

Fleets for the Future (F4F) is a national partnership of regional councils, Clean Cities coalitions, and industry experts tasked with coordinating five regional and one national procurement initiative designed to consolidate bulk orders of alternative fuel vehicles and infrastructure. Through these procurements, F4F will reduce the selected vehicles and infrastructure's incremental costs and disseminate best practices on application, usage, and procurement strategies.

The F4F team requests your help to inform the regional and national procurements' needs and target areas. Click below to complete a short survey on alternative fuel vehicle fleet profile, infrastructure and maintenance support, financing, and best practices. The survey is 19 questions and should take 20 minutes to complete. We thank you for your input.
