obtain hardware and associated software to run the system. Also, it will integrate different transportation databases and will enable better management of the transportation system. c. Integrated Traffic Management System (ITMS) - TEA-21 funds has been allocated to design an integrated and improved traffic control signal system and traffic operations management center. d. Motor Vehicle Information System - Funds are provided to purchase a new MVIS that will integrate and register motorist information such as licenses, driving records, inspection data and vehicle registrations, support the commercial driver license program, international registration system and problem driver point system. e. Metropolitan Branch Trail - Funding has been allocated for right-of-way acquisition and construction of segments of the metropolitan Branch Trail (MBT). The MBT is a bicycle/pedestrian trail between Silver Spring, Maryland Metrorail Station and Union Station, Washington, D. C. f. Intermodal Transportation Center - Funds have been allocated to conduct a study of financing alternatives, environmental assessment and a feasibility analysis of bus parking and truck marshaling with an underground connection to the Convention Center. The Federal Transit Administration under TEA-21 will support project funding for FY 1999 and FY 2000 for the Intermodal Transportation Center. g. Light Rail Transit Corridors - Funds will be used to conduct a Major Investment Study (MIS) of light rail corridors to promote improved internal circulation in the city. Funding included in Transit Section. h. Enhance Recreational Facilities Along Rock Creek Parkway - The D. C. Department of Public Works and the National Park Service are looking into doing bike facility/trail maintenance along the Parkway. i. Kennedy Center - Access to John F. Kennedy Center for the Performing Arts - Funds are allocated to conduct a study of methods to improve pedestrian and vehicular access to the John F. Kennedy Center for the Performing Arts. The study is to be conducted by the U. S. DOT, U. S. Department of Interior/National Park Service and the D. C. Department of Public Works. j. Smithsonian Institution Transportation Program - TEA-21 provides assistance to the Smithsonian Institute for transportation-related activities, including exhibitions and educational outreach programs, the acquisition of transportation-related artifacts, and transportation-related research programs. k. Capital Gateway Corridor - Solicit private consultant services to prepare necessary discretionary grant applications. The Capital Gateway Corridor (Project 33) follows U.S. Route 50 from the proposed intermodal transportation center connected to I-395 in Washington, D. C., to the intersection of U.S. Route 50 with Kenilworth Avenue and the Baltimore-Washington Parkway in Maryland. l. Fuel Cell Bus and Bus Facilities Program - Under TEA-21 Title III - Federal Transit Administration, Section 3015 provides additional funds for the Fuel Cell Bus and Bus Facilities Program. FTA will provide \$4,850,000 per year to carryout the fuel cell powered transit bus program and the intermodal transportation fuel cell bus maintenance facility. m. Ferry Boat and ferry boat facilities n. Kenilworth Avenue Bridge Over Nannie Helen Burroughs Avenue - Funding also listed under bridge program.

										STP	75,468	
										80/ 20/		
										Total:	\$84,468	

Description: This project reconstructs streets and highways on the Federal-aid highway system. Total roadway reconstruction is required when the highway pavement has reached the end of its useful life and can no longer be resurfaced. The life of street pavement is extended by cost-effective resurfacing whenever possible. When street pavement has reached the end of its useful life and can no longer be resurfaced, the street is reconstructed. Streets must be reconstructed once the base deteriorates or the crown becomes too high, creating an undesirable slope from the center line to each curb. The scope of work includes the removal of deteriorated base and pavement, repairing the sub-base, replacing or reconstructing pavement and base within the roadway area and resetting or reconstructing curbs and sidewalks. Additional work includes the installation of wheelchair ramps, bicycle facilities, safety features and landscaping improvements. This project is in the Transportation Planning Board's Long-Range Transportation Plan for the National Capital Region.

Description:	<p>Roadway resurfacing, roadway reconstruction, and roadway upgrading will be combined into this new project. Each contract will be developed by Ward to perform resurfacing, reconstruction and upgrading within the same geographic area. This will produce a comprehensive improvement of a neighborhood and will reduce disruption in the community. A detailed coordinated plan will be prepared for the entire neighborhood with participation from community leaders prior to the beginning of construction. This plan would include when streets would be closed, parking management issues, movement of vehicular traffic, temporary bus routes and other mitigation measures to facilitate access into and out of the neighborhood.</p> <p>Upgrading and reconstruction will involve removal of existing roadway pavement and miscellaneous structures and replacing them with new roadway pavements, new curbs, gutters and other structures. Handicap access ramps to sidewalks, improved street lighting and storm water drainage system will also be part of this work. Resurfacing will involve milling of existing roadway surface to approximately two inches and repaving. Work will also include repair of or replace curbs, gutters, sidewalks and miscellaneous structures as necessary. Handicap access ramps to sidewalks, improved street lighting and storm water drainage system will also be part of this work.</p>

Description: This project modifies and improves vehicular and pedestrian traffic control systems such as traffic signals, channelization, signs, pavement markings, and other traffic control measures on and off the Federal-aid highway system. Installation of a variety of traffic engineering devices and construction of nominal geometric alterations. This project will preserve and promote the efficient use of existing city streets through changes in the organization of vehicular and pedestrian traffic flows. Improved traffic flow on arterial streets will improve air quality

- a. Traffic Signal Maintenance
- b. Traffic Signal System Communications and Control Enhancements
- c. Traffic Signal System Operational Support

Description:	Identified as Action Item 7.2 in the District's Transportation Vision, Strategy, and Action Plan for the Nation's Capital." Work will include the design and construction of a system of coordinated information centers and Interactive information kiosks to provide travelers and tourists with information of various transportation modes, attractions, event information, transportation maps, automated route and travel mode guidance and real-time travel condition information.										
132 Facility: Urban Access/Freeway Noise Barriers From: To: Jurisdiction: District of Columbia,	500 a 3,300 c										CE
Description:	The Noise Barrier Environmental program will conduct feasibility studies, design and construct noise mitigation barriers adjacent to residential communities along the District of Columbia's Interstate and urban freeway system. These barriers will enhance the quality of life to residents and businesses that border congested freeways. The project will include portions of the Southeast-Southwest Freeway corridor with an average traffic volume of more than 125,000 vehicles per day and the Anacostia Freeway corridor with an average traffic volume of 85,000 vehicles per day. The Noise Barrier Environmental program will ameliorate the effects of overburdened roadways as the District of Columbia seeks ways to improve the urban environment for its residents. The Consolidated Appropriations Act of 2004 provides for the unobligated balance of funds made available to the District of Columbia under item 70 Section 1106(b) of ISTEA shall be made available to carry out a project for the replacement of the existing bridge on Kenilworth Avenue Over Nannie Helen

Description:	This project includes a series of minor intersection improvement projects that will relieve traffic congestion and improve east-west travel between I-270 and US 1. Category II (Mid term at-grade improvements) includes the following: MD 117/MD 124 Intersection (Under Construction) MD 355/Gude Drive Intersection MD 185/MD 586 Intersection (Under Construction) MD 586/Aspen Hill Road Intersection (Under Construction) MD 586/Randolph Road Intersection (Under Construction) MD 650/Randolph Road MD 650/MD 108 MD 97/Forest Glen Road I-270/Shady Grove Road Interchange Ramp Improvements (Developer funded) I-270/MD 28 Interchange Ramp Improvements (Developer funded) MD 410/MD 185 (Under Construction) MD 650/Lockwood Drive (Under Construction) MD 650/Michelson Road (Under Construction) MD 650/Schindler Drive/Mahan Road (Under Construction) MD 650/Powder Mill Road (Under Construction) MD 650/US 29 (Under Construction)										
28 Facility: MD 115, Muncaster Mill Road	1,419 b	3,463	959 b						STP	3,463	CE
From: MD 28	2,566 c		2,504 c						80/ 20/		Approved
To: MD 124											
Jurisdiction: Montgomery County,									Total:	\$3,463	
Description:	Provide safety improvements along MD 115 from MD 28 to MD 124. Improvements will concentrate on horizontal and vertical deficiencies in the road as well as spot intersection improvements. MD 115 experiences a significant number of accidents and several intersections are identified as candidate safety improvement intersections.										
29 Facility: MD 117 (Clopper Road)	1,576 a	1,576	2,157 a						STP	2,157	CE
From: Great Seneca Park									80/ 20/		Approved
To: I-270											
Jurisdiction: Montgomery County,									Total:	\$2,157	
Description:	Intersection improvements along MD 117, from Great Seneca Park to I-270.										
30 Facility: MD 124 (Woodfield Road)	500 a	500	3,181 a						STP	3,181	CE
From: Midcounty Highway									80/ 20/		Approved
To: Warfield Road											
Jurisdiction: Montgomery County,									Total:	\$3,181	
Description:	Reconstruct MD 124 (Woodfield Road), from Midcounty Highway to Warfield Road. Sidewalks to be included where appropriate. Wide curb lanes will accommodate bicycles.

Jurisdiction:	Montgomery County, Prince George's County,									<i>Total:</i>	<i>\$12,100</i>	
Description:	<p>CHART's projects can be classified into the following categories:</p> <p>Traffic and Roadway Monitoring Through the continuous real time evaluation of data received from variety of sources, CHART works to facilitate speed control and accelerate incident response time along our major highways. Field data is gathered from the following sources: Overhead and traffic speed detectors Placement or modification of in-pavement loop detectors Close circuit television camers (CCTV) Toll free #77 cellular call-in system Field survey data from police and SHA patrols Pavement weather sensors</p> <p>System Intergration includes the following: Improving the existing system Communication with other State agencies and local government's Intelligent Transportation Systems. Development of state of art automation known as CHART II to manage traffic and facilitate quick response to incidents and special traffic events The objectives of CHART II are as follows: 1) Develop methods to accelerate the detection and response to traffic problems associated with incidents and special events. 2) Develop a system that is easily maintained and upgradeable. 3) Develop a system that is easy to learn and operate 4) Develop a system that can effectively communicate with other State and local government agencies. 5) Enhance and expand the capabilities of CHART II to include interoperability with all MDOT modes, local jurisdiction and regional agencies.</p> <p>Communication Network: The ability to transmit and receive real time data from MDOT facilities, field personnel, remote sensing devices, and Traveler Information Service apparatus is a critical part of CHART operations. To ensure that communications are transmitted clearly and accurately, as well as economically responsible, the following strategies may be applied: Collect, process, and disseminate real time information concerning transportation system Provide areawide connectivity between local area networks the State through internet access, network management and Automated Vehicle Location (AVL). Studies to evaluate life-cycle costs for leased line network versus privately owned fiber optic networks. Integrate Automated Vehicle Location system into CHART system Develop and/or implement an Asynchronous Transfer Mode (ATM) network Install ATM switch/notes at various strategic locations Expand the existing network to include all MDOT modes, local jurisdiction and regional agencies.</p> <p>Traveler Information Service (TIS): CHART currently manages a TIS system that provides pre-trip and en-route travelers information concerning travel conditions. The expansion of this service will be accomplished through the following: Provide pre-trip and en-route traveler information during weekday peak periods, major special events, seasonal recreational peaks, incidents and major road construction activities. Maintain and expand the Traveler Advisory Radio network Maintain and expand the number of static message signs along interstate and major arterials roadways Maintain and expand the number of Dynamic Message Signs along interstate and major arterial roadways. Post information regarding travel conditions on CHART wed site Maintain and expand the number of information kiosks.</p> <p>Incident Management:</p>

<p>To facilitate the quick and efficient removal of non-reoccurring incidents CHART employees the following equipment and technology: Toll free #77 cellular phone call in system Emergency Traffic Patrol (ETP) vehicles, are typically pick up trucks and vans. Emergency Response Units (ERU) are typically tow trucks. Freeway Incident Traffic Management (FITM) Trailers: These trailers are specially equipped to assists on site incident response personnel. Continued implementation of a "Clear the Road" policy which allows SHA incident response personnel the discretion remove vehicles from the roadway prior to the arrival of public towing services.</p> <p>Emergency Weather Operations: During periods of severe weather, CHART services are expanded. In addition to regular CHART operations the following devices, activities and techniques are employed to maximize SHA's ability to maintain favorable travel conditions. Roadway Weather Information System (RWIS) is a series of remote sensing weather stations that provide real time information regarding temperature, precipitation and road conditions. Access to National Weather Service reports Communication and integration of neighboring states RWIS information. Weather and roadway condition monitoring through the use of roving patrol vehicles that report via radio to CHART operation center. Use automated vehicle location technology to assist in the effective deployment of emergency response vehicles and snow plows. Expand the RWIS and connect them to similar systems operated by neighboring states. Maintain the link or expand the connection between the RWIS and the roving patrols and the National Weather System. Install and or upgrade RWIS, cameras, and the Emergency Operations Reporting Systems.</p>

1 Facility: Bordly Dr. From: MD 97 east to To: 1800' to existing Bordly Dr. Jurisdiction: Montgomery County	45 a 349 c										N/A
Description:	This project would construct a new two-lane primary residential road and a separate bicycle facility from MD 97 to approximately 1,800' east to the limits of the developer constructed section of master-planned road P-23, Bordly Drive. This project completes the remaining section of P-23 between MD 97 and Brighton Dam Road.										
2 Facility: Bridge Replacement and Rehab Program From: countywide To: Jurisdiction: Montgomery County,			2,203 a 238 b 8,057 c						BR 80/ / 20 Total: \$10,498	10,498	N/A
Description:	The Bridge Replacement and Rehabilitation Program is proposed for continued funding throughout the TIP period. This program provides for the basic maintenance of the County's bridges. The program includes the replacement of one-lane bridges with two-lane structures designed to current standards as well as the rehabilitation of existing bridges with bridges that meet design standards.										
3 Facility: Briggs Chaney Rd. From: Automobile Blvd. To: Dogwood Dr. Jurisdiction: Montgomery County	130 a 80 b 2,950 c										n/a
Description:	This project will involve the reconstruction of Briggs Chaney Road as a four-lane divided, closed-section roadway from Automobile/Castle Boulevards to Aston Manor Drive and to improve Briggs Chaney Road from Aston Manor Drive to Dogwood Drive as a two-lane, undivided arterial.										
4 Facility: Burtonsville Access Road From: MD 198 To: School Sccess Road Jurisdiction:			839 a	648 b			2,258 c		Local / / 100 Total: \$3,745	3,745	
Description:	This project provides a new roadway between Spencerville Road (MD 198) and the School Access Road in Burtonsville. This roadway will consist of two 12-foot lanes, closed section, for a length of approximately 1, 400 linear feet. The project also includes an eight-foot parking lane, curb and gutter, five-foot sidewalk, eight-foot hiker/biiker path, landscaping, and streetlighting.										
5 Facility: Citadel Avenue Extended From: dead end of existing road south of Marinelli R To: Nicholson Lane Jurisdiction: Montgomery County			263 a 923 b 2,316 c						Local 0/ 0/ 100 Total: \$3,502	3,502	N/A
Description:	This Master-Planned facility provides for a continuous four-lane undivided, pedestrian-friendly, transit-oriented, business district road within 100 feet of ROW from Marinelli Road to Nicholson Lane. The County will construct a segment from 700 feet south of Marinelli Road to Nicholson Lane. The balance of the project will be completed by developers of adjacent properties. This will complete the extension of Chapman on the east side of MD 355, from Bou Avenue to Huff Court. The segment from Bou Avenue to E. Randolph Road has already been constructed by a private development.										
6 Facility: Fairland Rd. From: US 29 To: Briggs Chaney Rd. Jurisdiction: Montgomery County			794 a 1,583 b	7,281 c					Local 0/ 0/ 100 Total: \$9,658	9,658	
Description:	This project includes the design and constructionh of roadway improvements on Fairland Road from US 29 to the Prince Georges County line. The roadway will be widened from a two-lane, open section road to a three-lane, closed-section roadway (two 15-foot lanes and an 11-foot center turn lane) for the entire road project length, approximately 7,130 feet. The project also includes a 5-foot wide sidewalk on the north side of the road, and an 8-foot wide hiker-biker path on the south side of the road.

7 Facility: I-66 Interchange From: @ US 29 (Gainesville) To: Jurisdiction: Prince William County,						43,836 b			NHS 80/ 20/	43,836	EA/FONSI Approved
Total:										\$43,836	
Description: Reconstruct the existing I-66/US 29 interchange in Gainesville. Reconstruction may include the addition of exclusive HOV access ramps within the interchange or in close proximity to the interchange Due to high traffic volumes, existing and projected traffic operational problems, and land use issues in the vicinity of the I-66/US 29 interchange; the design/evaluation of this interchange will include, but not necessarily be limited to, the following components: * a grade separation of US 29 and the Southern Railroad tracks, * an interchange between US 29/Relocated VA 55/Relocated VA 619 (Linton Hall Road), * widening of US 29 to six lanes from the vicinity of Virginia Oaks Drive to the interchange, * relocation/widening of VA 55 to four lanes from the vicinity of the Gainesville United Methodist Church to US 29, * relocation/widening of VA 619 in the vicinity of US 29, * a four-lane East-West Connector link bridging over I-66 between Route 29 (opposite Conway Robinson Memorial State Forest) to Route 674 (Wellington Road), * improvements on US 29 north of the I-66 interchange between the interchange and the Connector Link.											
8 Facility: I-66 WB From: Rosslyn To: Dulles Airport Access Highway Jurisdiction: Arlington & Fairfax Counties	1,243 a										N/A
Description: Conduct a technically-focused feasibility study using a community-based planning process to develop "context-sensitive" transportation alternatives that will improve mobility westbound in the I-66 corridor between Rosslyn and the Dulles Airport Access Highway. This study will be cognizant of the adjacent W&OD Trail, Custis Trail and other cyclist / pedestrian facilities as well as parks and environmental features. VDOT's Northern Virginia District Administrator and Mr. Vince Mammano, Federal Highway Administration, will lead the study. This study will be a technical effort aimed at inventorying mobility alternatives in the study area and identifying the pros and cons of these alternatives. In addition to VDOT staff, representatives of the Northern Virginia Transportation Authority (NVTA), local jurisdictions and agencies, and WMATA will provide technical support. A "consumer report" style of alternatives rating (previously used in the ATLAS study) is planned. The NVTA and the Commonwealth Transportation Board (CTB) will review and comment upon the study findings. Ultimately, this study will provide technical data for consideration by decision makers. There will be an outreach effort, facilitated by a consultant with expertise in community outreach, aimed at maintaining and providing an exchange of information and ideas between the public, including community and business representatives, and the study's technical staff. As requested by the Governor, the study scope will, at a minimum, consider the following alternatives: "no-build," a transit option(s), an HOV / HOT-lane option(s), and highway widening. Per the Governor's request, any proposed improvements will be located within the existing rights-of-way. This study will not be the detailed study approved by the TPB several years ago that was to result in a DEIS (Draft Environmental Impact Statement)

Description: VA's share of the funding for the following Phase I VA 28 PPTA projects:												
Construct interchanges at the following locations: <ul style="list-style-type: none"> o Barnsfield (SASM) Interchange (Phase 2) - Construct a full cloverleaf interchange and a 4-lane bridge carrying Barnsfield Road over Route 28. o Route 625 - Construct a partial cloverleaf interchange and a 4-lane bridge carrying Route 625 over Route 28 with a directional flyover ramp from northbound Route 28 to westbound Route 625. Widen existing Route 625 crossing Broad Run from four to six lanes. Construct a bridge on Route 625 crossing over the W&OD Trail. o Route 606 - Construct a full cloverleaf interchange and a 4-lane bridge carrying Route 606 over VA 28. o Westfields - Construct a full cloverleaf interchange and a 4-lane bridge carrying Westfields Boulevard over Route 28. o Sterling Boulevard - Construct a full cloverleaf interchange and a 4-lane bridge carrying Sterling Boulevard over Route 28. Completion of this interchange and associated mainline widening will result in an eight-lane freeway between VA 606 and VA 625. o McLearen Road - Construct a trumpet style interchange and a 2-lane bridge carrying McLearen Road over Route 28. Completion of this interchange and associated mainline widening will result in an eight-lane freeway between the Barnsfield (SASM) interchange and McLearen Road. Implement safety and operational improvements, as necessary. Reconstruct / replace bridges, as necessary.												
65	Facility: VA 7 From: Route 9 To: Market Street (Leesburg) Jurisdiction: Loudoun County, Leesburg	3,202 a	3,202	3,202 a						NCPD* 80/ 20/ RSTP 80/ 20/	2,735 467	EA Proposed for preparation
Description: Widen to six lanes between Route 9 and West Market Street in Leesburg and implement limited access control on Route 7. Construct an interchange at the Route 7 / White Gate Road intersection and construct frontage roads.												
This segment of Route 7 is characterized by traffic in excess of 46,000 vehicles per day, a steep grade, four at-grade and unsignalized intersections, and high travel speeds on Route 7 that makes access difficult and dangerous. As currently envisioned, the Route 7 Implementation Plan (for this segment of Route 7) will do the following: <ul style="list-style-type: none"> a. Eliminate the at-grade access points b. Provide an interchange at White Gate Road c. Construct frontage roads to provide adjacent properties access to the proposed White Gate Road interchange.

		FY 04	Carry Over	FY 05	FY 06	FY 07	FY 08	FY 09	FY 10	Source Fed/St/Loc	Source Total	Environ. Review	
140	Facility: VA 236 (Duke Street) Congestion Relief From: I-395 To: Telegraph Road Jurisdiction: Alexandria,	732 c	732	68 a 665 c						Federal Minimu 80/ 20/	733	PCE Proposed for preparation	
											<i>Total:</i>	\$733	
Description:	<p>The aim of this project is to reduce congestion on Route 236 Duke Street, improve existing transit service reliability, and improve the accessibility for pedestrians. The Scope of this project will include the following:</p> <ol style="list-style-type: none"> 1) Installation of optical detection equipment at various locations still to be determined during the project scoping. 2) Installation of accessible pedestrian signals at 19 intersections. 3) Traffic signal phasing optimization where appropriate. 4) Development of new traffic signal coordination timing plans. 5) Implementation of traffic responsive signal control along Duke Street. <p>This project will blend several technologies to achieve the projects aim. Traffic congestion will be reduced by an advanced implementation of traffic responsive control. Transit service reliability will be improved by reducing the congestion on Duke Street. Pedestrian signal accessibility will be improved by the installation of audible speech pedestrian signals and physical improvements to the intersections.</p> <p>The existing traffic signal coordination along Duke Street is achieved through fixed coordination timing plans which are implemented on a time of day schedule. There are four coordination timing plans: a morning peak plan, an afternoon peak plan, a midday peak plan, and an off-peak plan. This is typical of most signal systems in the region. Although our coordination plans accommodate the daily shifts in traffic patterns related to commuter traffic, these four plans cover a broad spectrum of traffic patterns, which have moderate fluctuations throughout the day. Furthermore, the level of recurring congestion can change from day to day during the week, based on residual effects of incidents and congestion on nearby roadways (eg. I-495).</p> <p>The ability to adjust to these anticipated fluctuations in daily traffic patterns would enable City Staff to help ensure the day-to-day consistency of traffic operations. Coupled with the optimization of traffic signal timing and phasing, the end-product will be to create day-to-day consistency of optimized traffic signal operations. This will involve the creation of additional 8 to 10 timing plans that will can be implemented as certain conditions are detected. This will further involve establishing thresholds based on roadway occupancy and speed whereby these alternate coordination plans may be automatically implemented. An example of these thresholds may be if the speed in a particular direction falls below 5 miles per hour; or if a vehicle is detected to be at the same point for an extended period of time. Through improved traffic signal operation, it is also anticipated that the on-time reliability of the bus service along Duke Street will also be improved.</p> <p>Accessible pedestrian signals will also be installed at the existing traffic signals along Duke Street. The installation of the audible signals will require other physical changes to the intersections such as installation of new wheelchair ramps and better placement of pedestrian buttons. The installation of the accessible pedestrian signals will promote our goal of safety for disabled persons and may help many of the disabled use the existing transit service along Duke Street.</p> <p>Currently, funding has been identified but will not be available until the Summer of 2004. Although some preliminary work has been done, a more detailed project scope will be developed in coordination with our private consultant once funding becomes available. This will include the collection of data for a subsequent "before" analysis, installation & testing, and an "post-implementation" analysis. While there are several step involved in the project, this is conceptually how the project will flow. With a start date in early Fall of 2004, we expect to be complete at the same time the following year</p>

Description:	The Downtown Circulator bus system will provide five high frequency bus routes in Downtown Washington, D. C. to create a single coherent surface transit system connecting the Monumental Core of the Nation's Capital with downtown and with the existing regional transit system. The Circulator will distribute visitors, residents and workers within Downtown DC, and between Downtown DC and the Monumental Core, and will serve as a supplement to existing transit services that generally move people into and out of the downtown.											
7	Facility: East Entrance Foggy Bottom From: To: Jurisdiction: District of Columbia				100 a					STP 80/ 20/ Total:	100 \$100	CE Proposed for preparation
Description:	Currently, Foggy Bottom Metrorail Station has no entrance on the east side. The project will study the feasibility of implementing an additional entrance on the east side of the Metrorail station.											
8	Facility: Farragut Station Pedestrian Tunnel From: To: Jurisdiction: District of Columbia				100 a					STP 80/ 20/ Total:	100 \$100	CE
Description:	Currently, there is no direct subsurface connection between Farragut North and Farragut West Metrorail Stations. This project will study the feasibility of connecting the two stations through a tunnel.											
9	Facility: K Street, NW Priority Busway From: 7th Street, NW To: 23rd Street, NW Jurisdiction: District of Columbia	400 a		2,100 a	27,800 c					STP 80/ 20/ STP* 80/ 20/ Total:	2,100 27,800 \$29,900	CE
Description:	A reconstruction project on K Street, NW provides an opportunity to improve transit and general vehicular operations by converting a portion of the roadway from its current cross section consisting of four general automobile lanes, two curb parking lanes, and median-separated local access and service lanes, into four general auto lanes, two curbside parking lanes, and two dedicated transit lanes. The project includes pedestrian, bicycle and signal improvements as well as other Intelligent Transportation System applications.											
10	Facility: Metrobus Replacement Program From: To: Jurisdiction: District of Columbia,	3,000 a		3,000 a	3,000 a	3,000 a				BD / / 100 Total:	9,000 \$9,000	CE
Description:	WMATA proposes to purchase standard transit buses to replace existing Metrobuses over the six-year CIP project period. This action will permit reduction of the average fleet vehicle age from the current 9.8 years by 2002. The Federal Transit Administration's latest recommended bus specifications suggest a desirable average bus fleet age of 12 years. A mid-life bus overhaul program at WMATA will extend the useful life of Metrobuses to 15 years, with an acceptable average fleet age of 7.5 years. The proposed Metrobus procurement program, in combination with a mid-life overhaul program, will achieve an acceptable Metrobus average fleet age of 7.5 years by 2002.											
11	Facility: Metrochek Pilot Demonstration Project From: To: Jurisdiction: District of Columbia,	300 a		300 a	300 a					CMAQ 80/ 20/ Total:	600 \$600	CE
Description:	The Metrochek Program is a fare subsidy program that allows employers to provide up to \$100 per month for each employee's public transportation commuting costs. Alternatively an employee may deduct from pre-tax earnings the allowable cost of commuting. Employees are provided with a MetroChek farecard, which can be applied towards the cost of commuting to work by any mode of public transportation. The MetroChek Program in the region is comprised of various structures including full employer subsidy, employee contributions and partial state or local government subsidy, and pre-tax payroll deduction.

69 Facility: Dulles Corridor Rapid Transit Project - Phase From: East Falls Church Metrorail Station To: Wiehle Avenue Jurisdiction: Fairfax County,	73,666 a		98,034 b	258,300 c	373,200 c	396,200 c	246,800 c		Section 5309 13/ 87/ Section 5309* 50/ 17/ 33 Section 5309** 50/ 25/ 25 Section 5309*** 50/ 23/ 27 Total:	98,034 505,100 373,200 396,200 \$1,372,534	FEIS Under preparation

Description: Complete NEPA requirements and perform preliminary engineering for construction of a 23.1 mile extension of WMATA's Metrorail system in the Dulles Corridor. The Dulles Corridor Rapid Transit Project will extend the Metrorail Orange Line in Fairfax County, through Tysons Corner to Washington Dulles International Airport and beyond the airport to Route 772 in Loudoun County. The extension will include 11 new Metrorail Stations, a new rail yard on Dulles Airport property, and an expansion of the existing rail yard at West Falls Church. Construction of the project is planned in two phases: Phase 1 includes an extension from the Metrorail Orange Line through Tysons Corner to Wiehle Avenue in Reston; Phase 2 will complete the extension to Dulles Airport and Route 772 in Loudoun County.

70 Facility: SmarTrip Implementation From: Systemwide To: Jurisdiction: Prince William, Fairfax, Arlington, Alexandria,			3,750 c							CMAQ 80/ 20/ SSTP / 100/ Total:	2,500 1,250 \$3,750	CE Proposed for preparation

Description: This project will implement SmarTrip functionality into VRE's fare collection system. This synchronization will allow VRE to be compatible with the regional transit system.

71 Facility: VRE - Burke Centre Station From: Extend Canopy To: Jurisdiction: Fairfax County	20 a 180 c											PCE Proposed for preparation
---	---------------	--	--	--	--	--	--	--	--	--	--	------------------------------------

Description: As ridership grows, additional covered area is needed to protect the number of people waiting on the platforms. For this project, the canopy at the Burke Centre Station will be extended 250 feet in order to cover the platform area.

72 Facility: VRE - Burke Centre Station From: Parking Lot Expansion To: Add 1100 spaces Jurisdiction: Fairfax County	2,000 a 5,957 c	7,957	2,000 a 17,707 c							CMAQ 80/ 20/ New Starts Earn 80/ 20/ Section 5307 80/ 20/ Section 5309 80/ 20/ Total:	13,250 3,106 1,851 1,500 \$19,707	EA Under review
---	--------------------	-------	---------------------	--	--	--	--	--	--	--	--	--------------------

Description: As VRE ridership grows, passenger demand for parking continues to increase. As a result, parking expansion and enhancement projects, including Burke, are an important component of the VRE CIP. This project would add 1100 spaces to the existing 543-space surface parking lot at the Burke Centre VRE Station.

73 Facility: VRE - Cherry Hill Commuter Rail Station From: Cherry Hill To: Prince William County Jurisdiction: Prince William County	1,890 c										EA Proposed for preparation
Description:	This project includes the development of VRE's 13th station on its Fredericksburg Line. The VRE station is part of a larger development project on the Cherry Hill Peninsula being managed by Prince William County. Conceptual work has begun on the station. Efforts to construct the station will be coordinated with the developer and are scheduled to begin in 2004.										
74 Facility: VRE - Fare Collections System / Communicati From: Systemwide To: Jurisdiction: Northern Virginia and the District of Columbia	2,355 c	544	1,089 c	546 c	547 c	548 c	475 c	475 c	Section 5307 80/ 20/	3,680	CE Approved
Description:	Fare Collections System II. Development and installation of a fare collection system that will replace the current fare collection system, which will become functionally obsolete by 2001. The current system is no longer supported by the manufacturer, Schlumberger Technologies, and parts are increasingly difficult to obtain. The replacement system will continue the operating practice of self-service, automated ticket vending on the platform for credit and debit cards. Application of new technologies such as smart cards is also included in this project, as well as a communications upgrade to the stations.										
75 Facility: VRE - Grant and Project Management From: To: Jurisdiction: Northern Virginia	2,345 a	1,650	3,409 a	1,689 a	Section 5307 80/ 20/ Section 5309 80/ 20/	5,930 5,924	N/A Ongoing				
Description:	The costs of grants and project management, as well as staff participation in federal grants management seminars, will be capitalized to the grants, reserving operating funds for service provision. This entry also includes the Strategic Planning Study, capital project contingency, construction management, accounting software upgrades, studies, and training.										
76 Facility: VRE - Manassas Station From: Expand Parking / Construct Old Town Parking To: Jurisdiction: Prince William County	3,871 c	3,271	3,271 c						CMAQ 80/ 20/ Federal Earmark 80/ 20/ STP 100/ /	140 1,856 1,275	EA Under review
Description:	As VRE ridership grows, passenger demand for parking continues to increase. As a result, parking expansion and enhancement projects are an important component of the VRE CIP. Current parking capacity will be exhausted within the next year. A 320 space parking deck will be built to serve VRE commuters adjacent to VRE's Manassas station.										
77 Facility: VRE - Quantico Bridge From: To: Jurisdiction: Prince William County,	16,310 c										Approved
Description:	This project will construct a second bridge over Quantico Creek and install a second track parallel to the existing single-track crossing. There are currently delays several times per week within the vicinity of the bridge. This project will remove this bottleneck, improve safety, and increase operating capacity south of Woodbridge. The bridge will be designed to accommodate a third track at a future date.

78 Facility: VRE - Railway System Improvements From: To: Jurisdiction: Northern Virginia and the District of Columbia	500 c		500 c	500 c					Section 5307 80/ 20/ Total: \$1,000	1,000	EA Proposed for preparation
Description: As development continues to the south and west of the Washington D.C. core area, demand for VRE railroad improvements will continue to grow. As a result, VRE anticipates future expansion and improvements within the corridor. These projects may be the result of new jurisdictional members, increases in ridership, and new operating requirements. Projects could include track and signal work, improvements to grade crossings, and addition of third track.											
79 Facility: VRE - Rolling Stock Acquisition From: To: Jurisdiction: Northern Virginia and the District of Columbia	7,920 c		2,683 c	3,069 c	2,284 c	3,356 c	5,456 c		Section 5307 80/ 20/ Section 5309 80/ 20/ Total: \$16,848	11,420 5,428	CE Approved
Description: VRE has exercised an option (on an MTA contract) to purchase 13 bi-level commuter rail passenger cars. This project includes an annual payment of \$1,850,000 for the acquisition of rail cars, which represents the approximate cost of financing this equipment over 20 years. In addition, the purchase of two 3,000 horsepower locomotives is programmed for FY-05. The aging of the original fleet & the higher horsepower requirements of the bi-level trainsets will require additional power. The proposed locomotive acquisition will require approximately 18 months, with delivery anticipated in FY05. Includes \$3,675 K in State funds in FY-02 for a two-year lease of two (2) Sounder trains. In addition, the purchase of two 3,000 horsepower locomotives is programmed for FY05. The aging of the original fleet and the higher horsepower requirements of the bi-level trainsets will require additional power. The proposed locomotive acquisition will require approximately 18 months, with delivery anticipated in FY05.											
80 Facility: VRE - Rolling Stock Modifications and Overha From: To: Jurisdiction: Northern Virginia and the District of Columbia	4,540 c		2,053 c	2,265 c	7,566 c	6,494 c	5,068 c		Section 5307 80/ 20/ Section 5309 80/ 20/ Total: \$23,446	14,488 8,958	CE Approved
Description: Technological developments and safety mandates from the Federal Railroad Administration (FRA), may require ongoing improvements to the VRE fleet. Projects that bring VRE into compliance with future federal mandates will be given the highest funding priority. In addition, advances in electronic systems and controls present opportunities for safety and reliability improvements. Finally, projects that improve passenger travel conditions, as well as crew working conditions, will be accomplished through equipment modifications. More specifically, the VRE Mafersa fleet will soon require an overhaul of brakes, air conditioning, trucks and related equipment which will be phased in over several years to minimize the number of railcars out-of-service at any one time.											
81 Facility: VRE - Stations and Facilities From: To: Jurisdiction: Northern Virginia and the District of Columbia	8,865 c		6,128 c	3,696 c	1,149 c	1,996 c	300 c		Section 5307 80/ 20/ Section 5309 80/ 20/ Total: \$13,269	10,441 2,828	EA Proposed for preparation
Description: Involves the addition of parking spaces, second platforms and related improvements at various VRE stations, including Fredericksburg, Leeland Road, Manassas Park, Woodbridge, Rippon, Rolling Road, Broad Run and other stations to be determined. Environmental reviews and land acquisition are in progress.

V. FINANCIAL PLAN

This section presents the financial plan for the Washington Region's TIP. TEA-21 funding for the region is under either Title I, Surface Transportation, or Title III, Transit. Within each title are several programs or funding categories, such as the National Highway System program and the Surface Transportation Program under Title I and the Section 3 transit capital program under Title III.

All TEA-21 funding is apportioned to states. Thus, in order to assess the projected funding authorized in TEA-21 to the funding programmed in the Washington region's TIP, financial summaries for the TIP projects from agencies in the District of Columbia, Maryland and Virginia as well as WMATA are prepared. To demonstrate that funding can reasonably be expected to be available, the projects in the TIP tables in the previous section have been examined by the proposed funding categories under Title I and Title III.

Financial summaries of funds by type of improvement and source of funds for FY 2005, the Annual Element, for the District, Suburban Maryland, Northern Virginia, and WMATA are presented in the following pages. A financial summary of total dollars programmed each year over the six-year period FY 2005-2010 is also presented.

The funds programmed in the TIP for each state by TEA-21 program category have been compared with TEA-21 and state funding that has been authorized by each state for the region. The funding programmed for the projects in the first year is consistent with the anticipated TEA-21 funding authorized for FY 2005. The funding programmed for the second through sixth years is consistent with the anticipated federal dollars authorized by the states.

PROGRAM CODES AND ABBREVIATIONS

(1) CODES FOR PROJECT PHASE

To be used in the Phase Column of Table 1 and 2.

These abbreviations are used after the dollar figures in the tables to indicate the purpose of funding:

Preliminary Engineering	a
Right-of-way Acquisition.....	b
Construction	c

(2) ABBREVIATIONS FOR SOURCE OF FUNDS

To be used in the Funding Source Column of Tables 1, 2 and 3.

Identification of the funding source is for programming purposes only, and does not necessarily represent approval from the appropriate federal agency.

TITLE I

BR, BH	Bridge Replacement and Rehabilitation Program
CMAQ.....	Congestion Mitigation and Air Quality Improvement Program
CRP.....	Congestion Relief Project
DEMO.....	Demonstration
DEMO (HPD)	High Priority Demonstration
FLHP	Federal Lands Highway Program
FRANS	Federal Reimbursement Anticipatory Notes
HES/STP (STP-HES).....	Hazard Elimination Safety Improvement Program
HPD.....	High Priority Demonstration
IC.....	Interstate Completion
IM	Interstate Maintenance
IVHS.....	Intelligent Vehicle Highway System
NHS.....	National Highway System
NPS	National Park Service
NRT	National Recreational Trails
PTF-NHS (NHS-PTF).....	NHS funds allocated prior to District
RSTP.....	Regional Surface Transportation Program
SP.....	Special Project
SPR-PL	State Planning & Research-Metropolitan Planning
STP	Surface Transportation Program
STP-ENH	Enhancement
STP-HES.....	Hazard Elimination Safety
STP-OC.....	Open Container
TF	Toll Facilities

FTA TITLE III

HSR-Sec 130	High Speed Rail – Section 130
JARC.....	Job Access and Reverse Commute
NCTA.....	Metrorail funding under PL 101-551 (National Capital Transportation Act)

Section 4(i)	Innovative Techniques & Methods Grant
Section 3037	Job Access and Reverse Commute Program
Section 5303	Planning Program
Section 5307	Block Grant Program
Section 5309	Capital Grant
Section 5309 FG	Fixed Guideway
Section 5309 NS	
Section 5310(b)(1).....	Capital Grant to Public Agencies
Section 5310(b)(2).....	Capital Grant to Private Non-Profit Agencies
Section 5311	Non-Urbanized Area Formula Program
Section 5313/5314	Planning and Research Program
Section 5333(b).....	Labor Protection Certifications
Section 6	Demonstration Grant
SH	Metrorail funding under PL 96-184 (Stark-Harris)
TIIF	Transit Infrastructure Investment Fund

OTHER SOURCES

BD	State/local Bond
LOCAL.....	Local Funds
P.....	Proffers
PRIV.....	Private Developer
REVSH.....	Revenue Sharing
SR	Surplus Toll Revenues
STATE.....	State Funds
TD.....	Tax District
TF.....	Toll Financing

(3) ABBREVIATIONS FOR IMPLEMENTING AGENCIES

To be used in Column 2 in Tables 1 and 2, and Column 1 in Table 3

NPS.....	National Park Service
FHWA.....	Federal Highway Administration
DCDOT.....	District of Columbia Department of Transportation
MDOT.....	Maryland Department of Transportation
FDC.....	Frederick County
MCDOT	Montgomery County Department of Transportation
MNCPPC.....	Maryland-National Capital Park & Planning Commission
PGCPWT	Prince George's County Public Works & Transportation
VDOT	Virginia Department of Transportation
ACDPW.....	Arlington County Department of Public Works
FCDOT	Fairfax County Department of Transportation
LCDTS.....	Loudoun County Department of Transportation Services

NVTC.....	Northern Virginia Transportation Commission
PRTC.....	Potomac & Rappahannock Transportation Commission
PWCDPW	Prince William County Department of Public Works
PRIV.....	Private
WMATA.....	Washington Metropolitan Area Transit Authority

(4) ABBREVIATIONS AND CODES FOR STATUS OF ENVIRONMENTAL REVIEW

To be used in the Environmental Review Column Table 1 and 2.

Identification of the type of environmental work is for programming purposes only, and does not necessarily represent approval from the appropriate Federal agency.

These abbreviations are used to indicate the type of environmental work associated with certain projects:

CE	Categorical Exclusion
DEIS.....	Draft Environmental Impact Statement
EA.....	Environmental Assessment
FEIS	Final Environmental Impact Statement
4F	Determination of Environmental Impact on Parkland
FONSI	Finding of No Significant Impact

In addition, the following subscripts are used to indicate the status of this environmental work:

Proposed for Preparation	(1)
Under Preparation.....	(2)
Prepared for Review.....	(3)
Approved.....	(4)
