Visualize 2050 Status Reports

- A. Public Engagement Summary
- B. Maryland Express Lanes Projects
- C. WMATA Projects And Operations

Background: The board will receive a briefing summarizing the outcomes of the February 15-November 30, 2023 public engagement conducted in preparation for Visualize 2050. In addition, the Visualize 2050 schedule was changed due to uncertainties with a few of the major projects in our region – the express lanes system in Maryland and the WMATA transit system. As the deadline approaches for the Visualize 2050 project inputs, MDOT and WMATA will provide briefings on the status of these inputs.

- Item 10A – Visualize 2050 Status Memo
- Item 10A – Visualize 2050 Initial Project List Public Comment Analysis Summary
- Item 10B – MDOT Presentation
- Item 10C – WMATA Visualize 2050 Update Status Letter

MEMORANDUM

TO: Transportation Planning Board
FROM: Jamie Bufkin, TPB Transportation Planner
SUBJECT: Visualize 2050 Initial Project List Public Comment Analysis Summary (February 15 – November 30)
DATE: December 14, 2023

PURPOSE

The purpose of this analysis is to provide a summary of all public comments received to the Board and Technical Committee members as agencies continue their re-examination and submission of project inputs for Visualize 2050. This memorandum includes Appendix A: All Comments and Letters Received. This comment period extended from February 15 through November 30, 2023, and was conducted as an “open” survey. As an open survey, a statistical sampling method was not employed, and participation was open to any interested party. Therefore, the public opinion survey results cannot be considered statistically representative of the views of the region.

BACKGROUND

On February 15, the Transportation Planning Board approved the Visualize 2050 Technical Inputs Solicitation (TIS) and inputs to the Transportation Improvement Program (TIP). TPB staff launched a supplemental public comment period with an initial schedule of February 15 until May 31, 2023. TPB staff recommended adding six months to the Visualize 2050 schedule, which extended the public comment period to conclude November 30, 2023. Public comments were accepted via the Visualize 2050 Initial Project List Feedback Form to collect project-specific comments on the Visualize 2045 project list. In addition, staff collected comments about Visualize 2050 via email, voicemail, and letter.

A summary of comments received through November 30, 2023, is included in this memorandum. TPB staff included project-specific comment summaries for “green list” projects exempt from re-examination that received ten or more comments, and “orange list” projects undergoing re-examination that received five or more comments. Six emails were received related to Visualize 2050, and/or specific projects up for public comment. No comments have been received via mailed letter or voicemail through November 30, 2023.

OVERARCHING THEMES

Between February 15 at 12:00 PM and November 30 at midnight, there was a total of 997 project comments for the Visualize 2050 Initial Project List Feedback Form. Virginia received 514 comments, Maryland received 406 comments, and the District of Columbia received 77 comments. A total of 136 project suggestions were received, with 43 for Virginia, 40 for Maryland, and 10 for the

District of Columbia. Most survey participants learned about the projects through advocacy organizations.

The overarching themes during the entire comment period are similar to the overarching themes of the mid-year summary:

- There is **strong negative** sentiment towards roadway widening and expansion projects. There are concerns that roadway widening and expansion induces more automobile travel, contributes to climate impact, undermines public transit, and misallocates money and resources.
- There is **strong positive** sentiment towards passenger rail expansion and improvements, bus improvements, bicycle and pedestrian infrastructure improvements, and BRT projects. This support comes from enthusiasm for reducing car dependence in the region, advancement towards climate goals, and improving access and connectivity for alternative modes.
- For many projects that received “agree” for inclusion into the 2050 plan, there was support for roadway improvements that include traffic calming features, but desires for more bicycle, pedestrian, or bus infrastructure improvements.

OP LANES MARYLAND PHASE 1

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Op Lanes Maryland Phase 1	1	1	1	4	173	2	182

Sentiment Analysis and Identified Themes:

Most individuals commenting expressed strong negative sentiment for the Op Lanes Maryland Phase 1, citing concerns about environmental and historic resource degradation, equity and cost burden, and skepticism about its ability improve congestion over time. Many commenters believe that the project will adversely affect the region’s ability to reach its climate goals. Some comments expressed concerns about the public-private partnership approach and hesitancy to involve a private entity. Other comments criticized the public participation process for the project for a lack of transparency. Individuals who did not support the project suggested investing in mass transit, transit-oriented development, and telework policies as alternatives.

A small minority of commenters expressed neutrality, or approval of the project as proposed in Visualize 2045. These comments supported the project to address bottlenecks at the American Legion Bridge, and to support transit or carpooling.²

LONG BRIDGE VA – DC

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Long Bridge VA - DC	44	0	0	0	0	1	45

Sentiment Analysis and Identified Themes:

The comments received on the Long Bridge VA – DC expressed overwhelming positive sentiment toward the project. The comments emphasized the regional significance of the project for positive impact on passenger rail and freight transportation. Many commenters also supported the pedestrian and bike component of the project. Some commenters mentioned that they support the project because of its anticipated reduction in greenhouse gas emissions. There was also enthusiasm for improved connectivity between Virginia and the District of Columbia.

I-270 INNOVATIVE CONGESTION MANAGEMENT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
I-270 Innovative Congestion Management	3	1	0	1	33	0	38

Sentiment Analysis and Identified Themes:

Most comments received for the I-270 Innovative Congestion Management project expressed negative sentiment to highway expansions and tolls. Many commenters cite concerns with negative impacts to the environment or quality of life. Many respondents expressed skepticism about the project's efficacy to address congestion. Respondents noted that induced demand would result in temporary congestion relief. In addition, feedback was critical of toll lanes as an inequitable solution that provides congestion relief to those who can pay. Many commenters suggested that alternatives such as mass transit, transit-oriented development, telework policies, and other traffic calming measures should be considered to reduce congestion and reach climate goals. Some people supported congestion pricing without highway widening, suggesting a design with reversible lanes.

There were four comments that expressed support for the project to address congestion and safety on I-270. Individuals cite the success of similar projects to support their comments.

MARC IMPROVEMENTS

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
MARC Improvements	25	2	0	0	0	0	27

Sentiment Analysis and Identified Themes:

All of the comments received expressed positive, or strong positive sentiment towards the MARC Improvements as a regionally significant project. Commenters highlighted the importance of improving MARC to meet climate goals, improve air quality, and reduce congestion. Feedback about desired MARC improvements including all-day, weekend, and bidirectional service on all MARC lines. There was also enthusiasm for the potential for congestion to be reduced as a result of MARC improvements.

DISTRICT-WIDE BICYCLE AND PEDESTRIAN MANAGEMENT PROGRAM

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
District-wide Bicycle and Pedestrian Management Program	19	2	0	0	2	0	23

Sentiment Analysis and Identified Themes:

The comments received on the District-wide Bicycle and Pedestrian Management Program largely represented a strong positive sentiment. Commenters supported more bike and pedestrian infrastructure to improve safety outcomes, connectivity, and reduce automobile dependence.

Several comments expressed negative sentiment towards the District-wide Bicycle and Pedestrian Management Program with concerns about traffic impacts, and safety implications.

UNION STATION TO GEORGETOWN STREETCAR LINE

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Union Station to Georgetown Streetcar Line	19	0	1	1	1	0	22

Sentiment Analysis and Identified Themes:

Most comments received expressed a strong positive sentiment towards the Union Station to Georgetown Streetcar Line, citing its potential to alleviate congestion and support climate goals. Many respondents noted the importance of more coverage, and high frequency service to encourage ridership.

Some people expressed neutral or negative sentiment towards the project concerning congestion or alternative modes of public transportation.

DUKE STREET BRT DESIGN & CONSTRUCTION

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Duke Street BRT Design & Construction	16	1	0	0	0	0	17

Sentiment Analysis and Identified Themes:

All comments received on the Duke Street BRT Design & Construction project expressed positive, or strong positive sentiment. Respondents expressed support for BRT as a cost-effective, efficient, and environmentally sustainable solution to address congestion, advance climate goals, and promote safety along a major corridor.

DULLES AIRPORT ACCESS ROAD PROJECT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Dulles Airport Access Road Project	0	0	0	1	15	0	16

Sentiment Analysis and Identified Themes:

All of the comments received about the Dulles Airport Access Road Project expressed strong negative sentiment. Most comments state concern that expanding roadway capacity on the Dulles Airport Access Road would undermine the region’s investment in the Silver Line. Others noted their concerns that the project will induce more automobile travel and deviate the region from its climate goals.

MD 355 BUS RAPID TRANSIT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
MD 355 Bus Rapid Transit	15	0	1	0	0	0	16

Sentiment Analysis and Identified Themes:

Most comments express strong positive sentiment for the MD 355 Bus Rapid Transit Project. All comments emphasize the importance of BRT on MD 355 to address congestion. Some respondents support the project’s ability to improve mobility from Bethesda to Rockville – noting that it would reduce transfers and complement travel along the Red Line. Some comments support BRT as a cost-effective strategy that benefits climate goals, equity, and mobility without a car.

One comment expressed a neutral stance and suggested that RideOn Bus 30’s pre-pandemic schedule be restored.

DASH SERVICE EXPANSION

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
DASH Service Expansion	14	1	0	0	0	0	15

Sentiment Analysis and Identified Themes:

All comments received on the DASH Service Expansion project expressed positive or strong positive sentiments. Many respondents support expanding public transportation through better frequencies and updating fleets. The public comments anticipate that improved service will encourage people to use transit and reduce congestion.

BRUNSWICK LINE

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Brunswick Line	13	1	0	0	0	0	14

Sentiment Analysis and Identified Themes:

The majority of comments express a positive or strongly positive sentiment towards the Brunswick Line project. Respondents' desired improvements include improved frequency (including weekends), bidirectional service, and direct service to BWI. Many comments express support for improved rail service as a key strategy to reduce congestion.

MONTROSE PARKWAY

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Montrose Parkway	0	0	1	0	13	0	14

Sentiment Analysis and Identified Themes:

Most comments express strong negative sentiment towards the Montrose Parkway project. Many comments state concern that the project will continue to divide the White Flint neighborhood, promote car dependency, and negatively impact the environment. Some respondents suggested alternative investments in protected bike lanes, MD 355 BRT, and the local street network.

One comment had a neutral stance towards the project but noted that the project was previously presented as a new road. They noted that the project map in ProjectInfoTrak displayed a segment crossing railroad tracks, which they stated was extremely dangerous.

VEIRS MILL BUS RAPID TRANSIT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Veirs Mill Bus Rapid Transit	12	0	0	0	0	1	13

Sentiment Analysis and Identified Themes:

All of the comments received about the Veirs Mill Bus Rapid Transit project expressed strong positive sentiment. Most comments emphasize the need for east-west transit routes, and support BRT as a cost-effective mass transit option. Respondents also believe that expanding BRT will alleviate congestion, citing existing density and high transit ridership along the corridor.

ALEXANDRIA 4TH TRACK

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Alexandria 4th Track	13	0	0	0	0	0	13

Sentiment Analysis and Identified Themes:

All of the comments received about the Alexandria 4th Track project expressed strong positive sentiment. Respondents expressed support for improving rail travel via VRE, MARC, and Amtrak in the region.

BUS RAPID TRANSIT: US 29 – PHASE 2

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Bus Rapid Transit: US 29 - Phase 2	12	0	0	0	1	0	13

Sentiment Analysis and Identified Themes:

Most comments expressed strong positive sentiment towards the Bus Rapid Transit: US 29 – Phase 2 project. Respondents support BRT to reduce congestion on US 29, improve environmental quality, reach climate goals, and provide an affordable transportation alternative.

One comment expressed strong negative sentiment towards the project, citing disapproval for the dedicated median lane alternative. The respondent expressed support for the managed lane option citing concern about cost and congestion.

US 29 WIDENING PROJECT (ECL CITY OF FAIRFAX (VIC. NUTLEY ST.) TO CAPITAL BELTWAY)

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
US 29 Widening Project	0	0	0	1	12	0	13

Sentiment Analysis and Identified Themes:

All comments for this project showed negative sentiment. There are concerns that widening US 29 will only increase automobile demand while making the road more unsafe for other roadway users. There is also mention that the recent dense and mixed-use developments along the corridor are not

compatible with a widened roadway. A few commenters suggested that US 29 be dieted with more narrow lanes and more bicycle, transit, and pedestrian infrastructure instead.

FAIRFAX COUNTY PARKWAY IMPROVEMENTS

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Fairfax County Parkway Improvements	1	1	1	1	8	0	12

Sentiment Analysis and Identified Themes:

There was strong negative sentiment towards this project, with only 2 showing support. There is concern that this project will make Fairfax County Parkway more dangerous than it already is and that the improvements are only for automobile drivers. There was also concern about the cost of the project and skepticism towards VDOT's ability to maintain it in the future. A sporter noted the benefits that the smart lights will bring.

ROLLING ROAD WIDENING PROJECT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Rolling Road widening project	0	1	0	0	11	0	12

Sentiment Analysis and Identified Themes:

All comments received about the Rolling Road widening project expressed negative sentiment. Respondents cited concerns about induced demand and increased carbon emissions for all road widening projects. Some respondents suggested investments in safety and complete streets improvements as an alternative, noting that this area presents challenges for pedestrians, bicyclists, and transit riders.

One comment expressed support for the project but wishes it included a bike lane, safe pedestrian walking paths, and pull outs for bus stops.

VA 7

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
VA 7	5		0	1	6	0	12

Sentiment Analysis and Identified Themes:

This project received mixed sentiment, with 7 comments showing negative sentiment and 5 showing support. Those who do not support the project have concerns that widening VA 7 will induce more

car demand and is skeptical about VDOT's ability to maintain it. Those who support the project anticipate congestion relief and support the inclusion of BRT.

RESTON PARKWAY IMPROVEMENTS

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Reston Parkway Improvements	0	0	0	4	7	0	11

Sentiment Analysis and Identified Themes:

All comments express negative or strong negative sentiment towards the Reston Parkway Improvements project. Respondents criticized the road widening plans with concern that it would result in additional congestion. Many comments suggested that bike, pedestrian, and transit projects as alternatives. Some comments suggest that widening Reston Parkway would undermine the region's investment in the Silver Line.

VA 123 WIDENING (FAIRFAX)

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
VA 123 Widening (Fairfax)	0	0	0	1	10	0	11

Sentiment Analysis and Identified Themes:

All comments for this project showed negative sentiment. There are concerns that VA 123 is already too wide and that more lanes will not solve the problem. A few commenters noted that the project description is not detailed enough on where the road will be widened.

US 1 BRT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
US 1 BRT	9	0	1	0	0	1	11

Sentiment Analysis and Identified Themes:

This project received strong positive sentiment. There is enthusiasm for the potential to replace car trips with bus trips, while also making the corridor safer.

BATTLEFIELD PARK BYPASS PROJECT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Battlefield Park Bypass Project	0	0	0	0	10	0	10

Sentiment Analysis and Identified Themes:

All comments received express strong negative sentiment towards the Battlefield Park Bypass Project. Most comments call for the removal of this project over concern that it will encourage high-speed traffic through the area. Some respondents also criticize the project for undermining the Prince William County Strategic Plan’s vision for walkable, bikeable, and transit-friendly communities. One comment suggested the project undertake the Route 29 Alternate Alignment. There was also concern that the project will become a barrier for the community and encourage car-dependent development.

PENNSYLVANIA AVENUE NW PROTECTED BICYCLE LANE

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Pennsylvania Avenue NW Protected Bicycle Lane	8	2	0	0	0	0	10

Sentiment Analysis and Identified Themes:

All comments for this project show positive sentiment. There is enthusiasm for bicycle lanes that are designed with safety in mind. Others say that the project will also bring beautification improvements for the corridor. One commenter noted that Massachusetts Avenue may make more sense as a bicycle corridor.

DULLES TOLL ROAD EXPANSION

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Dulles Toll Road Expansion	0	0	0	1	8	0	9

Sentiment Analysis and Identified Themes:

All comments express negative or strong negative sentiment about the Dulles Toll Road Expansion. Most respondents suggest that the road expansion project is outdated and will undermine the region’s investment in the Silver Line and induce more automobile travel.

MAGARITY TOLL ROAD EXPANSION

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Magarity Toll Road Expansion	0	0	0	0	9	0	9

Sentiment Analysis and Identified Themes:

All comments for this project showed strong negative sentiment. There is concern that many homes and a school will be negatively impacted by the project. There is emphasis that the project should instead focus on improving pedestrian and bicycle access to the metro.

MARC RUN-THROUGH SERVICE TO VIRGINIA

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
MARC Run-through service to Virginia	7	1	0	0	0	0	8

Sentiment Analysis and Identified Themes:

All comments received for the MARC Run-Through Service to Virginia expressed positive or strongly positive sentiment. Many comments mentioned the significance of the project to improving the regional rail network, especially facilitating travel to destinations outside of downtown Washington DC.

US 50 IMPROVEMENTS

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
US 50 Improvements	1	0	0	0	7	0	8

Sentiment Analysis and Identified Themes:

Most comments expressed strong negative sentiment towards the US 50 Improvements project. Many respondents opposing the project suggest supporting the STARS study recommendations for safety and operational improvements and considering a BRT study for the corridor.

One comment expressed support for the project but did not provide any additional information.

DULLES TOLL ROAD COLLECTOR

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Dulles Toll Road Collector	0	0	0	1	6	0	7

Sentiment Analysis and Identified Themes:

All comments received for the Dulles Toll Road Collector project report negative or strong negative sentiment towards the project. Most comments suggest that this project is outdated and undermines the region's investment in the Silver Line. One comment noted that the area should instead be designed as transit-oriented development.

NEW BRADDOCK RD

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
New Braddock Rd	0	0	1	0	4	0	5

Sentiment Analysis and Identified Themes:

This project received strong negative sentiment, with only 1 neutral comment. There is concern that the project will create a barrier for the Center Ride Community and redirect traffic through a neighborhood and elementary school. There is also skepticism as to whether this project is needed at all. One neutral comment noted that there should be protected bicycle lanes, a road diet, crosswalks, and improved transit access.

NEW GUINEA ROAD, CONSTRUCT

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
New Guinea Road, Construct	0	0	0	0	5	0	5

Sentiment Analysis and Identified Themes:

This project received strong negative sentiment. There is concern that this widening project will make the roadway less safe, contribute to emissions, worsen traffic, and destroy some natural areas. Some suggested that there should be a road diet with improved bicycle and pedestrian infrastructure instead.

STRINGFELLOW ROADWAY IMPROVEMENTS

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
Stringfellow Roadway Improvements	0	0	1	0	4	0	5

Sentiment Analysis and Identified Themes:

This project received strong native sentiment, with only 1 neutral comment. There is concern that the widening project will only induce automobile demand. Others noted that the project does not align with TPB's policy framework and question whether the current traffic levels warrant the roadway projects. There were suggestions that transit access be improved and a road diet be implemented.

VRE SERVICE IMPROVEMENTS (REDUCE HEADWAYS)

Project	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	No Response	Total
VRE Service Improvements (Reduce Headways)	4	0	1	0	0	0	5

Sentiment Analysis and Identified Themes:

This project received strong positive sentiment, with only 1 neutral comment. There is enthusiasm for making VRE more reliable and viable for users. There is also enthusiasm for the project's potential to get cars off the road.

SUMMARY TABLE OF PROJECTS SELECTED FOR ANALYSIS AND NUMBER OF COMMENTS RECEIVED

APPENDIX A. ALL COMMENTS RECEIVED FROM FEBRUARY 15 – NOVEMBER 30, 2023

The comments outlined below were received from the Visualize 2050 Initial Project List Feedback Form (<https://www.surveymonkey.com/r/Viz2050Update>) from February 15 – November 30, 2023. TPB staff has organized the original responses to the feedback form by state. Comments were reported monthly at the TPB Technical Committee and TPB meetings.

In addition to comments on projects undergoing re-evaluation, comments were also received on suggestions for projects that should be considered for the plan. There were 10 project suggestions for DC, 40 for MD, and 43 for VA. The tables below provide the project comments and project suggestions by state.

Table 1. District of Columbia Project Comments	17
Table 2. District of Columbia Project Suggestions	32
Table 3. Maryland Project Comments	33
Table 4. Maryland Project Suggestions	118
Table 5. Virginia Project Comment	123
Table 6. Virginia Project Suggestions	242

Table 1. District of Columbia Project Comments

Date	Project	How did you learn about this project?	I support this project's inclusion in Visualize 2050?	Explain why you support/do not support the project's inclusion in the Visualize 2050. You can also share other comments about the project's inclusion in the plan.	Name
2/28/2023	Union Station to Georgetown Streetcar Line	Project webpage	Neutral		
3/22/2023	Union Station to Georgetown Streetcar Line	Project webpage	Strongly agree		Mark Scheufler
4/13/2023	District-wide Bicycle and Pedestrian Management Program	Project webpage	Strongly disagree	the existing bike lanes have constrained and restricted traffic flow. This program does not increase traffic throughput, it in fact impedes it. Secondly, because the bike lanes are both on the right hand side of the road and the fact that it is slowing traffic has increased the danger to both bike riders, pedestrians, and drivers by forcing the drivers to make a right hand turn from the middle lane.	
4/13/2023	Union Station to Georgetown	Project webpage	Strongly disagree	Given the constraints to traffic from the bike lanes, further impeding traffic in a high traffic area by taking away lanes for a street car makes no sense.	

	Streetcar Line			If the bike lanes go away, then and only then, does it make sense to remove another lane for street cars.	
5/2/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	The current streetcar route does not provide significant transit benefits because the route is too short to connect many destinations on a trip. The extension west (together with the currently planned extension east to Benning Road) has the potential to fill a significant transportation gap and should be used together with mixed-use development along the corridor to create an excellent east-west corridor for DC. There would be significant equity benefits by connecting east of the river neighborhoods with downtown DC, and there is potential to facilitate tourism as the Streetcar could support trips taken from Georgetown or the white house area to reach difficult-to-reach areas like H Street Corridor or the Anacostia River.	Eric Englin
5/31/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree		
5/31/2023	Union Station to Georgetown Streetcar Line		Strongly agree		

6/14/2023	District-wide Bicycle and Pedestrian Management Program	News/media	Strongly agree		
6/14/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	Good east west transit is essential to DC, and therefore I strongly support the Georgetown to Union Station streetcar project	
6/14/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	News/media	Strongly agree	Protected bike lanes are important to encourage safe cycling, I strongly support this project so that cyclists will be protected from vehicle traffic on Pennsylvania Ave.	
6/14/2023	District-wide Bicycle and Pedestrian Management Program	Friend/colleague	Strongly agree	nowhere near ambitious enough. our planet is literally on fire	Karthik Balasubramanian
6/14/2023	East Capitol Street Corridor Mobility & Safety Plan	News/media	Strongly disagree	engineers unjustifiably dropped protected bike lanes. cowards	Karthik Balasubramanian
6/14/2023	C Street NE Implementation	Neighborhood/civic association	Strongly agree		Karthik Balasubramanian

6/14/2023	South Capitol Street Corridor	Neighborhood/civic association	Strongly agree		
6/14/2023	District-wide Bicycle and Pedestrian Management Program	Advocacy organization	Strongly agree	We need to provide alternatives to cars and that includes making our streets more friendly & safe for pedestrians, bikers & mass transit and less inviting for cars.	
6/14/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	A high frequency Streetcar is necessary for providing better transit connections to locations currently served by bus. Along K and M streets. Since direct Metro service between the two high volume destinations of Union Station and Gtown is not provided, a streetcar line with frequent service would provide a better and more reliable connection. It is important, however, that the streetcar operate in a dedicated transit way, and not in mixed traffic, given congestion along the route. It's also important that service be frequent - at least every 10 minutes, otherwise ridership will be lower than expected. People in DC just don't have the luxury of scheduling their lives around when transit will arrive. Time is money.	Paul Brown
6/14/2023	South Capitol Street Corridor	Advocacy organization	Strongly disagree	Given commitments in various planning documents to combat climate change and encourage more environmentally sustainable development patterns and transportation, we should not pursue roadway widening projects unless it is to incorporate high capacity transit. Please include high capacity transit in this project to encourage transit and make it competitive to the automobile in this corridor.	

6/14/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Advocacy organization	Agree	DC needs more high capacity transit/Bus Rapid Transit lanes to promote alternatives to the automobile and reduce congestion. Besides K st, Pennsylvania Ave is a perfect candidate as it has the space for dedicated bus lanes. Please incorporate bus lanes into the design.	
6/14/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	An east-west high capacity transit option is critical to reducing congestion downtown and promoting environmentally sustainable transportation. Please get this project finally off the ground and also consider further extensions to Rosslyn/up Wisconsin Ave.	
6/14/2023	Union Station to Georgetown Streetcar Line	Friend/colleague	Strongly agree	Alternative methods to driving are great! This will help relieve congestion, help people get to where they need faster, and reduce pollution since there are fewer drivers.	Andy
6/14/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	Alternatives to driving are great. This will reduce congestion, reliance on cars and create safer roads.	
6/14/2023	Union Station to Georgetown Streetcar Line	Project webpage	Strongly agree	Building alternatives to driving are great, especially in the city.	
6/14/2023	District-wide Bicycle and Pedestrian	Neighborhood/civic association	Strongly agree	agree 100% with any and all District bicycle and pedestrian management plans. This city MUST slow down in vehicular traffic	

	Management Program				
6/14/2023	District-wide Bicycle and Pedestrian Management Program	Neighborhood/civic association	Strongly disagree	Enduring the devastation of my local shopping center, 17th st., due to the unnecessary and unused so-called "protected" bike lanes. I, a life-long cyclist, have given up riding in the city. The so-called bike lanes are jammed with delivery trucks (or even police cruisers), forcing me into hostile traffic—already furious at the loss of a lane.	Suzanne Legault
6/15/2023	Benning Rd Bridges and Transportation Improvements	News/media	Strongly agree		
6/15/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree	This is an important project to improve mobility and safety and advance the region's climate and air pollution goals.	
6/15/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree		
6/15/2023	Union Station to Georgetown Streetcar Line		Disagree	Enhancing transit between Georgetown and Union station along K Street sounds great, but I question the cost of a light-rail line compared to dedicated bus lanes. A busway could be well designed and could also ideally enable express buses from I-66 to have direct access to stops in DC without a transfer,	

				which could help to address the Rosslyn station bottleneck on Metro and could function as an Orange/Silver line express from stations like Vienna and Reston or West Falls Church into DC.	
6/17/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	Streetcars are great, I love streetcars. Also this would connect me with my office and I would use it 6 times per week	
6/23/2023	District-wide Bicycle and Pedestrian Management Program	Advocacy organization	Strongly agree	More bikes is critical to our transportation future.	Kevin O'Brien
6/23/2023	District-wide Bicycle and Pedestrian Management Program	Advocacy organization	Strongly agree	DC is making progress on Bike and Pedestrian issues but needs to do more.	
6/23/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	We need more public transportation in DC and I strongly support building more streetcar lines, specifically extending the H Street line via Union Station to Georgetown utilizing K Street. And please let's not wait until 2050 - how about doing this by 2030?	
6/23/2023	District-wide Bicycle and Pedestrian Management Program	News/media	Strongly agree	I strongly support streetscape improvements to Connecticut Avenue - please re-make Connecticut Avenue into a complete street with improved pedestrian crossings, bus stops and protected bike	

				lanes so it is an Avenue for DC residents and not one designed around the needs to MD Commuters.	
6/23/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	News/media	Strongly agree	I strongly support extending the PA Ave protected bike lanes to Georgetown and by 2025 not 2030.	
6/23/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	Please include the Glen Echo Trolley Trail in your 2050 plans for a rail to trails conversion to add a multi-use trail for pedestrian and bicyclists.	
6/27/2023	District-wide Bicycle and Pedestrian Management Program	Advocacy organization	Strongly agree		
6/27/2023	South Capitol Street Trail		Strongly agree		
6/27/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree	Please! We need more bike and ped infrastructure	
6/27/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree	We need more miles of streetcar!!	Jason Schwartz

6/27/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree		
6/27/2023	Benning Rd Bridges and Transportation Improvements		Strongly agree		
6/27/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree		
6/27/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Advocacy organization	Strongly agree	Protected bike lanes make conditions safer for all road users	
6/27/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	Streetcars are more efficient than cars, and we should be taking space from cars anyway	
6/27/2023	Florida Ave NE Streetscape	News/media	Strongly agree	Taking space from cars and giving it to bike lanes and sidewalks is good policy!	

6/27/2023	District-wide Bicycle and Pedestrian Management Program		Strongly agree		
6/30/2023	District-wide Bicycle and Pedestrian Management Program (Vision Zero high-injury network and intersection projects)	Friend/colleague	Agree	Cars and trucks are getting heavier either because people purchase larger ICE vehicles or because EV batteries are inherently heavy. Heavier vehicles cause more damage in accidents. So providing bikers and pedestrians super safe lanes for walking and biking (which is the essence of Vision Zero) will reduce injuries and death.	
7/5/2023	Pennsylvania Avenue NW Protected Bicycle Lanes (Bus Priority Program improvements (multiple corridors))		Strongly agree		
7/14/2023	Benning Rd Bridges and Transportation Improvements	News/media	Strongly agree	The streetcar would be much more useful if it were longer and connected more residents.	Luke Mueller-Oden

7/14/2023	District-wide Bicycle and Pedestrian Management Program	Project webpage	Strongly agree	I would like to bike to work but it doesn't feel safe since there aren't any protected bike lanes connecting me to the office. I'm sure many others feel the same and would like to see infrastructure improvements	Luke Mueller-Oden
7/14/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Project webpage	Agree	Building protected bike lanes on the major avenues is key to connecting the city for cycling. Although I do wonder why Pennsylvania ave was chosen rather than Massachusetts ave, which could potentially be longer and connect to more existing bike infrastructure	Luke Mueller-Oden
7/14/2023	Pennsylvania Avenue SE	Project webpage	Strongly agree	This is a great project which would connect many DC neighborhoods and centers of employment by bike!	Luke Mueller-Oden
7/15/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Friend/colleague	Strongly agree	The proposed plan will improve bicycle and pedestrian infrastructure, as well as the streetscape, in an unattractive and hostile area of downtown. It will put underutilized capacity to more effective use and improve safety and the street use experience for cyclists, pedestrians, and transit users.	
7/29/2023	District-wide Bicycle and Pedestrian Management Program	Project webpage	Strongly agree	These improvements are regionally significant. Other jurisdictions should also package and submit for inclusion in Visualize 2050 the many identified local unmet needs for safe street improvements for walking, biking, and transit access. Visualize 2045, by excluding many of these small projects, undervalues the benefits of these transit-oriented community investments which provide regional benefits by reducing driving demand and shifting more trips to walking, biking and transit. These packages deserve to be in the Visualize 2050	Bill Pugh, Coalition for Smarter Growth

				constrained element, as they are needed to achieve regional safety goals and adopted TPB priorities.	
7/29/2023	South Capitol Street Trail		Strongly agree		Bill Pugh, Coalition for Smarter Growth
7/29/2023	East Capitol Street Corridor Mobility & Safety Plan	Project webpage	Agree		Bill Pugh, Coalition for Smarter Growth
8/31/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	Streetcars need to be expanded to other destinations to meet climate goals, reduce traffic and help lower income individuals, while supporting more density.	Adnan Masri
9/6/2023	Union Station to Georgetown Streetcar Line	Advocacy organization	Strongly agree	Build it immediately	Mostafa Elnahass
9/13/2023	Benning Rd Bridges and Transportation Improvements	Advocacy organization	Neutral	Road diet for all the roads around it	Mostafa Elnahass
9/15/2023	South Capitol Street Trail	Advocacy organization	Strongly agree		Mostafa Elnahass
9/15/2023	District-wide Bicycle and Pedestrian	Advocacy organization	Strongly agree		Mostafa Elnahass

	Management Program				
9/16/2023	Pennsylvania Avenue SE	Advocacy organization	Neutral	Pennsylvania ave should undergo a road diet	Mostafa ElNahass
9/16/2023	South Capitol Street Corridor	Advocacy organization	Neutral	South Capitol Street should undergo a road diet with protected bicycle lanes implementation	Mostafa ElNahass
9/16/2023	C Street NE Implementation	Advocacy organization	Strongly disagree	Road diet and pedestrian, cycling improvements	Mostafa ELNahass
9/16/2023	Florida Ave NE Streetscape		Neutral		
9/22/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Friend/colleague	Strongly agree	ldk	
9/25/2023	District-wide Bicycle and Pedestrian Management Program	Project webpage	Strongly agree	The area has neglected alternatives to car transportation for decades and more should be allocated to bring the other options up to competitive, if not preferred, options. Everyone that drives a car is outside of the car at least some of the time. People outside of cars should be the priority and cars accommodated later instead of the other way around.	David Duffy
9/25/2023	Pennsylvania Avenue NW Protected	Project webpage	Strongly agree	Protected bike lanes are the single best thing that can be done to encourage modal shift. The streets as they are are exceedingly hostile and dangerous to be on a bike. Giving physical separation from	David Duffy

	Bicycle Lanes			dangerous cars has been shown to increase usage of bike lanes by 70% (https://nitc.trec.pdx.edu/news/research-reveals-perceptions-safety-and-use-protected-bike-lanes).	
9/25/2023	South Capitol Street Trail	Project webpage	Strongly agree	DC is the only local jurisdiction serious about alternative modes of transportation and deserve the money to make it happen.	David Duffy
9/25/2023	East Capitol Street Corridor Mobility & Safety Plan		Neutral	To the extent this project prioritizes pedestrians and cyclists, I support it.	David Duffy
10/2/2023	District-wide Bicycle and Pedestrian Management Program	Advocacy organization	Strongly agree	I support this program because it reduces carbon emissions, creates safer conditions for vulnerable road users, and supports a more vibrant, people-friendly district. The Vision Zero initiative should be at the forefront of all traffic-based projects within the district. Let's make safer, more accessible, and greener traffic solutions.	
10/2/2023	Union Station to Georgetown Streetcar Line	News/media	Strongly agree		Rebekah King
10/18/2023	Union Station to Georgetown Streetcar Line	Project webpage	Strongly agree		

10/18/2023	Pennsylvania Avenue NW Protected Bicycle Lanes	Advocacy organization	Strongly agree		
10/19/2023	C Street NE Implementation	Friend/colleague	Strongly agree	sfddf	Laeq Ahmed
10/19/2023	East Capitol Street Corridor Mobility & Safety Plan	Neighborhood/civic association	Strongly agree	aSAsaSAsASAsasASasasasa	Laeq Ahmed
11/29/2023	District-wide Bicycle and Pedestrian Management Program	Friend/colleague	Agree	Needed to improve flow of vehicles and to manage bike/ped/vehicle interactions	

Table 2. District of Columbia Project Suggestions

Date	Do you have any suggested projects that should be considered for the long-range transportation plan (Visualize 2050)?	Name
5/2/2023	Visualize 2050 should consider the wider Streetcar plan that DC had developed and evaluate the potential costs/benefits in relation to other transit or road projects. Ideally, this could also take into account potential economic development that takes place when infrastructure is put into a fixed place, rather than a bus route that could move with relatively little notice.	Eric Englin
6/14/2023	Bus lanes on every arterial road in DC.	Karthik Balasubramanian
6/14/2023	Whatever is done to K St, it should not include bicycle lanes. What should be promoted are dedicated bus lanes, with strict enforcement, such as have be implemented in NYC on 14th St.	Suzanne Legault
6/18/2023	Bus Priority Program improvements (multiple corridors) Washington Union Station Expansion Project Vision Zero high-injury network and intersection projects, with accelerated implementation	Brian Lutenegger
6/25/2023	Washington Union Station Expansion Project	David Yaffe
6/30/2023	Vision Zero high-injury network and intersection projects, with accelerated implementation – see earlier comments re this projects included under DC bicycle and pedestrian management program	
7/14/2023	The Washington Union Station Expansion Project should be included, as should the Blue line loop metro expansion. There should also be a commitment to build protected bike lanes along every major avenue in DC, along with commensurate infrastructure connecting them at the circles where the avenues meet.	Luke Mueller-Oden
7/29/2023	Bus Priority Program improvements (multiple corridors) - these are regionally significant, very beneficial projects that support TPB's policy framework and should be included in Visualize 2050	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Washington Union Station Expansion Project	Bill Pugh, Coalition for Smarter Growth
9/15/2023	395, 295, 695 highway removal	Mostafa ElNahass

Table 3. Maryland Project Comments

Date	Project	How did you learn about this project?	I support this project's inclusion in Visualize 2050?	Explain why you support/do not support the project's inclusion in the Visualize 2050. You can also share other comments about the project's inclusion in the plan.	Name
3/13/2023	I-270"	Advocacy organization	Disagree	Any highway widening project 1) will induce MORE driving, not less, adding more pollution to the air, and 2) is a missed opportunity to invest in better bus rapid transit, light rail, or heavy rail. If so many people are using these highways and getting stuck in traffic it's a sign to "upgrade" to a higher-capacity system like buses or rail. Please apply my comment to any and all proposed highway widening projects in Maryland.	
3/13/2023	MARC Improvements	Advocacy organization	Strongly agree	We NEED to prioritize better rail infrastructure. Electrification; greater service frequency; and better connections to other public transit systems must be top of the list and should be prioritized above ANY highway-widening projects to meet our climate goals and protect the environment for our children.	
3/17/2023	MD 28/MD 198 Corridor Study, Potomac River Bridge to Loudon County Connecting MD-28 Into Dulles, VA	Friend/colleague, Lived EXPERIENCE	Strongly agree	We badly need another Potomac River crossing connecting Montgomery County, MD and Loudon County, VA. For security, faster transport, better economics, and so much more.	Greg Visscher

3/18/2023	Op Lanes Maryland Phase 1	News/media, It impacts an organization I'm affiliated with	Strongly disagree	It will damage the environment, worsen climate change, will only benefit the wealthy and the developers, widening roads doesn't reduce traffic and the American Legion Bridge is structurally sound and just needs re-decking	Nancy Soreng
3/18/2023	Brunswick Line	Advocacy organization	Strongly agree	Expanding more frequent trains would take pressure off I 270 and be better for the environment	Nancy Soreng
3/20/2023	Montrose Parkway	Neighborhood/civic association	Neutral	The verbal description of the project and previous information I received described this as a NEW road. But the map included with the description shows just the segment crossing the railroad tracks. I SUPPORT re-routing the road above the railroad tracks. That crossing is extremely dangerous and I currently try to avoid it whenever possible.	Mary Stickles
3/20/2023	Veirs Mill Bus Rapid Transit	Neighborhood/civic association	Strongly agree	More and more reliable east-west transit routes are needed in the MD DC suburbs. Bus rapid transit seems to be the quickest and most cost effective option. I also support the pedestrian and bike improvements along that route.	Mary Stickles
3/20/2023	Brunswick Line	Project webpage	Strongly agree	We need more and more dependable transit options in the MD DC suburbs. Brunswick line does not run frequently enough to be well used as it could be.	Mary Stickles

3/24/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association		<p>I submit this article from WAPO, in case you missed it. Good points. www.washingtonpost.com washingtonpost.com Opinion Maryland residents won when a toll-lane plan failed Mar. 21st, 2023 Kudos to the people of Maryland for getting Transurban to walk away. Its expensive, lopsided project would ultimately yield little to no benefit to Marylanders. I recently moved away from Northern Virginia, where traffic is seemingly as bad as it has ever been. A thoughtful, multifaceted plan that could include toll roads would prove far superior to the Transurban profit-oriented model, and it would be much less expensive to complete through traditional governmental project financing. Tolls would be lower, and the project would not come with revenue guarantees and noncompete clauses that come with many public-private partnership contracts. Virginia is locked into decades of such restrictions with Transurban, such as not being allowed to expand Metro's Orange Line for 10 years, little say over toll prices, and not being able to improve secondary roads to ease traffic without Transurban approval, plus state revenue subsidies if HOV riders are too numerous. This interferes with local governmental autonomy to provide for citizens and is contrary to the goals of an effective transportation program. I urge Marylanders to embrace this opportunity to build an effective plan for the new era. You have dodged a bullet; the real tragedy would be if Transurban returns. Robert McGary, Glen Allen, Va.</p>	Arlene Montemarano
3/26/2023	Op Lanes Maryland Phase 1 (Advocacy organization	Strongly disagree	<p>There are a multitude of reasons to remove this project. Here is another that should be taken seriously: Heat. In addition to the well-researched fact that induced car travel offsets the temporal traffic fluidity gained after</p>	Arlene Montemarano

	Creating more of a heat sink as the planet gets hotter.)			adding a new lane, there is the large amount of heat that additional pavement generates which is permanent, not temporal. That reality is explained by the fundamental thermal formula $Q = Mc\hat{T}$ where Q is the amount of heat released, M the mass (of a new lane in this case), c the specific heat of the material (concrete or asphalt in this case), and \hat{T} the temperature increase. Given the large M added with a miles-long new lane, a large amount of pavement heat (Q) will be generated when temperature increases (\hat{T}). With summers becoming hotter and hotter, there is nothing trivial about the additional heat that new pavement brings.	
4/15/2023	Op Lanes Maryland Phase 1	Multiple sources	Strongly disagree	This project is deeply concerning because of the climate impact it would have. It would also likely generate additional traffic overall and on other roads that do not have capacity to support them.	Kacy Kostiuk
4/15/2023	Governor Harry W. Nice/Senator Thomas "Mac" Middleton Bridge Replacement Project	Serving on the TPB previously	Strongly disagree	This project does not allow for bike lanes, which the TPB previously requested as part of the project. Although this project is now likely farther along in the process, I hope MDOT will reconsider options to support bike lanes on this project.	Kacy Kostiuk
4/15/2023	MARC Run-through	Project webpage	Strongly agree	Improved rail would be a great asset and a big improvement to allow for residents living further away from the region's center alternatives to driving	Kacy Kostiuk

	service to Virginia				
4/15/2023	MD 650 New Hampshire Avenue BRT	Neighborhood/civic association	Strongly agree	The New Hampshire Ave BRT project would be very beneficial to numerous neighborhoods and would improve connectivity with other high occupancy transit options (especially the Purple Line and the Red Line).	Kacy Kostiuk
5/30/2023	MARC Improvements	Friend/colleague	Strongly agree	I want to more easily travel to and within Maryland by rail. Driving a car is boring and dangerous (a deadly combination) . I am not getting any younger and don't want to become a shut-in in my home because I am no longer willing to drive a car.	Jonathan Krall
6/6/2023	Veirs Mill Bus Rapid Transit	Project webpage	Strongly agree	Veirs Mill is constantly crowded and jams the buses which have to share traffic with an onslaught of personal cars. A BRT system with an integrated protected bike path is necessary to improve the condition of the road between Wheaton and Rockville. Currently there is no clear or safe path for a bicyclist to take what should be a relatively easy bike ride between the two town centers, yet there is not. Plus, current bus stop along Veirs Mill are dangerous, many lack suncover or benches, and people who are not in personal vehicles are treated as second-class citizens in their own community. The status quo of unending crowded personal automobiles must change - a BRT route (or even better, trolleybus or a tram) and safe protected bicycle infrastructure is needed to alleviate this congestion and poor quality of living along Veirs Mill.	Adam Carlesco

6/13/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project should be eliminated as it doesn't coincide with the climate goals for pollution. No transit is included that should be a priority and not roads. All the construction pollution is not considered at all from air to water to hazardous waste, etc.	
6/14/2023	Brunswick Line	News/media	Strongly agree	All Marc lines, including the Brunswick line should have bidirectional and weekend service. I support expanded service on this line in the 2050 vision plan	
6/14/2023	Corridor Cities Transitway (CCT)	News/media	Strongly agree	Bus connections from Montgomery county to Frederick MD need to be bidirectional and all day, including weekends. Expanded public transit to Frederick should be a part of the 2059 vision plan	
6/14/2023	Bus Rapid Transit: US 29 - Phase 2	News/media	Strongly agree	Good Brt is important for this region- I support this project in the 2050 vision plan	
6/14/2023	MARC Improvements	News/media	Strongly agree	Marc all day, weekend, and bidirectional service on all lines is important door reducing car dependency in this region. I strongly support Marc service improvements on all lines.	
6/14/2023	MARC Run-through service to L'Enfant Plaza	News/media	Strongly agree		
6/14/2023	MARC Run-through service to Virginia	News/media	Strongly agree		

6/14/2023	MD 355 Bus Rapid Transit	News/media	Strongly agree		
6/14/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	News/media	Strongly agree		
6/14/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	News/media	Strongly agree		
6/14/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	News/media	Strongly agree		
6/14/2023	Veirs Mill Bus Rapid Transit	Project webpage	Strongly agree		
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern	George Hite

				Montgomery to address the E-W jobs imbalance, along with transit and telecommuting.	
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Ineffective to try to build out of congestion.	
6/14/2023	Bus Rapid Transit: US 29 - Phase 2	Advocacy organization	Strongly agree	Important improvement to reduce commuting along by auto	
6/14/2023	US 29 Corridor	Advocacy organization	Strongly disagree	Support TOD around BRT stations. Grade-separated intersections would undermine that possibility.	
6/14/2023	MD 28/MD 198 Corridor Study	Advocacy organization	Strongly disagree	This demand should be handled by the ICC.	
6/14/2023	Montrose Parkway	Advocacy organization	Strongly disagree	Don't further divide White Flint area.	
6/14/2023	Bus Rapid Transit: US 29 - Phase 2	News/media	Strongly agree	We need to move beyond excessive car use to help the environment and need improved buses for equity reasons. People should not be dependent on cars that create congestion, cause dangerous and fatal accidents, harm local air quality, worsen climate change, and are financially difficult or impossible for households.	Ethan Goffman
6/14/2023	MARC Improvements	News/media	Strongly agree	We need better train service and less car dependence to help the environment and those who cannot drive or cannot afford cars.	Ethan Goffman
6/14/2023	Brunswick Line	News/media	Strongly agree	We need greatly improved train service, not more sprawl.	Ethan Goffman

6/14/2023	Corridor Cities Transitway (CCT) (BRT network in Montgomery and Prince George's counties)	News/media	Strongly agree	We need a complete network of public transit that makes it possible for people to live conveniently without cars or for families to depend on only one car.	Ethan Goffman
6/14/2023	MARC Improvements	Advocacy organization	Agree	Encourage greater MARC usage	
6/14/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	Important opportunity to improve transit and land use in the 355 corridor	
6/14/2023	MD 650 New Hampshire Avenue BRT	Advocacy organization	Strongly agree	Need to provide better and more frequent bus service in the New Hampshire Ave corridor	
6/14/2023	Veirs Mill Bus Rapid Transit	Advocacy organization	Strongly agree	Dense corridor that could support higher transit usage with better service.	
6/14/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	Advocacy organization	Strongly agree	BRT is an efficient mode of transit.	

6/14/2023	Bus Rapid Transit: US 29 - Phase 2	Advocacy organization	Strongly agree	We need to make this project a reality sooner than later. We need to reduce vehicle miles traveled, and dedicating road space to high capacity vehicles, like buses and trains, does exactly that.	Jacob Allen Barker
6/14/2023	MARC Improvements	Advocacy organization	Strongly agree	All current MARC lines need to run all day bidirectionally. We need to make more places in the state accesible to those doing the most good to combat energy, climate, and environmental crises and find ways to move people without cars around out state.	Jacob Allen Barker
6/14/2023	MD 650 New Hampshire Avenue BRT	Advocacy organization	Strongly agree	We need to continue to redistribute road space to high capacity forms of transit to make those faster, more reliable, and equitable.	Jacob Allen Barker
6/14/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	We need to continue to redistribute road space to high capacity forms of transit to make those faster, more reliable, and equitable.	Jacob Allen Barker
6/14/2023	Corridor Cities Transitway (CCT)	Advocacy organization	Strongly agree	We need to continue to redistribute road space to high capacity forms of transit to make those faster, more reliable, and equitable.	Jacob Allen Barker
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The way to ease traffic in the region is through more affordable public transit, not more toll roads. I'm also concerned about this project's impact on homeowners, the environment, wildlife, and water and air quality.	Andrea Cimino
6/14/2023	Montrose Parkway	Neighborhood/civic association	Strongly disagree	I used to live near Montrose Parkway and still own a condo near it. The way to ease traffic in the White Flint area is through investing in needed local street network, protected bike lanes, and 355 BRT. I'm also concerned about this project's impact on homeowners, the environment, wildlife, and water and air quality. Some	Andrea Cimino

				bike lanes have already been built in this area (on Nebel St) and I'd love to see more, as I am a regular bike commuter.	
6/14/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	Like most Montgomery County residents, I spend a lot of time on Rt 355. I would be so much easier to travel the length of it with bus rapid transit. If you want to go from one end of Rt 355 to the other by bus, currently you have to take several buses. Metro is an option but bus is more affordable, especially during rush hour. I am in favor of bus rapid transit in this area and generally throughout the county because it will help low income people, people without cars, and the climate, and will reduce pollution.	Andrea Cimino
6/14/2023	Veirs Mill Bus Rapid Transit	Advocacy organization		This project will make it easier for me to travel by bus from the western side of the county to the eastern side. I am in favor of bus rapid transit in this area and generally throughout the county because it will help low income people, people without cars, the environment, and the climate.	Andrea Cimino
6/14/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Advocacy organization	Strongly agree	This project will make it easier for me to travel by bus from the western side of the county to the eastern side. I am in favor of bus rapid transit in this area and generally throughout the county because it will help low income people, people without cars, the environment, and the climate.	Andrea Cimino
6/14/2023	Bus Rapid Transit: US 29 - Phase 2	Advocacy organization	Strongly agree	This project will give a better option to travel by bus north and south on the eastern side of the county. Bus rapid transit can help low-income people, people without cars, the environment, and the climate.	Andrea Cimino

6/14/2023	I-270 Innovative Congestion Management (Project to add toll lanes on interstates 270 and 495 between the American Legion Bridge and Frederick, MD)	News/media	Strongly disagree	Funding used for toll lanes to run alongside non-toll highways, is not doing anything to help reduce the carbon footprint, while only helping those who can afford to drive on toll lanes, and helping the corporate oligarchs who build them, and earn revenue from the tolls. And these toll lanes are way underutilized, making their construction a totally wasteful use of resources and taxpayer money. Anyone who drives on the NOVA portion of the I-495 beltway that has toll roads, knows exactly what I'm talking about - even during rush hour, the toll lanes are hardly used, while the regular lanes are packed, business as usual. Funding toll lanes to run alongside non-toll highways, is robbing the lower class taxpayers to fund welfare for the rich. If taxpayer money is used to fund highway construction, it should ONLY be for HOV lanes, which will actually help reduce the carbon footprint, a dire necessity. And, it will also help ease congestion. An even better alternative is to fund mass transit lanes - either rail or bus, or both. And, HOV lanes should be segregated - The overwhelming majority of drivers on the present I-270 HOV lanes are without any passengers in their vehicles.	Douglas Sedon
6/14/2023	MD 355 Bus Rapid Transit	News/media	Strongly agree	Bus Rapid Transit on the MD 355 corridor is an important complement to the Metro Red Line, both in terms of going beyond Shady Grove but also enabling connections to and from the Metro along MD 255. Given long distance between some Red Line stations, BRT is crucial to such locations not near stations, as Montgomery College, residents near Pooks Hill, Pike & Rose, residents in Chevy Chase. The BRT should extent to terminate at a reconfigured Friendship Heights transit center, with the curb lane along Wisconsin freed up for use by the BRT.	Paul Brown

6/14/2023	Camden Line	Advocacy organization	Strongly agree	More frequent bidirectional MARC service on the Camden line (and also Brunswick line) will help transition these commuter lines into more like regular transit lines, providing real transit options that don't exist now. Ideally, both lines would be electrified to allow for EMU (electric multiple unit) train service rather than the current loco-pulled diesel trains.	Paul Brown
6/14/2023	MARC Run-through service to Virginia	News/media	Strongly agree	Integrating commuter rail service to allow riders to travel to non-downtown destinations without transferring at Union station is key to making transit more competitive with the automobile. Please include this and other rail/BRT projects in the constrained visualize 2050 project list.	
6/14/2023	Brunswick Line (Direct rail service to BWI)		Strongly agree	Please provide direct rail service to BWI, which is now the last airport without rail connection to DC. This can either be MARC or metro rail extension.	
6/14/2023	Brunswick Line (Would like to see excursion trains to Harper's Ferry with ADA accessible at HF, also extend MARC to Oakland Maryland on	News/media	Strongly agree	I support the Brunswick train as it takes cars and drivers off the road as too tolerant of aggressive drivers	Steve Warner

	account of ski resorts)				
6/14/2023	MARC Improvements (Improving MARC service all day v h in both directions to Hagerstown, Cumberland and Oakland)	News/media	Strongly agree	I again believe rail is better than highway construction	Steve Warner
6/14/2023	MD 97 at MD 28 Interchange	News/media	Agree	Several historical buildings should not be sacrificed for stupid car traffic	Steve Warner
6/14/2023	Presidential Parkway	Advocacy organization	Strongly disagree	Multiple planning documents, combatting climate change, and building humane-focused live-able cities, all call for discouraging sprawl and auto-centric roadways. We should be promoting transit which is a mode that all can use, not just driving, which only the able-bodied who can afford cars can use. Widening and building new roadways should not be added to Visualize 2050 and replaced by public transit projects instead.	
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This should be removed. This plan would leave most people stuck in traffic or having to pay very high tolls. There should be constructions of alternative methods of people getting around instead (bike lanes, trams, etc).	

6/14/2023	I-270 Innovative Congestion Management	News/media	Strongly disagree	Nothing should be done to I270 that will enable more vehicles. More vehicles will cause more air, noise, and water pollution in the immediate and wider areas, which will negatively impact the health of people of all ages. Traffic can be addressed by encouraging work-at-home policies, I270 lanes dedicated to public transit electric vehicles, and better public transportation throughout the area. The goal should be to have most I270 use be by public transit vehicles, service vehicles, and local cargo delivery (long distance delivery should be by train, not truck or plane), by 2050.	Roselie Bright
6/14/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Although I support renovating the bridge over the Potomac for structural integrity, I oppose all efforts to install toll lanes, add lanes, or use the public-private partnership for any part of the project. Additional vehicle capacity will only increase traffic in a few years and encourage further degradation of our air, water, and ambient noise, all of which will hurt the health of people who live in and travel through the area. Better ways to address congestion include work-from-home policies, one or more lanes dedicated to public transit buses, and wider, attractive, and useful public transportation. The goal for 2050 should be that most users of I495/I270 are buses, service vehicles, and local cargo trucks (long distance cargo transportation should be by rail, not trucks or planes). The P3 partnership idea should be scrapped because it put all risks of the project on taxpayers and all benefits on the private company, and locked Maryland into the deal for decades.	Roselie Bright
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine	Nic Kotschoubey

				more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting	
6/14/2023	US 29 Corridor	Advocacy organization	Strongly disagree	US 29 Corridor – the proposed \$7 Billion series of grade-separated interchanges would undermine efforts to create walkable neighborhood hubs around FLASH bus rapid transit stops	Nic Kotschoubey
6/14/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Harms neighborhoods, parks, streams, tree cover. High tolls are regressive. We need transit-oriented development instead	
6/15/2023	MARC Run-through service to Virginia	News/media	Strongly agree	This kind of reform is the minimum requirement for bringing passenger rail service up to global standards	
6/15/2023	I-270" (MD OP Lanes Phase 1)	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls	Robin Gross
6/15/2023	Op Lanes Maryland Phase 1	News/media	Strongly agree	The American Legion Bridge is one of the worst traffic bottlenecks in the region. The addition of Express Lanes across the bridge and I-495 will help relieve this huge bottleneck, enable fast and reliable express bus service, and HOV-3 free will incentivize people to carpool. This project has been studied extensively and is by far the best solution with tolls paying for the new capacity and providing huge opportunities for transit that currently is not viable between Maryland and Virginia. I used to live in Maryland and commute to Northern Virginia (what could be a 20-minute commute from Bethesda but traffic would regularly take 45+ minutes each way). I	

				wound up moving to Virginia so Maryland lost my tax revenue. I cannot understand why Montgomery County leaders oppose this project. With all the job growth in Northern VA, this project will greatly improve access to jobs, take through traffic off roads like Seven Locks Road, enable new transit options, likely strengthen the economy in Bethesda/Rockville, and support equity through new transit access for those who do not have a car or cannot afford driving.	
6/15/2023	MARC Run-through service to Virginia	News/media	Agree	It would be great to have direct access by rail between Maryland and Northern Virginia, particularly with all of the new job growth in Crystal City.	
6/15/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	News/media	Agree	This project would provide important transit access between the Montgomery Mall area and the Red line on Metro, which should help enhance the vitality of the mall area and Rock Spring Park.	
6/15/2023	US 1 Corridor		Agree	Route 1 is somewhat ugly and this could be a nicer gateway to College Park.	
6/16/2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly agree	I-270 ICM is very successful on lower I-270. It is urgently needed for upper 270. ICM has made a difference. Please extend its scope. Thank you.	Andrew Gallant
6/16/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	I oppose tolls in this corridor. I oppose the disastrous assumptions on which OpLanes is based. The project cannot be saved. It endangers the environment and Maryland finances. Even worse, it does not solve the congestion problem. Please kill this project and look at	Andrew Gallant

				the whole set of issues with fresh eyes. There is no silver bullet. Thank you.	
6/16/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting	
6/16/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	The stated objective of reducing congestion is totally illogical because the project requires congestion in the free lanes to induce use of the toll lanes. Even if, on average, congestion was reduced, there are no average drivers – only those who have the money to pay and those who don't. So much for equity! Ironically, Transurban used photos of the toll lanes in Virginia in their marketing materials. The photos show congestion in the free lanes and practically empty toll lanes. This is hardly evidence that the toll lanes are successful in reducing congestion. Does it also mean that the tolls are already too high? The project also would create new bottlenecks to promote future toll-lane expansion – specifically by extending toll lanes to the 495 Beltway from Bethesda eastward. As a long-time resident of the Indian Spring neighborhood in Silver Spring, this is the area where I am most familiar with the project's environmental and community damage. In its path are Rock Creek, our YMCA, community association building and park, the Blair High School athletic fields, and the new wing of Holy Cross Hospital – just to name a few threatened community resources. When attempting to sell the project several years ago, the MDOT produced a	

				map that minimized the impact on houses near the Beltway, of which there are many. The map was presented in the absence of any formal design for the construction of the project, and there is little reason to believe that the map bears any resemblance to reality. At the time, ideas being floated as ways to “minimize” the damage included building the toll lanes above the existing lanes or tunnelling. Flyway lanes in Dallas were used as an example. It is an insult to even average intelligence to suggest that options of this type would NOT cause major damage. The delays and cost overruns incurred on the Purple Line project do not inspire any confidence in the MDOT’s competence or credibility. The most recent delays reportedly result from a failure to account for necessary movement of utility lines. How is it that such an important element of the Purple Line’s construction was not recognized and accounted for at the outset?	
6/18/2023	Veirs Mill Bus Rapid Transit	News/media	Strongly agree	This plan has the capability of significantly reducing car traffic along Viers Mill Road.	
6/18/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. The proponents failed to examine more effective alternatives that begin with transit-oriented development in Prince George’s and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting,	Brian Lutenegeger
6/19/2023	US 29 Corridor	Advocacy organization	Strongly disagree	More investment in 29 road would undermine efforts to create walkable neighborhood hubs around FLASH bus	Alex Demarais

				rapid transit stops. The money should be spent upgrading the BRT.	
6/19/2023	Op Lanes Maryland Phase 1		Strongly disagree	This project will be terrible for the environment, people, and traffic. It will induce demand and increase greenhouse gas emissions. It is shameful that a 1950s project like this is being entertained in the year 2023.	
6/19/2023	Montrose Parkway		Strongly disagree	This proposed 4-lane road would further divide White Flint. Instead fund needed local street network, protected bike lanes, and 355 BRT.	
6/19/2023	US 29 Corridor		Strongly disagree	This project would undermine efforts to create walkable neighborhood hubs around FLASH bus rapid transit stops. East County needs to become a network of walkable, transit-oriented communities, not a further mess of highways.	
6/19/2023	Veirs Mill Bus Rapid Transit		Strongly agree	This project is critical to serving one of the state's highest ridership bus routes.	
6/19/2023	Bus Rapid Transit: US 29 - Phase 2		Strongly agree	This project is critical to achieving success in BRT in MoCo.	
6/23/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Expanding I-495 and I-270 will private toll lanes will not address congestion but will simply shift bottlenecks to different parts of the region. It will have devastating impacts on our natural resources and communities and exacerbate air and climate change pollution. Please remove this project from the long range plan.	
6/23/2023	MARC Improvements	News/media	Strongly agree	Making MARC more attractive is a massively important step towards reducing emissions from automobiles.	Thomas G Zeller

6/23/2023	I-270"	Neighborhood/civic association	Strongly disagree	commuting traffic can be met by other traffic calming measures. The environmental degradation is not worth the limited benefit.	Elliott Levine
6/23/2023	Montrose Parkway	Advocacy organization	Strongly disagree	Montrose Rd and Parkway borders a number of communities. Traffic coming off of I270 is already driving at 60 MPH! It would be deadly for bicycle riders and pedestrians to cross the road without taking your life in your hands.	Elliott Levine
6/23/2023	Op Lanes Maryland Phase 1	Advocacy organization (News/WaPo)	Strongly disagree	For the sake of our children, grandchildren, and great grandchildren, we must move away from automotive transportation and for-profit road building.	Hal Ginsberg
6/23/2023	I-270"	Advocacy organization (Washington Post)	Strongly disagree	No more road expansion. Our focus should be on clean green energy/public transit.	Hal Ginsberg
6/24/2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly disagree	I oppose this plan because it centers around building more road capacity, rather than reducing the need for driving through transit and other enhancements. More driving will quickly use up the increase road capacity and cause more air pollution and emit more greenhouse gases.	
6/24/2023	Op Lanes Maryland Phase 1	Project webpage	Strongly disagree	a very large amount of money on a unneeded project that will cause much harm to the environment and provide little return on investment and be limited to those with the money to pay the tolls	Bob R
6/24/2023	Brunswick Line	historical knowledge of line	Strongly agree	this is actually far less than the true need. this route is a major corridor for freight and passengers have suffered from lack of service due to this overuse of this limited rail line. it desperately needs significant up grading,	Bob R

6/25/2023	MARC Improvements	News/media	Agree	marc and amtrak upgrades are both needed to improve service and reliability on the widely used railway, maglev should NOT be supported, use maglev funds for marc and amtrak	
6/25/2023	Brunswick Line	News/media	Agree	our local railways need maintenance and updates to better serve users	
6/25/2023	I-270"	News/media	Strongly disagree	i have serious environmental concerns regarding this project, we can not continue to strip our land bare of trees and plants that help protect us from the sun, retain water, and counteract global warming	
6/25/2023	MARC Improvements	News/media	Strongly agree	marc and amtrak both need maintenance and upgrades to provide more reliable and improved service on our widely used railways, maglev should NOT be funded, use maglev funds to help marc and amtrak	
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association (I live next to I-170 in Rockville, MD.)	Strongly disagree	The proposed plan has too many negative impacts.	
6/25/2023	Op Lanes Maryland Phase 1	News/media		Does not stand up to scrutiny vis a vis equity, sustainability, environmental protection and environmental justice	
6/25/2023	I-270"	News/media	Strongly disagree	Environmental	
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Environmental concerns are my biggest concern. More pavement is not the answer. Other major cities have found unique ways to handle traffic. The benefits are only for the toll company and the wealthy as I do not	

				believe the tolls lanes will alleviate congestion in the free ones. Too many issues not addressed in the plan.	
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The Hogan administration talked about balanced transportation when transit capacity to Frederick was measured in the hundreds and highway capacity in the tens of thousands. They proposed to address this 'balance' by adding yet more lanes, a 'pave the earth' approach. Not one more penny on highways until true balance is achieved.	
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Disagree		
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	toll lanes will only add to congestion and no one will pay the tolls	
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Research shows that any improvements in congestion from adding more lanes are temporary don't address underlying issues. The environmental implications and inequities that will be perpetuated by this project also make this project a non-starter.	
6/25/2023	I-270 Innovative Congestion Management	News/media	Strongly agree	Maryland's Legion Bridge and I270 are solvable bottlenecks if proposed expansions are approved. I live in Rockville and traveling north to Frederick is a slow and dangerous ride. Going from 6 lanes where I live down to two is just wrong for such a busy corridor. Our neighbors in VA are doing an excellent job in widening their portions of the beltway and 95. Maryland's roads are third rate. Those who complain about added pollution and environmental issues are the same folks who opposed I200 for decades. And they have been proven totally wrong as 200 is a blessing for pulling	Brad Botwin

				traffic off 95 and the beltway. Please start the work to widen the Legion bridge and 270 to Frederick! Thank you.	
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	This is a project that defies the urgent need to address climate change, water pollution, and area mobility. The current segment of the larger, super destructive and ineffective project, would result in such bottlenecks that the entire project would become inevitable. Our recent experience with COVID also indicates we need all the parks we can get. Aside from destroying natural areas, the project would also harm neighborhoods and leave most people stuck in traffic or having to pay very high tolls. The purpose and need statement simply defined away alternatives to roadways, yet that is how we best address our crisis: reducing the need to travel by better development patterns, and then by greatly increasing BRT and MARC service. BRT service needs to be a network, not just a couple of isolated lines.	Anne Ambler
6/25/2023	Op Lanes Maryland Phase 1		Strongly disagree	The proposed toll lanes will only make traffic worse and will mostly benefit private contractors. Please focus instead on removing potholes and maintaining safe roads and bridges on I-270.	Mark Laubach
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	More lanes on 270 will only contribute more crowded traffic and will quickly have no use. If you build it, more cars will come. How about alternatives like high-speed buses. There are many good suggestions online from concerned citizens and organizations. See https://arstechnica.com/cars/2021/08/please-stop-adding-more-lanes-to-busy-highways-it-doesnt-help/ for one example.	

6/25/2023	Op Lanes Maryland Phase 1	News/media	Agree	Traffic relief on the Beltway and I-270 is long overdue. Transit cannot solve the problem. More lanes are needed. I am regularly caught in backups even mid-day on the Beltway. I would prefer more lanes without tolls to a toll project. Raise the gas tax to pay for the lanes.	
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This is a toll lanes project with a private entity: these never work out like they're supposed to. The environmental impact studies were rushed and incomplete. It is not compatible with our state's environmental goals, it will worsen our water quality while jacking up our water and sewer bills, and it may mean bulldozing my house for something I can't afford to drive on.	
6/25/2023	I-270"	Advocacy organization	Strongly disagree	Widening 270 with expensive toll lanes will not improve traffic congestion. Only the wealthy can afford the proposed tolls (with profits going to private companies) and traffic will only increase in the other lanes. The current contract must be dissolved altogether and an honest evaluation made of traffic solutions. Yes, this means starting over but the current P3 project is an abomination that cannot be fixed. It must be stopped altogether.	Linda Rosendorf
6/25/2023	Op Lanes Maryland Phase 1		Strongly disagree		
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	1) The OP lanes proposal is socially unjust, leaving those who can't afford the OP lanes in worse traffic. Traffic at OP lanes junctures with local roads would be awful. Apartment complexes and households would be closer to highway exhausts and noise. 2) The OP lanes proposal to expand the beltway and American Legion	

				<p>Bridge comes with huge environmental costs at the juncture in time where we absolutely need to reverse the direction of climate change. Induced demand for commuting by cars would, in any case, fill up the expanded lanes soon after the construction project was completed, and after years of construction caused traffic jams. 3) Alternative plans to P3 OP lanes proposals were not given serious, judicious, and publicly open consideration. 4) Transurban's consortium would rule the beltway and force expansion of their model for the next 50 years. Any plans that reduce their expected cash flow would have to be approved by the Consortium, and be compensated by taxpayers. The taxpayers would be footing the bills for many hidden costs to infrastructure adjustments and improvements required by highway expansion. 5) Expanding the American Legion Bridge only pushes the traffic 495 bottleneck a mile further into Maryland and gives Transurban or other P3 consortium's justification to continue expansion. 6) Plummers Island nature research reserve, home to the Washington Biologists' Field Club (WBFC) for 122 years, part of the C & O Canal National Historical Park, would be devastated by the proposed expanding the American Legion Bridge. Rare plants and animals and their habitats, and WBFC long-term research projects, would be irreversibly and damaged.</p>	
6/25/2023	Op Lanes Maryland Phase 1		Strongly disagree	Toll lanes have done exactly NOTHING to ease traffic in VA (I sit in it; I speak from experience). I object to the environmental repercussions as well.	
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		

6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	A road to nowhere – not well thought out, doesn't included alternative transportation possibilities... as long as development continues at the current pace, the problems north of these toll lanes will continue, backups will continue... we need solutions that include mass transportation and cut down on economic and environmental waste. These toll lanes are a boondoggle. I voted Democratic in the recent election for MD governor to put an end to these toll lanes. The process was not fair and open. Take a serious, open and informed look.	Caol Drew
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	One car crash delays thousands of people on the beltway or 270. How freaking damaging would years of construction be? Also, i would lose or lose value in a condo i own on Azalea Dr in Rockville due to construction. And, MD cares not about the environment, but i know the damage would be extreme and never mitigated based on living next to the damn icc. Maryland cant take care of existing roads, dont build any more.	Mary
6/25/2023	I-270"	Advocacy organization	Strongly disagree	Will damage my neighborhood which abuts I270 in Rockville. Installing reversible lanes would be a much cheaper and less destructive alternative. It hasn't received much study, possible because it means less money for contractors.	
6/25/2023	I-270"	Neighborhood/civic association	Strongly disagree		
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		

6/25/2023	I-270"	Advocacy organization	Strongly disagree	toll roads has failed in Virginia and will be terrible for the Maryland communities surrounding the highways. it will also just make traffic worse and driving more dangerous.	Kyra Freeman
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The reasons and data justifying this project are questionable.	
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	It will require large taxpayer subsidies, wasting scarce capital funding that would be better used to expand rail transit. Middle-income drivers who can't afford the tolls will subsidize the wealthy who can afford them. It will make traffic worse in Maryland by relocating the traffic jam where the toll lanes end from Maryland to Virginia. It will transfer jobs from Maryland to Virginia, because the CEO who lives in Potomac or West Bethesda will find it easier to drive to Tysons than to job centers in Maryland.	
6/25/2023	Brunswick Line	Advocacy organization	Strongly agree	This urgently needed project, as currently described, is set up to be impossible to implement. The section of third track between Silver Spring and Union Station is the most difficult to implement on the entire line, it should not be in Phase 1. Rather, initial sections of third track should be located from the White Flint area westward, starting with the Barnesville Hill.	
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Widening I270 will only increase traffic, congestion, and air pollution. More should be done to improve and expand mass transit.	
6/25/2023	Corridor Cities Transitway (CCT)	Advocacy organization	Strongly agree	When Clarksburg was planned to be developed to a "corridor city," the plan counted on the CCT for speedy, climate-friendly transportation to employment centers down county. Although the routing has, last I saw, meant it was no longer speedy, it still would provide a	Anne Ambler

				needed transit link, perhaps more to other spots on the route than to the down county.	
6/25/2023	Middlebrook Road Extended Widening	Friend/colleague	Strongly disagree	No additional roadways are needed in this area; transit options are needed. Road construction here would irreparably damage valuable wooded land and foster yet more sprawl. Visualize 2050, by its very name, should be focused on what will benefit our area in 2050, not what will make mobility and climate change worse, as well as hampering our resiliency to flooding.	Anne Ambler
6/25/2023	Montrose Parkway	News/media	Strongly disagree	What is needed in this area is BRT on Rt. 355 and on Randolph/Montrose, NOT an extension of Montrose Pkwy.	Anne Ambler
6/25/2023	MARC Improvements	Advocacy organization	Strongly agree	Making MARC work for more commuters is a no-brainer, given the current climate crisis. This should be a priority.	Anne Ambler
6/25/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	BRT on Rt. 355 is a vital part of a BRT network.	Anne Ambler
6/25/2023	MD 650 New Hampshire Avenue BRT	Advocacy organization	Strongly agree	This is an important part of a BRT network.	Anne Ambler
6/25/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Advocacy organization	Strongly agree	Important part of a BRT network.	Anne Ambler

6/25/2023	Veirs Mill Bus Rapid Transit	Advocacy organization	Strongly agree	Vital link in a BRT network.	Anne Ambler
6/25/2023	I-270 Innovative Congestion Management	Neighborhood/civic association	Strongly disagree	Economically stupid. Environmentally devastating. *Encourages* congestion. Ignores overwhelming, long-term opposition and tries to bury legitimate scientific evidence.	EM Ryan
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	There are numerous downsides. The only people who would benefit are those wealthy enough to pay the proposed tolls. Everyone else would be stuck in even worse traffic congestion. The HOT/Lexus lanes are un-American. Our PUBLIC highways should be open to ALL motorists, 24/7, and financed with motor fuel taxes – as we've done for decades. HOT/Lexus lanes would only divide our society even further. They are dead wrong and the plan should be terminated with prejudice.	Sherman Johnson
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree		
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Research shows that expanding highways does not solve the congestion problem in the long run. We need to use that money to invest in public transportation and safe bike and pedestrian lanes.	Shilpa Shenvi
6/25/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project is inequitable, environmentally destructive, unsupported by reliable data, and guaranteed to make congestion worse than it is now for the majority of drivers.	Jennifer Whalen

6/25/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree		
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Would be detrimental to the environment and communities. Would only make the traffic worse.	Kathleen Pirollo
6/25/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The environmental and community impacts have not been fully assessed. Toll lanes have been demonstrated to create more congestion. No one will pay the outrageously high fees to use toll lanes.	
6/25/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Terrible for the environment. Will not relieve congestion.	Mary Anne Hess
6/26/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	As a long-term aid to reduce traffic congestion, I would prefer a train system (extending the Metro) as occurs in the NY City area. Widening highways is a temporary, highly expensive fix. Widening 270 and the Beltway would cause much environmental harm in an already overstressed, too polluted part of the U.S.	Edward M. Barrows
6/26/2023	I-270"	Advocacy organization	Strongly disagree	The case for toll lanes provides neither compelling data nor argument for how the approach provides long-term, sustainable traffic relief. Costs, financial and environmental, are long-term. Benefits do not appear to be.	
6/26/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	It's going to hurt the environment, the people that live around it and it's not going to help traffic. It's only going to cause more cars fit on the road and sit in traffic.	

6/26/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	It is beyond belief that this project is moving forward when it has never had independent financial and legal review, the Capital Beltway Accord has not been released; and key traffic modeling, pollution data, and mitigation plans are missing. This is going to get bogged down and waste time that is better spent on real issues affecting people. And there are better ways to deal with congestion.	
6/26/2023	Corridor Cities Transitway (CCT)	I've been active with organizations, civic assoc, and gov't for decades	Strongly agree	This is a key component to reducing vehicle congestion north-south and has been delayed way too long. Before any proposals are examined for I-270, the CCT mitigating effects should be included in those studies. Without giving the public aggressive rapid transit options, all other congestion relief will fail. There is a great need to connect these points with CCT BRT.	
6/26/2023	I-270 Innovative Congestion Management (I-270 projects)		Strongly disagree	The P3 project, as pursued by Gov. Hogan, was ill conceived and poorly studied. Adding lanes to I-270 will not reduce congestion, as numerous studies have shown, but will cause great harm, siphoning needed funds from more effective projects. Please go back to the drawing board and work with transit-oriented and environmental organizations to come up with an appropriate rebuild for the American Legion Bridge and transit solutions for upcounty.	
6/26/2023	MARC Improvements (Including MARC run-through to VA & L'Enfant Plaza)	Long-time activism on transit issues as citizen	Strongly agree	Reliable, safe, and frequent MARC service is key to removing single car vehicles from our road grid. It has proven to be effective when it can be counted on by commuters.	

6/26/2023	MD 355 Bus Rapid Transit	Gov't presentations and North Bethesda planning	Strongly agree	BRT on Rt. 355 is a critical element to creating a "boulevard" in North Bethesda. As the number of residential units increase along this corridor, supplementing the Red Line by having dedicated bus lanes will allow residents to move easily up and down the Pike without using their cars as frequently. BRT must include dedicated bus lanes to work.	
6/26/2023	Montrose Parkway	Long-time activist in North Bethesda	Strongly disagree	This is a dinosaur remnant of a failed policy to run highway-style roadway through an urbanizing area. It is environmentally unsound and totally unnecessary. The only worthy project is to separate the grade at the CSX tracks, and there are several better proposals to accomplish that goal. Redesign the project to grade separate the tracks on Randolph Road, and leave it there.	
6/26/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Disagree		
6/26/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This is an ill-conceived project that poses great threats to our watershed, historic places, and taxpayers. Aside from the project's flawed environmental review, it will not relieve congestion and only serves those who can afford tolls. It does nothing to reduce the ever-increasing amount of dangerous interstate truck traffic from the unexpanded "free" lanes. Additionally, a P3 financing model for a massive infrastructure project like this will not work as intended (except to benefit foreign owners and their investors) and essentially hands over defense critical infrastructure to foreign ownership. This is not a forward-thinking "2050" transportation project. It is a 20th century solution that doubles down on the ills and injustices of the original Interstate Highway construction.	

6/26/2023	I-270"		Strongly disagree	Do not widen 270. It will only make traffic worse and cost the common man more money to get around.	
6/26/2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly disagree	The toll lanes are inequitable and will cause more congestion. I was around and commute from Montgomery county to Tysons corner and the toll lanes have made it worse for 99% of all commuters. The tolls are too high and very few people use them. Which makes more traffic on fewer nontoll lanes worse.	Phyllis Epstein
6/26/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree		Dr. Donna Hoffmeister
6/26/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	This project does not mitigate/solve traffic for drivers in general purpose lanes. Rather it increases traffic for all except for people in the LUXURY LANES. And its irreversible harm to our health and planet is appalling.	
6/26/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Plans to expand I-270 would lead to major increases in vehicle traffic and environmental pollution, rather than alleviating traffic congestion.	Jeanne Anastasi
6/26/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	I am Kevin Thatcher Gerike, and I live on Lawndale Ct in Silver Spring, Maryland. I live in the Indian Springs Neighborhood, which is in danger of becoming more polluted, louder, and destroyed with the proposed widening of the Capital Beltway. With an increase in the road width and additions of toll lanes, the project will devastate our community and other communities near the Beltway. We will lose our neighborhood park and YMCA. There will be more noise from construction and increased traffic on the road. The value, safety, and security of our homes will be ruined. The project will NOT reduce traffic congestion, but the construction and increase in traffic WILL pollute our air and increase the	

				<p>noise in the neighborhood. In addition, the project is horrendous for the environment and will wreak havoc on local ecosystems that are already disjointed and polluted from the existing Beltway. My husband (LaDereke Grant) and I oppose this project and urge you to reject any version of the project in favor of better, smarter choices. We advocate for light rail built on the entire Capital Beltway loop to reduce traffic and the addition of Bus Rapid Transit. We need to advocate for smarter, safer, more sustainable modifications of the Beltway and implement good, frequent public transit options throughout the county to reduce the traffic not only on the Beltway but other roads such as Colesville and University. In this day and age, we must advocate for traffic-reducing measures and advocate for more public transit options that also include more bike lanes. Very Respectfully, Kevin Gerike and LaDereke Grant Lawndale Ct, Silver Spring, MD</p>	
6/26/2023	Op Lanes Maryland Phase 1		Strongly disagree		
6/26/2023	Op Lanes Maryland Phase 1		Strongly disagree	<p>The Op Lanes won't resolve congestion. In fact, the Maryland-National Capital Park and Planning Commission found that it would only move the bottlenecks from McLean, creating severe congestion on I-270 North, the Inner Loop of the Beltway on the top side of the Beltway and the Inner Loop in Prince George's County. MDOT should cancel the project and study alternatives to HOT lanes.</p>	Barbara Coufal
6/26/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	<p>There are effective and more environmentally responsible ways to deal with traffic such as transit, incentivizing telework and better land use planning.</p>	Nancy Soreng

6/26/2023	Op Lanes Maryland Phase 1	Project webpage	Strongly disagree	This P3 project has been a disastrous boondoggle since its inception. It would enrich private companies while harming the environment. With tolls up to \$50, it would be very inequitable, favoring the wealthy and making traffic far worse for the overwhelming majority of drivers. IMPORTANTLY, THIS PLAN WILL NOT IMPROVE TRAFFIC CONGESTION. The current project must be thrown out and a carefully thought out plan for traffic management be considered. This horrible project has already cost Maryland taxpayers a huge amount of money and continues to do so. STOP THIS NOW!!!	Linda Rosendorf
6/26/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree		
6/26/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Adding express toll lanes to 270 would be extremely destructive. It would harm neighborhoods, damage the watershed, and reduce tree cover that is so essential for wildlife. As experience in other cities has shown, widening highways actually increase the amount of traffic rather than decrease it, as people fill in the extra space. This would be contrary to our climate change goals in Montgomery County and undermine transit projects that are in the works. In addition, the planners failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting.	Shannon Shea
6/26/2023	Montrose Parkway	Advocacy organization	Strongly disagree	Expanding this road further would further divide the White Flint area, which is already splintered (which reduces a good sense of place) and difficult to get around without a car. It would be the opposite of our commitments to reduce greenhouse gases and expand	Shannon Shea

				walking and biking. Instead, we should invest in the local street network, transit (especially BRT), and protected bike lanes.	
6/26/2023	MARC Improvements	Advocacy organization	Strongly agree	I strongly support improvements and expansion to MARC service, particularly adding service on weekends and having it go both ways during the morning and evening to expand access. Improving and expanding the service would enable more sustainable travel between Frederick County, Montgomery County, and Washington D.C. It could reduce car traffic as well.	Shannon Shea
6/26/2023	MD 355 Bus Rapid Transit	Neighborhood/civic association	Strongly agree	Bus Rapid Transit can be a backbone of a sustainable transportation system, especially when combined with Metro, MARC, protected bike lanes, and excellent sidewalks. BRT should be prioritized on 355 to reduce traffic and ensure buses do not get stuck in traffic. This project would reduce our greenhouse gas emissions, local smog-causing pollution, and reduce the need for residents to rely on driving.	Shannon Shea
6/27/2023	Op Lanes Maryland Phase 1		Strongly disagree		
6/27/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	I believe this is a project destructive to the environment and neighborhoods and an ineffective way to address traffic congestion	
6/27/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	My neighborhood will suffer tremendously. Will have negative environmental impact. Won't fix the problem	
6/27/2023	I-270 Innovative Congestion	News/media	Strongly disagree	I strongly oppose widening I-270 and I-495, and any project that proposes to widen these and other freeways should not be included in Visualize 2050. Our goal,	

	Management			related to transportation, should be to efficiently and sustainably provide mobility in a manner that reduces greenhouse gas emissions, promotes compact development patterns, and ensures equitable access to transportation options. Widening a freeway is antithetical to all of these aims, and prioritizes motor vehicle throughput at the expense of other investments that could meaningfully move the needle on climate change, sustainable growth, and equity. I-270 and I-495 should instead have a form of congestion pricing (without widening) that manages access, with revenue going directly to investments in regional bus rapid transit, improved bus and metro service, improved MARC service to convert it to a true regional provider with all day operations and through-running to VA, and pedestrian and bicycle infrastructure for last mile connections to transit stops. It is absolutely unacceptable that today – with everything we know about the mistakes of the past and their harmful impact on our communities and the climate – we are still considering freeway widening projects. More lanes have never, and will never, solve a problem of vehicle congestion in a large metro area, since freeways and widening projects induce more driving and unsustainable growth patterns. It is beyond time to move on from this terrible legacy. Please remove this project from the LRTP.	
6/27/2023	I-270 Innovative Congestion Management	Neighborhood/civic association	Strongly disagree	As seen with the I-66 expansion, the project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address	Jacob Goldberg

				the E-W jobs imbalance, along with transit and telecommuting,	
6/27/2023	MARC Improvements	Neighborhood/civic association	Strongly agree	Improved public transportation does much more to assist sustainable growth in the region	Jacob Goldberg
6/27/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	Neighborhood/civic association	Strongly agree	Support public transit and more sustainable growth in this area	Jacob Goldberg
6/27/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Neighborhood/civic association	Strongly agree	Promote sustainable growth in this region	Jacob Goldberg
6/27/2023	MARC Improvements	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	MARC Run-through service to L'Enfant Plaza	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	Camden Line	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young

6/27/2023	Brunswick Line	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	MARC Run-through service to L'Enfant Plaza	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	MARC Run-through service to Virginia	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	Veirs Mill Bus Rapid Transit	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	Corridor Cities Transitway (CCT)	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young
6/27/2023	Veirs Mill Bus Rapid Transit	Project webpage	Strongly agree	I believe that mass transit is the best way to solve the traffic congestion problem and that this project will help Maryland accomplish this	William Young

6/27/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	It will create more congestion and pollution. Will not work as someone aspects Public transportation is solution	
6/27/2023	I-270 Innovative Congestion Management	Neighborhood/civic association	Strongly disagree	Lack of environmental study, would only benefit those who can afford the toll lanes and I already cannot use my balcony facing #495 and I-270 due to exhaust fumes and pollution.	
6/27/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	I support the no build plan for Op Lanes Maryland. The expensive toll lanes will only serve the wealthy and the occasional emergency use. On 270 north, traffic will buckle and slow on the free lanes before and after termination of the toll lanes at RT 370 and accidents will occur as cars merge. Induced demand will cause more to drive rather than riding MARC and Metro, a much more equitable option for all populations. Within a short interval traffic will rebound negating the small benefits provided by widening the interstate. Congestion has already decreased with the advent of at least part time telework and rush hour is less predictable as work schedules have changed. Highway expansion will increase air pollution, storm runoff, and greenhouse gas emissions that enhance climate change. The solution is prioritizing funding for transit and increasing safe access, availability, and reliability for riders. Climate change incurs reducing car travel and increasing provisions for bicyclists and pedestrians in urban settings that provide shopping, entertainment, and housing near employment or close to transit. Expanding highways induces sprawl which is not the vision for the future. Often it most impacts lower income neighborhoods that don't benefit from the more roads and many do not own cars. The goal of the future urban	Gail Landy

				center is to provide safe provisions for walking and biking and reduce vehicle traffic and provide spaces where cars are not permitted. European countries have already adopted this theme and brag about high speed trains providing travel between nations. Goal is to reduce funding for new and expanded highways and prioritize repair and funding for transit. No other option exists for reducing the possibility of catastrophic climate change and cities will better serve people with this transition.	
6/27/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	I can't believe this project is still on the list of greenlighted projects! I reviewed the environmental impact study, which was seriously flawed because it did not consider the project's potential impact on climate change. Building HOV lanes for 495 would negatively affect communities along the highway without providing ANY benefit to those communities. Better regional transit needs to be built to get commuters off the road. Then the existing lanes should be sufficient for long-distance travelers. Many studies have shown that increasing road capacity only increases the traffic and urban sprawl.	
6/27/2023	MARC Run-through service to Virginia	News/media	Strongly agree	Just a great idea to have more broadly linked regional rail	
6/27/2023	I-270 Innovative Congestion Management	News/media	Strongly disagree	Jesus Christ stop wasting money on stupid highways, they're a money sink, terrible for the environment, inefficient, and deadly.	

6/27/2023	I-270 Innovative Congestion Management	News/media	Strongly disagree	Jesus Christ stop wasting money on stupid highways, they're a money sink, terrible for the environment, inefficient, and deadly	
6/27/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	This plan is a terrible idea	
6/27/2023	I-270"	News/media	Strongly disagree	Widening/expanding this freeway is a terrible idea.	
6/27/2023	Op Lanes Maryland Phase 1	News/media	Neutral	Just toll all the lanes. You don't need to put down new pavement. Start charging 10 cents a mile and see how many giant SUVs with one person in them keep clogging up the highways.	Daniel Stephen Marcin
6/27/2023	I-270 Innovative Congestion Management	Neighborhood/civic association	Strongly disagree	Other lanes wouldn't be needed if mass transit stepped up. Rail, bus.	
6/27/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	Project webpage	Neutral	Must have RideOn #30 bus restored to make it feasible for Pooks Hill Road residents. 40 minutes between buses is too long.	
6/27/2023	MD 355 Bus Rapid Transit	Advocacy organization	Neutral	Must have pre-pandemic routes for RideOn Bus 30 restored so buses run no longer than 30 minutes apart. 20 would be much better.	

6/28/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Climate Change concerns require forward-thinking solutions that limit the use of fossil fuels. This irresponsible project will ENCOURAGE more fossil fuel use in a highly inequitable way. Money and legislation should be directed at discouraging vehicle traffic and encouraging public transportation and telecommuting, not supporting the use of fossil fuels.	Christy Bumanis
6/28/2023	MARC Improvements	News/media	Strongly agree	It is one area that already has an infrastructure. It should just be improved and the frequency of service must be improved.	John Fay
6/28/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	News/media	Strongly agree	If any major roadway should be included, Randolph Rd. tops the list. Running from the edge of Prince Georges County to White Flint, it carries a huge number of cars, trucks and buses, especially during rush hours. Let's have a break.	John Fay
6/28/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This plan is an environmental disaster and contrary to slowing climate change. Better solutions must be found than encouraging more cars and driving.	Alison Bennett
6/28/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The project would be ineffective as it would create new traffic bottlenecks and encourage more highway usage thereby continue congestion, damage numerous parks, trees and streams, generate unacceptable levels of climate-damaging greenhouse gas emissions, create air pollution which would cause heart disease, various cancers, various respiratory diseases and premature death, and not be equitable as the toll lanes would be too expensive for most drivers and the project was chosen instead of more transit which would serve more people, even those without cars.	Brian Ditzler

6/28/2023	Bus Rapid Transit: US 29 - Phase 2	Neighborhood/civic association	Strongly agree	BRT on US 29 would get more people out of their cars which would lessen traffic congestion, climate-damaging greenhouse gas emission and health-damaging air pollution. It would help business development along the US 29 corridor and in Silver Spring.	Brian Ditzler
6/28/2023	MARC Improvements	News/media	Strongly agree	MARC improvements would get more people out of their cars which would lessen traffic congestion in I-270, reduce climate-damaging greenhouse gas emissions and health-damaging air pollution, and ease commuting worries of many local residents.	Brian Ditzler
6/28/2023	MD 355 Bus Rapid Transit	News/media	Strongly agree	BRT on 355 would get more people out of their cars which would reduce congestion in I-270 and Rockville Pike, reduce greenhouse gas emissions and lessen health-damaging air pollution. It also would be good for businesses long MD 355.	Brian Ditzler
6/28/2023	MD 650 New Hampshire Avenue BRT	Neighborhood/civic association	Strongly agree	BRT on MD 650 would get more people out of their cars, and thereby reduce traffic congestion, reduce greenhouse gas emissions and reduce health-damaging air pollution. It also would be good for businesses along New Hampshire Avenue and adjacent areas.	Brian Ditzler
6/28/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Not only will this project have a substantial negative impact on our community but it won't solve the problem of traffic congestion. The TPB needs to consider a comprehensive approach that makes other modes of transportation more accessible, affordable, reliable and viable as alternatives to travel in private vehicles. Other alternatives are the creation of employment centers around major transit hubs, along with close-in affordable housing for our public work force to ensure that they can live near their jobs rather than miles away in transit deserts. Telework and staggered work schedules are also better options than adding lanes to a roadway that	

				is already wider than the New Jersey Turnpike. Creating demand pricing toll lanes while reducing the number of lanes available to the general public is inequitable and rewards those of higher incomes. Moreover, the EIS was severely flawed and did not study other viable alternatives to building more lanes. It is addressing a 21st century issue with a 1950s solution. We can do better than this.	
6/28/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting. Please remove this project.	Steve Wardell
6/28/2023	Op Lanes Maryland Phase 1	News/media (I first found out about it from Gov. Hogan's Sept. 2017 public announcement. I've been studying it and vigorously opposing it for over five	Strongly disagree	As I wrote above, years of study have found that the Op lanes will make congestion worse, be terrible for the environment which we all depend on, be grossly inequitable for many reasons, and is opposed by most Montgomery County elected officials and general public. Montgomery County will be impacted by this ruinous project more than any other. In general terms, anyone who has actually studied this project opposes it unless they are contractors who will make money building it. The minority of the public who supports it have been given the misinformation that it would shorten their commute. It will actually make it worse, unless they can pay \$50/day on a regular basis. That is what a person would need to budget if they planned to use the HOT Lanes for commuting on a daily basis, from Gaithersburg to Tysons, Va. Needless to say, after the many years of	Sally Stolz

		<p>years. MDOT's own materials say the HOT lanes' financial viability depends on the operational failure of the regular lanes. And their own travel time tables show drivers in the general lanes are in most cases no better off or worse off if the Op Lanes are built. In addition, the environmental effects are calamitous, the inequity of a road that</p>		<p>construction when EVERYONE would suffer, this project would benefit only a tiny number of very wealthy people. In a cost/benefit analysis it is a total failure. Please remove the Op Lanes project!</p>	
--	--	--	--	---	--

		provides a slower and less safe trip for poor people, the huge financial risk (look at the Purple Line P3) and the enormous public opposition should all make removing the Op Lanes from the list of approved projects compelling)			
6/28/2023	Governor Harry W. Nice/Senator Thomas "Mac" Middleton Bridge Replacement Project (Advocacy organization	Strongly agree	I support improving transit by including rail on this bridge. With rail on this bridge we can make the regional transit system for efficient and effective. To get cars off the road, we much have an efficient, economical, and reliable transit system.	Sally Stolz

6/28/2023	Brunswick Line	Advocacy organization	Strongly agree	We need to increase service on the Brunswick line to give more people the option of commuting by transit. Ideally the Brunswick line would run all the same hours as the metro, including nights and weekends. These trains are already providing efficient, reliable and cost-effective travel, and they are heavily used. They are keeping many cars off I-270 and the beltway. If we increase their service times, we will reduce the number of cars on I-270 and I-495. This will improve congestion, whereas the Op Lanes project will just make congestion worse.	Sally Stolz
6/28/2023	MARC Improvements	Advocacy organization	Strongly agree	In the "Brunswick Line" section I wrote a lot, so I will summarize. Better transit options WILL result in getting more cars off the road. Ultimately that is the only way our transportation options can keep up with population growth here. When you widen a road, drivers will come! The road will quickly be congested again. If you provide efficient, reliable, economical transit, you'll have a system capable of handling regional growth. It is a big investment, but will pay for itself by ACTUALLY reducing road congestion and reducing our collective carbon footprint! And it benefits EVERYONE. Drivers find less cars on the road and transit riders find more convenience and options. We can do this!	Sally Stolz
6/29/2023	Op Lanes Maryland Phase 1 (I assume the above title refers to the plan to add yet more lanes to the	News/media	Strongly disagree	Where to begin... "induced demand" probably sums it up best. Visit the Katy Freeway in Houston, or look what happened when lanes were added to 270 back in the day. How long did it take for traffic to build back up again? Not long. The way to get people out of private cars clogging our roads and into public transit (thereby shoring up WMATA) is to disincentivize using private cars - but this project will do the exact opposite! By the way, have you heard about climate change? Paving	Nan Wellins

	Beltway in Montgomery and PG counties)			impermeable surfaces where we now have acres of CO2-absorbing parkland seem a good idea to you? Have you even re-evaluated the need at all, in light of post-pandemic hybrid work models (is anyone back in office M-F 9-5)? Please stop talking about "soul crushing traffic" and do something about "climate- and green space-crushing traffic" by shifting Eisenhower-era thinking into the 21st century. Incentivize telework (employer subsidies?); invest in increasing MARC and WMATA and decent bus service; reversible lanes; etc. There are a dozen things at least that could be done here apart from ripping out parkland and creating Lexus lanes. And finally - I'd bet serious money (which I don't have a lot of) that in the end the Maryland taxpayer will end up footing the bill for these lanes. I'm sure the contractor, should one appear, would include provisions buried in the fine print on page 63 sticking us with the bill under this, that, and the other condition. They have the dosh to hire top lawyers in the private sector who'll run rings around our state attorneys. No thank you!	
6/29/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	This project, as currently configured, will ultimately do more damage than it will provide substantial and lasting benefit. The damage includes localized destruction of numerous environmental, historic, and community resources. It will also produce negative instead of positive impacts on regional traffic conditions by perpetuating traffic patterns and even worsening congestion for most travelers who cannot afford or do not wish to pay what could be high fees for highway usage. A slightly (one lane in each direction) reconfigured American Legion Bridge deck, and similarly reconfigured existing I-270/495 could, on the other hand, include a reversible lane in each direction for rush hours that would provide congestion relief without	

				extensive additional land required. Additional transit and transit-oriented development on the eastern side of the beltway would also improve conditions over time.	
6/29/2023	MD 28/MD 198 Corridor Study	News/media (COG information)	Strongly disagree	When the ICC was proposed and built, MDOT and political supporters said that the ICC would obviate any need for work on this other corridor. A "Study" usually indicates only the first step toward recommending expansion projects, which are not necessary.	
6/29/2023	US 15 Corridor	News/media	Strongly disagree	While there is occasional rush hour congestion from the Route 40 to the Motter Avenue interchanges (and vice versa), the rest of US 15 is almost always free-flowing. Conditions do not justify a widening project in this corridor. In the short stretch mentioned above, widening would have substantial adverse effects on neighboring property, a cost too high to bear for the modest and necessarily temporary relief it might provide.	
6/29/2023	Montrose Parkway	News/media	Strongly disagree	Any further expansion of Montrose Parkway is unjustified by the minimal benefits it might provide. Widening would serve to further separate neighborhoods and daily activities, and would make attempts at pedestrianizing these areas dangerous and futile. Instead, added funding for those and related area fixes, such as embracing BRT, would provide for a higher local quality of life.	
6/29/2023	US 29 Corridor	News/media	Strongly disagree	10-15 years ago, the 29 corridor underwent grade separation in several locations. The ICC's interchange and Briggs-Chaney Road complexities are already a fact. Constructing additional grade separations would make recent transit improvements less useful and would preempt new neighborhood and neighborhood access around BRT stations on 29.	

6/29/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting,	Brendan Wray
6/29/2023	Addison Road I	Advocacy organization	Disagree	This project would expand already wide and unsafe roads, making safe pedestrian and bike access to Blue Line stations even harder and undermining efforts to create walkable neighborhoods near transit.	Brendan Wray
6/29/2023	I-95/I-495 at Greenbelt Metro Station Interchange Construction (I-495/Medical Center interchange)	Project webpage	Strongly disagree	The I-495/Medical Center project would modify the current safest bike/walk route in a 10-mile stretch to cross I-495 and undermine efforts to foster a safe, local street grid that allows walking, biking and transit access in the Largo Town Center neighborhood.	Brendan Wray
6/29/2023	Addison Road I (Maglev)	Advocacy organization	Strongly disagree	Oppose maglev projects on the basis of cost and effectiveness - can make a greater difference with other targeted projects already in the plan.	Brendan Wray
6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization (advocacy groups, Sierra Club)	Strongly disagree	I oppose this project and think it should be removed. Equity issue – Toll lanes benefit only those with incomes high enough to pay the *expensive* rates. Traffic flow – great for the people in toll lanes, but 90% of the cars/trucks will be pressed into the remaining lanes. Climate – this project promotes our reliance on cars. Given the increasing forest fires, floods, drought, and	

		& it's in the news)		heat waves, we need to promote better & more frequent transit (MARC Brunswick line parallels much of I270) and encourage people to use cars less frequently.	
6/30/2023	US 29 Corridor	Advocacy organization (and I live near Rt 29)	Disagree	I strongly **support** US 29 FLASH BRT improvements, However, I disagree with the \$7 Billion series of grade-separated interchanges that would undermine efforts to create walkable neighborhood hubs around FLASH bus rapid transit stops	Tina Slater
6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization (advocacy groups, Sierra Club, newspapers)	Strongly disagree	EQUITY – toll lanes accessible only to those with more money; all other cars/trucks will be pressed into existing lanes. NEED to PROMOTE TRANSIT – MARC Brunswick Line parallels much of the route and takes people from Frederick to DC (and from there to NoVa); we should invest the \$\$\$\$ in MARC and Express Buses. CLIMATE – drought, forest fires, record heat waves – we canNOT keep accommodating SOVs. Govt should be promoting mass transit over cars. We can no longer deny that Climate Change is upon us.	Tina Slater
6/30/2023	Bus Rapid Transit: US 29 - Phase 2	Neighborhood/civic association	Strongly agree	US 29 is crowded during rush hour. BRT in *dedicated lanes* in the median will make FLASH a TRUE BRT. The FLASH bus will travel quickly, bypassing cars stuck in traffic. Let's *reward* people who use transit, helping the climate, and reducing the number of vehicles on the road.	Tina Slater
6/30/2023	MARC Improvements	Advocacy organization	Strongly agree	Instead of MD investing \$\$\$ in I-270 Op Lanes, let's invest in MARC expansion -- adding third tracks in key locations to reduce conflicts between passenger and freight trains. Note that MARC Brunswick Line parallels I-270 for much of the way.	Tina Slater

6/30/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	This BRT would connect Bethesda to Rockville and to places North. Rockville is the hub of County Gov't and also a campus of Montgomery College. Connecting people from South MoCo to Activity Centers North of Rockville will be a bonus for people currently taking transit. It also would be a fast/convenient way for current drivers to get around the county and leave their cars at home. Do it for EQUITY, do it for the CLIMATE.	Tina Slater
6/30/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association (and Advocacy organization , news/media)	Strongly disagree	It is a proven fact that increasing lanes does NOT reduce congestion. The very plan of creating a 'faster route' through traffic congestion accessible to rich people, while the poor folk sit in traffic is undemocratic and elitist. The environmental damage of such a project is completely underestimated. One need only look at the devastation in Virginia on the other side of the American Legion Bridge to see it. The atmosphere is heating up and replacing forests and shrubs with blacktop is an insane idea. We're not in as much trouble as other states yet - but projects like this assure that we will be. There must be a solution to the terrible traffic congestion - I agree completely. We MUST give people an alternative to driving! An efficient public transit system must be top priority. Every rider on BRT is not driving a car. Existing rail must be upgraded and increased in capacity. New rail alternatives, perhaps a monorail as proposed on 270, would be reasonable. No more blacktop! It's not a viable solution. And it will damage much more than just adjacent homeowners' property. Stop this insane project now.	Patty McGrath
6/30/2023	Bus Rapid Transit: US 29 - Phase 2	Advocacy organization	Strongly agree	We must provide workers with affordable and efficient alternatives to driving to work! I have visited Rome, Italy, where family lives. I have never needed a car! Bus	Patty McGrath

				service is extremely affordable, time efficient and located 'everywhere'. We can do that.	
6/30/2023	US 29 Corridor	Advocacy organization	Strongly disagree	US 29 Corridor – proposes \$7 Billion series of grade-separated interchanges that would undermine efforts to create walkable neighborhood hubs around FLASH bus rapid transit stops. Environmental and human livability must be prioritized.	Patty McGrath
6/30/2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Advocacy organization	Strongly agree	We must provide workers with affordable and efficient alternatives to driving to work! I have visited Rome, Italy, where family lives. I have never needed a car! Bus service is extremely affordable, time efficient and located 'everywhere'. We can do that.	Patty McGrath
6/30/2023	Veirs Mill Bus Rapid Transit	Advocacy organization	Strongly agree	We must provide workers with affordable and efficient alternatives to driving to work! I have visited Rome, Italy, where family lives. I have never needed a car! Bus service is extremely affordable, time efficient and located 'everywhere'. We can do that.	Patty McGrath
6/30/2023	Middlebrook Road Extended Widening	Advocacy organization	Strongly disagree	This would M-83 expansion project pushing reliance on auto traffic instead of prioritizing public transit. We MUST provide realistic alternatives to workers via PUBLIC TRANSIT. Blacktop is NOT the answer. M-83 was deeply opposed by residents who were assured it would NOT be extended. The environmental consequences of blacktop highways in place of forest buffers are damaging our air and water.	Patty McGrath
6/30/2023	MD 28/MD 198 Corridor Study	Advocacy organization	Strongly disagree	MDOT when promoting the ICC, considered widening of this road unnecessary because the ICC would be built. Upcounty residents must be given public transportation alternatives to driving!	Patty McGrath

6/30/2023	Montrose Parkway	Advocacy organization	Strongly disagree	This proposed 4-lane road would further divide White Flint. Instead fund needed local street network, protected bike lanes, and 355 BRT.	Patty McGrath
6/30/2023	MARC Improvements	Advocacy organization	Strongly agree	In MARC we have the infrastructure to revolutionize how people commute to MD, DC and Virginia! Let's invest in the upgrades and get on with adding more capacity to make it a realistic alternative to driving!	Patty McGrath
6/30/2023	MARC Run-through service to L'Enfant Plaza	Advocacy organization	Strongly agree	Here we have a realistic alternative for upcounty residents to reach DC without lengthy transfers - which cause so many to DRIVE instead of using public transit. We need public transit to be RAPID. This proposal could get us there.	Patty McGrath
6/30/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree		Molly Hauck
6/30/2023	Op Lanes Maryland Phase 1		Strongly disagree		Molly Hauck
6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Proposed toll lanes on American Legion Bridge, Beltway and I-270 will just increase car/truck traffic in long run and are not well designed. Any redesign of the bridge should include space for Metro (even if installed later) between Bethesda and Tysons Corner (at least) as well as for BRT and biking. We need more public transit, not more road lanes to reduce congestion long term.	
6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	No More Roads → move to public transportation and other non-fossil fuel modes of movement	rg

6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	I think we should be spending our time, effort and money and projects that explicitly decrease greenhouse gas emissions, like mass transit, projects that support walking and biking, etc.	
6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Expansion of the highway is directly in conflict with our need to cut greenhouse gases and other pollutants and there are far better, more efficient, and healthful ways to provide transportation support	
6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	As a concerned resident, I strongly oppose the expansion of 270. It is disheartening to witness our region's road building efforts fail to alleviate traffic congestion. Instead of finding effective solutions, these expansions only contribute to the problem by encouraging more spread-out development, leading to increased driving and traffic.	Lisa Clemans-Cope
6/30/2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly disagree	The expansion of I-270 to carry more cars, and utilizing expensive tolls to maintain it, is counterproductive to efforts to reduce use of cars, reduce GHGe by cars, and develop effective mass transit alternatives to result in a more sustainable transportation system.	
6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	It has serious environmental failings & would disturb important historical sites. The study on it failed to include a reasonable alternative which would have significant transit portions as well as some road improvement.	
6/30/2023	Op Lanes Maryland Phase 1		Strongly disagree		

6/30/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	The climate impact of expanding roads and adding toll lanes to I270 is too high and unethical. It is antithetical to smartgrowth and should be abandoned as transportation solution.	
6/30/2023	Presidential Parkway	News/media	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs	Frances Stewart
6/30/2023	MARC Improvements	Advocacy organization	Strongly agree	MARC has the potential to significantly improve transportation and decrease emissions in many areas of Maryland, but it's schedule is too limited and it has been plagued with problems.	Frances Stewart
6/30/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	MD 355 is an important route in Montgomery County, and it has terrible traffic. Bus Rapid Transit is a way to quickly and affordably decrease traffic and emissions and to improve access to transit.	Frances Stewart
6/30/2023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	Advocacy organization	Strongly agree	This project would decrease traffic and pollution in a heavily traveled area and would improve transit access.	Frances Stewart
6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Widening 270 won't solve our traffic woes and is about the worst possible choice for the climate. Toll lanes will only add to economic inequity. We need climate-friendly mass transit solutions	

6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	We do not need to add more lanes. We need to get people out of their cars and drastically reduce VMT in order to reach our climate goals. Please invest in public transit instead of highway expansion.	Philip Bogdonoff
6/30/2023	Op Lanes Maryland Phase 1	Friend/colleague (Also from neighborhood and civic organizations)	Disagree	This project concentrates on building roads and unaffordable toll roads which will only increase traffic, not solve congestion, and its overall approach does not promote transit which is the transport mode that will not only address congestion but be environmentally progressive. The project is very destructive of environmental features in Montgomery County and is a 'taking' of too many homes and civic structures.	Elaine Emling
6/30/2023	I-270"	Advocacy organization	Strongly disagree	Toll lanes do not solve traffic problems. We need better transit in order to solve help with congestion and traffic flow.	Bonny Eisenbise
6/30/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Rapid transit and monorail on 270, reverse lanes, anything but what is proposed. I strongly oppose this project and want its removal from the 2050 Plan. it should not be included in visualizing 2050. why is it that the project above has been listed that way, so unclear, confusing to many people who did not persist.	sylvia diss
6/30/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Adding more lanes to roads doesn't work for long, as has been proven in many cases, and I would like to see us shift away from individual cars and find solutions to our traffic problems, which are certainly real, that add mass transit. I was very against the private/ public plan, with its toll lanes that create another inequality for less affluent among us, and it's long term costs to us. I know this is a very hard problem to solve, so, I wish you all the best in finding a better way forward. Cathie Nelsen	Cathie Nelsen

6/30/2023	I-270"	Project webpage	Strongly disagree		nanci wilkinson
6/30/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	I am strongly opposed to the Beltway/270 Toll Lanes expansion and I would like this to be removed from the 2050 Plan.	Rosie Clemans-Cope
6/30/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	I oppose the Beltway/270 Toll Lanes expansion and would like this removed from the plan totally. It makes no sense to encourage automobile traffic expansion.	Eleanor Clemans-Cope
6/30/2023	Op Lanes Maryland Phase 1 (beltway/270 toll lanes expansion)	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting,	
6/30/2023	Op Lanes Maryland Phase 1	Advocacy organization (News/media)	Strongly disagree	To save a liveable world for humanity we must transition as quickly as possible to transportation and land use that preserves our forests, prioritizes mass transit and safer bikeable, and walkable areas and decreases our dependence on cars. This project does just the opposite.	Stuart Simon
6/30/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	Adding more lanes to highways in an already densely developed area. It will be extremely destructive to neighborhoods, parkland, existing infrastructure. It will increase greenhouse gasses at the time we are trying to reduce/eliminate them. Signing a contract committing our grandchildren to pay for an expanding network of toll roads which by them will be obsolete makes no sense. No Transurban public/private partnership has been financially advantageous to the government partner. There has been no discussion of common goals and	

				<p>priorities among the partners. The risk of the occurrence of an economic and financial crisis is a major example. Privatizing the profits and leaving all the risk to the public partnership is a huge risk. A clear discussion on common goals and priorities among the partners early in the process is necessary to establish agreed goals and priorities and to effectively define and share risks. More discussion and visioning by taxpayers is necessary to develop future transportation objectives. It is time to increase funding to maintain, improve service, and expand our transit network.</p>	
7/1/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree		
7/1/2023	Op Lanes Maryland Phase 1		Strongly disagree		Molly Hauck
7/1/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	<p>I do not support the plan for adding multiple toll lanes because of the environmental impact, loss of human and animal habitats, parks, and resultant disturbance to the area during and after completion of the project. Consideration of alternate solutions and a reassessment that accounts for the recent and likely lasting changes to the way that people work, commute, and live should be undertaken. Please do not make me regret my first home purchase. There must be a different path forward.</p>	
7/1/2023	Op Lanes Maryland Phase 1	Friend/colleague	Strongly disagree	<p>Sadly, adding more roads/lanes never solves the problem. We need more alternatives to driving, including Bus Rapid Transit. And we need more Transit-Oriented Development. Build more housing near transportation hubs!</p>	

7/1/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be destructive to neighborhoods, parks, tree canopy and streams and would still leave drivers stuck in traffic or paying high tolls. Transit-oriented projects in Prince George's County and eastern Montgomery County would be a better alternative in addressing the E-W jobs imbalance.	
7/1/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This plan adds confusion with additional lane changing, ugliness with excessive signs, and separate lanes for the wealthy. Why not add more commuter parking lots and bus routes along 270?	
7/1/2023	Veirs Mill Bus Rapid Transit	Advocacy organization	Strongly agree		
7/1/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	This entire project is going to put the climate in further jeopardy, our settled communities carved up and damaged, and our fiscal health subject to the whims of a private corporation for five decades ahead. All evidence suggests that the benefit is illusionary, and traffic will be as great or greater of a problem in a very short time. We need to offer alternatives to private automobile reliance, and discourage more and more cars being on the road. The plan to widen roads will do harm and is most self-destructive. It needs to be scrapped completely. Future generations will either thank you or curse you for the conditions that will be created if the project is allowed to proceed.	Arlene Montemarano
7/1/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	We have exceeded most of the planetary boundaries, per a recent Nature article. The least we need is more roads! We need to power down enormously and stop destroying our only home.	Jim Laurenson

7/2/2023	Middlebrook Road Extended Widening	Advocacy organization	Strongly disagree	Mid county highway extended has been removed from vision 2045. There is no need for widening Middlebrook Road ext. It goes nowhere	Margaret Schoap
7/2/2023	MD 355 Bus Rapid Transit	Advocacy organization	Strongly agree	BRT on 355 has been a master plan for 13 years. It needs to be finished with dedicated lanes and be the priority transportation project for Upcounty.	Margaret Schoap
7/2/2023	I-270"	Advocacy organization	Strongly disagree	I have reversible lanes on 270 and no toll lanes	Margaret Schoap
7/2/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	It has been very poorly devised and implemented so far. It will NOT improve existing transportation issues. There many things that were short-circuited to get to point that exists. A lot of information has not been released to the public as is should be and required. Alternatives which would help with the transportations were ignored or tossed aside. This entire project needs to "go back to the drawing board" and start from the very beginning with much more public input and not hide information from the public.	
7/5/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		
7/5/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting.	

7/5/2 023	Middlebrook Road Extended Widening		Strongly disagree		
7/5/2 023	MD 28/MD 198 Corridor Study			MDOT when promoting the ICC, considered widening of this road unnecessary because the ICC would be built	
7/5/2 023	Montrose Parkway		Strongly disagree	This proposed 4-lane road would further divide White Flint. Instead fund needed local street network, protected bike lanes, and 355 BRT.	
7/5/2 023	Op Lanes Maryland Phase 1		Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit- oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting.	
7/9/2 023	Op Lanes Maryland Phase 1	Neighborho od/civic association	Strongly disagree	Garbage idea that will increase emissions and damage the environment. Focus on expanding public transit and incentivizing telework.	
7/9/2 023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This expansion is terrible start to finish. Scrap the plan!	G Magary
7/9/2 023	Op Lanes Maryland Phase 1	News/medi a	Strongly disagree	We need to fund transit and work to reduce traffic. Our environment desperately needs this change! The earth is warning quickly, even faster than anticipated.	
7/9/2 023	Corridor Cities	News/medi a	Strongly agree	Critical for the goal of reducing traffic. We must implement mass transit alternatives. The entire	

	Transitway (CCT)			Clarksburg development was based on the development of the CCT.	
7/9/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Need less cars on the road, and less toll lanes too	
7/9/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Widening already wide interstates isn't sustainable and brings air and noise pollution farther into our communities surrounding the road. Toll lanes are attractive only if the free lanes are congested.	
7/9/2023	MARC Improvements	News/media	Strongly agree	We need more rail between Baltimore and Washington, DC. With the road congestion there, we need more options.	
7/9/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		
7/9/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Toll lanes are not the answer to traffic problems; studies and real life examples prove this. Not to mention the environmental impact of building them is too high.	
7/9/2023	I-270 Innovative Congestion Management (I-495-270 and American Legion Bridge Expansion)	Advocacy organization	Strongly disagree	Climate change is not countered, environmental justice is unequal, I'm opposed to OPP lanes tolls, Moses Hall Cemetery destruction, National Park and Plummers Island destruction	Robert Soreng

7/9/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Expanding the Beltway is not a 21 century solution to the transportation problems of our region. It will increase the number of cars on the road and further damage our environment in other ways.	Betsy Devlin-Foltz
7/9/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Expansion of I270 & I495 lanes are destructive of the long term well being of Maryland and the country. If anything an existing lane on each should be closed to cars & trucks and made rapid transit only lanes. This would be the right direction for Maryland.	Riley Casey
7/9/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Nothing about this plan prepares Maryland for a future where cars don't reign supreme. The only way to get to that point is to start building alternatives. Transit options that are convenient, frequent, reliable, and affordable will be used and would allow people to ditch their cars. Subsidize transit at least as much as roads are subsidized. Furthermore, if there must be toll lanes, the state should own and operate them for the good of the state - not private company shareholders. If that means issuing bonds to pay for them, do it.	Sarah Lanning
7/9/2023	I-270 Innovative Congestion Management		Agree		
7/9/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Shortsighted, wrongly situated	
7/9/2023	I-270"		Strongly disagree	No tolls	

7/9/2023	Op Lanes Maryland Phase 1		Strongly disagree		
7/9/2023	Op Lanes Maryland Phase 1		Strongly disagree		
7/9/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Additional lanes will increase car traffic and greenhouse gasses not reduce them. Alternate ways to reduce congestion and gas emissions have been repeatedly put to government officials but largely ignored. No matter how many lanes are built, they will always be full of cars.	Rici Rutkoff
7/9/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree		
7/9/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Ineffective solution to the traffic problem. Will have no positive impact. Will only destroy environment, communities, and displace marginalized people.	
7/9/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	I do not support expanding toll lanes, losing park and other lands, and increasing pollution.	
7/9/2023	Op Lanes Maryland Phase 1 (Lexus lanes for the rich.)	News/media	Strongly disagree	There are a large number of downsides associated with this proposal, and they are well known. One is that it is divisive and un-American to build semi-exclusive lanes for the wealthy on a PUBLIC right-of-way. Only the richest citizens would be able to use the proposed HOT/Lexus lanes on a regular basis. This proposal is the equivalent of allowing a corporation to build new wings on public schools, and then charge tuition high enough that the class sizes would remain small – say 15 students per teacher. Like our public schools, public	Sherman Johnson

				roads should be available to ALL. If a corporation wants to build toll lanes, they can purchase the necessary land; get all the permits; and pay for the surveying, engineering, and construction. Then they can charge what the market will bear. But not with a pre-existing public highway. I-270 belongs to the public, all of us. It should continue to be funded by motor fuel taxes.	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project was not done correctly with transparency. The decision to go with this project was arbitrary and NOT based on the facts. In addition, minimal public input was asked until many advocacy groups raised the issue. It was very political. With the Covid experience, the entire project needs to be started again from the very beginning to include an unbiased and non political view of ALL options!	
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Severely harm the health and wellness of humans, animals, plants through years of construction, noise, pollution. Increase the number of cars on the roads instead of working towards less vehicle dependent alternatives.	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	https://ssti.us/2023/06/26/adding-road-capacity-is-fruitless/ The project won't alleviate congestion long term, will be hugely expensive, and will have significant negative environmental and social impacts.	
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Will degrade environment, and add to further congestion through induced demand. Do not carry out at all.	

7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	NO more highway expansion until transit/rail capacity is raised to a comparable level of service. We need balanced transportation options, not continually paving the earth.	Robert McGuire
7/10/2023	I-270" (I-495 expansion)	News/media (Washington Post)	Strongly disagree	Toll lanes and road expansion will only increase traffic, add to pollution, and destroy neighborhoods.	
7/10/2023	Op Lanes Maryland Phase 1	My city council member	Strongly disagree	This project has been in the works for years. Time and again it has been shown to be environmentally dangerous, economically unsound, and an utterly inequitable approach to transportation planning.	
7/10/2023	I-270 Innovative Congestion Management	News/media (I see it in action on 270)	Strongly agree	Assuming this means entrance/exit ramp management, reversible lanes, and other alternatives to laying more concrete and, charging tolls, I strongly support this public-funded effort.	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Disaster	steve shapiro
7/10/2023	Op Lanes Maryland Phase 1		Strongly disagree	There are other, more environmentally responsible means of improving travel times for necessary vehicle travel, other than expanding highways. This project would be ineffective, inequitable, and environmentally disastrous.	John Holden
7/10/2023	US 29 Corridor		Strongly disagree	The TPB should reject the \$124 million project – approved in Fall 2022 by a 'lame duck' Montgomery County Council – that would place two BRT-only lanes down the middle of US 29. This "MEDIAN Lane option" was studied, along with a "MANAGED Lane option." As	John Holden

				noted in a County Council staff memo, “the Managed Lane option would be \$42.1 million (34%) less than the Median Lane option,” and “the Managed Lane option is clearly superior in nearly every meaningful metric.” The Managed Lane option would also benefit ALL buses, including Metro, RideOn, and school buses, and not just BRT buses (as in the Median Lane option).	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Adding toll lanes to I-270 and the Beltway would be an environmental catastrophe and a financial boondoggle.	Steve Bruns
7/10/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Studies show the extra lanes will only add to more cars on the road. As a resident of a neighborhood impacted by this proposed expansion, I strongly oppose the added noise and pollution it will add to my home while at the same time harming the environment. Please focus on other initiatives to increase use of public transit options instead of adding more cars to an already congested beltway.	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	More investment in public transit, less in traffic that will only increase congestion, contribute to climate change.	Geoff Thale
7/10/2023	Op Lanes Maryland Phase 1		Strongly disagree		Kathy Schmidt
7/10/2023	Op Lanes Maryland Phase 1		Strongly disagree		Hank Schmidt
7/10/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		

7/10/2023	Op Lanes Maryland Phase 1	I have known about this proposed project for years.	Strongly disagree	Not needed, wrong approach for the future, disastrous for our environment and Maryland's future goals	
7/10/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	This plan will result in horrendous environmental consequences to our area. Our area should promote more public transportation and teleworking, NOT more cars. Our earth is at a tipping point and this project is reckless, ridiculously costly, and destructive.	Randi Field
7/10/2023	Op Lanes Maryland Phase 1 (I-495/I-270 toll lanes)	News/media	Strongly disagree	Expanding highways, hurting the environment, uprooting people from their homes, and adding "expensive" toll roads has already been proven not to work (most recently in Virginia). Try other means as the public is very much against this solution.	Barbara Scott
7/10/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Funds committed to this project would benefit a third party contractor and not residents, businesses, or families. Please consider financial burdens on county residents (who use 270 regularly, multiple times daily, and rely on it) and environmental impacts as well.	Karen Olk
7/10/2023	I-270 Innovative Congestion Management	Neighborhood/civic association	Strongly disagree	Development of a road connecting Rockville's Gude Dr to Carnation Dr (via the Rockville Senior center parking lot) would be detrimental to the renowned Senior Center as well as the Woodley Gardens and College Gardens neighborhoods as a whole. These long-standing neighborhoods are one of the first in the DC area and currently home to a large number of young families in (what until recently was) affordable homes in Montgomery County. A "cut through" from Gude Dr would endanger the children in this neighborhood and effect quality of life and limb. Hundreds of families have their	Karen Olk

				lives and life savings invested in these neighborhoods due in large part to the relative safety of the streets, low speed limits, limited access points which will be immediately and irrevocably annihilated by providing an alternate route to avoid 270 tolls. All local businesses and commuters avoiding 270 tolls will use local roads and endanger these families. Please reconsider this portion of future planning as it will not offer benefit to our county, our city, or our neighborhoods.	
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	We will never meet climate goals with more highways. Spend transportation budgets on mass transit, bicycle and micro mobility projects instead.	Paul Daisey
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The project will increase vehicle traffic in an area where transit options should be increased.	Carol Schatz
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Building toll lanes is a misguided transportation project from a fiscal, environmental, and practical standpoint.	John Kunz
7/10/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	This plan will increase traffic on the highways, thus increasing greenhouse gas emissions. Many studies have shown that increasing the number of highway lanes leads at best to a temporary decrease in congestion followed by more cars on the road and gridlock again. Find environmentally safe transit alternatives	
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project will not help meet air quality goals. The project will not alleviate highway crowding in the long term. The project's environmental, personal property, and cultural/historical impacts are too detrimental. Evidence shows that similar projects haven't worked well elsewhere. It is a _really_ bad idea!	

7/10/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	More concrete roadway will only result in more cars, more air pollution, more traffic deaths, more noise. Instead adopt/encourage the many other approaches to improving traffic congestion.	Stephanie Land
7/10/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	This project is ill-conceived and will not provide overall improvements to our transportation network. Instead, it will wreak havoc on the environment and destroy neighborhoods, especially in Rockville where I270 follows the Watts Branch and Cabin John watersheds. It will only benefit those who are willing to pay tolls and that benefit is a marginal decrease in time on the road. Look at the ICC. It is overbuilt for the amount of use it gets and I495 is still a mess. Look at the VA toll lanes on I95. Folks prefer to sit in traffic instead of pay the toll. Meanwhile, VA has taken down thousands of trees. It is ugly. We're lucky we are in a drought or we would probably see mudslides and sinkholes. The American Legion Bridge could be improved for safety reasons, but don't encourage more driving with expansion of I495 and I270. This project should be removed from the long range transportation plan. There are far more important projects to focus on than this shoot from the hip solution by our former governor.	Wendy Aaronson
7/11/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	Private toll lanes are the wrong approach. If the public does not support toll lanes enough to fund them publicly up front, they should not be built. It is corrupt or at best paternalistic to suppose that the public will be glad to fund the levitate profits on the toll lanes with their toll money when the public clearly does not support up-front financing with a bond. We don't need more lanes. We need better growth management.	

7/11/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Rather than widening highways to accommodate more traffic, we need to expand the use of more alternate transportation options, such as buses. Also, highways tear up a natural landscape affecting all life and groundwater nearby.	Sandra Roberts
7/11/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree		
7/11/2023	I-95/I-495 at Greenbelt Metro Station Interchange Construction	News/media	Strongly agree		
7/11/2023	Op Lanes Maryland Phase 1	live near the proposed project	Strongly disagree	Every day now the news is dominated by climate-related disasters which will only intensify if a huge, controversial construction project like this is allowed to proceed. Amazing to me that it is still (sort of) alive.	Ross Capon
7/11/2023	Brunswick Line	have ridden the trains many times	Strongly agree	The region desperately needs better public transportation, which includes more frequent service on the MARC Brunswick and Camden Lines. The pandemic has marginalized rush-hour-only services, so it is important that MARC trains run all day.	Ross Capon
7/12/2023	Op Lanes Maryland Phase 1	Advocacy organization (Newspaper)	Strongly disagree	After reading about this plan I believe that it will be a significant factor preventing MD from reaching important climate control goals. We need to focus on a viable public transport system, safe walking and bike paths and more opportunities for remote work.	Lonni Millman
7/12/2023	Op Lanes Maryland	News/media	Disagree	As someone who regularly travels along the Beltway and within the Beltway and who has lived/travelled in other	

	Phase 1 (Beltway Expansion)			major metropolitan areas, I don't see expanding the Beltway as a good idea to minimize traffic, instead the back up on the feeder roads like Georgia and Connecticut will only get worse, more folks will move to outer suburbs and later will demands more roads from those of us who chose to live closer to our jobs and/or use public transportation. More roads will only lead to more congestion.	
7/12/ 2023	Op Lanes Maryland Phase 1	Neighborho od/civic association	Strongly disagree		
7/12/ 2023	Op Lanes Maryland Phase 1	Neighborho od/civic association	Strongly disagree	This project has been shown to not resolve the long range transportation needs of our region. We need more public transport investment, and we need leaders who will think about things differently and be ambitious about solutions.	Katherine Woods
7/12/ 2023	Op Lanes Maryland Phase 1	Neighborho od/civic association	Strongly disagree	We need to increase transit and remote work and reduce vehicle miles traveled.	Mary Beaudoin
7/12/ 2023	Bus Rapid Transit: US 29 - Phase 2	Neighborho od/civic association	Strongly disagree	If these interchange improvements include putting a dedicated Median lane for BRT on Rte. 29, then this is a terrible option. Studies show that this is a much worse option than the Managed Lane option in terms of cost and congestion.	Mary Beaudoin
7/15/ 2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Would be harmful to those most needing low cost transit and the environment. We need better low cost public transportation and fewer cars on road, not bloated profits for proprietary companies and more congestion.	Marianne Follingstad

7/15/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	Express toll lanes do not to enough to resolve congestion and highway expansion is not what this region needs. Public transit-oriented development is less destructive to existing neighborhoods and the environment and needs to be explored for the region first.	
7/20/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The I-270 toll-lane project is not good for Woodley Gardens, Rockville, Montgomery County and for Maryland taxpayers. No version to the toll-lane plan will help Montgomery County residents. This plan was devised to maximize profits for a private contractor. We have 12 lanes of traffic (north and southbound) in Rockville and more lanes will not help the traffic flow when the bottlenecks are elsewhere. The majority of highway users will be worse off than they are now if this toll-plan moves ahead. The Virginia toll roads have not helped taxpayers but has lined the pockets of the private business that administers the toll lanes. This has been well documented in public docs as well as articles in the Washington Post. Please do not allow the same thing to happen here in Montgomery County. The toll roads will not address the need to move toward better public transportation options. The toll lanes will increase traffic in many neighborhoods by opening additional ramps for toll users. Our neighborhoods will be negatively impacted and the state has not laid out any plan to help with noise abatement. Please reject the toll-lane plan and to focus on sustainable and equitable options.	Jeanine Gould-Kostka
7/20/2023	Op Lanes Maryland Phase 1	Project webpage	Strongly disagree		Rodolfo Pérez

7/20/2023	Op Lanes Maryland Phase 1	Project webpage	Strongly disagree	This project evolved from a DEIS and FEIS process that excluded any alternatives to adding the toll lanes. For example, before deciding to add more lanes to I-270 why not improve the MARC rail service that is PARALLEL to I-270?	Rodolfo Pérez
7/21/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree	Widening the Beltway in any form is not a solution to traffic congestion. The solution rather involves focusing on enhancing public transportation. on any given day at any time no matter how many lanes there are, one car or truck crash is all it takes to bring traffic to a standstill and providing more lanes only increases that inevitability. The beltway was NEVER meant to be for commuters. It was intended to BYPASS Washington DC. As such we need better options for commuters other than cars.	Deborah beebe
7/29/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The MD expansion of I-495/270 as currently proposed needs to be removed from the region's CLRP, as it is not consistent with TPB's policies. The project would be destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. MDOT failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the East-West jobs imbalance, along with transit, HOV, telecommuting, and other travel demand management measures. MDOT has also not studied options for congestion pricing and usage fees that do not expand lane capacity and that address equity for lower-income drivers. These other alternatives and issues need to be studied first before the failed project is put back into the CLRP. Various studies (some noted in a review by TPB) show that induced demand is a real issue for express	Bill Pugh, Coalition for Smarter Growth

				lane projects that increase total lane capacity, likely increasing VMT and GHG emissions.	
8/8/2023	Op Lanes Maryland Phase 1	Neighborhood/civic association	Strongly disagree		
8/14/2023	MD 355 Bus Rapid Transit	Project webpage	Strongly agree	MD 355 Bus Rapid Transit is a critically important project for mobility on one of Montgomery County's most heavily used bus corridors. It is one of the highest-priority, highest-value projects in the transportation plan, and I urge the COG and county leaders to deliver the service enhancements as soon as possible.	Stewart Mader
8/14/2023	Brunswick Line	Project webpage	Strongly agree	Increasing service frequency on the Brunswick Line is one of the best ways Montgomery County, Maryland, and regional leaders can take advantage of existing rail infrastructure to provide more high-quality transit service to a variety of communities, including communities that are underserved by transit.	Stewart Mader
9/5/2023	Addison Road I	Project webpage	Strongly disagree	The project is not consistent with TPB's policy framework. For example, it conflicts with TPB's aspirational initiative to improve walk and bike access to transit. As designed, this project would expand already wide and unsafe roads, making safe access to the Blue Line station even harder and undermining efforts to create walkable neighborhoods near transit.	Bill Pugh
9/5/2023	Middlebrook Road Extended Widening	Advocacy organization	Strongly disagree	This unnecessary widening project should be removed, especially with the suspension of the M-83 project and its removal from Visualize 2045. The project is not consistent with TPB's policy framework, as it would divert resources from TPB's identified priority strategies and is inconsistent with TPB's policy goal to "Actively encourage	Bill Pugh

				mode shift away from less climate-friendly modes like single occupancy vehicles".	
9/5/2023	MD 28/MD 198 Corridor Study	Friend/colleague	Strongly disagree	Remove from Visualize 2050. Note that MDOT, when promoting the ICC, considered widening of this road unnecessary because the ICC would be built. The project is not consistent with TPB's policy framework, as it would divert resources from TPB's identified priority strategies and is inconsistent with TPB's policy goal to "Actively encourage mode shift away from less climate-friendly modes like single occupancy vehicles".	Bill Pugh
9/5/2023	Montrose Parkway	Friend/colleague	Strongly disagree	This proposed 4-lane road would further divide White Flint. Instead fund needed local street network, protected bike lanes, and 355 BRT. The project is not consistent with TPB's policy framework, as it would divert resources from TPB's identified priority strategies and is inconsistent with TPB's policy goal to "Actively encourage mode shift away from less climate-friendly modes like single occupancy vehicles".	Bill Pugh
9/5/2023	US 29 Corridor	Friend/colleague	Strongly disagree	Remove from Visualize 2050. The project proposes a \$7 Billion series of grade-separated interchanges that would undermine efforts to create walkable neighborhood hubs around FLASH bus rapid transit stops. The project is not consistent with TPB's policy framework. For example, it conflicts with TPB's aspirational initiative to improve walk and bike access to transit. Also, it would divert resources from TPB's identified priority strategies and is inconsistent with TPB's policy goal to "Actively encourage mode shift away from less climate-friendly modes like single occupancy vehicles".	Bill Pugh

9/5/2 023	Bus Rapid Transit: US 29 - Phase 2	Friend/colle ague	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	MD 355 Bus Rapid Transit	Project webpage	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	MD 650 New Hampshire Avenue BRT	Friend/colle ague	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	North Bethesda Transitway Bus Rapid Transit (BRT) Project	Friend/colle ague	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	Friend/colle ague	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	Veirs Mill Bus Rapid Transit	Friend/colle ague	Strongly agree	The project supports multiple TPB goals and strategies, including the aspirational initiative to "Expand Bus Rapid Transit and Transitways."	Bill Pugh
9/5/2 023	MARC Improvemen ts	Project webpage	Strongly agree	The project provides necessary improvements for the overall safety and quality of MARC. It supports multiple TPB goals and strategies.	Bill Pugh

9/18/2023	MD 355 Bus Rapid Transit	Project webpage	Strongly agree	355 as it is now is unpleasant and ineffective at transporting drivers, pedestrians, and cyclists. Having BRT that doesn't get stuck in the same traffic as private vehicles during rush hour would be an amazing option for people to travel through the county without having to suffer through/contribute to traffic.	
9/22/2023	Addison Road I	Advocacy organization	Strongly agree	ldk	
10/2/2023	US 15 Corridor	Advocacy organization	Strongly disagree	has unnecessary capacity expansion components	Rebekah King
10/2/2023	I-70/US 40 Corridor	Advocacy organization	Strongly disagree	has unnecessary capacity expansion components	Rebekah King
10/2/2023	MD 85 Corridor	Advocacy organization	Strongly disagree	has unnecessary capacity expansion components	Rebekah King
10/2/2023	MARC Improvements	Advocacy organization	Strongly agree	Would love to see the MARC improved and service expanded. Such a great way to utilize existing infrastructure and take cars off the roads.	Rebekah King
10/2/2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and	Rebekah King
10/2/2023	MARC Improvements	Advocacy organization	Strongly agree	I support the expansion of MARC service, including 2-way transit that is not restricted to south, southeast travel in the morning in the direction of DC, but allows access to jobs and shopping in upper Montgomery County and Frederick. I also support MARC Brunswick	Gail B Landy

				line transit to Western Maryland that will preclude driving. MARC should not only support occupational traffic but also tourism, sightseeing, and recreational opportunities along the rail line.. The prevalence of train travel will reduce MVT and correspond with the goal of reducing greenhouse gas emissions largely connected to the transportation sector.	
10/2/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls. They failed to examine more effective alternatives that begin with transit-oriented development in Prince George's and eastern Montgomery to address the E-W jobs imbalance, along with transit and telecommuting,	
10/18/2023	Governor Harry W. Nice/Senator Thomas "Mac" Middleton Bridge Replacement Project	News/media	Strongly disagree		
10/18/2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree		
10/18/2023	Corridor Cities Transitway (CCT)	Project webpage	Strongly agree		

10/18 /2023	Bus Rapid Transit: US 29 - Phase 2		Strongly agree		
10/18 /2023	Randolph Road Corridor Bus Rapid Transit (BRT) Project	News/media	Strongly agree		
10/18 /2023	Brunswick Line	Advocacy organization	Strongly agree		
10/18 /2023	MARC Improvements	Advocacy organization	Strongly agree		
10/18 /2023	MARC Run-through service to L'Enfant Plaza	Advocacy organization	Strongly agree		
10/18 /2023	MARC Run-through service to Virginia	Advocacy organization	Strongly agree		
10/18 /2023	Montrose Parkway	Advocacy organization	Strongly disagree		
10/18 /2023	MD 97 at MD 28 Interchange	Advocacy organization	Strongly disagree		

10/18 /2023	MD 28/MD 198 Corridor Study	Advocacy organization	Strongly disagree		
10/18 /2023	Middlebrook Road Extended Widening	Advocacy organization	Strongly disagree		
10/18 /2023	Montrose Parkway	Advocacy organization	Strongly disagree		
11/21 /2023	I-270 Innovative Congestion Management	Advocacy organization	Strongly disagree	This project does not meet any greenhouse goals. It is much too road centric with little transit. The 2050 plan SHOULD NOT endorse the project. Beef up all area transit & solve both congestion & emissions.	
11/29/ 2023	Op Lanes Maryland Phase 1	News/media	Strongly disagree	The project would be very environmentally damaging as well as ineffective because expanding highways attracts more drivers so congestion continues. More effective multi-modal alternatives were eliminated and if implemented first, would be more equitable and reduce congestion enough to eliminate traffic bottlenecks on I-495 & I-270 .	Brian Ditzler
11/29/ 2023	MD 355 Bus Rapid Transit	News/media	Strongly agree	This project would greatly reduce congestion on MD 355, and because it would parallel I-270, would also reduce congestion on I-270 and thereby eliminate any perceived need to expand I-270, especially because innovative	Brian Ditzler

				congestion management on I-270 already has virtually eliminated congestion on that highway.	
11/29/2023	Bus Rapid Transit: US 29 - Phase 2	News/media	Strongly agree	The "Flash" buses on U.S.29 are working well, and implementing phase 2 would provide more dedicated lanes, thereby increasing the speed of the buses which would attract more ridership and lessen the number of cars on that road.	Brian Ditzler
11/29/2023	MARC Improvements	News/media	Strongly agree	MARC improvements would allow MARC service to be improved, which would attract more riders and decrease the number of people driving on MD355 and I-270. That would reduce congestion on those roads and eliminate the perceived need to expand I-270, especially because Innovative Congestion Management on I-270 has already been shown to work.	Brian Ditzler
11/29/2023	MD 650 New Hampshire Avenue BRT	News/media	Strongly agree	There is a great need for BRT on New Hampshire Avenue to reduce congestion on that road and better serve employees who work at FDA and other research businesses located on that corridor. Having BRT on MD 650 would attract more companies to locate there, which would create jobs and be good for economic development.	Brian Ditzler

Table 4. Maryland Project Suggestions

Date	Do you have any suggested projects that should be considered for the long-range transportation plan (Visualize 2050)?	Name
6/13/2023	More transit of every kind should be included instead of roads.	
6/14/2023	Create a countywide package of walking, biking, and safety improvements. Nearly all state roads should be made safe for biking, which means a bike lane protected and separated from the road. This includes Goldsboro Rd, River Rd, and Connecticut Avenue. Build sidewalks where possible. People need should be able to walk along state roads safely. Build cross-walks along population centers, every 100 meters.	Brian Robinson
6/14/2023	We need a connected bicycle network (separated bike lanes) throughout Montgomery County and Prince George's county.	Ethan Goffman
6/14/2023	All current freeways should have half their lane miles converted into rail and BRT dedicated right of way. We need to make the state more and more accessible, and the easiest way is to re allocate, mile by mile, the area we are already using inefficiently to move one person in one car to become mass transit moving many people with much less space and energy.	Jacob Allen Barker
6/14/2023	I'd like to see protect bikes lanes along the length of RT 355, CT Ave, Georgia Ave, NH Ave, Randolph Rd, Viers Mill Rd, and other major north-south and east-west major roads in Montgomery County. Bike lanes can save lives and encourage more people to use this health, inexpensive and eco-friendly transportation option.	Andrea Cimino
6/14/2023	ICC extension to Baltimore Washington Parkway to redesignate as 495	Steve Warner
6/14/2023	Maryland and Virginia have dispersed residences and jobs. It is difficult to successfully serve with big buses and rail. Cochabamba, Bolivia, is also sprawled across a very big valley. There, they accomplish inexpensive, frequent, reliable, and dense public transit by tailoring the size of the vehicle (big buses, half-size buses, passenger vans, and sedans) to the popularity of the bus route. Most vehicles on the roads are public transit vehicles. Transfers are easy because the public transit vehicles are very frequent and pickup locations are well marked with the routes and schedules. When I was there I never had to walk more than a block to go anywhere in the valley. Cochabamba has limited means; yet if they can serve their population well with public transit, we can, as well. I	Roselie Bright

	don't think the expense of, and delays caused by, collecting fares are worthwhile. We need to encourage ridership and efficient trips. Taxpayer costs for subsidizing fares will more than offset larger public health gains by reducing pollution, and lower burdens on road infrastructure by reducing the numbers of vehicles on the roads. Some of the dollars saved from repaving projects could be redirected to adding more bus shelters. We need to get our residents of all ages to see private vehicles as more of a nuisance and expense than they are worth.	
6/14/2023	Please finish the Purple Line! Thank You!	Nic Kotschoubey
6/19/2023	Countywide package of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops	Alex Demarais
6/19/2023	Packages of Metro, MARC and BRT station access improvements for walking, biking, local street connectivity and safe	
6/24/2023	a light rail line from the end of the Red line metro to at least Frederick, could possibly be linked to the purple line	Bob R
6/25/2023	Get the speeding, racing, threatening, treacherous, law ignoring idiots off the roads so they stop killing decent people. Give the police and legal system power to prosecute.	Mary
6/25/2023	Road diets for safety. On arterial highways with narrow sidewalks located at the curb, the motor vehicle lane adjoining the sidewalk must be removed for safety reasons, as was recently done on Old Georgetown Road (MD187). Highways needing this treatment include US29 from White Oak south, Georgia Avenue from Bel Pre Road south, University Blvd, MD355 in Gaithersburg, parts of Connecticut Ave, etc.	
6/25/2023	Please shift funding from road-building to making the ones we have safer for everyone, that is, for pedestrians and cyclists as well as for cars, and to transit projects that support transit-oriented communities with safe, convenient walking and biking access to that transit. We can't afford to go another 25 years making the same mistakes that have led us to the current degraded environment and climate crisis.	Anne Ambler
6/26/2023	Light rail that runs on the entire capital beltway loop. More bike lanes. More Bus Rapid Transit. No road expansions and no toll lanes. More dedicated bus lanes. More frequent, better, sustainable, and reliable public transit options. We need to aggressively put in more and more diverse public transit options and actively work to decrease cars.	

6/26/2023	Countywide package of walking and biking safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops.	Shannon Shea
6/27/2023	Promote growth around metro stops to increase density in areas that can support it and have substantial access to public transportation. The white flint mall has sat vacant for years now despite taking up a ton of space right near a metro stop. This region, and the metro owned land adjacent to the North Bethesda stop should be prioritized for high density growth to promote the area. Proximity to the metro with easy access to Rockville, Bethesda, and DC should make this area highly desirable, and the longer these spaces remain unused the more we continue to lack substantial housing supply for those who need it	Jacob Goldberg
6/27/2023	Op Lanes Maryland	Gail Landy
6/28/2023	Just eliminate projects that simply encourage more vehicles on the road. Light rail should be the only alternative.	John Fay
6/28/2023	North Bethesda Transitway BRT, Randolph Road Corridor BRT, Veirs Mill BRT, packages of access improvements for walking and biking at Metro, MARC and BRT stations, and walking, biking and safety improvements in older neighborhoods lacking safe ways to walk, bike and access bus stops	Brian Ditzler
6/29/2023	YES! I visualize 2050 as a year by which we will have a functioning Purple Line, a thriving MARC, WMATA, and express buses all ferrying folks to and fro efficiently, and creative solutions to auto traffic (reversible lanes, high tolls to pay for lane maintenance to further disincentivize private auto highway use, and charges for commercial trucking, etc). My real dream would be an elevated train circling the Beltway and making all the exit stops, where folks could connect with a fuel-efficient or electrified fleet of buses to take them to their destination.	Nan Wellins
6/29/2023	WMATA bus priority projects such as Silver Hill Rd, Morgan Blvd Metro complete streets, Prince George's county packages of Metro, MARC and bus transfer station access improvements for walking, biking, local street connectivity and safety, Prince George's County-wide package of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops	Brendan Wray
6/30/2023	ALL BRT proposals must be incorporated into a workable network across the region. This is the only way to provide workers a way of commuting in a reasonable amount of time and cost.	Patty McGrath

6/30/2023	We need a complete overhaul of bus service making it QUICK and cost effective. Here are some of the BRT proposals for Maryland which I fully support: Bus Rapid Transit US 29 MD 355 Bus Rapid Transit MD 650 New Hampshire Avenue BRT North Bethesda Transitway Bus Rapid Transit (BRT) Project Randolph Road Corridor Bus Rapid Transit (BRT) Project Veirs Mill Bus Rapid Transit	Patty McGrath
6/30/2023	Countywide package of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops	Frances Stewart
6/30/2023	On 270 - more well designed, public transit, rapid rail, monorail.	sylvia diss
6/30/2023	More transit is needed	nanci wilkinson
7/1/2023	Extend metro stations all the way to Frederick, or build high speed rail between Frederick and metro stations.	
7/5/2023	- Packages of Metro, MARC and BRT station access improvements for walking, biking, local street connectivity and safety - Countywide package of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops	
7/9/2023	RED LINE IN BALTIMORE, MORE MARC TRAINS FROM NORTH AND SOUTH OF DC, MORE BIKE AND PEDESTRIAN ACCESS, SUPPORT MORE TELEWORKING, SUPORT MASS TRANSIT GENERALLY	Robert Soreng
7/10/2023	Please consider widening 270 at the existing 2 -lane bottle neck before burdening businesses and residents with tolls benefitting only third-parties.	Karen Olk
7/11/2023	Provide a transit connection to the Baltimore Washington International Airport. We used to have a Metro Bus. We need to be able to reach an important airport via public transit.	
7/20/2023	Large investment in sustainable and equitable transportation! Link here.	Jeanine Gould-Kostka
7/20/2023	All day MARC service to improve the I-270 corridor mobility	Rodolfo Pérez
9/5/2023	Keep out of Visualize 2050 the proposed I-495/Medical Center interchange project in Prince George's County near Downtown Largo Metro. The project would expand the interchange and undermine efforts to foster a safe, local street grid that allows walking, biking and transit access in the Downtown Largo neighborhood. The project is not consistent with TPB's policy framework. For example, it conflicts with TPB's aspirational initiative to improve walk and bike access to transit.	Bill Pugh

9/5/2023	Packages of Metrorail, MARC, Purple Line, and BRT station access improvements for walking, biking, local street connectivity and safety.	Bill Pugh
9/13/2023	Rapid transit network in Montgomery and PG County	Mostafa Elnahass
9/16/2023	MARC Train ROW acquisition from Freight rail	Mostafa Elnahass
9/16/2023	MARC train electrification	Mostafa Elnahass
10/2/2023	Countywide and City packages of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops	Rebekah King

Table 5. Virginia Project Comments

Date	Project	How did you learn about this project?	I support this project's inclusion in Visualize 2050?	Explain why you support/do not support the project's inclusion in the Visualize 2050. You can also share other comments about the project's inclusion in the plan.	Name
2/27/2023	Arcola Boulevard Improvements	Friend/colleague	Neutral		
2/27/2023	I-66 Improvements		Strongly disagree	The Transform I-66 Megaprojects--both outside and inside the Beltway--have largely been completed. If there are a few remaining elements from those projects that VDOT wants to retain in Visualize 2050, those elements should be resubmitted as separate, clearly described projects. Also, any additional widening of I-66 inside the Beltway should be clearly tied to a firm commitment by VDOT to toll I-66 in both directions, either during the eight peak weekday commuting hours or ideally 24/7. Finally, VDOT should reconfigure its tolling system inside the Beltway to reduce the tolls to zero whenever that segment would be free-flowing at 55 MPH.	Allen Muchnick
3/3/2023	I-66 Improvements (CE1956: I-66 and US 29 Interchange, Widen and Construct	Project webpage (The project map depicts downtown DC.)	Strongly disagree	I believe the \$255 Million project described at I-66 and Rte 29 in Gainesville has been completed. Any incomplete or future elements should be resubmitted as a separate new project.	

	US 29 and VA 55)				
3/3/2023	Grant Avenue Road Diet		Neutral	This project is largely, if not entirely, funded and about to go to construction. If any element is not fully funded for construction, it should be resubmitted as a new, separate, re-scoped project. This project would not expand roadway capacity.	Allen Muchnick
3/13/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	Any lane widening plan is doomed to failure from the start. The last thing needed is an extra lane for such useless endeavors. Especially when it makes the commute worse by creating an induced demand of vehicles thus creating more traffic than necessary. Northern Virginia is already polluted with enough cars and enough traffic, the last thing we need is a wider lane just for more traffic to congest it all over again. Northern Virginia requires more bike lanes, more train lines, more anything else but highway/freeway/route lane expansions. We NEED less traffic and less people in cars not more people in cars and more congestion on our roads.	

3/14/2023	VA 7, Widen, any road widening		Strongly disagree	adding additional general road travel lanes increases miles driven through induced demand. this is incompatible with making the Washington area reduce its carbon foot print and should be strongly discouraged to not make the climate problem worse	Steve Wardell
3/15/2023	VA 28 Widening, General Comment - stop widening roads. This induces more driving over time, increasing emissions and hurting the region's climate goals.		Strongly disagree	There are far too many roadway widening projects in this plan. Widening roadways induces additional driving over time, increasing emissions and moving the region further from its stated climate goals. The majority of funding should be spent on maintaining existing infrastructure and expanding climate-friendly modes of travel: public transportation and active transportation like biking and walking. Continuing to spend the majority of money on roadway widening is climate arson.	

3/15/2023	Duke Street BRT Design & Construction	Project webpage, i live in the Duke St corridor	Strongly agree	BRT projects like the one on Duke St are beneficial to climate and enable more people to travel without relying on cars. Transit and bike/ped projects like this should receive the vast majority of funding	Alex Goyette
3/16/2023	Richmond Highway Corridor Improvements	Fairfax County Alert	Strongly agree		
3/22/2023	Route 1 Improvements, CE2161	Project webpage	Disagree	Remove widening VA 123 to 6 lanes from Annapolis Way to US 1 (VP10g) from the project. Less than 20000 AADT does not warrant the high priority highway expansion. Developer can improve roadway as needed.	Mark Scheufler

3/22/2023	Rippon Boulevard Extension	Project webpage	Strongly agree	Update Project Description to future scope	Mark Scheufler
3/22/2023	Wellington Road Improvements	Project webpage	Neutral	CE3695 - Update Project Description to future scope/Combine with CE2145	Mark Scheufler
3/22/2023	Route 1 Improvements	Project webpage	Neutral	CE1942 - Update Project Description to future scope [Align with High Capacity Transit]	Mark Scheufler

3/22/2023	Route 1 Improvements	Project webpage	Neutral	CE2685 - Remove/Consolidate/Update Project Description to future scope [Align with High Capacity Transit]	Mark Scheufler
3/22/2023	Route 1 Improvements	Project webpage	Disagree	CE3180 - Update Project Description to future scope [Align with High Capacity Transit] - Project is restricted due to I-95 Express Lane Concessionaire Agreement https://p3.virginia.gov/docs/95-395_Third_ARCA_executed/95-395_Third_ARCA_(Executed).pdf	Mark Scheufler
3/22/2023	Catharpin Road, Widening	Project webpage	Disagree	Local Project. Project should be funded by developer/proffer as needed	Mark Scheufler

3/22/2023	McGraws Corner Drive	Project webpage	Disagree	Local Project. Project should be funded by developer/proffer as needed	Mark Scheufler
3/22/2023	Vint Hill Road Improvements	Project webpage	Disagree	Local Project. Project should be funded by developer/proffer as needed	Mark Scheufler
3/22/2023	John Marshall Widening		Disagree	CE3694 - Local Project. Project should be funded by developer/proffer as needed	Mark Scheufler

3/22/2023	Dale City Parkway Node New Through Boulevard	Project webpage	Disagree	Local Project. Project should be funded by developer/proffer as needed	Mark Scheufler
3/22/2023	Battlefield Park Bypass Project	Project webpage	Strongly disagree	Recommend Route 29 Alternate Alignment	Mark Scheufler
3/22/2023	US 15 Improvements		Neutral	CE3162 - Combine with CE1803	Mark Scheufler

4/25/2023	US 15 Improvements	Project webpage	Strongly agree	I'm assuming this is the project to widen US 15 and build a railroad overpass near the Town of Haymarket (CE1803). If not, please file these comments under that project. This is a badly overdue project that causes both congestion and safety issues to this day. Traffic on this stretch of US 15 has grown significantly over the last 10 years and it not only serves as a 2-lane bottleneck on a 4-lane road, but also a high-risk area due to the at-grade railroad crossing. This project would go a long way in lessening both congestion and injuries/fatalities.	
4/25/2023	John Marshall Widening	Project webpage	Strongly agree		
5/30/2023	Rte 7 Corridor Improvements - Phase 2		Agree	The Sierra Club Virginia Chapter asks that the Transportation Planning Board create a Visualize 2050 plan that reflects the goals of regional, state and local planners, and the desires of residents. For example: <ul style="list-style-type: none"> • The Metropolitan Washington Council of Governments acknowledges that in order to meet its goal of a 50 percent reduction in GHG emissions below 2005 levels, an unprecedented set of collaborative actions is needed. • The TPB's climate study showed that the region must shift far more trips to sustainable modes and create compact walkable communities - in addition to adopting electric vehicles - to meet its climate target. The climate study also showed that this is feasible but it requires urgent action starting this decade. TPB's Climate Change Mitigation Study found that the region must reduce per capita vehicle miles traveled of passenger cars by 20% by 2030 relative to pre-pandemic levels in addition to 	

				<p>rapidly adopting electric vehicles to meet the COG climate target.</p> <ul style="list-style-type: none"> • Virginia’s Transportation Plan (VTrans) includes objectives to reduce per-capita vehicle miles traveled, reduce transportation-related NOX, VOC, PM, and CO emissions, and increase the number of trips traveled by active transportation (bicycling and walking.) • Local efforts in Virginia are underway to reduce parking requirement minimums, which necessitates more multimodal transit to move people, rather than more lanes to move cars. • Families and individuals desire safe ways to get to shopping, recreation and other destinations without constantly having to pile into a car. Highway expansion projects are the future we are trying to avoid. Route 7 BRT is one example of a project that meets the region’s goals, as well as the needs of residents. However, the projects submitted by the member jurisdictions and agencies are too weighted toward road expansion, and do not integrate transit improvements or bicycling and pedestrian connections sufficiently. For example, improvements on Routes 50, 29, 123 and other arterial roads in Fairfax County should provide dedicated bus lines and BRT. 	
5/30/2023	Duke Street BRT Design & Construction	Advocacy organization	Strongly agree		
5/30/2023	Duke Street BRT Design	Friend/colleague	Strongly agree	In their final report to City Council, the DSIM Advisory Group stated that "The long-term plan for the corridor should include center running bus lanes for the entirety of Duke Street with separate spaces for pedestrians and	Jonathan Krall

	& Construction			cyclists." I am fully supportive of this recommendation. History shows that transit investments pay off and that, where built, high-quality transit improves equity.	
5/30/ 2023	Alexandria 4th Track (Any project that improves VRE)	Friend/colle ague	Strongly agree	I want to more easily travel in Virginia by rail. Driving a car is boring and dangerous (a deadly combination) . I am not getting any younger and don't want to become a shut-in in my home because I am no longer willing to drive a car.	Jonathan Krall
5/30/ 2023	DASH Service Expansion	Advocacy organization	Strongly agree	Expanding the DASH fleet is foundational to improving frequency of service. Increased frequencies have been proven in Alexandria and elsewhere to increase ridership.	JAMES DURHAM
5/30/ 2023	Duke Street BRT Design & Construction	Project webpage	Strongly agree	Designing and building the Duke Street BRT is the most important transportation project in Alexandria for the next decade. BRT infrastructure will improve safety, travel time and reliability for both local (DASH) bus service as well as regional (Metrobus) service that includes the Duke Street corridor.	JAMES DURHAM
5/30/ 2023	Duke Street BRT Design & Construction	Friend/colle ague	Strongly agree	Important for safety and other improvements on Duke Street	Bonnie ODay

5/30/2023	DASH Service Expansion	Advocacy organization	Strongly agree	Need better bus service to encourage people not to drive	Bonnie ODay
5/30/2023	Duke Street BRT Design & Construction	Friend/colleague	Strongly agree	Providing more transit and pedestrian options will improve equity in the community, reduce travel times, help the environment, and increase safety for all users.	Dane Lauritzen
5/31/2023	Duke Street BRT Design & Construction	Project webpage	Strongly agree	Duke Street is Alexandria's primary east-west corridor and is expected to serve as a site for much of the city's development over the next few decades. Implementing high quality BRT is crucial to ensuring that Alexandrians and other Virginians can move to and through the City safely, efficiently, and sustainably	
5/31/2023	DASH Service Expansion	Advocacy organization	Strongly agree	DASH service expansion will build on the success of Alexandria's bus service, which is critical sustainable transportation infrastructure in the region	
5/31/2023	Croson Lane widening	projects listed here	Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	

5/31/2023	Devlin Road Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	Landmark Transit Center		Strongly agree		
5/31/2023	Landmark Transit Center		Strongly agree		
5/31/2023	Lee Highway Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	Liberia Avenue widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	

5/31/2023	Grant Avenue Road Diet		Strongly agree		
5/31/2023	Loudoun County Parkway Widening (Shellhorn Road to Ryan Road)		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	Magarity Road Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	Rolling Road widening project		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	

5/31/2023	Route 15 North Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	West End Transitway		Strongly agree		
5/31/2023	VA 123 Widening (Fairfax)		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	VA 123 Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will	

	(Prince William)			contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	US 1 Bus Rapid Transit		Strongly agree		
5/31/2023	VRE L'Enfant Station and 4th Track		Strongly agree		
5/31/2023	Washington Boulevard Widening		Strongly disagree	road widening for cars is a waste of money and only encourages more driving. it's well-established that this will not improve congestion in the long term, but will contribute additional carbon emissions. road widening is fiscally irresponsible and at this point is basically climate arson	
5/31/2023	VRE Service Improvements (Reduce Headways)		Strongly agree		
6/14/2023	Long Bridge VA - DC	News/media	Strongly agree		

6/14/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway) (Any project that involves widening roadways for increasing SOV capacity or reducing traffic)	Project webpage	Strongly disagree	Fairfax County and the greater region need to stop widening roads for congestion relief. Solutions to traffic are not solved with widening. Other ideas such as transit, active transportation infrastructure, and providing alternative routes by creating new streets and grids of streets creates a more sustainable and resilient system. Stop wasting money and degrading the environment.	JoAnne Fiebe
6/14/2023	Alexandria 4th Track	Advocacy organization	Strongly agree		
6/14/2023	Alexandria Potomac Yard Metro Station Improvements, Including Southwest Entrance	Advocacy organization	Strongly agree		
6/14/2023	Arkendale to Powells Creek Third Track Project and	Advocacy organization	Strongly agree		

	Potomac Shores Station				
6/14/2023	DASH Service Expansion	Advocacy organization	Strongly agree		
6/14/2023	DASH Service Expansion	Advocacy organization	Strongly agree		
6/14/2023	Duke Street BRT Design & Construction	Advocacy organization	Strongly agree		
6/14/2023	Franconia to Occoquan 3rd Track Project	Advocacy organization	Strongly agree		
6/14/2023	Herndon Metrorail Intermodal Access Improvements	Advocacy organization	Strongly agree		
6/14/2023	Herndon Metrorail Intermodal Access Improvements - Phase II	Advocacy organization	Strongly agree		

6/14/2023	Landmark Transit Center	Advocacy organization	Strongly agree		
6/14/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Improved passenger rail service over long bridge is long overdue. This needs to be a priority for the region.	
6/14/2023	Multimodal Bridge to Van Dorn Metro Station	Advocacy organization	Strongly agree		
6/14/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	I am most interested in the bike-pedestrian bridge to be connected between Long Bridge Park and East and West Potomac Parks. We need more ways to get safely between MD and Virginia on foot and by bicycle. It would allow for recreation, commuting, and economic opportunities, as Marylanders could bike to dinner in VA, and vice versa.	Brian Robinson
6/14/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link	George Hite
6/14/2023	Route 1 Metroway Extension (Alexandria)	Advocacy organization	Strongly agree		
6/14/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree		

6/14/2023	West End Transitway	Advocacy organization	Strongly agree		
6/14/2023	Long Bridge VA - DC	News/media	Strongly agree	Strong agree with inclusion of the new bridge to add 2 new tracks to the Long Bridge railway crossing of the Potomac. This should be of the utmost priority. If there is a funding question, I would suggest adding congestion toll pricing to I395 inside the beltway.	Paul Brown
6/14/2023	Battlefield Park Bypass Project	Advocacy organization	Strongly disagree	Multiple planning documents, combatting climate change, and building humane-focused live-able cities, all call for discouraging sprawl and auto-centric roadways. We should be promoting transit which is a mode that all can use, not just driving, which only the able-bodied who can afford cars can use. Widening and building new roadways should not be added to Visualize 2050 and replaced by public transit projects instead.	
6/14/2023	New Guinea Road, Construct	Advocacy organization	Strongly disagree	Multiple planning documents, combatting climate change, and building humane-focused live-able cities, all call for discouraging sprawl and auto-centric roadways. We should be promoting transit which is a mode that all can use, not just driving, which only the able-bodied who can afford cars can use. Widening and building new roadways should not be added to Visualize 2050 and replaced by public transit projects instead.	
6/14/2023	VA 7 (Second Potomac River Metrorail crossing)	News/media	Strongly agree	To promote sustainable development and transport and redevelop auto-centric strip malls, we need to expand metro. Metro has three lines running under Rosslyn to Downtown DC and one can be separated out to run on a new route to downtown - ideally via Rte 7 from Tysons to Alexandria/Pentagon and then crossing into DC. A new metro crossing would help metro be more competitive with the auto and decongest the Rosslyn River crossing.	

6/14/2023	Boone Blvd Extension	Advocacy organization	Strongly disagree	We do not need more roads to solve the issue of too many cars/traffic. There should be more dedicated alternative methods of getting people around. Such as bike lanes instead to help people move around without needing a car. More revenue can be generated from bike rental stations and/or scooter stations such as those found in DC.	
6/14/2023	Braddock Rd Improvements (Fairfax County Pkwy to Rte 123/Ox Road)	Advocacy organization	Strongly disagree	This plan should be removed. Instead build infrastructure for alternative ways to move people around such as bike lanes, dedicated bus-only lanes, or even trains running through the median.	
6/14/2023	DASH Service Expansion	Advocacy organization	Strongly agree	This is a great way to reduce traffic, give people alternative ways to get around.	
6/14/2023	Eisenhower Valley Access and Circulation Improvements	Advocacy organization	Strongly disagree	Remove this plan. It's already congested enough, adding more lanes will add more cars. With Eisenhower Ave being so close to the metro, there is a unique opportunity to increase funding to maintain, improve service, and expand our transit network. Widening roads divides neighborhoods, makes it more dangerous for people to walk, and ultimately disrupts communities as they are more disconnected.	Andy
6/14/2023	Fairfax County Parkway Improvements	News/media	Strongly disagree	Remove this plan. Widening roads will only bring more cars, congestion, pollution and division of northern virginia communities. There should be an increase funding to maintain, improve service, and expand our transit network. A transit system running up and down fairfax county parkway would alleviate a lot of traffic, lessen car dependency, increase a sense of community,	Andy

				make streets safer and save people a lot of time not stuck in terrible polluting traffic.	
6/14/2023	Herndon Metrorail Intermodal Access Improvements	Friend/colleague	Agree	While I support it, there should not be any road widenings which would increase congestion. Focus on more bike lanes and providing alternative modes of people getting across such as bus-only lanes. You can also build bike-rental and scooter rental stations.	Andy
6/14/2023	Landmark Transit Center	Advocacy organization	Strongly agree	A dedicated transit center sounds great. There should be constructed bike lanes to help people get around in other methods. We need to increase access to jobs by transit, and address regional equity	Andy
6/14/2023	Lee Highway Widening	Advocacy organization	Strongly disagree	This should be cancelled. This would leave most people stuck in traffic, destroy more nature. This plan failed to examine more effective alternatives that begin with transit-oriented development. There needs to be more alternatives than having to own a car!	Andy
6/14/2023	Long Bridge VA - DC		Strongly agree	This is a great project to increase transit efficiency, and help people move around without needing a car. This is a great shift of funding from wasteful highway and road expansion projects to alternative methods of moving around (walking, biking, transit).	
6/14/2023	Route 1 Improvements		Strongly disagree	This should be canceled. Widening roads will not solve congestion or traffic. Shift funding from wasteful highway and road expansion projects to both redesigning arterial roads to make them safer for walking, biking, transit AND protect our roads from increased flooding from climate change.	
6/14/2023	Shirley Gate Road	Advocacy organization	Strongly disagree	Adding more roads will only increase more cars on the road, leading to more congestion, people stuck in traffic,	

	Improvements			unsafes roads and pollution. The alternative is to support packages of local street and transit projects that support transit-oriented communities with safe, convenient walking and biking access and new mixed-use development close to Metro, rail and bus rapid transit stations	
6/14/2023	VA 28 Widening	Advocacy organization	Strongly disagree	Adding more roads will simply induce people to drive more, it will lead to more congestion, more pollution, more time stuck in traffic and unsafes highways. Shift funding from wasteful highway and road expansion projects to redesigning arterial roads to make them safer for walking, biking, transit. Create transit-oriented development!	
6/14/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	Cancel this. Adding more lanes/widening will not solve the problem. It will create more congestion, unsafes roads, more people stuck in traffic, money wasted. Shift funding from wasteful highway and road expansion projects to redesigning arterial roads to make them safer for walking, biking, transit.	
6/14/2023	Battlefield Park Bypass Project	Friend/colleague	Strongly disagree	This should be removed. Adding more roads will only increase traffic, congestion, and separate communities. Manassas is severely lacking transit options, preventing people from moving to where they need to, find jobs in new cities. Shift funding from wasteful highway and road expansion projects to both redesigning arterial roads to make them safer for walking, biking, transit AND protect our roads from increased flooding from climate change	
6/14/2023	Dulles Airport Access Road Project	Friend/colleague	Strongly disagree	This plan should be removed. Shift funding from wasteful highway and road expansion projects to redesigning arterial roads to make them safer for walking, biking, transit AND protect our roads from increased flooding from climate change. We should	

				invest in more transit-oriented development and providing an alternative to driving! Build more train tracks, more dedicated bike lanes, trams, trolleys, etc. People should be able to move around without needing a car. Stop wasting our tax money on roads we can't use unless we buy a car.	
6/14/2023	New Guinea Road, Construct	Friend/colleague	Strongly disagree	Adding more lanes to the road will make them less safe in our community! Shift funding from wasteful highway and road expansion projects to both redesigning arterial roads to make them safer for walking, biking, transit AND protect our roads from increased flooding from climate change. We should invest in dedicated bike lanes in the beautiful new guinea road so people can get around without needing a car!	
6/14/2023	Reston Parkway Improvements	Friend/colleague	Strongly disagree	Cancel this plan. Widening roads will only create more congestion, traffic, create less safe streets, and separate our community. Shift funding from wasteful highway and road expansion projects to both redesigning arterial roads to make them safer for walking, biking, transit AND protect our roads from increased flooding from climate change. Create dedicated, safe bike lanes instead, or bus-only lanes, or bus-rapid transit system.	
6/14/2023	Telegraph Road widening	Neighborhood/civic association	Strongly disagree	This plan should be scrapped. Widening roads only leads to induced demand. There will be more congestion, more unsafe streets for our kids, more pollution, and more people stuck in traffic. Increase funding to maintain, improve service, and expand our transit network Support packages of local street and transit projects that support transit-oriented communities with safe, convenient walking and biking access and new	

				mixed-use development close to Metro, rail and bus rapid transit stations	
6/14/2023	Frying Pan Road Widening	Advocacy organization	Strongly disagree	We cannot widen our way out of traffic. Putting more space for cars is antithetical to mitigating climate change. Stop that right now.	Kripa Patwardhan
6/14/2023	Rolling Road widening project	Advocacy organization	Strongly disagree	Stop widening roads! This is antithetical to combatting climate change. What we need is LESS space for cars.	Kripa Patwardhan
6/14/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Nic Kotschoubey
6/14/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Helps with commuting, long-distance travel, freight, pedestrian and bicycle travel.	
6/15/2023	Long Bridge VA - DC		Strongly agree	This is a crucial project to improve rail passenger service on the East Coast. It will also add iconic new pedestrian and bicycle facilities.	
6/15/2023	Alexandria 4th Track	Advocacy organization	Strongly agree		B. Morrow
6/15/2023	DASH Service Expansion	Neighborhood/civic association	Strongly agree		B. Morrow
6/15/2023	Duke Street BRT Design & Construction	Project webpage	Strongly agree		B. Morrow
6/15/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	It is the most critical project to improve mobility between VA and DC.	John Burke

6/15/2023	Soapstone Drive Connector	News/media	Strongly agree	Soapstone Drive Connector will help create an additional option to cross the Dulles Toll Road, connect North and South Reston, and support transit-oriented development.	
6/15/2023	I-95 Express Lane Extension to Fredericksburg	News/media	Strongly agree	Traffic is really bad on I-95. The express lanes work wonderfully. It would be great to see this expanded further.	
6/15/2023	Greensboro Drive Extension	Project webpage	Agree	Need to continue to create more of a grid of roads in Tysons.	
6/15/2023	Rte 7 Corridor Improvements - Phase 2	Project webpage	Strongly agree	Need to complete the Route 7 expansion project - it has been ongoing for years and needs to be complete. Capacity is needed and addition of bike/ped path, better bus stops, and sound walls are great.	
6/15/2023	Dulles Airport Access Road Project		Strongly disagree	I have never seen the Dulles Airport Access Road congested, and it is unconscionable that the Airports Authority would use toll road funds to widen the access road that is only for airport users who pay nothing. The Airports Authority has dramatically increased tolls over the past years, has stopped transit buses from using the Airport Access Road, and now wants to make this inaccessible road for commuters even wider, likely using the tolls we pay. No, this is not right. The only way the Airport Access Road should be allowed to be widened is if it is converted to be like the Express Lanes and allow HOV-3 to use these lanes for free. This should be made part of the Express Lanes network with HOV-3 able to bypass the main toll plaza. Give commuters more	

				options by expanding express bus services and helping to encourage carpooling as well.	
6/16/2023	Long Bridge VA - DC	Friend/colleague	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	
6/17/2023	Dulles Toll Road Expansion	News/media	Strongly disagree	These outdated proposals are unnecessary and would undermine the region's major investment in the Silver Line	Ram V
6/17/2023	Battlefield Park Bypass Project	News/media	Strongly disagree	This will encourage even more high-speed and dangerous traffic while cutting down more forests and undermining the county's vision for walkable, bikeable and transit-friendly communities	Ram V
6/17/2023	Sudley Road 3rd Lane, NB	News/media	Strongly disagree	This will increase traffic and cut down residential and wooded areas	Ram V
6/17/2023	Rte. 28 Bypass	News/media	Strongly disagree	increases traffic, better projects in the area to focus on	Ram V

6/17/2023	I-66 Improvements (FABB recommendations)	Advocacy organization	Strongly agree	Would like to see bike lane improvements A package of protected bike lanes as part of a region-wide bike lane and trail network. Shared-use side paths to complete bike network connections where on-road bike lanes cannot be installed. Pedestrian- and bicyclist-scale lighting along bike lanes, trails, and shared-use paths. Provisions (personnel, equipment, and funding) for long-term bike lane and trail maintenance, to include snow removal and regular sweeping. Package of intersection treatments (bicycle boxes, stop bars, lead signal indicators) to accompany new protected bike lanes. New and repaved roadways should include paved shoulders where bike lanes are not possible. Near term proposal for I-66 Trail (start immediately): Landscaping to separate trail from roadway and block noise and debris plus tree planting to provide shade. Medium term proposal: Install solar panel trail covers, where practical (I-66 and other trails abutting major highways) to provide power, shade, and rain protection	Matthew Henry
6/18/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Brian Lutenegger
6/18/2023	Rte 7 Corridor Improvements - Phase 2 (Route 7 Bus Rapid Transit (BRT) project)	Advocacy organization	Strongly agree	The planned Route 7 Bus Rapid Transit project will significantly improve travel on Northern Virginia's second busiest bus corridor and support plans for walkable transit-friendly activity centers. But Fairfax County is saying they don't want to do it until years from now after Route 1 BRT is complete.	Brian Lutenegger

6/19/2023	Long Bridge VA - DC	Advocacy organization (News Media)	Strongly agree	This project will provide an important new pedestrian and bicycle link.	Steven Ward
6/19/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	Outdated proposals that is unnecessary would undermine the region's major investment in the Silver Line. Money would be better used for improving bike-ped facilities in Herndon, Reston, Vienna, and McLean.	Steven Ward
6/19/2023	Dulles Toll Road Collector	Advocacy organization	Strongly disagree	Outdated proposals that is unnecessary would undermine the region's major investment in the Silver Line. Money would be better used for improving bike-ped facilities in Herndon, Reston, Vienna, and McLean.	Steven Ward
6/19/2023	Magarity Road Widening	Advocacy organization	Strongly disagree	Project encourages even more high-speed and dangerous traffic while undermining the county's vision for walkable, bikeable and transit-friendly communities	Steven Ward
6/19/2023	Dulles Toll Road Expansion	News/media	Strongly disagree	Metro just opened a silver line to the airport. We need to move people out of cars into more environmentally friendly ways of traveling to the airport. Expanding vehicle capacity works against this	Mary Crowe
6/19/2023	Shirley Gate Road Improvements	News/media	Strongly disagree	Just moved to the area and this road handles traffic well-better design than other roads in the area. Have been on it during commute time- it is not at capacity	Mary Crowe
6/19/2023	Fairfax County Parkway Improvements	News/media	Agree		Mary Crowe

6/19/2023	New Guinea Road, Construct	News/media	Strongly disagree	You'll be destroying important natural areas without really alleviating the problem	Mary Crowe
6/19/2023	Multimodal Bridge to Van Dorn Metro Station		Strongly agree	We need safe ways for folks to walk bike and scooter to access the metro	Mary Crowe
6/23/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Kevin O'Brien
6/23/2023	Duke Street BRT Design & Construction	Advocacy organization	Strongly agree	Transit-focused project that also includes robust bike and pedestrian improvements. Exactly how we need to be thinking about our key transportation corridors.	Kevin O'Brien
6/23/2023	DASH Service Expansion	Advocacy organization	Strongly agree	More transit is the answer.	Kevin O'Brien
6/23/2023	Alexandria 4th Track	Advocacy organization	Strongly agree	More rail capacity is critical to expanding transit options in the region and further downstate.	Kevin O'Brien
6/23/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	These outdated proposals are unnecessary and would undermine the region's major investment in the Silver Line.	Kevin O'Brien
6/23/2023	Rte. 28 Bypass	Advocacy organization	Strongly disagree	No more highways.	Kevin O'Brien
6/23/2023	VA 7, Widen	Advocacy organization	Strongly disagree	We don't need wider highways. Invest limited dollars in transit, bike, and pedestrian improvements.	Kevin O'Brien

6/23/2023	Route 1 Improvements	Advocacy organization	Strongly disagree	Remove road widening and replace with high-capacity transit that is under study	Kevin O'Brien
6/23/2023	Long Bridge VA - DC	News/media	Strongly agree		
6/23/2023	Herndon Metrorail Intermodal Access Improvements	Advocacy organization	Strongly agree		
6/23/2023	US 1 Bus Rapid Transit	News/media	Strongly agree		
6/25/2023	I-495 Improvements		Strongly disagree	It is destroying the ecosystem and the community. VDOT changed the plans after the EA was completed, dramatically increasing the environmental impacts of the project and removing planned mitigations. It is an abomination.	Claudia M O'Brien
6/25/2023	Long Bridge VA - DC	Friend/colleague		Generally, I'd like climate-focused investments and not investments in projects that expand cars and GHGs	
6/25/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Stephen D'Alessio
6/25/2023	Long Bridge VA - DC	News/media	Strongly agree	Adding a new crossing for rail and walking will promote greater use of mass transit rather than cars and enhance the improvement of rail for the entire East Coast. This project is quite likely to slow the increase in	David Yaffe

				GHG emitting forms of transportation for commuting as well as longer distance human and freight traffic	
6/25/2023	Dulles Toll Road Expansion	Advocacy organization	Strongly disagree	The toll road has relatively recently been expanded. What is greatly needed is more projects that will enhance use of Metro for this corridor as well as greater bus access. There is no crying need (other than to pay off road bonds) to increase the number of cars on this path with the commensurate increase in GHG emissions, addition of more nonpermeable blacktop that increases stormwater runoff rather than better recharging of groundwater, etc. There are various proposed overpass projects that will enhance access to Metro or multimodal transportation that will be much more effective than widening roads.	David Yaffe
6/26/2023	I-495 Improvements	Neighborhood/civic association	Strongly disagree	This project does not mitigate/solve traffic for drivers in general purpose lanes. Rather it increases traffic for all except for people in the LUXURY LANES. And its irreversible harm to our health and planet is appalling.	
6/27/2023	DASH Service Expansion		Strongly agree	We need to create more efficient ways of transporting people, and highway expansion just induces demand and sprawl.	
6/27/2023	Alexandria 4th Track		Strongly agree	We need to expand transit and alternative ways of getting places for those who don't and cannot drive. The fourth track will allow more frequent connections and increase viability of using VRE/Amtrak.	
6/27/2023	Alexandria Potomac Yard Metro Station Improvements, Including		Strongly agree		

	Southwest Entrance				
6/27/2023	Duke Street BRT Design & Construction		Strongly agree	We need a BRT to make travel down route 7 by bus more realistic.	
6/27/2023	Battlefield Parkway/Route 15 Bypass Interchange		Strongly disagree		
6/27/2023	Union Station to Georgetown Streetcar Line		Strongly agree		
6/27/2023	Catharpin Road, Widening		Strongly disagree		
6/27/2023	Dale Blvd HOV Lanes		Strongly disagree		
6/27/2023	Dulles Toll Road Expansion		Strongly disagree	Add more rail instead of expanding a toll road (which only induces car demand)	
6/27/2023	Dulles Airport Access Road Project		Strongly disagree		

6/27/2023	Farrington Connector		Strongly disagree		
6/27/2023	Eisenhower Valley Access and Circulation Improvements		Strongly disagree	Stop widening roads!	
6/27/2023	Fairfax County Parkway Improvements		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	Farmwell Road Intersection Improvements		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	Franconia to Occoquan 3rd Track Project		Strongly agree		
6/27/2023	I-66 Improvements		Strongly disagree	Spend this money on transit, don't waste it on the highway	
6/27/2023	Alexandria 4th Track	News/media	Strongly agree	We need stronger a rail network. I am a retired scientist and the climate emergency is genuinely frightening	Jonathan Krall

6/27/2023	DASH Service Expansion	Friend/colleague	Strongly agree	We need stronger transit.	Jonathan Krall
6/27/2023	Duke Street BRT Design & Construction	Friend/colleague	Strongly agree	We need strong transit. Car dependency is misery	Jonathan Krall
6/27/2023	Long Bridge VA - DC		Strongly agree	We need stronger rail networks. I hope this will include a bicycling/walking path	Jonathan Krall
6/27/2023	Herndon Metrorail Intermodal Access Improvements		Strongly agree		
6/27/2023	Herndon Metrorail Intermodal Access Improvements - Phase II		Strongly agree		
6/27/2023	I-95 SB Auxiliary Lane, between Route 123, Exit 160 and Route 294, Exit 158		Strongly disagree		

6/27/2023	I-95 Reversible Ramp to/from Express Lanes @ Optiz Blvd.		Strongly disagree		
6/27/2023	King and Beauregard Intersection Improvements, Phases 1 and 2		Strongly agree		
6/27/2023	Alexandria 4th Track	News/media	Strongly agree	We need more rail service	Jason Schwartz
6/27/2023	DASH Service Expansion	News/media	Strongly agree	I strongly support better service for DASH!!	Jason Schwartz
6/27/2023	I-95 SB Auxiliary Lane, between Route 123, Exit 160 and Route 294, Exit 158	News/media	Strongly disagree	We don't need for vehicle lanes!!	Jason Schwartz
6/27/2023	Op Lanes Maryland Phase 1	Advocacy organization	Strongly disagree	The project would be extremely destructive and ineffective - harming neighborhoods, parks, streams and tree cover. It would leave most people stuck in traffic or having to pay very high tolls.	Jason Schwartz

6/27/2023	Grant Avenue Road Diet		Strongly agree		
6/27/2023	Landmark Transit Center		Strongly agree	Very important to build this	
6/27/2023	Lee Highway Widening		Strongly disagree		
6/27/2023	Liberia Avenue widening		Strongly disagree		
6/27/2023	Long Bridge VA - DC		Strongly agree		
6/27/2023	Loudoun County Parkway		Strongly disagree		
6/27/2023	Loudoun County Parkway Interchange at US 50		Strongly disagree	Stop widening roads!	
6/27/2023	Loudoun County Parkway Interchange at US 50		Strongly disagree		
6/27/2023	McGraws Corner Drive		Strongly disagree		

6/27/2023	Multimodal Bridge to Van Dorn Metro Station		Strongly agree	This will improve ped and cyclist safety.	
6/27/2023	Rolling Road		Strongly disagree	Rolling road has accidents all the time and is very unsafe for pedestrians. The road needs to reduce its speed and put in protected bike lanes because there are already too many memorials on this road for people who have been killed.	
6/27/2023	Route 1 Metroway Extension (Alexandria)		Strongly agree		
6/27/2023	Wellington Road Improvements		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	VRE Service Improvements (Reduce Headways)		Strongly agree	VRE service needs to be improved and more frequent to make it a viable transit option. This will help.	
6/27/2023	VA 7, Widen		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	US 50 Improvements		Strongly agree		

6/27/2023	Telegraph Road widening		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	Stringfellow Roadway Improvements		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	Rolling Road widening project		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)		Strongly disagree	Widened road will only induce demand. That area needs better transit access.	
6/27/2023	VRE Service Improvements (Reduce Headways)	Friend/colleague	Strongly agree	I believe that mass transit is the best way to relieve traffic congestion and that Virginia has not created enough mass transit to make this possible. So, this project will help expand and maintain mass transit in Virginia	William Young
6/27/2023	Alexandria 4th Track	News/media	Strongly agree	Provides extra capacity for VRE and future MARC commuter train service.	Brian Glenn
6/27/2023	King and Beauregard Intersection Improvements	Project webpage (I drive in this area regularly)	Agree	Frustrated by traffic backups at this intersection. With new West End development it has only gotten worse. These improvements should have been done in advance of or concurrent with the redevelopment.	Brian Glenn

	ts, Phases 1 and 2	and frustrated with traffic backups)			
6/27/2023	Long Bridge VA - DC	News/media	Strongly agree	This project will provide additional capacity for VRE and future MARC commuter rail service.	Brian Glenn
6/27/2023	Route 1 Metroway Extension (Alexandria)	Friend/colleague (previous employment)	Agree	Primary North-South local commuter corridor, ideally suited for enhanced bus service parallel to the VRE commuter rail.	Brian Glenn
6/27/2023	Franconia to Occoquan 3rd Track Project	News/media	Agree		Brian Glenn
6/27/2023	Alexandria Potomac Yard Metro Station Improvements, Including Southwest Entrance (DASH Service Expansion)	Advocacy organization	Strongly agree	Anything transit to releave congestion.	Niels Pemberton
6/28/2023	Long Bridge VA - DC	News/media	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Steve Wardell

6/29/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-west travel and freight. It will also provide an important new pedestrian and bicycle link.	Brendan Wray
6/30/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	We must provide efficient and cost effective alternatives to driving. We have too long neglected the huge resource we have in existing RAIL options. Let's upgrade and promote them! Virginia - Long Bridge VA-DC (Amtrak and commuter rail) Support (strongly agree with inclusion) This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Patty McGrath
6/30/2023	VA 7 (The planned Route 7 Bus Rapid Transit project.)	Advocacy organization	Strongly agree	The planned Route 7 Bus Rapid Transit project will significantly improve travel on Northern Virginia's second busiest bus corridor and support plans for walkable transit-friendly activity centers. But Fairfax County is saying they don't want to do it until years from now after Route 1 BRT is complete.	Patty McGrath
6/30/2023	Long Bridge VA - DC	News/media	Strongly agree	Building the separate commuter tracks connecting VA and DC at the Long Bridge will integrate economies of DC, MD & Va, reducing congestion for both freight and commuter rail, which in long run better, could include commuter rail from MD through to VA. It also includes bike and pedestrian lanes, improving commuting that does not involve cars and trucks and facilitates recreation.	
6/30/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Frances Stewart

6/30/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	jan w greenberg
7/1/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree		
7/1/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project will make an important contribution to improving commuting, east-coast travel, and freight and will provide an important new pedestrian and bike link	
7/1/2023	Duke Street BRT Design & Construction	Advocacy organization	Strongly agree	Improvements in transit across the region are the best ways to deal with congestion and to reduce greenhouse gas emissions from transportation	
7/1/2023	DASH Service Expansion	Advocacy organization	Strongly agree	Improvements to transit across the region are the best way to address congestion and reduce greenhouse gas emissions from transportation	
7/1/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	Projects expanding capacity on the Dulles Access Rd and Toll Rd are unnecessary and undermine investment in the Silver Line	
7/5/2023	Long Bridge VA - DC	Friend/colleague	Strongly agree	Love the pedestrian and bike link, and appreciate the project for commuters, as well as freight and overall travel	
7/5/2023	VA 7, Widen	Advocacy organization	Strongly disagree	It would unnecessarily widen Route 7, when it has repeatedly been shown that road widenings are not a meaningful solution to congestion.	
7/5/2023	Dulles Toll Road Expansion	Advocacy organization	Strongly disagree	While infrastructure development is crucial for improving transportation in the region, the proposed Dulles Toll Road Expansion raises concerns about its potential	

				negative consequences for Northern Virginia's investment in the Silver Line. The Silver Line has been a significant investment aimed at alleviating traffic congestion and promoting sustainable transportation options. Expanding the Dulles Toll Road without adequate consideration for the Silver Line's integration could undermine the progress made and discourage the use of public transportation. It is essential for policymakers to ensure that any infrastructure projects align with the long-term goals of promoting efficient and environmentally friendly transportation solutions in the region.	
7/5/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	I strongly support the Long Bridge VA-DC project as one of the region's most important endeavors for commuting, east-coast travel, and freight transportation. Its inclusion of a pedestrian and bicycle link demonstrates a commitment to sustainable and active transportation. This project will greatly enhance connectivity, reduce congestion, promote healthier lifestyles, and support economic vitality. It is a transformative milestone for the region's transportation system.	
7/5/2023	Duke Street BRT Design & Construction	Friend/colleague	Strongly agree	I wholeheartedly support the implementation of Bus Rapid Transit (BRT) in Duke Street, Virginia. BRT offers a cost-effective, efficient, and sustainable solution to address traffic congestion, enhance accessibility, and promote environmental sustainability. I urge you to prioritize and allocate resources to make this project a reality.	
7/5/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It	

				will also provide an important new pedestrian and bicycle link.	
7/5/2023	Long Bridge VA - DC		Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	
7/7/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project expands regional commuter service and will provide important pedestrian and biking infrastructure connecting DC and Virginia.	Joan McIntyre
7/7/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	Project funding for transportation projects need to shift away from expanding roads and highways to supporting frequent and convenient public transit to offer an alternative to single occupancy vehicles to reduce carbon emissions, improve air quality and make our urban and suburban environments safer and more liveable communities	Joan McIntyre
7/14/2023	Long Bridge VA - DC	Project webpage	Strongly agree	This project is one of the region's most important projects for commuting and regional development. Reforming VRE into a proper regional rail system will enable development further from the city centers without suburban sprawl and that is good.	Luke Mueller-Oden
7/15/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	The improvements to rail, pedestrian and bicycle infrastructure that this project represents is very much needed in the region.	
7/15/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	The Silver Line extension was an extensive, and much needed investment. Expanding vehicle traffic to Dulles undermines it.	

7/15/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	The Silver Line extension was an extensive, and much needed investment. Expanding vehicle traffic to Dulles undermines it.	
7/15/2023	Dulles Toll Road Expansion	Advocacy organization	Strongly disagree	The Silver Line extension was an extensive, and much needed investment. Expanding vehicle traffic to Dulles undermines it.	
7/21/2023	Reston Parkway Improvements	Project webpage	Strongly disagree	Widening Reston Parkway between Sunrise Valley Drive and Bowman Terrace is a particularly bad idea because of its proximity to Reston Town Center. Aren't we trying to make this street more rather than less walkable? Adding two through lanes would make this "6 lane" road more like 8-10 lanes at intersections where pedestrians have to cross -- right near our Metro stations and so much urban development. It's a really bad idea.	Douglas Stewart
7/21/2023	Route 50 Corridor Improvements in Fairfax and Loudoun Counties	Project webpage	Strongly disagree	Route 50 is wide enough already. Adding more lanes will only induce more traffic and make it less safe for pedestrians. In Fairfax County, the Route 50 corridor east of Fairfax City in particular has a lot of residents who walk and use transit, and the focus should be on improving bus service and safety at intersections.	Douglas Stewart
7/21/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Project webpage	Strongly disagree	The County is looking at redeveloping Pan Am shopping center, and Fairfax City has redeveloped denser housing at Fairfax Circle. The Vienna and Dunn Loring Metro stations are in this corridor. Why would you make this street even more pedestrian-unfriendly and inimical to crossing and improved transit access, rather than focusing on calming traffic and improving the walking and biking conditions to accommodate all the new	Douglas Stewart

				residents and mix of uses that the City and County are planning for in this area?	
7/21/2023	Duke Street BRT Design & Construction	Project webpage	Strongly agree	This area is densely populated has a good mix of uses. Providing dedicated lanes for buses will encourage even more growth and travel by transit, displacing vehicle trips and making for a much more efficient use of our transportation network. It will also make life a lot more enjoyable for people living and working in this area, by making Duke Street and 236 more of a people-centered street and providing better transit access.	Douglas Stewart
7/21/2023	VA 7, Widen (Route 7 Bus Rapid Transit)	Project webpage (Have been following it since development of initial concept plans by the Northern Virginia Transportation Commission)	Strongly agree	Route 7 from Alexandria to Tysons is a perfect corridor for improved bus service. It goes through Seven Corners, Broad Street in Falls Church, Pimmit Hills and Tysons. All of these areas are getting more urban and developing more businesses and residences. Dedicated bus lanes will only make this mix better and make it easier for thousands of people to walk, bike and use transit for daily trips. And it will make these areas better places to live. (Regarding the answers above to the drop-down boxes-- I had to fill these in to register my response, even though they weren't applicable.)	Douglas Stewart
7/22/2023	Reston Parkway Improvements	Project webpage	Disagree	I wish to withdraw an earlier comment I submitted on this project. I had mistakenly commented that it would widen Reston Parkway in the area near Reston Town Center, which is in fact already 6 through lanes. I apologize for my mistake. I still object to widening	

				Reston Parkway from 4 to 6 lanes from South Lakes Parkway to the Dulles Toll Road.	
7/24/2023	Battlefield Park Bypass Project	Friend/colleague	Strongly disagree	Planning this bypass (and hundred of new lanemiles that incentivize more Vehicle Miles Traveled) is counterproductive to Prince William County's Strategic Plan to create walkable live-work-play communities, and to the Community Energy and Sustainability Master Plan action strategies to reduce greenhouse gas emissions.	
7/29/2023	Long Bridge VA - DC	News/media	Strongly agree	The new Long Bridge is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Dulles Airport Access Road Project	Visualize 2045 list of Fairfax projects	Strongly disagree	Widening the Dulles Airport Access Rd is unnecessary and would undermine the region's and Fairfax County's major investment in the Silver Line.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Dulles Toll Road Expansion	TPB Visualize 2045	Disagree	Widening the Dulles Toll Road Rd is unnecessary and would undermine the region's major investment in the Silver Line.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Dulles Toll Road Collector	TPB Visualize 2045	Strongly disagree	Widening the Dulles Toll Road Rd is unnecessary and would undermine the region's major investment in the Silver Line.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Magarity Road Widening	Project webpage	Strongly disagree	Many homes, at least one school on this street will be negatively impacted. Replace with safety, complete streets, and McLean Metro station access improvements from this neighborhood.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Reston Parkway	Project webpage	Strongly disagree	Widening Reston Parkway would undermine Fairfax County and the region's investments in the Silver Line	Bill Pugh, Coalition for Smarter Growth

	Improvements			and efforts to foster a transit-oriented, walkable Reston area.	
7/29/2023	Rolling Road widening project	TPB Visualize 2045, Fairfax County	Strongly disagree	The project as proposed is not consistent with TPB's policy framework. Replace with safety and complete streets improvements. These are established neighborhoods here, and widening will only generate more traffic while making this area of the county even less friendly to pedestrians, bicyclists and transit users.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Telegraph Road widening	TPB Visualize 2045 and Fairfax County	Strongly disagree	The project is not consistent with TPB's policy framework. Replace with safety and complete streets improvements. These are established neighborhoods here, and widening will only generate more traffic while making this area of the county even less friendly to pedestrians, bicyclists and transit users.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Visualize 2045 and Fairfax County	Strongly disagree	The project is not consistent with TPB's policy framework. Remove further widening of US 29 from Visualize 2050. Instead direct funding to safety, pedestrian, bike and transit access improvements along the corridor.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	US 50 Improvements	TPB Visualize 2045, Fairfax County	Strongly disagree	Remove further widening of US 50. The project is not consistent with TPB's policy framework. Instead, support the STARS study recommendations for safety and operational improvements and study BRT on this corridor.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	VA 123 Widening (Fairfax)	Visualize 2045,	Strongly disagree	The project is not consistent with TPB's policy framework. Further widening this already expansive highway within the Tysons area would undermine	Bill Pugh, Coalition for Smarter Growth

		Fairfax County		Fairfax County's investments in the Silver Line and a transit-oriented, walkable Tysons	
7/29/2023	Shirley Gate Road Improvements	Visualize 2045, Fairfax County	Strongly disagree	The project is not consistent with TPB's policy framework. This road extension through forested parkland to create a supergrid of wide, high-speed arterials is misguided. The project would lead to more induced demand and car-dependence, encourage more high-speed and dangerous traffic, and undermine the county's vision for walkable, bikeable and transit-friendly communities and preservation of its tree canopy.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	New Guinea Road, Construct	Visualize 2045, Fairfax County	Strongly disagree	The project is not consistent with TPB's policy framework. The project would lead to more induced demand and car-dependence, encourage more high-speed and dangerous traffic, and undermine the county's vision for walkable, bikeable and transit-friendly communities, and preservation of its woods and tree canopy.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Stringfellow Roadway Improvements	Visualize 2045, Fairfax County	Strongly disagree	The widening project is not consistent with TPB's policy framework. Replace with safety and complete streets improvements. These are established neighborhoods here, and widening will only generate more traffic while making this area of the county even less friendly to pedestrians, bicyclists and transit users.	Bill Pugh, Coalition for Smarter Growth
7/29/2023	Alexandria 4th Track	Project webpage	Strongly agree	An additional track allows for better train traffic management between passenger and freight trains, which move at different speeds.	John Faulkner
7/29/2023	Alexandria Potomac Yard Metro Station Improvements	Advocacy organization	Strongly agree	Facilitates use of metro rail.	John Faulkner

	ts, Including Southwest Entrance				
7/29/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Facilitates passenger, freight, and commuter rail between VA and DC and provides a bicycle and pedestrian link as well.	John Faulkner
7/29/2023	Duke Street BRT Design & Construction	Advocacy organization	Agree	Improved and rapid bus service encourages people to take transit, thus reducing traffic congestion and the need to further expand roads for automobile travel.	John Faulkner
7/29/2023	DASH Service Expansion	Advocacy organization	Agree	Improved bus service encourages use of transit.	John Faulkner
7/31/2023	Dulles Airport Access Road Project	News/media	Strongly disagree	Expanding doesn't make sense now that the Metro goes to Dulles Airport. People should be incentivized to use public transport. Would benefit the Metro and save money	
7/31/2023	Dulles Toll Road Expansion	News/media	Strongly disagree	Metro Silver Line would be undermined by expanding the DTR, as it would be by expanding the Dulles Access Road. Use transit. Saves money and cuts pollution.	
7/31/2023	Dulles Airport Access Road Project	News/media	Strongly disagree	Expanding DAAR would undermine Silver line, while adding climate and other pollution. Use of Silver line should be prioritized. Prioritizing public transit on Silver Line would save money for new construction and provide needed ridership for the Silver Line. New construction that would undermine ridership should be rejected. Any money spent on DAAR should be conditioned on cutting tolls for users of Dulles Toll Road.	

7/31/2023	Fairfax County Parkway Improvements	Reston Comp Plan Task Force	Neutral	Expanding roads is generally a bad idea. The only justification for this FCP expansion would be if it were conditioned upon eliminating proposals to widen roads (e.g., present or future proposals to widen Reston Parkway, Sunset Hills, Sunrise Valley, Wiehle) through the Reston Transit Station Areas by diverting traffic to the FCP. The Reston TSAs can become true walkable, transit-oriented communities by reducing through traffic, particularly fast traffic. Traffic calming and improved pedestrian friendly roadways are needed in Reston. Diverting traffic to FCP is the only possible justification for expanding the FCP	
7/31/2023	Soapstone Drive Connector	Reston Comp Plan Task Force	Strongly agree	Needed to improve the grid and allow paths that relieve congestion around transit station areas. Critical to have pedestrian and bike paths along the Soapstone Connector	
7/31/2023	Herndon Metrorail Intermodal Access Improvements - Phase II	Friend/colleague	Strongly agree	Improving access to Herndon transit station is important to encourage use of Silver Line	
7/31/2023	Reston Parkway Improvements	Reston Comp Plan Task Force	Disagree	To the extent "improvements" mean widening, as I understand they do, then it should be rejected. We do not need to encourage more traffic, especially through traffic, in areas that are intended to implement pedestrian-friendly, transit oriented development. "Improvements" that reduce and slow traffic and that encourage more walking, biking and transit uses would be more than welcome.	

7/31/2023	Town Center Parkway (underpass DTR)	News/media (Reston Comp Plan Task Force)	Strongly agree	Strongly support. Important to relieving congestion by enhancing grid of streets near transit station. Needs to include pedestrian and bicycle pathways	
7/31/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	This outdated proposal to further widen the highway is unnecessary and would undermine the region's major investment in the Silver Line.	Sam Ressin
7/31/2023	Dulles Toll Road Collector	Advocacy organization	Strongly disagree	This outdated proposal to further widen the highway is unnecessary and would undermine the region's major investment in the Silver Line.	Sam Ressin
7/31/2023	Magarity Road Widening	Advocacy organization	Strongly disagree	Many homes and at least one school on the street will be negatively impacted. Replace with safety, complete streets, and McLean Metro station access improvements from this neighborhood.	Sam Ressin
7/31/2023	Reston Parkway Improvements	Advocacy organization	Strongly disagree	This widening project would undermine Fairfax County and the region's investments in the Silver Line and efforts to foster a transit-oriented, walkable Reston area.	Sam Ressin
7/31/2023	Rolling Road widening project	Advocacy organization	Strongly disagree	Replace with safety and complete streets improvements. These are established neighborhoods here, and widening will only generate more traffic while making this area of the county even less friendly to pedestrians, bicyclists and transit users.	Sam Ressin
7/31/2023	Telegraph Road widening	Advocacy organization	Strongly disagree	Replace with safety and complete streets improvements. These are established neighborhoods here, and widening will only generate more traffic while making	Sam Ressin

				this area of the county even less friendly to pedestrians, bicyclists and transit users.	
7/31/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Advocacy organization	Strongly disagree	Remove further widening of US 29 from Visualize 2050. Instead direct funding to safety, pedestrian, bike and transit access improvements along the corridor.	Sam Ressin
7/31/2023	US 50 Improvements	Advocacy organization	Strongly disagree	Remove further widening of US 50. Instead, support the STARS study recommendations for safety and operational improvements and study bus rapid transit (BRT) on this corridor.	Sam Ressin
7/31/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	As a Vienna resident, I do not support widening 123. We already have enough traffic. Further widening this already expansive highway within the Tysons area would undermine Fairfax County's investments in the Silver Line and a transit-oriented, walkable Tysons. We need a safe protected bike lane on Maple Ave. That way, I could do my errands in Vienna without driving!	Sam Ressin
7/31/2023	Stringfellow Roadway Improvements	Advocacy organization	Strongly disagree	This unnecessary and wasteful project, like others, encourages even more high-speed and dangerous traffic while cutting down more forests and undermining the county's vision for walkable, bikeable and transit-friendly communities.	Sam Ressin
8/3/2023	US 29 Widening Project (ECL City of Fairfax (vic.	Advocacy organization	Strongly disagree	This project goes against all of the transit oriented development near the Dunn Loring metro station and the walkability of Merrifield. As is, this road is one of the biggest threats to walkability and widening it is not the	

	Nutley St.) to Capital Beltway)			solution. This project also doesn't solve any problem as there isn't too much congestion anyway.	
8/15/2023	US 50 Improvements	Neighborhood/civic association	Strongly disagree	Please remove any widening for additional travel lanes on Rt. 50. I ask that you instead support the STARS study recommendations for inside the beltway, provide needed pedestrian and bicycle improvements, and access to bus stops. BRT for this corridor should be studied.	Sonya Breehey
8/15/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Advocacy organization	Strongly disagree	Please remove any further widening of Rt. 29. It's already too wide in the Merrifield area undermining its walkability. This area has metro and good bus service. You should instead invest in safety, pedestrian, bike and transit access improvements. And fix the Gallows/Rt. 29 intersection to make is smaller and easier to cross. Do not add an interchange or any slip lanes.	Sonya Breehey
8/15/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	BRT is a smart investment and will support more people taking transit in the Rt. 1 corridor.	Sonya Breehey
8/15/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	The roads in Tysons are already too wide, dangerous and undermines walkability and access to transit. Please do not widen anymore in Tysons.	Sonya Breehey
8/15/2023	Greensboro Drive Extension	Project webpage	Agree	Street network enhancements in Tysons will help improve mobility and support walkable TOD. Just be sure not to over design with too many lanes.	Sonya Breehey
8/15/2023	Shirley Gate Road Improvements	Advocacy organization	Strongly disagree	It's hard to tell if the "improvements" are teh same as the "extension" project. I oppose the extension of this road as it will cut through forested parkland, laying more	Sonya Breehey

				roads, encouraging more driving and sprawling development.	
8/27/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	
8/29/2023	Frying Pan Road Widening	Project webpage	Strongly agree	Frying Pan from Sunrise Valley to Centreville Rd is too narrow to support all of the new development in the area.	Elizabeth Stein McCartney
8/29/2023	Lee Highway Widening (Orange Line Extension to Centreville)	Project webpage (This long lingering project has appeared on many prior trans plans)	Strongly agree	If Orange Line were extended to at least Centreville perhaps widening of Route 29 wouldn't be needed. We need to get more cars off the road, and opening up this corridor to transit would provide mass transit access to so many commuters that currently will not consider transit because bussing to Metro takes FOREVER, and driving and parking at Herndon/Vienna isn't an attractive option. We need transit farther west than it is currently.	Elizabeth Stein McCartney
8/29/2023	Lee Highway Widening (Orange line extension to Haymarket)		Strongly agree	Public transportation and metro access is paramount to any city's sustainable and environmental development. As population has grown in Fairfax and surrounding region, and is expected to grow even more by 2045, especially along Lee Hwy, the extension of the metro line to Haymarket is the only long term and viable transportation solution! Furthermore, public transport allows lower income hourly-workers to reach their place of business quickly, economically, and without adding to existing traffic load... Thus improving the overall access experience for workers, businesses, and customers.	Serge Kaddoura

8/29/2023	Town Center Parkway (underpass DTR)	Neighborhood/civic association	Strongly agree	This connection is critical to balancing the transportation network in Reston and associated high-density development which is already underway. The project needs to move forward to prevent further congestion and exacerbation of safety issues along Fairfax County Parkway and Reston Parkway.	
8/29/2023	Widen East Spring Street	News/media	Strongly agree	Elden Street is aged in this location and advancing this project will continue to support not only roadway but supporting utilities and trail projects.	
8/29/2023	Rock Hill Road Overpass Improvements	News/media	Strongly agree	This overpass is critical to supporting a stable transportation network in Herndon and Reston by distributing extreme demand through the Town of Herndon from Loudoun County. Without it, there will be severe congestion and pedestrian/bicycle safety conflicts along Herndon Parkway and Elden Street.	
8/29/2023	Dulles Toll Road Collector	Project webpage	Disagree	There are so many local off-highway improvements that need to occur to make this functional, there is no reason to advance this without conducting Tysons-wide improvements.	
8/29/2023	Reston Parkway Improvements	Project webpage	Disagree	Reston Parkway is already wide and very difficult to cross or experience any multimodal improvement. Further widening on this segment would induce more vehicular demand as opposed to trying to distribute traffic to other routes or encourage use of the transit system which is very well established in this area.	
8/29/2023	Alexandria 4th Track	Advocacy organization	Strongly agree	We need to expand the rail capacity to be able to run more passenger trains on the RF&P line	
8/29/2023	Alexandria Potomac Yard Metro	Advocacy organization	Strongly agree	Adding more entrances will improve how people access the station and will add to the ridership	

	Station Improvements, Including Southwest Entrance				
8/29/2023	Annapolis Way Extension	Advocacy organization	Neutral	Would be better if the road would be more rectangular instead of round to create a grid-like pattern	
8/29/2023	Arcola Boulevard Improvements	Advocacy organization	Neutral	The road should only be two lanes with more pedestrian crossings	
8/29/2023	Arkendale to Powells Creek Third Track Project and Potomac Shores Station	Advocacy organization	Strongly agree	Adding a VRE station and a third track will improve the passenger rail capacity and add more train trips	
8/30/2023	Dulles Toll Road Collector	Advocacy organization	Strongly disagree	Expanding access to the Dulles Toll Road goes against the 6 billion dollars that we have spent on the silver line. We should prioritize using the Metro to access the Dulles Airport.	
8/30/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	This project helps reduce carbon emissions from cars while investing in the vastly more efficient public transit.	
8/31/2023	Soapstone Drive Connector	News/media	Disagree	The area around Whiele Reston East Metro station is becoming built-up such that car traffic is becoming increasingly a problem here, and cars are becoming less	

				effective as a transportation method here. This project will only encourage more driving in this area, induced demand. Instead, to evaporate traffic here I'd prefer this connection to be car-less, and provide connection only for micro mobility, bikes and pedestrians.	
8/31/2023	Fairfax County Parkway Improvements	Project webpage	Strongly disagree	The project will cost nearly 200 million dollars, which is a significant sum to spend on a roadway widening project. The project's main achievement will be to widen portions of Fairfax County Parkway. The effects of this widening projects are likely to be: (1) a short-term reduction in congestion; (2) a return to the same level of congestions due to induced demand (see https://www.vtpi.org/gentraf.pdf "Traffic congestion tends to maintain equilibrium. Congestion reaches a point at which it constrains further growth in peak-period trips. If road capacity increases, the number of peak-period trips also increases until congestion again limits further traffic growth) (3) additional sprawled development along the corridor which will increase overall traffic until it again exceeds capacity of this road and reaches equilibrium. (4) increase in emissions of CO2 both from the lose of plant life along the corridor, the cardon required to do the construction, and the increase in motor vehicle traffic. Recommendations - Consider adding an electrified Bus Rapid Transit system along this corridor that links with the metro and bus systems. Integrate it with transit at Fort Belvoir at the terminus. - Improve the convenience, safety, and comfort of using alternative transit (biking, scooters, walking) along and ACROSS this corridor to make choosing to use an alternative transit method more appealing.	

8/31/2023	Dulles Toll Road Collector	Advocacy organization	Strongly disagree	Outdated proposal to widen the highway is unnecessary and undermines our investment in the Silver Line.	Adnan Masri
8/31/2023	US 50 Improvements	Advocacy organization	Strongly disagree	Remove further widening of US 50. Instead, support the STARS study recommendations for safety and operational improvements and study BRT on this corridor.	Adnan Masri
8/31/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	Further widening this highway within Tysons would undermine our investment in the Silver Line and a transit-oriented, walkable Tysons.	Adnan Masri
8/31/2023	Battlefield Park Bypass Project	Advocacy organization	Strongly disagree	These unnecessary and wasteful projects encourage even more high-speed and dangerous traffic while cutting down forests and undermining the county's vision for walkable, bikeable and transit-friendly communities.	Adnan Masri
8/31/2023	Rolling Road	Advocacy organization	Strongly disagree	This widening will negatively impact the community by generating more traffic and making the area even less friendly to pedestrians, bicyclists and transit users. Replace with safety and complete streets improvements.	Adnan Masri
8/31/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	A express bus service will make the corridor safer, revitalize the area, and give commuters more options. Reduce the amount of cars on the highway without spending more money on inducing demand in widenings.	
8/31/2023	Rte 7 Corridor Improvements - Phase 2 (Route 7	Advocacy organization	Strongly agree	The planned Route 7 BRT will significantly improve travel on Northern Virginia's second busiest bus corridor and support plans for walkable transit-friendly activity centers.	

	Bus Rapid Transit)				
9/4/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Advocacy organization	Strongly disagree	This project will decrease walkability and bikeability for the developing urban fabric in Merrifield and near Fairfax City. Instead of widening the road we should look into creating bike/ped improvements to 29 or nearby alternatives.	
9/5/2023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	Outdated proposal to widen the highway is unnecessary and undermines our investment in the Silver Line.	
9/5/2023	Magarity Road Widening	Advocacy organization	Strongly disagree	Many homes and at least one school would be impacted. Replace with safety, complete streets, and McLean Metro station access improvements.	
9/5/2023	Reston Parkway Improvements	Advocacy organization	Strongly disagree	This widening project would undermine our investments in the Silver Line and efforts to foster a transit-oriented, walkable Reston.	
9/5/2023	Rolling Road	Advocacy organization	Strongly disagree	This widening will negatively impact the community by generating more traffic and making the area even less friendly to pedestrians, bicyclists and transit users. Replace with safety and complete streets improvements.	
9/5/2023	Telegraph Road	Advocacy organization	Strongly disagree	This widening will negatively impact the community by generating more traffic and making the area even less friendly to pedestrians, bicyclists and transit users. Replace with safety and complete streets improvements.	

9/5/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Advocacy organization	Strongly disagree	Remove further widening of US 29. Instead direct funding to safety, pedestrian, bike and transit access improvements.	Kevin
9/5/2023	US 50 Improvements	Advocacy organization	Strongly disagree	Remove further widening of US 50. Instead, support the STARS study recommendations for safety and operational improvements and study BRT on this corridor.	Kevin
9/5/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	Further widening this highway within Tysons would undermine our investment in the Silver Line and a transit-oriented, walkable Tysons.	Kevin
9/5/2023	Battlefield Park Bypass Project	Advocacy organization	Strongly disagree	These unnecessary and wasteful projects encourage even more high-speed and dangerous traffic while cutting down forests and undermining the county's vision for walkable, bikeable and transit-friendly communities.	Kevin
9/5/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	great transit project!	Kevin
9/5/2023	VRE - Broad Run Expansion (Orange Line Extension (WMATA/Metro))	Project webpage	Strongly agree	Need Metrorail service to Manassas. Fairfax/Centreville need Metro service to draw in more riders and get people off the roads.	

9/6/2023	Battlefield Park Bypass Project	Advocacy organization	Strongly disagree	No more roadway expansion or extensions which will destroy the urban factor, increase roadway deaths, and increase traffic. Fund public transit in the area instead. Expand VRE and Omniride	Mostafa Elnahass
9/6/2023	Battlefield Parkway/Route 15 Bypass Interchange	Advocacy organization	Strongly disagree	No more roadway expansion. We need to fund public transit in the area instead. Instead of this project which will divide the area, make it impossible for pedestrians, cyclists, and other mode users to exist. Fund public transit	Mostafa Elnahass
9/6/2023	Belmont Ridge Road Reconstruct	Advocacy organization	Neutral	Only include the shared path as sidewalks and bicycle infrastructure should be mandatory on all roads and streets. No road widening as it contributes to climate issues, does not solve traffic and creates a dangerous road to drivers and other mode users	Mostafa Elnahass
9/6/2023	Boone Blvd Extension	Advocacy organization	Strongly agree	Expanding Boone Blvd will create a grid system of roads for Tysons which will improve walkability, cycling, and access to transit. The blvd should be equipped with these features	Mostafa Elnahass
9/6/2023	Braddock Rd Improvements	Advocacy organization	Strongly disagree	No road widening for Braddock road. It should be only two lanes with sidewalks and a bike path. Also multiple transit stops	Mostafa Elnahass
9/6/2023	Braddock Rd Improvements (Fairfax County Pkwy to Rte 123/Ox Road)	Advocacy organization	Strongly disagree	No widening. It should have a road diet instead from four lanes to two lanes and add multimodal transportation to it: cycling, walking and transit	Mostafa Elnahass
9/6/2023	Braddock Rd Improvements	Advocacy organization	Strongly agree	Construct the shared use path	Mostafa Elnahass

	ts (I-495 to Burke Lake Road)				
9/6/2023	Croscon Lane widening	Advocacy organization	Strongly disagree	Croscon lane has a lot of residential areas and widening it will make it very dangerous for all users. It should have more crosswalks and better pedestrian access	Mostafa ElNahass
9/6/2023	Crosstrail Boulevard, Segment C	Advocacy organization	Strongly disagree	Crosstrail Boulevard should have a road diet, crosswalks and a bicycle lane, and transit stops	Mostafa ElNahass
9/6/2023	Dale City Parkway Node New Through Boulevard	Advocacy organization	Neutral	Road diets for all the roads and add transit access and stations with protected bicycle lanes and sidewalks	Mostafa ElNahass
9/6/2023	Dale Blvd HOV Lanes	Advocacy organization	Strongly disagree	Add bus lanes instead of the car HOV Lanes and do a road diet, add sidewalks, crosswalks and a protected bicycle lane	Mostafa ElNahass
9/6/2023	Catharpin Road, Widening	Advocacy organization	Strongly disagree	Road Diet Instead of widening, Add sidewalks, protected bicycle lanes and add more transit options in the area	Mostafa ElNahass
9/6/2023	DASH Service Expansion	Advocacy organization	Strongly agree	Expanding DASH service will decrease the reliance of cars in the Alexandria air, improve the environment, add multimodal transit options, increase equality	Mostafa ElNahass
9/6/2023	Devlin Road Widening	Advocacy organization	Strongly disagree	Instead of widening the road. Road Diet with sidewalk addition, bicycle lane addition and transit stops and crosswalks	Mostafa ElNahass
9/6/2023	Duke Street BRT Design	Advocacy organization	Strongly agree	Should be designed as Light Rail instead but BRT will improve transit frequency in the area and improve the environment, equality and job access	Mostafa ElNahass

	& Construction				
9/6/2 023	Dean Drive Widening	Advocacy organization	Strongly disagree	Instead of widening the road. Add crosswalks, protected bicycle lanes, more transit options to make the area less car-centric and create a good urban fabric	Mostafa EINahass
9/6/2 023	Dulles Airport Access Road Project	Advocacy organization	Strongly disagree	Dulles Airport Access Road should be demolished along with the Dulles Toll road to improve the urban fabric of the area since the area around Dulles airport is mostly residential and commercial and no longer rural	Mostafa EINahass
9/6/2 023	Dulles West Boulevard	Advocacy organization	Strongly disagree	Dulles West should have a road diet of two lanes. Should have sidewalks with crosswalks, bicycle lanes, and more transit access. The current design only serves cars	Mostafa EINahass
9/6/2 023	Eisenhower Valley Access and Circulation Improvements	Advocacy organization	Strongly agree	It should have protected bicycle lanes and a road diet	Mostafa EINahass
9/6/2 023	Evergreen Mills Road Improvements	Advocacy organization	Disagree	The road should only be realigned to two lanes instead of four and to form a grid system in the area	Mostafa EINahass
9/6/2 023	Fairfax County Parkway Improvements	Friend/colleague	Strongly disagree	Additional lanes of traffic will only help in the short term. Request that mass transit be considered for Fairfax County Parkway from Reston to Springfield!	David Cacner

9/6/2023	Soapstone Drive Connector	Friend/colleague	Strongly agree	Having another option for bikes (and cars) to cross Dulles Toll Road will be helpful.	David Cacner
9/6/2023	Stringfellow Roadway Improvements	Friend/colleague	Strongly disagree	I do not believe that traffic on Stringfellow Road warrants increasing the number of lanes.	David Cacner
9/6/2023	VA Route 28 Widening (Prince William County Line to Route 29)	Friend/colleague	Strongly agree	Any project that puts in additional bicycle lanes is a project that I support!	David Cacner
9/6/2023	Potomac Shores	Friend/colleague	Strongly disagree	Remove the destructive Potomac Shores Parkway project which is inconsistent with TPB's policy framework goals for environmental protection.	
9/6/2023	Route 123/Route 1 Interchange in PWC	Advocacy organization	Strongly disagree	Remove widening VA 123 to 6 lanes in area planned for walkable activity center near Woodbridge VRE station. The project is inconsistent with the TPB policy framework, including the aspirational initiative to improve walk and bike access to transit.	
9/6/2023	Battlefield Park Bypass Project	Advocacy organization	Strongly disagree	Remove this destructive project. It would further open up the Rural Crescent and area near Manassas Battlefield to development. I-66 and Route 28 will provide fastest access to nearby areas. We support roundabouts as an alternative at key intersections in the area to move local traffic. Project is inconsistent with the TPB policy framework, as it would divert resources from TPB's identified priority strategies and is inconsistent with multiple TPB policy goals, for example undermining	

				"Bring Jobs and Housing Closer Together" and ignoring induced demand that leads to more miles of driving.	
9/6/2023	Route 1 Improvements	Friend/colleague	Strongly disagree	Remove further widening of Route 1 and replace with high-capacity transit that is under study for this corridor as an alternative that is more consistent with TPB's policy framework.	
9/6/2023	Magarity Road Widening	Project webpage	Strongly disagree	Magarity Road is a neighborhood street with a lot of nearby schools and a community center within walking distance. It's also close to Tysons, and you can walk there now via the Scotts Run Trail. Widening this road would make the neighborhood much less pleasant and walkable. It would be much more appropriate to focus on slowing traffic going down the road, such as through adding bulb-outs and striping more visible crosswalks.	
9/6/2023	Route 50 Corridor Improvements in Fairfax and Loudoun Counties	Project webpage	Disagree	It doesn't make sense to bundle Route 50 across both Fairfax and Loudoun Counties. It's a much different and denser corridor in Fairfax east of Fairfax City than west of the City, and the western Fairfax corridor is different than in Loudoun east of Aldie. Route 50 should not be widened east of Fairfax City without prioritizing or dedicating lanes for bus service.	
9/6/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Project webpage	Disagree	There are many increasingly dense, mixed-use areas in this corridor, including Merrifield and Dunn Loring and the area in and around Falls Church. 29 is already too wide, especially in Merrifield. It gets in the way of making this area more walkable and reducing car trips. Route 29 improvements should focus on traffic calming, especially near these activity centers.	

9/6/2023	Dulles Airport Access Road Project	Project webpage	Strongly disagree	It's too expensive and will encourage more sprawling, auto-dependent development.	
9/6/2023	US 50 Improvements	Project webpage	Strongly disagree	The project titles should be more descriptive. It's impossible to tell that this project covers 50 east of Fairfax City unless you read the project description, and therefore impossible to distinguish it from the 50 improvements in Fairfax and Loudoun counties. 50 east of Fairfax City should not be widened unless the lanes provide priority or dedicated bus service. Adding more car travel lanes would negatively affect the denser communities there.	
9/6/2023	Reston Parkway Improvements	Project webpage	Disagree	Continuing the widening of Reston Parkway through this stretch of Reston will make the area less safe and desirable for walking, bicycling and rolling. We should take advantage of the increasing density, mix of uses and access to transit in this area. Adding more car travel lanes would have the opposite effect.	Douglas Stewart
9/8/2023	New Braddock Rd.	Neighborhood/civic association	Strongly disagree	This project will separate our Center Ridge community and make it dangerous for the kids walking to the elementary school and residents walking the sidewalks and paths in our neighborhood. Cars already speed too fast on that section of New Braddock Road between Rt 28 and the community entrance on Store House Drive. This project will allow cars to go farther through the neighborhood and very likely increase speeds even more, despite the posted limits.	
9/8/2023	Rolling Road widening project	Neighborhood/civic association	Agree	I support the project but hope it will include a bike lane or safe pedestrian walking path and pull outs for bus stops. Currently when the bus stops in this area it delays traffic. With an appropriate bus pull over lane and	

				pedestrian connections, safety for drivers and those walking to the bus stops will be improved. Safety for bicyclists can also be improved by adding a dedicated bike lane as part of the widening. Would also like you to include flashing yellow turn arrows at the intersection into Saratoga neighborhood with Fullerton road if the project includes updating the traffic light.	
9/9/2023	New Braddock Rd.	Project webpage	Strongly disagree	It will redirect rush hour traffic through a neighborhood and in front of an elementary school.	Sharon Gottovi
9/10/2023	Neabsco Mills Road (Fairfax County Trail Maintenance Agreement 110 along Union Mill Rd., Clifton, Va.)	Neighborhood/civic association	Strongly agree	The existing developer-installed 4-foot wide trail from Stonefield Drive North along Union Mill Rd. is 35 years old, has never been repaved, and is damaged causing a safety hazard. The 4-foot trail width is obsolete because it is too narrow for pedestrians, pets, baby carriages, and runners simultaneously. The TMA should be revised to authorize a 5-foot wide trail in its place to better handle trail traffic and funding provided.	al francesse
9/11/2023	New Braddock Rd.	News/media (Newsletter from local BOS member)	Strongly disagree	The extension of New Braddock Road (CE2206) is NOT needed and would be extremely disruptive to the community and Centreville region. Machen Road is an existing 4 lane divided roadway that serves the same purpose as the proposed extension of New Braddock Road. Machen Road runs from Route 29 to Route 28 in Centreville (same as the proposed extension of New Braddock Rd.). Extending New Braddock would physically divide the well established Centre Ridge Community, have significant negative environmental impacts (noise, community tree loss, cross multiple existing Fairfax CountyPark Authority properties, impacts	Ron Kirkpatrick

				<p>to floodplains, wetlands, require a bridge over Big Rocky Run, impacts to wildlife, etc.), and would be extremely costly due to the difficult topography, crossing I-66 and Big Rocky Run. The walkability of the community would be negatively impacted including access to the community elementary school, Centre Ridge Elementary School and the Community Center, community pool, etc... Construction would be extremely disruptive to numerous existing residential properties that have been in place for more than 30 years. In community meetings as recent as March 2023, Sully District Supervisor Kathy Smith has stated she does NOT support moving this project forward. Adding more and more pavement in Centreville is not the answer; more effort is need by transportation planners to encourage alternate means of transportation; mass transit in particular. The environment in Centreville has already been dramatically impacted by years of continued road widening; please look for alternate solutions; rather than continuing the needless addition of lane miles of pavement. The area of Centreville impacted by this proposed road extension has already been negatively impacted by ongoing road construction (I-66 express lanes and Route 28 widening, Route 29 widening) for years and will be for some time into the future (particularly ongoing construction on Route 28 and Route 29). The transportation construction recently completed and ongoing should be analyzed (traffic flow) before additional roadway projects are undertaken. Note: The project description shown is not accurate as the "existing structure" referenced does not exist - was never constructed; adding significant additional cost.</p>	
--	--	--	--	--	--

9/12/2023	Magarity Road Widening	Project webpage	Strongly disagree	This road is bordered by many residential properties that would be adversely affected by the road widening. Sidewalk improvement projects are being implemented on Magarity Road which may be wasted if the road is widened. Use of this road for additional automobile traffic would not be beneficial for the neighboring communities and would not be pedestrian and bicyclist friendly. There is a school on Magarity Road. Access to the school by pedestrians would be adversely affected by widening of the road. This road should not be used as a cut-through alternative to Route 123 for Tysons traffic.	Elizabeth Yu
9/12/2023	Dulles Airport Access Road Project	Project webpage	Disagree	I do not think this project is necessary and is not worth the estimated cost. Traffic on the Dulles Access Road with the existing configuration is not bad. The availability of the Silver Line to Dulles airport reduces the need for increased vehicle capacity on the Dulles Access Road.	Elizabeth Yu
9/12/2023	VRE Service Improvements (Reduce Headways)	News/media	Strongly agree		
9/13/2023	Dulles Toll Road Collector	Advocacy organization	Strongly disagree	Dulles toll road should be demolished and replaced with a two-lane street with transit-oriented development	Mostafa Elnahass
9/13/2023	Dulles Toll Road Expansion	Advocacy organization	Strongly disagree	Dulles toll road should be demolished and replaced with a two-lane street with transit-oriented development	Mostafa Elnahass
9/13/2023	Fairfax County Parkway	Advocacy organization	Strongly disagree	Fairfax County Parkway is too wide and dangerous and a highway should not run in residential and commercial	Mostafa Elnahass

	Improvements			areas. Should have a road diet, cycling and pedestrian improvements	
9/13/2023	Farmwell Road Intersection Improvements	Advocacy organization	Strongly disagree	Farmwell Road should only be 2 lanes with a sidewalk, and protected bicycle lanes with trees and lights on the sidewalks	Mostafa Elnahass
9/13/2023	Franconia to Occoquan 3rd Track Project	Advocacy organization	Strongly agree	A great addition, needs to be extended and electrified	Mostafa Elnahass
9/13/2023	Franconia-Springfield Parkway (and SOV)	Advocacy organization	Strongly disagree	This parkway should have a road diet of two lanes. Install protected bicycle lanes, lights, Wide Sidewalks and trees for shade and a transit lane instead of widening it which will have a huge environmental damage and will increase traffic	Mostafa Elnahass
9/13/2023	Frontier Drive Extension	Advocacy organization	Neutral	Its good to have a connected network but needs a road diet, sidewalks, protected bicycle lanes and strong lights and trees	Mostafa Elnahass
9/13/2023	Grant Avenue Road Diet	Advocacy organization	Strongly agree	The project will improve walkability, cycling, transit and pedestrian access	Mostafa Elnahass
9/13/2023	Greensboro Drive Extension	Advocacy organization	Neutral	It will improve accessibility in the area but also should only be two lanes	Mostafa Elnahass
9/13/2023	Herndon Metrorail Intermodal Access	Advocacy organization	Strongly agree	Access to the station should be improved for better pedestrian, cyclist and transit riders experience	Mostafa Elnahass

	Improvements				
9/13/2023	Herndon Metrorail Intermodal Access Improvements - Phase II	Advocacy organization	Strongly agree	Access to the station should be improved for better pedestrian, cyclist and transit riders experience	Mostafa ElNahass
9/13/2023	Frying Pan Road Widening	Advocacy organization	Strongly disagree	There are already a lot of commercial and residential areas and the Innovation Center metro is close by. Frying Pan Road needs a road diet, a transit lane, protected bicycle lanes and wider sidewalks with more frequent crosswalks	Mostafa ElNahass
9/13/2023	I-66 Improvements	Advocacy organization	Strongly disagree	Urban interstates should be demolished, except the metro, and replaced with a two-lane street with transit-oriented development	Mostafa ElNahass
9/13/2023	I-95 Express Lane Extension to Fredericksburg	Advocacy organization	Strongly disagree	Urban interstates should be demolished and replaced with two-lane streets with transit and transit-oriented development	Mostafa ElNahass
9/13/2023	I-95 Reversible Ramp (EPG Southern Loop Road)	Advocacy organization	Strongly disagree	Urban interstates should be demolished and replaced with two-lane streets with transit and transit-oriented development	Mostafa ElNahass
9/13/2023	Fairfax County Parkway	Project webpage	Disagree	I disagree with the addition to this project unless there is even the slightest consideration given to other modalities. Currently FFX parkway has many crossings that are simply pedestrian marked but cross up to 6	Michael Riccard

	Improvements			lanes with not even a signal or high visibility marking to get to a bus stop across the way. Expecting this to be easier with 8 lanes is comical. Furthermore, while we are blessed with the Fairfax County parkway trail there are missing segments. Presently, the trail does not extend fully where it breaks off from 286 and there are no bike lanes at the interchange of I-95 and FFX Parkway necessitating cyclists to go far north over a different bridge. I understand the realities of suburban voters and that they want more lanes even if it is ill advised long term but the least that could be done is to better protect pedestrians and complete the missing cycling connection from Rolling road over I-95 to the remainder of the FFX trail.	
9/14/2023	Fairfax County Parkway Improvements (Every road expansion project)	News/media (Fairfax County Government youtube channel)	Strongly disagree	Drivers are fine. Cyclists are at risk. Pedestrians are either brave or suicidal. Transit riders are not adequately served. The very last thing that we need in Virginia is more roadways. I would walk to the grocery store if there were sidewalks, I would bike to work if there was a safe place to do so, I would take transit across the county if it was convenient or even possible. I drive along the Fairfax County Parkway about every week to visit family. The few times I've been caught in traffic only make me wish for arterial-scale transit more. I'd kill to take a bus from Burke to Herndon, but that bus route does not exist. I do not enjoy driving and I go out of my way to avoid getting behind the wheel when I can. This choice should be empowered by the transportation plan, not insulted by it. Your job is to serve the people, not the drivers. Remember this.	Evan Ramee
9/14/2023	Boone Blvd Extension	News/media	Disagree	The sunk cost fallacy is a tricky one! Just because we thought this was a good idea yesterday does not mean that we should still build it tomorrow. I would support	Evan Ramee

				this project if and only if it coincides with later human scale development to allow multimodal transportation parallel to Rt.7.	
9/14/2023	Braddock Rd Improvements (Fairfax County Pkwy to Rte 123/Ox Road)	News/media	Strongly disagree	I drive along this segment of Braddock road to visit my family in Herndon, and it's fine. These 16.7 million dollars would be much better spend on bike lanes and sidewalk improvements. My dad lives in Burke and I go to GMU. I'd love to commute by bike, to save on room, board, parking, and GHG emissions, but I do not feel safe making the trip when I must bob and weave through incomplete sidewalks and dismount at every intersection so I don't die.	Evan Ramee
9/14/2023	Braddock Rd Improvements (I-495 to Burke Lake Road)	News/media	Disagree	While I think that HOV lanes on this segment of Braddock Rd. would make transit run faster and more consistently, and that the project is a wholesale improvement to the area, the project should not be exempt from the zero-based budget.	Evan Ramee
9/14/2023	Fairfax County Parkway Improvements	News/media	Strongly disagree	The span of the Fairfax County Parkway leading into Reston deserves better than mindless expansion. It deserves continuous bike lanes that don't kill your speed at every intersection. It deserves fast and frequent transit for commuters into the Reston area. It deserves a right-sized road and that is what we have today. This project should not be exempt from the zero-based budget.	Evan Ramee
9/14/2023	Franconia-Springfield Parkway (and SOV)	News/media	Strongly disagree		Evan Ramee

9/14/2023	Franconia-Springfield Parkway (and SOV)	News/media	Strongly disagree	This project will only stand to make driving an easier choice to default to. Why are we spending 16 million dollars to make life easier for those who can afford to drive?? This project should not be exempted from the zero-based budget.	Evan Ramee
9/14/2023	Greensboro Drive Extension	News/media	Disagree	This project should not be exempted from the zero-based budget, even if it would lead to a denser street grid and a more walkable, more enjoyable Tysons.	Evan Ramee
9/15/2023	I-95 SB Ramp Improvements	Advocacy organization	Strongly disagree	I95 should be demolished especially in the residential and commercial areas. Urban highways should not exist in urban areas	Mostafa Elnahass
9/15/2023	I-95/VA 613 Interchange	Advocacy organization	Strongly disagree	I95 must be demolished and VA 613 should undergo a road diet to two lanes with protected bicycle lanes, wide sidewalks, lights and Trees on the edge of sidewalks	Mostafa Elnahass
9/15/2023	Richmond Highway /Fuller Heights Improvements	Advocacy organization	Strongly disagree	Richmond Urban Highway should undergo a road diet	Mostafa Elnahass
9/15/2023	King and Beauregard Intersection Improvements, Phases 1 and 2	Advocacy organization	Strongly disagree	Both King Street and Beauregard Street should undergo a road diet but keep the pedestrian and cycling improvements	Mostafa Elnahass
9/15/2023	Landmark Transit Center	Advocacy organization	Strongly agree	It will improve transit access in the area	Mostafa Elnahass

9/15/2023	John Marshall Widening	Advocacy organization	Strongly disagree	John Marshall should undergo a road diet and become a residential street instead. Do not destroy the urban fabric of the area	Mostafa ELNahass
9/15/2023	John Marshall Widening (University Boulevard to VA 621 Devlin / Balls Ford Road)	Advocacy organization	Strongly disagree	John Marshall should undergo a road diet and become a residential street instead of a wide dangerous highways for all mode users	Mostafa ELNahass
9/15/2023	Lee Highway Widening	Advocacy organization	Strongly disagree	Lee Highway is already very wide and dangerous, it has a lot of foot traffic because there are a lot of businesses and residential areas on it. It should undergo a road diet with a protected bicycle lane, wider sidewalks, More lights, More transit access	Mostafa ELNahass
9/15/2023	Liberia Avenue widening	Advocacy organization	Strongly disagree	Liberia avenue and Route 28 should undergo a road diet not widened for more crashes, climate damage, and impossible pedestrian access.	Mostafa ELNahass
9/15/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	SHould be funded and accelerate the process of construction as soon as possible. It has massive benefits to the area. SHould also be electrified	Mostafa ELNahass
9/15/2023	Loudoun County Parkway	Advocacy organization	Strongly disagree	Loudoun COuntY Parkway should undergo a road diet, Build wide sidewalks, protected bicycle lanes, Plant trees on sidewalks sides, add lights	Mostafa EINahass
9/15/2023	Loudoun County Parkway	Advocacy organization	Strongly disagree	Route 50 and Loudoun County Parkway should both undergo a road diet and be on grade with each other, remove all interchanges and diamonds	Mostafa EINahass

	Interchange at US 50				
9/15/2023	Loudoun County Parkway Widening (Shellhorn Road to Ryan Road)	Advocacy organization	Strongly disagree	Loudoun County Parkway is already too wide with no pedestrian, transit, or cycling access although its adjacent to a lot of residential and commercial areas. It should undergo a road diet instead	Mostafa Elnahass
9/15/2023	Loudoun County Parkway Widening (Shellhorn Road to Ryan Road)	Advocacy organization	Strongly disagree	Shellhorn road and Ryan road are already 4 lanes in a residential area. Should have a road diet and be two lanes	Mostafa Elnahass
9/15/2023	Loudoun: Evergreen Mills Road Realignment	Advocacy organization	Strongly disagree	The intersecting roads should intersect with a roundabout and the roads should undergo a road diet each two lanes	Mostafa Elnahass
9/15/2023	Magarity Road Widening	Advocacy organization	Strongly disagree	Magarity Road is in a residential area with bus 703 passing through it. Widening it would be very dangerous to pedestrians, cyclists, and transit riders. It should not be widened and it should have protected bicycle lanes instead. The shared walkway is good as well	Mostafa Elnahass
9/15/2023	Marina Way Extended	Advocacy organization	Disagree	It should be designed to create a grid pattern in the area	Mostafa Elnahass
9/15/2023	McGraws Corner Drive	Advocacy organization	Strongly disagree	Should include a road diet	Mostafa Elnahass

9/15/2023	Multimodal Bridge to Van Dorn Metro Station	Advocacy organization	Strongly agree	Should be funded immediately and work should be accelerated	Mostafa Elnahass
9/15/2023	Neabsco Mills Road	Advocacy organization	Strongly disagree	Neabsco Mills Rd should undergo a road diet, should build sidewalks, lights, protected bike lanes and better transit access	Mostafa Elnahass
9/15/2023	New Braddock Rd.	Advocacy organization	Neutral	Should include protected bicycle lanes, road diet, crosswalks, lights and transit access	Mostafa Elnahass
9/15/2023	New Guinea Road, Construct	Advocacy organization	Strongly disagree	Construct it to create a pattern and not a round wide design. It should be a two-lane street with sidewalks, crosswalks, protected bicycle lanes, transit access	Mostafa Elnahass
9/15/2023	New Herndon Station Park and Ride Garage	Advocacy organization	Strongly disagree	All Parking next to transit should be replaced by Transit-oriented development	Mostafa Elnahass
9/15/2023	Park and Ride Lot at Arcola Center	Advocacy organization	Strongly disagree	Park and Ride should be replaced with a transit center with buses that go to all the neighborhoods and does not require a car	Mostafa Elnahass
9/15/2023	Potomac Shores	Advocacy organization	Strongly agree	Should be accelerated and finalized quickly	Mostafa Elnahass
9/15/2023	Prentice Drive Improvements	Advocacy organization	Strongly disagree	The road should be straight and not wavy like the design. It should include a sidewalk, protected bicycle lanes, crosswalks, lights and transit access	

9/15/2023	Reston Parkway Improvements	Advocacy organization	Strongly disagree	Reston Parkway should undergo a road diet, protected bicycle lanes, better transit access, more lights, more crosswalks	
9/15/2023	Richmond Highway Corridor Improvements	Advocacy organization	Strongly disagree	Richmond highway is already dangerous with multiple crashes, deaths, and pedestrian fatalities. Widening it will cause more fatalities. It should undergo a road diet and become a residential street rather than an urban highway. Install bicycle lanes for equity, build the BRT as soon as possible, more crosswalks, protected bike lanes and trees	
9/15/2023	Rock Hill Road Overpass Improvements	Advocacy organization	Strongly disagree	Route 267 should be a two-lane street and at grade with rock hill road where it connects with the other side of Fairfax county which is already constructed in a straight line to keep the grid pattern. Should also include protected bicycle lanes, sidewalks, and lights	
9/16/2023	Rolling Road	Advocacy organization	Strongly disagree	Rolling Road should undergo a road diet along with all the roads connecting to it and add sidewalks, protected bicycle lanes, lights, trees, pedestrian crossings and keep it at grade with other intersecting streets and roads	Mostafa Elnahass
9/16/2023	Rolling Road widening project	Advocacy organization	Strongly disagree	Rolling Road should undergo a road diet along with all the roads connecting to it and add sidewalks, protected bicycle lanes, lights, trees, and pedestrian crossings and keep it at grade with other intersecting streets and roads. Widening the road will destroy the urban fabric, and create a more dangerous road for pedestrians and other mode users	Mostafa Elnahass
9/16/2023	Route 1 Improvements	Advocacy organization	Strongly disagree	The only improvement is a road diet to two lanes for cars, LRT, Protected bicycle lanes and widened sidewalks	Mostafa Elnahass

9/16/2023	Route 1 Metroway Extension (Alexandria)	Advocacy organization	Strongly agree	Should be extended and in the future transformed to an LRT	Mostafa Elnahass
9/16/2023	Route 7-690 Interchange	Advocacy organization	Strongly disagree	Route 690 should be at grade with Route 7 and an intersection with a four-way pedestrian crossing. Also, route 7 should undergo a road diet to two-lane street with a protected bicycle lane, sidewalks and lights	Mostafa Elnahass
9/16/2023	Rolling Road widening project	Advocacy organization	Strongly disagree	Instead of widening the road, I suggest implementing a comprehensive urban design approach that prioritizes the safety and convenience of pedestrians and cyclists. This can include constructing wide sidewalks, protected bicycle lanes, installing proper street lighting, planting trees for shade and aesthetics, and implementing a road diet to convert a two-way street into a more pedestrian-friendly environment. Additionally, creating more pedestrian crossings will enhance safety and encourage more people to walk and cycle, reducing the reliance on automobiles and promoting sustainable modes of transportation. This holistic approach not only improves mobility but also fosters a healthier and more vibrant urban community.	Mostafa Elnahass
9/16/2023	Rollins Ford Road	Advocacy organization	Strongly disagree	Transforming sections of Rollins Ford Road into a two-way street with a road diet, coupled with the construction of wide sidewalks, protected bicycle lanes, ample street lighting, tree-lined pathways, and additional pedestrian crossings, would be a significant step towards creating a more accessible and sustainable urban environment. This integrated approach not only promotes safe and efficient road use but also encourages healthier modes of transportation like walking and cycling. It enhances overall mobility,	Mostafa Elnahass

				reduces traffic congestion, and fosters a more attractive and pedestrian-friendly community for residents and visitors alike. Such initiatives align with modern urban planning principles that prioritize safety, environmental sustainability, and community well-being.	
9/16/2023	Route 7/George Washington Blvd Overpass	Advocacy organization	Strongly disagree	Implementing a road diet for both George Washington and Route 7, while keeping them at grade, and incorporating features like wide sidewalks, protected bicycle lanes, adequate lighting, tree planting, and additional pedestrian crossings would be a commendable urban development strategy. This approach not only promotes traffic flow efficiency but also fosters a safer and more inclusive environment for all road users. By prioritizing pedestrian and cyclist infrastructure alongside vehicular traffic, this initiative encourages sustainable transportation options, reduces congestion, enhances safety, and contributes to the overall livability of the community. It aligns with contemporary urban planning principles that seek to create balanced, accessible, and environmentally friendly transportation corridors.	Mostafa Elnahass
9/16/2023	Rte 7 Corridor Improvements - Phase 2	Advocacy organization	Strongly disagree	Implementing a road diet on Route 7, combined with the construction of wide sidewalks, protected bicycle lanes, adequate street lighting, tree planting, and additional pedestrian crossings, represents a holistic approach to improving transportation infrastructure and enhancing the urban environment. Furthermore, integrating a Light Rail Transit (LRT) line from Alexandria would be a transformative addition to the area's public transit system, offering a sustainable and efficient alternative to private vehicles. This comprehensive plan not only promotes safety and accessibility for all road users but also addresses the growing demand for sustainable	Mostafa Elnahass

				mobility options, reducing traffic congestion, and contributing to a more environmentally friendly and vibrant community.	
9/16/2023	Route 15 Bypass/Edwards Ferry Road Interchange	Advocacy organization	Strongly disagree	Demolishing the Route 15 Bypass and implementing a road diet for Edwards Ferry Road, complete with a transition to a two-lane street, wide sidewalks, protected bicycle lanes, adequate street lighting, tree planting, and additional pedestrian crossings, is a comprehensive approach to urban development that prioritizes safety, accessibility, and sustainability. In addition to these improvements, the addition of more transit bus lines and enhanced access would further contribute to a more efficient and inclusive transportation network. This multifaceted plan aligns with modern urban planning principles, reducing traffic congestion, encouraging alternative modes of transportation, and fostering a more connected and livable community for residents and visitors.	Mostafa ElNahass
9/16/2023	Route 15 North Widening	Advocacy organization	Strongly disagree	Converting Route 15 into a two-lane street with a road diet, while also incorporating wide sidewalks, protected bicycle lanes, ample street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure such as more bus lines and better access, would represent a holistic and sustainable approach to urban development. This comprehensive plan not only enhances safety and mobility for all road users but also promotes alternative transportation options, reduces traffic congestion, and creates a more appealing and pedestrian-friendly environment. Such initiatives align with contemporary urban planning principles, fostering a more connected, accessible, and environmentally	Mostafa ELNahass

				friendly community that benefits both residents and visitors.	
9/16/2023	Roundabout Sudley/Centerville	Advocacy organization	Disagree	Transforming Centerville Road, Sudley Road, and Prescott Road into two-lane streets without slip lanes, combined with the installation of traffic lights before crosswalks, wide sidewalks, protected bicycle lanes, proper lighting, tree-lined pathways, additional pedestrian crossings, and improved transit infrastructure, represents a comprehensive and forward-thinking approach to urban development. This holistic plan prioritizes safety, accessibility, and sustainability, creating a more inviting and inclusive environment for all road users. By promoting alternative modes of transportation and reducing traffic congestion, it contributes to a more vibrant and connected community, aligning with modern urban planning principles that aim to enhance the overall quality of life for residents and visitors.	Mostafa ELNahass
9/16/2023	Rte. 28 Bypass	Advocacy organization	Strongly disagree	Deciding not to construct the Route 28 Bypass in order to preserve the existing urban fabric is a thoughtful and community-oriented approach to urban planning. Such a decision acknowledges the importance of maintaining the character and integrity of the surrounding neighborhoods and infrastructure. It prioritizes the preservation of local communities, historic landmarks, and green spaces over the construction of new transportation infrastructure. This choice aligns with the principles of sustainable urban development and the need to balance progress with the preservation of a city's unique identity and heritage.	Mostafa ELNahass
9/16/2023	Route 50 Corridor	Advocacy organization	Strongly disagree	Transforming Route 50 in Virginia into a two-way street with wide sidewalks, Light Rail Transit (LRT), protected	Mostafa ELNahass

	Improvements in Fairfax and Loudoun Counties			bicycle lanes, proper street lighting, tree-lined pathways, additional pedestrian crossings, and enhanced transit bus lines and access would represent a comprehensive and forward-thinking urban development strategy. This holistic approach prioritizes safety, accessibility, and sustainability, offering a more attractive and inclusive environment for all road users. By promoting alternative modes of transportation and reducing traffic congestion, it contributes to a more vibrant and connected community, aligning with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and create a more efficient and equitable transportation network for residents and visitors alike.	
9/16/2023	Route 50 / Everfield Roundabout	Advocacy organization	Strongly disagree	Designing a roundabout without slip lanes, featuring wide sidewalks with crosswalks and signals, maintaining a single-lane configuration, incorporating protected bicycle lanes, proper lighting, tree planting, additional pedestrian crossings, and improving transit bus lines and access, is a comprehensive and safety-focused approach to urban planning. This design prioritizes the safety and convenience of all road users, encourages sustainable modes of transportation like cycling and walking, and enhances the overall aesthetics and functionality of the roundabout. By promoting a more accessible and inclusive urban environment, it aligns with modern urban planning principles that aim to create safer, greener, and more efficient transportation systems for the community.	Mostafa ELNahass
9/16/2023	Shirley Gate Road	Advocacy organization	Strongly disagree	Improving Shirley Gate Road by converting it into a two-lane street with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and enhanced transit	Mostafa ELNahass

	Improvements			infrastructure is a commendable urban development strategy. This approach prioritizes safety, accessibility, and sustainability, creating a more inviting and inclusive environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and enhancing public transit options, it contributes to a more vibrant and connected community. This aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.	
9/16/2023	Soapstone Drive Connector	Advocacy organization	Strongly disagree	Transforming Route 267 into a two-lane street and ensuring that the Soapstone Connector is at grade with it, featuring a four-way intersection, and enhancing both streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure, represents a comprehensive and community-oriented urban development approach. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, it contributes to a greener and more connected community, aligning with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.	Mostafa ELNahass
9/16/2023	Sterling Boulevard Extension	Advocacy organization	Disagree	Implementing a road diet on Sterling Boulevard to convert it into a two-way street, while removing service roads and enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting,	Mostafa ELNahass

				<p>additional pedestrian crossings, and improved transit infrastructure, including an extension to the Loudoun Gateway metro station, is a comprehensive and forward-thinking approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, it contributes to a more vibrant and connected community. This aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.</p>	
9/16/2023	Sudley Manor Drive/Prince William Parkway Interchange	Advocacy organization	Strongly disagree	<p>Converting both Prince William Parkway and Sudley Manor Road into at-grade, four-way intersections with no slip lanes and transforming them into two-way streets, while removing service roads and enhancing them with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure without constructing interchanges or cloverleaves, is a comprehensive and community-centered urban development strategy. This approach prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, it contributes to a more vibrant and connected community. This aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.</p>	Mostafa ELNahass

9/16/2023	Sudley Road 3rd Lane, NB	Advocacy organization	Strongly disagree	<p>Implementing a road diet on Sudley Road to convert it into a two-lane street, while removing service roads and enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure without constructing interchanges or cloverleaves, is a thoughtful and community-centered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, it contributes to a more vibrant and connected community. This aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.</p>	Mostafa ELNahass
9/16/2023	Sycolin Road – Loudoun Center Place to Crosstrail Boulevard	Advocacy organization	Strongly disagree	<p>Implementing a road diet on Sycolin Road to convert it into a two-lane street while removing service roads, and enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a sensible and community-focused approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, it contributes to a more vibrant and connected community. Avoiding road widening, which can indeed lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions,</p>	Mostafa ELNahass

				and ensure efficient and equitable access for residents and visitors.	
9/16/2023	Stringfellow Roadway Improvements	Advocacy organization	Neutral	Implementing a road diet on Stringfellow Road to convert it into a two-lane street with a tree-lined median and shared-use paths on both sides is a thoughtful and sustainable urban development approach. This strategy prioritizes safety, aesthetics, and multi-modal transportation. The addition of trees in the median not only enhances the visual appeal of the road but also provides shade and environmental benefits. Having shared-use paths on both sides of the street encourages active transportation, such as walking and cycling, and ensures accessibility for all residents and visitors. This approach aligns with modern urban planning principles that aim to create more pedestrian-friendly and eco-friendly environments, ultimately enhancing the overall quality of life in the community.	Mostafa ELNahass
9/16/2023	Telegraph Road	Advocacy organization	Strongly disagree	Converting Telegraph Road into a two-lane street, eliminating service roads, and enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a thoughtful and community-oriented approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. Avoiding road widening, which can indeed lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors. This comprehensive plan promotes alternative modes of transportation, reduces traffic congestion, and fosters a	Mostafa ELNahass

				healthier and more vibrant community while respecting the well-being and safety of its residents.	
9/16/2023	TIP Grouping project for Construction : Safety/ITS/Operational Improvements	Advocacy organization	Strongly disagree	Focusing on rapid transit expansion, sidewalk expansion, a protected bicycle lane network, adequate street lighting, and tree planting along sidewalks is an excellent approach to urban development that prioritizes sustainability, safety, and accessibility. By concentrating efforts on these initiatives, communities can reduce car dependence and promote the use of multimodal transportation options. Rapid transit expansion enhances public transportation accessibility, reducing the need for individual car ownership. Expanding sidewalks and bicycle lanes encourages walking and cycling, reducing traffic congestion and improving public health. Proper street lighting enhances safety for pedestrians and cyclists, and planting trees not only beautifies the environment but also provides shade and reduces the urban heat island effect. This holistic approach aligns with modern urban planning principles that aim to create more sustainable, livable, and inclusive communities. By reducing car dependence and offering alternatives, it contributes to a greener and more resilient urban future.	Mostafa ELNahass
9/16/2023	Town Center Parkway (underpass DTR)	Advocacy organization	Strongly disagree	Converting Route 267 into a two-lane street and Town Center Parkway to an at-grade, two-lane street, while removing service roads and enhancing both with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a sensible and community-oriented approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users.	Mostafa ELNahass

				Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, this comprehensive plan fosters a healthier and more vibrant community while respecting the safety and well-being of its residents.	
9/16/2023	US 1 Bus Rapid Transit	Advocacy organization	Strongly agree	BRT should be constructed immediately and in the future converted to an LRT	Mostafa ELNahass
9/16/2023	US 15 Improvements	Advocacy organization	Strongly disagree	Implementing a road diet on US 15 to convert it into a two-lane street while enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a well-considered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, this comprehensive plan fosters a healthier and more vibrant community while respecting the safety and well-being of its residents.	Mostafa ELNahass

9/16/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Advocacy organization	Strongly disagree	<p>Implementing a road diet on US 29 to convert it into a two-lane street while enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a well-thought-out approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, this comprehensive plan fosters a healthier and more vibrant community while respecting the safety and well-being of its residents.</p>	Mostafa ELNahass
9/16/2023	VA 7	Advocacy organization	Strongly disagree	<p>Transforming the entire stretch of Route 7 from Alexandria to West Virginia into a two-lane street with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a holistic and community-centered approach to urban development. Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that prioritize safety, sustainability, and accessibility. 				efficient and equitable access for residents and visitors along Route 7.	
9/16/2023	VA 7 and Rte. 690 Interchange	Advocacy organization	Strongly disagree	Implementing at-grade intersections without interchanges or cloverleaves for both Route 7 and 690, and converting them into two-lane streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure, is a well-considered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By enhancing both roadways in this manner, communities can reduce car dependence, promote the use of alternative transportation options, and foster a healthier and more vibrant urban landscape. This approach aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.	Mostafa ELNahass
9/16/2023	US 50 Improvements	Advocacy organization	Strongly disagree	Implementing a road diet on US 50 to convert it into a two-lane street while enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a sensible and community-centered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors. By promoting alternative modes of	Mostafa ELNahass

				transportation, reducing traffic congestion, and expanding public transit options, this comprehensive plan fosters a healthier and more vibrant community while respecting the safety and well-being of its residents.	
9/16/2023	VA 123 Widening (Fairfax)	Advocacy organization	Strongly disagree	It's concerning that Route 123, currently an eight-lane road, hasn't yet been transformed into a more appropriate two-lane street, especially in a transit-rich area. The focus should be on creating a balanced transportation environment with wide sidewalks, protected bicycle lanes, adequate street lighting, tree planting, additional pedestrian crossings, and improved public transit access. Expanding the road would only exacerbate safety issues and health concerns for the community, so it's crucial to prioritize these sustainable and safety-conscious measures to create a more livable and resilient urban environment.	Mostafa ELNahass
9/16/2023	VA 9 Improvements	Advocacy organization	Strongly disagree	Converting VA 9 into a two-lane street with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a prudent and safety-focused approach to urban development. Expanding the road could indeed lead to safety concerns and health consequences. Prioritizing these sustainable and safety-conscious measures fosters a healthier, more walkable, and vibrant urban environment, ultimately improving the quality of life for residents and visitors while ensuring their safety.	Mostafa ELNahass
9/16/2023	VA 17 Intersection Improvements	Advocacy organization	Strongly disagree	Transforming VA 17 into a two-way street with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and a pedestrian and cyclist-	Mostafa ELNahass

	ts in Warrenton			friendly intersection without slip lanes is a comprehensive and community-focused approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. It promotes alternative modes of transportation, reduces traffic congestion, and fosters a healthier and more vibrant community. Such initiatives align with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors.	
9/16/2023	VA Route 28 Widening (Prince William County Line to Route 29)	Advocacy organization	Strongly disagree	Transforming VA Route 28 and Route 29 into two-way streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and creating pedestrian and cyclist-friendly intersections without slip lanes is a comprehensive and community-focused approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and enhancing public transit options, these initiatives foster a healthier and more vibrant community while respecting the safety and well-being of its residents and visitors. This approach aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for all.	Mostafa ELNahass
9/16/2023	VA 123 Widening	Advocacy organization	Strongly disagree	Converting VA 123 into a two-way street, enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and creating	Mostafa ELNahass

	(Prince William)			pedestrian and cyclist-friendly intersections without slip lanes is a comprehensive and forward-thinking approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and enhancing public transit options, these initiatives contribute to a healthier and more vibrant community while respecting the safety and well-being of its residents and visitors. This aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for all.	
9/16/2023	VA 17 Intersection Improvements in Warrenton	Advocacy organization	Strongly disagree	Enhancing the intersection at VA 17 with four-way crosswalks, creating a two-way street for bike crossings, and improving it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, enhanced transit infrastructure, and pedestrian and cyclist-friendly design without slip lanes is a comprehensive and community-centered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, these initiatives foster a healthier and more vibrant community while ensuring the safety and well-being of its residents and visitors. Such an approach aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for all.	Mostafa ELNahass

9/16/2023	VA 7, Widen	Advocacy organization	Strongly disagree	Transforming the entire stretch of Route 7 from Alexandria to West Virginia into a two-lane street with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, and improved transit infrastructure is a holistic and community-centered approach to urban development. Avoiding road widening, which can lead to safety concerns and health consequences, aligns with modern urban planning principles that prioritize safety, sustainability, and accessibility. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, this comprehensive plan fosters a healthier and more vibrant community while respecting the safety and well-being of its residents. Such initiatives aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for residents and visitors along Route 7.	Mostafa ELNahass
9/16/2023	VRE Service Improvements (Reduce Headways)	Advocacy organization	Neutral	VRE SHould run 24 hours bidirectional, should be electrified and have 15 minute headways	Mostafa ELNahass
9/16/2023	VA 613 Van Dorn Interchange at VA 644 Franconia Road	Advocacy organization	Strongly disagree	Converting both 613 and 644 into two-lane streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and a focus on safety and accessibility is a commendable approach to urban development. This strategy promotes alternative modes of transportation, reduces traffic congestion, and enhances the overall quality of life for residents and visitors. By prioritizing these initiatives, communities can	Mostafa ELNahass

				create more vibrant, sustainable, and inclusive environments that benefit everyone.	
9/16/2023	VA 234 Bypass @ BallsFord	Advocacy organization	Strongly disagree	Opting to keep VA 234 at Bullsford Road as an at-grade intersection and transforming both roads into two-lane streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and a focus on safety and accessibility is a thoughtful and community-centered approach to urban development. This strategy promotes alternative modes of transportation, reduces traffic congestion, and enhances the overall quality of life for residents and visitors. By prioritizing these initiatives and avoiding overpasses or interchanges, communities can create more vibrant, sustainable, and inclusive environments that benefit everyo	Mostafa ELNahass

This strategy promotes alternative modes of transportation, reduces traffic congestion, and enhances the overall quality of life for residents and visitors. By prioritizing these initiatives and avoiding overpasses or interchanges, communities can create more vibrant, sustainable, and inclusive environments that benefit everyo	Mostafa ELNahass
9/16/2023	VA 234 Bypass	Advocacy organization	Strongly disagree	Opting to keep VA 234 at Clover hill Road as an at-grade intersection and transforming both roads into two-lane	Mostafa ELNahass

	interchange @ Clover Hill Road			streets with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and a focus on safety and accessibility is a thoughtful and community-centered approach to urban development. This strategy promotes alternative modes of transportation, reduces traffic congestion, and enhances the overall quality of life for residents and visitors. By prioritizing these initiatives and avoiding overpasses or interchanges, communities can create more vibrant, sustainable, and inclusive environments that benefit everyo	
9/16/2023	Wellington Road Improvements	Advocacy organization	Strongly disagree	Transforming Wellington Road into a two-way street and enhancing it with wide sidewalks, protected bicycle lanes, proper street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and pedestrian and cyclist-friendly design without slip lanes is a comprehensive and community-centered approach to urban development. This strategy prioritizes safety, accessibility, and sustainability, creating a more inviting and interconnected environment for all road users. By promoting alternative modes of transportation, reducing traffic congestion, and expanding public transit options, these initiatives contribute to a healthier and more vibrant community while ensuring the safety and well-being of its residents and visitors. Such an approach aligns with modern urban planning principles that aim to enhance overall quality of life, reduce carbon emissions, and ensure efficient and equitable access for all.	Mostafa ELNahass
9/16/2023	Williamson Boulevard	Advocacy organization	Strongly disagree	Your description of transforming Williamson Boulevard into a two-way street and enhancing it with various features like wide sidewalks, protected bicycle lanes,	Mostafa ELNahass

	Improvements			street lighting, tree planting, additional pedestrian crossings, improved transit infrastructure, and a focus on pedestrian and cyclist-friendly design without slip lanes is well-thought-out and aligns with modern urban planning principles. This approach prioritizes safety, accessibility, and sustainability, ultimately creating a more inviting and interconnected environment for all road users. By emphasizing alternative modes of transportation, reducing traffic congestion, and expanding public transit options, these initiatives contribute to a healthier, more vibrant community while ensuring the safety and well-being of both residents and visitors. Your vision reflects a comprehensive and community-centered strategy aimed at enhancing the overall quality of life, reducing carbon emissions, and ensuring efficient and equitable access for everyone.	
9/16/2023	New Braddock Rd.	Neighborhood/civic association	Strongly disagree	I strongly oppose Project CE 2206 to extend New Braddock Rd to Stone Rd for a number of reasons. There is no need for this project. To drive from point A to point B currently takes 5-10 minutes, and 10-15 minutes at most during the worst of rush hour. why embark on this massive and disruptive project to alleviate a small amount of traffic to save drivers a few minutes? The project would cause safety issues for school age children. Currently, walkers to Centre Ridge Elementary school, and children who take the bus for Bull Run ES, Liberty and Rocky Run MS, and Centreville HS from the corner of New Braddock and Store House Dr have a relatively safe environment. If the project happens, they would not. Children would have to walk across New Braddock to get to CRES. They also have to walk along New Braddock to get to CRES. I raised my 3 children and have walked in that area hundreds of times throughout their school years. I guarantee there would	Jon Yudt

			<p>be a lot of problems with child safety and New Braddock drivers if the road is extended. The project would divide our community that has been in place for 30 years. It would take a beautiful, nature filled area that my children and many other neighborhood children over the years love, and replace it with another road. The actual building and maintaining of the road is something I question. The topography of the area will be challenging to overcome. Besides actually leveling that area to be suitable for a road, every time it rains, the creek fills and rushing stormwater sometimes breaches its edges and overflows the creek. The topography is also changing over time because of stormwater eroding and changing the land. That issue would definitely need to be studied. I also question how a road will actually fit between the houses and properties that the road would split. I'm sure this was considered, but I urge anyone making decisions to please come to my house, or the dozens of houses that would have the road directly in their backyards, to take a quick look. You will also question how a road can be constructed to fit between houses. There are other reasons I strongly oppose this project, but the above are sufficient. Most importantly, the actual benefit to commuters or traffic flow is negligible. Even more important is the safety to the hundreds of children and adults who use the New Braddock/Store House Dr/Centre Ridge ES area daily. Thank you for considering my input. Please reach out to me for any more input. If someone would like to come to my house to talk further, or to walk and look at the land and creek where the road would be, please contact me. Thanks again. Jon Yudt 703 244 0487 Jon.yudt@verizon.net</p>

9/16/2023	VRE - Broad Run Expansion	Advocacy organization	Strongly agree	The expansion and electrification of the VRE Washington District Line should be acquired and extended to Charlottesville.	Mostafa ELNahass
9/16/2023	VRE L'Enfant Station and 4th Track	Advocacy organization	Strongly agree	Fourth track should be added and the line should be electrified	Mostafa ELNahass
9/18/2023	Braddock Rd Improvements (Fairfax County Pkwy to Rte 123/Ox Road)	VDOT meeting	Neutral	Before spending money on an overpass at Fairfax County Parkway and Popes Head Road. Could VDOT please experiment with efficient light timing. A "smart" traffic light. which accurately gives back the green when no cars are waiting could greatly improve the intersection. Perhaps make it so the bridge is not needed?	
9/18/2023	Fairfax County Parkway Improvements (Monument Drive/Fairfax County Parkway/Fair Lakes Parkway)	TAC meeting to add Smart Traffic lights	Strongly agree	Smart traffic lights can see cars/bikes/pedestrians which all use this intersection at varied timing and often one or two at a time. The current signal timing cannot tell if 1 or 15 cars need to progress through the intersection. A smart light can...and will allow for pedestrians crossing safely.	D Schneider
9/22/2023	Franconia to Occoquan 3rd Track Project	Advocacy organization	Strongly agree	ldk	
9/22/2023	Alexandria 4th Track	Friend/colleague	Strongly agree	ldk	

9/25/2023	Boone Blvd Extension	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. This project is budgeted over 100 million dollars for yet more car dependent infrastructure for one mile through parks while allocating 100 million for bikes and pedestrians for the entire county. Do you not see how expensive car infrastructure is? It is draining resources, killing people and making places that are polluted and unpleasant to be in.	David Duffy
9/25/2023	Braddock Rd Improvements (Fairfax County Pkwy to Rte 123/Ox Road)	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously widen roads at the expense of alternatives. Widening roads does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads.	David Duffy
9/25/2023	Braddock Rd Improvements (I-495 to Burke Lake Road)	Project webpage	Disagree	I can't even tell what this project is for. Is this to take over some of the existing lanes to convert them to HOV? If that can be done cheaply, fine. However, part of the information says \$800k and part says \$8 million. If this project is to add HOV lanes by widening the road, I am opposed to any more road expansion in Fairfax County. The county neglects all other modes of transportation and throws money at car infrastructure when it is the most costly, most dangerous and least efficient at moving people around the county. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
9/25/2023	Fairfax County Parkway	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously widen roads at the expense of alternatives. Widening	David Duffy

	Improvements			roads does not relieve congestion in the long term. The \$200 million set for this project alone could be used to add over 20 miles of new bike and pedestrian paths. A 10% modal shift can result in a 40% reduction in congestion which would do more than this road expansion. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. Any one of the proposed six-lane intersections is bigger than even oversized suburban single family house plots. Each of those intersections is the loss of \$10+k in taxable land for the county even before the ongoing maintenance costs, the human costs as people are hurt and killed at these massive junctions. You are building places that no one would ever want to be outside of a car. Is this a county for people to live or a highway that people are going to drive through as fast as possible? The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	
9/25/2023	Franconia-Springfield Parkway (and SOV)	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. There is no way two or more interchanges were going to be built for \$16 million. The county wastes money on making driving "faster" while neglecting all other modes of transportation.	David Duffy
9/25/2023	Frontier Drive Extension	Project webpage	Strongly disagree	The proposed plan for the metro station area and extension are anti-pedestrian and irresponsibly overbuilt. The jug handle interchange and noise walls will make this area like a prison. It is an excessive amount of lanes just to let a few cars take a short cut around the mall area. VDOT already cannot afford to maintain the roads that have been built and you are planning to knock down	David Duffy

				<p>tax paying businesses and put in a 4 lane road to go a trivial amount of distance. At most 2 lanes with pedestrian and bike infrastructure should be sufficient. This is access to a metro station, not a highway. Overbuilt, wide roads encourage speeding and are antithetical to providing a good, mixed use area. The language of this project exemplifies the wrong priorities by "saying accommodate pedestrian and bike facilities". The cars take up the most space and the most resources while causing the greatest harm in pollution (noise, air, water) and risk (injuries and fatalities). On street parking is even more stupid (somehow) than the rest of this plan. Why is the county going to spend even more money for private vehicle storage on a street that goes to a metro station with a paid parking garage? STOP SUBSIDIZING CAR OWNERSHIP. Each one of those surface spots is \$7k dollars of expense, will undermine any attempts to get modal shift and make it more dangerous because VDOT and the county will probably try to cut costs by doing shitty on street bike lanes right in the car door area of this on street parking. If the county wants to claim it is supportive of active transportation, it needs to act like it and stop overbuilding ridiculous monuments to failure to understand the costs of car dependency. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.</p>	
9/25/2023	Greensboro Drive Extension	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term.	David Duffy

				Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	
9/25/2023	Herndon Metrorail Intermodal Access Improvements	Project webpage	Agree	I support any aspects of this project (the description on the site is so sparse that I cannot tell what is really included) that will reduce lane widths, raise crosswalks to slow drivers and provide protected bike/pedestrian access to metro. I am against any portion of the project that would widen the roads, thus making them more expensive to maintain and dangerous to cross, and generally unpleasant to be around.	David Duffy
9/25/2023	Herndon Metrorail Intermodal Access Improvements - Phase II	Project webpage	Strongly disagree	It is insane to build a road under the auspices of improving a transit-oriented area. Cars are the problem that hold back other modes of transportation. They are expensive, take up the most amount of land for the least amount of movement of people and kill or maim people pretty damn regularly. More roads does not alleviate congestion. Modal shift reduces congestion. The county should be throwing money at making it easy, safe and pleasant to walk, scoot, bike, bus, anything but drive in their own car to destinations and this project is not going to do that.	David Duffy
9/25/2023	I-95 Reversible Ramp (EPG Southern Loop Road)	Project webpage	Strongly disagree	This is an insane undertaking for additional road access for an agency that only has 14k employees total. How much money needs to be thrown away on roads while every other mode is neglected. You may get this bridge for "Free" but VDOT already cannot maintain all the roads in a good state of repair and this is just going to	David Duffy

				keep adding expenses to an incompetent agency that VA tax payers will have to support even more.	
9/25/2023	I-495 Improvements	Project webpage	Strongly disagree	The HOT lanes are a failure of planning and vision. They do not provide a meaningful transportation "alternative" as they still essentially require a private vehicle (either your own or someone you can ride with) to use and do not provide adequate money for alternatives. The in excess of \$2 billion dollars spent on the HOT expansion and products could have provided massive amounts of pedestrian/bikeway improvements, mass transit upgrades and improvements and made an actual difference in how people got around. Instead all these projects have done is move the congestion around and lead to spending even more money on widening even more further down the line.	David Duffy
9/25/2023	Lee Highway Widening	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services. Just build the pedestrian and bicycle facilities and cut the expense and added liabilities and degradation of the environment by widening the road.	David Duffy
9/25/2023	New Herndon Station Park	Project webpage	Strongly disagree	It is insane and irresponsible to spend a hundred million dollars to add parking in the catchment area of a metro station. The area around a metro station, especially one not at the end of the line should be for dense in-fill	David Duffy

	and Ride Garage			development, not parking that is \$10 a day. Apartments or mixed use buildings should be here, not extremely subsidized parking for cars. Improvements to bus access are fine, but parking garages are a monument to failure to plan for the future and inability to see where and how people actually want to live. It also hobbles the metro and squanders the billions invested in this line. A neighborhood connected to the metro station with denser housing will generate far more than the potential of 2000 parking spots while generating tax revenue for the county as opposed to being an expensive albatross that will suck resources to be maintained. Adding some bike parking is good, but you don't need millions on car storage to accomplish that.	
9/25/2023	Richmond Highway Corridor Improvements	Project webpage	Strongly disagree	This project is not explained on the fairfax county project information page. I assume it is road widening based on the limited description. Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
9/25/2023	Rock Hill Road Overpass	Project webpage	Disagree	Proposal is for a four-lane road. Excessively overbuilt roadways increase costs, increase speeding and are less safe for pedestrians to cross. Pedestrian and bicycle facilities should be the priority and a two-lane road sufficient without driving up long term costs. Virginia	David Duffy

	Improvements			DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land.	
9/25/2023	Rte 7 Corridor Improvements - Phase 2	Project webpage	Strongly disagree	Project does not have an associated project description, so I can't see any details. Based on the mention of widening and adding capacity, Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
9/25/2023	Shirley Gate Road Improvements	Project webpage	Strongly disagree	What is wrong with this DOT? How much more land is going to be consumed and paved over for marginal "time improvements" for single occupancy cars? VDOT is already unable to maintain all the roads in a good state of repair. The County is already having trouble paying for all the priorities it has. This will remove taxable land, increase the impervious area, increase maintenance expenses and increase air, water and noise pollution in the area. The county should be focusing on making it nicer and easier to live here not drive faster to get out.	David Duffy

9/25/2023	Soapstone Drive Connector	Project webpage	Disagree	Proposal is for a four-lane road. Excessively overbuilt roadways increase costs, increase speeding and are less safe for pedestrians to cross. Pedestrian and bicycle facilities should be the priority and a two-lane road sufficient without driving up long term costs. Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land.	David Duffy
9/25/2023	Town Center Parkway (underpass DTR)	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
9/25/2023	US 1 Bus Rapid Transit	Project webpage	Neutral	I support the BRT portion of the project. I am opposed to the associated road widening portion of the project. Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Even under the umbrella of expanding mass transit, a road	David Duffy

				widening has to be thrown in. The road was already 4-8 lanes in various places. How much wider do they have to be before people get that wide roads do not reduce or solve congestion? How much more money has to be thrown away? How many more small businesses and houses get knocked down widening roads?	
9/25/2023	VA 7, Widen	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services. I can't tell exactly where this is, but there is a metro line in the middle of route 7 that would be inhospitable surrounded by even more ridiculous roadways. You are hampering and killing transit by making moats of deadly traffic around them.	David Duffy
9/25/2023	VA 7 (CE3161, CE3701)	Project webpage	Strongly disagree	Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy

9/25/2023	VA 123 Widening (Fairfax)	Project webpage	Strongly disagree	Project does not have an associated project description, so I can't see any details. Based on the mention of widening and adding capacity, Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
9/25/2023	VA 286 - Popes Head Road Interchange		Strongly disagree	Project does not have an associated project description, so I can't see any details. Based on what I have seen about making a massive new interchange, Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services. This area is claimed to not be sufficient to support transit, but it somehow needs a massive interchange? It makes no sense to throw money away on the least efficient form of transportation. The number of vehicles through this area will not justify the costs associated with it and the ongoing expenses.	David Duffy

9/25/2023	Widen East Spring Street	Project webpage	Strongly disagree	Project does not have an associated project description, so I can't see any details. Based on the mention of widening and adding capacity, Virginia DOT already cannot afford to maintain the roads it has adequately. It is irresponsible to continuously expand roads at the expense of alternatives. Road expansion does not relieve congestion in the long term. Car infrastructure is expensive to build, maintain and reduces both quality of life and taxable land. The county neglects pedestrians, bicycling and mass transit and builds fiscally irresponsible wide, dangerous roads. Car dependent infrastructure is also exclusionary and hurts those that cannot afford a car by limiting their access to jobs and services.	David Duffy
10/2/2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	This project is one of the region's most important projects for commuting, east-coast travel and freight. It will also provide an important new pedestrian and bicycle link.	
10/11/2023	Braddock Rd Improvements	News/media	Strongly agree	Roadways are dangerous with blind curves and little/no consideration for pedestrians and bike	Lakepointe Community Council
10/18/2023	VA 123 Widening (Prince William)	Advocacy organization	Strongly disagree		
11/1/2023	Braddock Rd Improvements (I-495 to Burke Lake Road)	Neighborhood/civic association	Strongly agree	Walking safely is a concern	

11/20 /2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Rail and pedestrian improvements are essential to hitting our regional climate goals. delaying or not supporting this project would be a generational mistake.	Joseph Schiarizzi
11/20 /2023	Lee Highway Widening	Neighborhood/civic association	Strongly disagree	Lee highway is wide enough, widening it will have no long term traffic benefits and would only be done if our leaders have absolutely no vision for the future. Add bus rapid transit here, or keep pretending like it is 1960s and we should just destroy all our neighborhoods in favor of highways.	Joseph Schiarizzi
11/20 /2023	Alexandria 4th Track	Advocacy organization	Strongly agree	Please expand all rail projects at it is the smart and obvious move to support our regional climate goals, and support economic expansion in the area.	Joseph Schiarizzi
11/20 /2023	DASH Service Expansion	I take DASH all the time	Strongly agree	DASH is excellent but needs more support and expanded service to meet the needs of our community.	Joseph Schiarizzi
11/20 /2023	Bus Rapid Transit on Route 7.			The 28a bus was one of the top fastest buses to recover ridership after 2020 of EVERY BUS LANE IN THE COUNTRY. It would be absolutely insane and irresponsible to not include BRT on route 7 at the top of every priority list. Let's get this done, it is essential to meeting our climate goals and a generational mistake to pass on.	Joseph Schiarizzi

11/21 /2023	Soapstone Drive Connector	Friend/colle ague	Strongly disagree	<p>I am submitting my comments to express my opposition to the proposed extension of Soapstone Road in the vicinity of Reston Town Center East. The proposal, as I understand it, is to build a four-lane road connecting Soapstone Drive, from its current terminus at Sunrise Valley Dr, to Sunset Hills Rd. This connection would be through the heart of the emerging Reston Town Center East. This proposal clearly contradicts the basic principles of Transit Oriented Development. Rather than expand motorized connections, in an area which is already experiencing increasing levels of congestion and delays, the proposed connection would better serve the larger Reston community as a non motorized connection for bikes, pedestrians, and those reliant on personal micromobility devices. The existing bike-Ped facilities along Reston Parkway and Wiehle Ave are substandard and, in light of the vehicular conflicts, dangerous in some spots. In addition to its impact on Sunset Hills Rd and the RTC East, the new connection would attract significantly more vehicular traffic through the established communities along Soapstone Dr between Lawyers Rd and Sunrise Valley Dr. This is area where there is a considerable amount of pedestrian and bicycle traffic today, not to mention school traffic associated with Terraset Elementary School. I hope the county will revisit this proposal and conclude the negatives for this proposed connection far outweigh any benefits. Like many Reston residents, I look forward to the evolution of Reston Town Center East as a true Transit Oriented Development, not as a car dependent suburban center.</p>	Eta Nahapetian
----------------	---------------------------------	----------------------	----------------------	---	----------------

11/26 /2023	Magarity Road Widening	Project webpage	Strongly disagree	Magarity Road is a neighborhood street, with many homes, schools and a community center nearby. It is also more connected now to destinations in Tysons East thanks to new trails and other improvements. The emphasis should be on making the road safer to walk and bike on, and to cross. Widening this road will result in faster speeds and more through traffic between Falls Church and Rte. 7, making it less safe for pedestrians and other non-motorized travelers.	Douglas Stewart
11/27 /2023	Route 15 North Widening	Project webpage	Strongly disagree	This is a very costly and traffic-inducing road widening project. It would be better to substitute a less expensive, less impactful alternative that would also have fewer environmental impacts. The project that continues to the north on Rt 15 from Montresor to the Potomac River and should be canceled in favor of less impactful solutions to address the Lucketts bottleneck.	
11/27 /2023	VA 7, Widen	Project webpage	Disagree	The project to widen VA 7 Leesburg Bypass between S. King Street Widen and Route 7 West needs alternative options before being included in the Loudoun Long Range Plan because of the close proximity of residential neighborhoods to that section of roadway and the impacts that would result from widening.	
11/27 /2023	Route 7-690 Interchange	News/media	Disagree	This project should be modified to eliminate the eastbound Rt 7 exit to Rt 690 to avoid impacts to wetlands and adjacent neighborhoods.	

11/27/2023	Battlefield Park Bypass Project	Project webpage	Strongly disagree	I don't think there is a compelling need for a new north-south road like this one, and fear that it will induce more low-density residential development that will only exacerbate our traffic congestion.	
11/27/2023	Reston Parkway Improvements	Project webpage	Strongly disagree	I think widening this road will negatively affect pedestrian safety in Reston, and it conflicts with the goals for the Town Center to develop around the Metro stations and foster more walking and bicycling trips.	
11/27/2023	US 29 Widening Project (ECL City of Fairfax (vic. Nutley St.) to Capital Beltway)	Project webpage	Strongly disagree	29 is already too wide, especially around Merrifield and Dunn Loring. Merrifield and Dunn Loring are within walking distance of the Dunn Loring and have all sorts of walkable destinations and dense, mixed-use development. Also, the County is studying multimodal improvements on Gallows Road. It would be imprudent and financially very wasteful to negate these investments in transit, mixed-use development and walkability by adding even more lanes for car travel on 29.	
11/27/2023	VA 123 Widening (Fairfax)	Project webpage	Disagree	What sections of 123 would be widened under this project? There is no project description in the PDF list or on the website that clarifies this question. I think there further widening in most parts of 123 both south and north of Fairfax City (and including Fairfax City) would be overly expensive and detrimental to the County's plans of creating more walkable activity centers, including Tysons,	Douglas Stewart

				Vienna, Oakton and the area around George Mason University.	
11/29 /2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Extremely important to facilitate efficiency in commuting and thereby relieve traffic on alternate routes into and out of the city	
11/29 /2023	VA 7 Bus BRT Project	Friend/colleague	Strongly agree	Very needed to lessen congestion on Rt 7	
11/29 /2023	Multimodal Bridge to Van Dorn Metro Station	Friend/colleague	Agree	Important for success of Metro	
11/29 /2023	US 1 Bus Rapid Transit	News/media		WMATA Full Funding and the Better Bus Visionary Network. It is absolutely critical that the operating and capital funding gap at WMATA be closed by partners.	
11/29 /2023	Loudoun County Parkway,	Neighborhood/civic association	Strongly disagree	Wholly disregards decades of planning and conservation, un-needed in light of other transportation priorities and simply creates a development vector in an area unsuited	

	Propoed southern Parkway from 211 to 29 around Warrenton			for same (note: no place on drop-down menu to select this project so "parkway" used as a placeholder)	
11/29 /2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Critically important for WMATA and success of efficient traffic flow	
11/29 /2023	VA 7 BRT Project	Advocacy organization	Strongly agree	Needed to help manage traffic flow on Rt. 7	
11/29 /2023	VA 9 Improvemnts	Project webpage	Strongly agree	Important series of traffic management solutions appropriately sized for the setting and for flows	
11/29 /2023	Long Bridge VA - DC	Advocacy organization	Strongly agree	Critically important for success of VRE and for transit into the city	John W. McCarthy
11/29 /2023	Alexandria 4th Track	Advocacy organization	Strongly agree	critically needed for freight, transit and passenger	John W. McCarthy

11/29 /2023	Route 15 North Widening	Project webpage	Strongly disagree	The proposed plan is costly, will induce traffic and raises additional safety issues – Replace with a less expensive and less damaging alternative. Cancel the additional planned widening from Montresor to the Potomac River.	Gem Bingol
11/29 /2023	Rte 7 Corridor Improvements - Phase 2	Project webpage	Strongly disagree	This project proposes to widen Leesburg Bypass between S. King Street and Route 7 West and needs more study of alternatives before Loudoun adds this to the long-range plan because of its impacts to adjacent neighborhoods.	Gem Bingol
11/29 /2023	Route 7-690 Interchange	News/media	Disagree	Modifications are needed to allow the intersection to be built without an eastbound exist ramp to Purcellville would address neighbors concerns and wetland impacts.	Gem Bingol

Table 6. Virginia Project Suggestions

Date	Do you have any suggested projects that should be considered for the long-range transportation plan (Visualize 2050)?	Name
2/27/2023	BRT	
3/17/2023	A POTOMAC RIVER CROSSING to connect Loudon County VA to Montgomery County MD and stop the ridiculous commute down and into the beltway and then back out west simply to get to Dulles area or points west.	Greg Visscher
3/22/2023	1. Occoquan to Neabsco Creek 3rd/4th Track Project (VPRA TRV) - Phase 3 2. Neabsco Creek to Quantico 3rd/4th Track Project (VPRA TRV) - Phase 3 3. Alexandria to Springfield 4th Track Project (VPRA TRV) - Phase X 4. Franconia to Occoquan 4th Track Project (VPRA TRV) - Phase X 5. I-95 Bi-Directional Express Lanes Dale City to Springfield 6. I-95 Bi-Directional Express Lanes Stafford CL to Dale City 7. North Woodbridge to Potomac Mills Fixed Guideway Study (Bus Transit/Rail) 8. US 1 Bus Rapid Transit (Woodbridge to Dumfries) 9. VA28/Old Centreville Rd Bus Rapid Transit (Manassas to Centreville) 10. VA234 Business Bus Rapid Transit 11. Route 29 Alternate (Close Route 29/Remove Battlefield Bypass) 12. I-66 Trail over Bull Run 13. Active Transportation Interstate crossings 14. 2nd Rosslyn WMATA Station 15. Fair Oak WMATA Station	Mark Scheufler
6/14/2023	Yes, WMATA (Metro) or even competing transit systems to bring prices down, reduce traffic. Shift funding from wasteful highway and road expansion projects to both redesigning arterial roads to make them safer for walking, dedicated SAFE bike lanes, transit.	
6/14/2023	There should be a package of transit station access improvements to support safe, convenient walking and biking access to Metro, VRE, bus rapid transit stations, and stops along high-frequency bus lines. There should be more safe, dedicated bike lanes so people can commute easily within their own community!	Andy
6/14/2023	With the extension of the silver line, our transit options and stations should increase. Transit-oriented development will help people move to where they need to easier, faster, safer and reduce their carbon footprint. Make cities made for people, not cars!	
6/14/2023	Build more transit-oriented development projects, where the projects' focus is on providing communities alternatives to driving to get around. Such as metro, VRE, other transit systems such	

	as BRTs. Dedicated and SAFE bike lanes. Widening roads only makes streets less safe for our kids, and separates communities!	
6/14/2023	Yes. Road diets everywhere, please and thank you.	Kripa Patwardhan
6/15/2023	BRT along Rt. 7	John Burke
6/19/2023	In general more funds towards bus, bike and pedestrian facilities	Mary Crowe
6/23/2023	National Landing to National Airport pedestrian bridge - this project is critical to knitting together the airport and multimodal hub in Crystal City. Route 1 boulevard conversion in National Landing - remaking this corridor as a people-friendly space is a key regional goal.	Kevin O'Brien
6/23/2023	Countywide packages of walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops. This should be funded in all Virginia counties.	Kevin O'Brien
6/27/2023	Expansion of metro rail access towards Burke and Fairfax City.	
7/7/2023	National Landing to National airport pedestrian bridge. This project will provide access for residents in National Landing and connect transit users to National Airport.	Joan McIntyre
7/29/2023	Route 7 BRT needs to be in Visualize 2050. The planned Route 7 Bus Rapid Transit from Tysons to Alexandria will significantly improve travel on Northern Virginia's second busiest bus corridor and support plans for walkable transit-friendly activity centers.	Bill Pugh, Coalition for Smarter Growth
7/31/2023	I support the Route 1 Bus Rapid Transit. We need better ways to get around the County without requiring residents to own cars. I can't afford one in my budget. TPB member agencies need to submit projects that better reflect regional and local policy goals to address climate change, reduce driving, increase access to jobs by transit, and address regional equity. This means removing many of the proposed 900 new lane miles of road widening. Shift dollars proposed for highway and arterial expansion to address unmet climate resilience and transit funding needs. Thank you, Sam Ressin Vienna, VA	Sam Ressin
8/15/2023	Route 7 BRT should be include. I also suggest your consideration of Transit Station access packages where you can tie together needed improvements to safety, walking and biking to Metro, BRT and other transit stations.	Sonya Breehey

8/29/2023	See comments provided on prior question about Orange Line extension to Centreville. This extension would add much needed transit to Fair Oaks and Centreville. The county is building a new garage at Monument Dr to serve transit, so please bring us transit.	Elizabeth Stein McCartney
8/29/2023	Better living experience, through improved public transportation access!	Serge Kaddoura
8/30/2023	I would suggest looking into BRT for Route 7 for the same reasons that BRT has been suggested for Route 1.	
8/31/2023	Transit Station Access Packages - Package needed improvements to support safe, convenient walking & biking access to Metro, VRE, planned BRT stations, and stops along high-frequency bus lines.	
9/5/2023	Route 7 Bus Rapid Transit – The planned Route 7 BRT will significantly improve travel on Northern Virginia’s second busiest bus corridor and support plans for walkable transit-friendly activity centers.	Kevin
9/5/2023	Keep out of Visualize 2050 proposals for new Potomac River bridges and highways from Loudoun Co. to Montgomery Co. and from Prince William Co. to Charles Co. These multi-billion dollar proposals would destroy rural and Potomac River natural areas and fuel more sprawl and traffic. TPB’s own analysis has shown that they would have little benefit to improving travel in the region. These proposals are not consistent with TPB's policy framework. They would divert significant resources from TPB's identified priority strategies and are inconsistent with multiple TPB policy goals, for example undermining "Bring Jobs and Housing Closer Together" and "Actively encourage mode shift away from less climate-friendly modes like single occupancy vehicles".	Bill Pugh
9/6/2023	VRE Expansion	Mostafa Elnahass
9/6/2023	VRE expansion and electrification	Mostafa Elnahass
9/6/2023	Buy all ROW from freight rail	Mostafa Elnahass
9/6/2023	Electrify all rail lines in the area	Mostafa Elnahass
9/6/2023	Pedestrian and bike Metrorail station access improvements within 1/2 mile of West Falls Church, Tysons, Reston, Herndon and Ashburn stations.	Bill Pugh

9/6/2023	Pedestrian and bike Metrorail station access improvements within 1/2 mile of West Falls Church, Tysons, Reston, Herndon and Ashburn stations.	Douglas Stewart
9/13/2023	Trolley buses replacing Diesel and CNG busses	Mostafa ElNahass
9/15/2023	Loudoun County Transit improvements	Mostafa ELNahass
9/15/2023	Creating a grid pattern in Northern Virginia like Old town Alexandria	Mostafa ElNahass
9/15/2023	VRE Electrification	Mostafa ElNahass
9/16/2023	Washington and Old Dominion Railway Revived as a VRE line	Mostafa ELNahass
9/16/2023	VRE Northwest Route to Dulles Airport and West Virginia	Mostafa ELNahass
9/16/2023	VRE Extension to Richmond	Mostafa ELNahass
9/18/2023	Smart traffic lights. Test intersections at Fairfax County Parkway and Monument Drive. Franklin Farm Rd and West Ox Rd, Fair Oaks Hospital and Rugby Rd. High impact for travelers, excellent test sites for feedback.	D Schneider
9/25/2023	Comprehensive protected bike lanes, continuous sidewalks, lane width reductions and a focus on road safety. VDOT is a single-minded agency that neglects pedestrians and bicyclists in the name of maximum vehicle throughput. The failure to provide any meaningful transportation alternatives has resulted in an increase in pedestrian deaths, increased costs of road infrastructure, and increased time spent in traffic by forcing all citizens to use private automobiles for all transportation needs. VDOT refuses to provide pedestrian or bike improvements unless there is an associated widening of a road, which drives up costs of projects and leaves a maintenance liability when VDOT's repair program is already unable to keep a good state of repair. They are fiscally irresponsible and criminal negligent in providing safe streets or efficient roads. Safe streets are narrow and slow. Safe roads limit access and provide safe alternative infrastructure to pedestrians/bicyclists and safe crossings. Roads should also be fiscally responsible and not overly built, excessively large and consume valuable land. VDOT does none of these things. They build and refuse to revise fast, wide neighborhood streets, provide no or extremely limited and unsafe pedestrian/bike infrastructure and spend money like they expect everyone else to cover their irresponsible ways. Have the courage to include a project that would actually make a difference at a lower cost per mile, provide greater mobility and freedom to those that cannot or cannot afford to drive and will actually reduce some of the congestion problems without the associated degradation that increasing car	David Duffy

	infrastructure causes. Cities are expensive because people crave walkable/bike able/livable areas, so build them instead of more deadly stroads and highways.	
9/25/2023	<p>Franconia Road road diet and protected bike lanes. Franconia Road is a six lane road with a 35mph speed limit that has three elementary schools, two middle schools and two highschool directly or shortly off of the road in the stretch from Frontier Drive to Telegraph Avenue. The sidewalks are inadequate for two people to pass, when even present. There is no protection for bikes on the side west of Van Dorn and the bike gutters on the eastern portion are more dangerous than nothing and only go as far as Twain middle school. The lanes are wide and the road is fairly straight, which encourages and facilities excessive speeding between the many traffic lights. There are residences directly off of this stroad which increase conflict points. The route is used as a 95-495 bypass in the evenings driving up non-local traffic and making it excessively dangerous to cross or be on. The intersection at Van Dorn does not even have marked crossings on half of the intersection. The intersection at Brookland Road gets overburdened and breaks down every morning at arrival time for Edison High because so many students drive to this side street or are dropped off on this side street to try to avoid the jam getting into the school because the entrance is too close to the massive intersection with Van Dorn. The Brookland Road intersection is crossed regularly by students patronizing the McDonalds on the corner who are put at risk by the sheer volume of traffic here that does not care about them and does not look for them. I witnessed a pedestrian hit by a car in the crosswalk to the McDonald's this morning. The cars turning onto Franconia have no incentive to look to the right as they are watching the two lanes of traffic coming from the left and they routinely ignore people at that corner. I routinely see people running across this street because of the lack of safe crossings. A failure to provide meaningful transportation alternatives has caused the failure of this route to be efficient for cars or safe for people. Protected, on street bicycle paths, raised crosswalks and reduced traffic lanes are the only way to increase safety and modal shift to allow more people (not cars) to move through this area safely.</p>	David Duffy
9/25/2023	<p>Van Dorn Street bike and pedestrian improvements. Van Dorn Street in Fairfax has a lot of housing and some shopping along the section from the beltway south to Telegraph Road. The sidewalks are narrow and inadequate. There are few crossings across this wide street. There is inadequate bike and pedestrian facilities near the ramps to the beltway. The road should be narrowed and space given over to protected bike ways and pedestrian paths. The current walkway under the beltway is extremely narrow and does not allow passage of people and bikes.</p>	David Duffy

10/11/2023	Again Guinea Road between Burke Road & Zion Drive 2 lanes become one -variance needed on RPA	Lakepointe Community Council
11/29/2023	Proposed Southern parkway around Warrenton should be opposed -WMATA operating and capital funding gap should be closed by partners -Rt. 7 BRT project should be advanced in the plan -Climate resilience capital project needs should be included in plan -No new crossings of the Potomac River should be contemplated; projects are of negligible impact on efficiency of traffic flows	John W. McCarthy
11/29/2023	Include climate resiliency projects to protect transportation infrastructure from damaging weather impacts. Submit more projects that help reduce the climate impacts of transportation, i.e. There should be a package of metro access bike and ped multimodal projects for more equitable access and options for getting to metro stations without a car. Also there should be a package of countywide walking, biking and safety improvements, especially in older neighborhoods which lack safe ways to walk, bike and access bus stops. Do NOT include these potential future projects on the list because they counter our regional climate objectives: *Rt 15 widening project from Montresor to the Potomac River, *A new Potomac River crossing in Loudoun County, VA to Montgomery County, MD, *Gloucester Parkway extension through Goose Creek riparian habitat west of Belmont Ridge Rd.	Gem Bingol

Subject: Visualize 2050 TPB Meeting for Thursday, March 30, 2023

To: Transportation Planning Board of the National Capital Region

Reference: Proposed Midcounty Highway Extended/M83 or any alias name referring to M83 Highway

The TPB's Long-Range Transportation Report in June 2021 wisely eliminated the proposed Midcounty Highway Extended due to:

- [Not meeting air quality conformity requirements - R19-2021 - Inclusion of Project Submissions in the AQC Analysis for the Constrained Element of the Update to Visualize 2045 and the 2023-2026 TIP](#) (page 28, Midcounty Highway Extended is struck out);
- The Director of MCDOT, Chris Conklin, wrote to the TPB on May 13, 2021, "Montgomery County is recommending removal of Midcounty Highway Extended from Visualize 2045 update because the project is no longer the preferred recommendation to serve the northwest Montgomery County transportation needs and is not included in the Capital Improvements Program (CIP)";
- [Montgomery County Council Resolution 18-957](#) prohibits decisions-makers from using proposed Midcounty Highway Extended/M83 in future master plans for transportation planning;
- TPB adopted a strong climate goal, and Midcounty Highway Extended/M83 is not consistent with - but instead hinders our ability to meet the climate goal;
- The State of Maryland adopted a Climate Solutions Act, and Midcounty Highway Extended/M83 is not consistent with those climate goals;

- Montgomery County is working on their Climate Action Plan, and Midcounty Highway Extended/M83 is not consistent with our climate goals;
- Midcounty Highway Extended/M83 is inconsistent with - and would divert resources away from - regional { {policies on future} } transportation priorities of walkable communities and transit solutions and other ways to manage congestion and travel;

In addition, TPB should eliminate Middlebrook Road Extended Widening, (ITEM 7 – Action February 15, 2023, Visualize 2050: Technical Inputs Solicitation Approval and Plan Development Kickoff, page MD-4, row 10); due to Midcounty Highway Extended/M83 being eliminated in the TPB report in 2022.

Subject: Visualize 2050 comment on MD projects

Dear TPB Chair Collins:

TPB member agencies need to seriously review and revisit all projects not currently under construction or in final stages of design, not just the small number of projects that TPB staff classified as "Developmental/Non-Exempt" for zero-based budgeting.

The proposed highway and arterial capacity expansion projects in the last Visualize 2045 are inconsistent with adopted TPB and COG regional policies and Montgomery County local policies that seek to create more walkable, transit-friendly communities with less need to drive.

Please remove the 495/270 project from the Regional Plan

Expanding highways attracts more drivers and also encourages drivers to live farther from their jobs because of (temporarily) reduced commute times. Mostly, expanding highways increases emissions --- something we (supposedly) want to address due to climate change.

Sustainable and Equitable Alternatives to Expanding 495/270

- BRT on MD Route 355 (which runs parallel to 270)
- Expand service on MARC Brunswick Line (which runs parallel to 270)
- Purple Line will reduce East/West congestion (which runs parallel to 495)
- Reversible Lanes (using existing lanes) on 270 to handle rush hour traffic

Other Projects

- Build more housing (especially affordable housing) near transit
- Invest in TOD within a mile of each Metro and Purple Line station – will help address economic and racial inequities, create jobs with very low commute times, reducing rush hour flow
- Re-deck and refurbish American Legion Bridge

Attachments: Remove 495270 P3 from Visualize 2050.pdf

Dear Transportation Planning Board Members and Maryland Leaders,

Please remove the I-495/I-270 Op Lanes Plan from the regional long range plan, Visualize 2050!

Reasons:

1. The Op Lanes plan locks Maryland in a Public Private Partnership (P3), like the one Virginia is locked into, which saddles taxpayers and drivers with enormous expenses for over 50 years. In addition, the non-compete clauses take away some of the rights of local jurisdictions to make and enact transportation decisions to increase safety and reduce congestion.
2. P3's have proven to be extremely risky for large projects such as this, with delays, cost overruns, and large legal expenses being the norm, as we see with Maryland's Purple Line.
3. The traffic modeling in the Op Lanes FEIS shows longer evening commutes in the general lanes if the Op Lanes were to be built than if they aren't. We are better off NOT building them.
4. The I-270 Innovative Congestion Management Project (ICMP) solved congestion on Lower I-270 with ramp metering and extension of merge lanes which has reduced bottlenecks and accidents - half at a cost of under \$150 million. This is an example of how thoughtful, smart and inexpensive changes can make a huge difference in congestion.
5. The focus of transportation investment needs to be on convenient, affordable transit, in order to:
 1. Reduce green house gas emissions
 2. Give people realistic options to leave their car at home
 3. Reduce the number of cars on roads so those who MUST drive can drive without congestion
 4. Create a much more equitable transportation system, rather than one which locks in a safer, faster trip for a few, and a less safe, slower trip for the rest.

Please remove the deeply flawed P3 Op Lanes project, which is not aligned with our regional climate goals, which is environmentally and economically irresponsible, which won't solve congestion and will make it worse for many people, and which clearly is not in the public interest.

Sincerely,
Sally Stolz

March 29, 2023

National Capital Region Transportation Planning Board
Maryland Jurisdictions and Agencies

Re: **Visualize 2050 project submissions need to change to reflect adopted regional policies for climate, safety, equity, and walkable transit-friendly communities**

Dear Maryland TPB board members,

At your Thursday, March 30 TPB working meeting and following it, the Coalition for Smarter Growth respectfully asks you to:

1. **Seriously review and revisit all projects that are not under construction or in final stages of design for consistency with regional policies.** The TPB staff classification of projects as "Funded/Committed//Exempt" is so overly broad that it includes many projects not completed until 2035 and beyond, or projects with only planning dollars identified or projects inactive for the foreseeable future. These projects should only be resubmitted if they are consistent with regional policy goals. This was the intent of the TPB board in 2021 calling for the current special update to the long-range plan.
2. **Remove the current MD Op Lanes project and many of the 1,000 new highway and arterial lane miles proposed in Visualize 2045, as this massive investment is not consistent with achieving regional policy goals – and ignores induced demand.** TPB, regional, and local policies overwhelmingly call for reducing car-dependence and prioritizing investments to foster walkable transit-oriented communities, increase travel demand management programs, and prioritize safety and climate goals.
3. **Package and submit for inclusion in Visualize 2050 the many identified local unmet needs for safe street improvements for walking, biking, and transit access.** While often smaller individual infrastructure improvements, these are regionally significant investment packages and deserve to be in the Visualize 2050 constrained element, as they are needed to achieve regional safety, mode shift and transit access goals and other adopted TPB priorities. Other regions include these in their plans, and Visualize 2045 included other types of small project groupings as well.
4. **Resubmit critical projects that invest in transit-oriented development, rail, and bus rapid transit.** Visualize 2045 included many important projects like Montgomery County BRT lines, Purple Line, and MARC improvements. These types of projects need to be resubmitted and prioritized in Visualize 2050.

5. **Submit critical projects not included in the last plan, like Prince George's Blue Line TOD infrastructure investments.** Maryland Transit-Oriented Development plans will be transformative for multiple jurisdictions, including reducing long Prince George's commutes on the Beltway, and their supportive infrastructure projects need to be included in Visualize 2050. Other important projects include Maryland portions of the National Capital Trail Network, bus priority treatments and rider amenities on high-ridership lines, and Southern Maryland rapid transit.
6. **Keep out destructive and wasteful proposed projects like M83 and new Potomac River highway crossings from Loudoun County and Prince William County into rural Maryland.** Various rural and suburban highway and interchange projects were rightly excluded from Visualize 2045, as they are inconsistent with TPB and COG policy goals and siphon funds from safety, sustainability, and equity priorities. These bad projects also run counter to the goals of Maryland's nationally recognized smart growth program.
7. **Recognize that achieving the COG, Montgomery, Prince George's and MD Climate Solutions Now Act greenhouse gas targets requires reducing per capita VMT by 20% in addition to rapidly adopting electric vehicles.** TPB's climate study found that our region needs to reduce per capita VMT of passenger vehicles 20% by 2030, in contrast to Visualize 2045, which would only achieve a 5% reduction by 2045. And achieving TPB's new adopted greenhouse gas reduction targets requires even stronger action on your part. The reconfiguration of Visualize 2050 along the lines outlined above is one critical part of achieving Maryland climate targets.

Note that the Coalition for Smarter Growth will submit to you more detailed comments on Visualize 2050 projects next month.

Thank you for your consideration.

Attachments: MDSierraClub-TPBcomments-29Mar2023.pdf

Dear Transportation Planning Board Members, Chair Collins, County Executive Elrich, County Executive Alsobrooks, and County Executive Fitzwater,

Attached you will find Maryland Sierra Club comments related to Maryland project submissions for *Visualize 2050*.

We encourage you to include projects in *Visualize 2050* that help Maryland and the region reach its climate goals, advance equity, improve mobility, and achieve its vision of ending traffic-related fatalities and serious injuries. The region's financially constrained plan should reflect a sustainable transportation system that gives people choices—not one that perpetuates car dependency and makes it harder for people to access jobs, food, healthcare, education, and recreation. Please remove the I-495 and I-270 toll lanes project and additional highway widening projects and instead promote projects that improve and enhance public transit, equitable transit oriented-development with affordable housing, and pedestrian and cycling infrastructure.

Can you please confirm receipt of these attached comments?

Sincerely,

Lindsey Mendelson

RE: Proposed Visualize 2050 Projects

Dear Members of the Transportation Planning Board,

The Sierra Club Maryland Chapter urges you to include projects in the *Visualize 2050* long-range transportation plan update that help Maryland and the region reach their climate goals, advance equity, improve mobility, and achieve its vision of ending traffic-related fatalities and serious injuries. To realize the objectives, the Transportation Planning Board should include projects that improve and expand public transit, equitable transit-oriented development with affordable housing, and pedestrian and cycling infrastructure. The *Visualize 2050* should not include projects that conflict with Maryland's climate and equity goals—specifically projects that encourage auto-centric development, exacerbate sprawl, and fail to address the root causes of congestion.

Highway expansion projects within the current list of Transportation Planning Board projects run counter to the [region's new climate targets](#) and Maryland's new ambitious target to reduce greenhouse gas emissions 60% below 2006 levels by 2031, as required by the Climate Solutions Now Act of 2022. The National Capital Region Transportation Planning Board [Climate Change Mitigation Study](#) indicated that the Greater Washington region must reduce per capita driving (light duty VMT) 20% below the 2030 baseline forecast under the region's current transportation plan, ensure 50% of cars sold are EVs by 2030, and take additional actions to reduce emissions at least 50% by 2030. Vehicle Miles Travelled (VMT) per capita and total VMT were increasing prior to the COVID-19 pandemic in 2020 and have been increasing since 2021. Adding highway capacity would undermine efforts to meet our climate targets by increasing VMT.

The proposed highway expansion projects would also undermine our progress to cut air pollution. More than 85% of Marylanders live in counties that do not meet federal clean air standards for ozone, due in large part to vehicle tailpipe

emissions. The region needs to adopt a fix-it-first approach where it prioritizes maintaining its existing highway assets instead of building new ones.

Last year's TPB Chair Pamela Sebesky encouraged the TPB to better integrate climate change mitigation activities—including on-road GHG reduction goals and a set of multi-pathway reduction strategies—into the long-range transportation plan and other regional planning activities.

To be successful, Sebesky [emphasized](#) that “the collective commitment of TPB members to take action will be critical along with a consensus of member jurisdictions to adopt a set of strategies that are comprehensive and have a diverse set of actions to offer, so that every jurisdiction can take one or more actions.”

Maryland can take a significant action by removing the unwieldy and harmful I-495 and I-270 toll lane highway expansion that will lead to additional toll lane expansions and expansions of arterial roads. The TPB's 2021 Climate Change Mitigation Study showed that it will be impossible to meet 2030 and 2050 emissions reduction goals unless the most polluting projects are replaced with less polluting projects and supportive travel demand management programs (and updated assumptions for telework) and land use in the long-range transportation plan.

The I-495 & I-270 Managed Lanes project cannot be reconciled with the region's VMT and emissions reduction goals. Therefore, the Sierra Club Maryland Chapter urges you to remove the I-495 and I-270 high occupancy toll (HOT) lanes proposal in the list of projects for *Visualize 2050*. We also urge you to weigh carefully and consider removing other Maryland projects that widen or add more capacity to our roads and highways for single-occupancy vehicles beyond maintenance. Numerous [studies](#) show that adding highway capacity to reduce congestion is a false solution because it attracts more drivers and after a few years, the lanes fill up again with more traffic and congestion returns.

The I-495 and I-270 toll lanes project would expose residents and environmental justice communities located near the highways to adverse health impacts by increasing the localized air pollutants, including particulate matter pollution during the construction and operation of the toll lanes. Expanding I-495 and I-270 would also cause irreversible damage to the environment and historic and cultural resources. Graves in the Morningstar Tabernacle No. 88 Hall and Cemetery in the historic Black community of Gibson Grove in Cabin John would potentially be disturbed if the toll lanes project proceeds. In addition, the toll lanes expansion also threatens Plummers Island, a globally unique biodiversity hotspot and site of over 120 years of ongoing research.

Instead of adding HOT lanes to I-495 and I-270, we, along with multiple groups in the Maryland Advocates for Sustainable Transportation coalition, [recommend](#) the following comprehensive and integrated approach to addressing congestion in the region including:

- Implement planned Bus Rapid Transit (BRT) on MD Route 355 (which runs parallel to I-270) and on MD Route 586 (Veirs Mill Road - which facilitates east-west trips) in Montgomery County.
- Expand the MARC Brunswick Line (which runs parallel to I-270).
- Implement/increase the number of commuter buses that run on I-270 and I-495, ideally on dedicated lanes.
- Increase the frequency and reliability of all bus services in the I-495 and I-270 corridors, ideally on dedicated lanes.
- Implement more protected bike lanes and trails along roadways in the I-495 and I-270 corridors.
- Use elements of Innovative Congestion Management like ramp metering on I-495 (as is now working on lower I-270), Transportation Systems Management and Operations (TSMO) (as is being used on the Baltimore Beltway to reduce congestion), and more Transportation Demand Management (TDM) (e.g., telework, car and van pools, subsidized transit passes, etc.).
- Add more rail cars on the future Purple Line (which runs parallel to I-495) and increase frequency of service, as appropriate.
- Extend the Purple Line across the American Legion Bridge to Tysons in Northern Virginia.
- Mandate that employers above a certain size participate in sustainable commuter services programs such as Montgomery County's Fair Share for Employers Program or the Maryland Commuter Choice Program. Such mandates exist in Washington, DC, Washington State, and New Jersey.
- Turn one or possibly two one-way lanes on I-270 and possibly I-495 into reversible lanes to handle rush hour traffic.

In addition to these measures, the region should address economic and racial equity by investing in transit-oriented development within a mile of each Metro and Purple Line station in Prince George's and eastern Montgomery Counties. This would help create jobs with little or no additional VMT, reduce rush hour demand to travel from east to west on I-495 in the morning and back in the evening, and even out the flows on the inner and outer loops of I-495 during the day.

Maryland should hire independent expert(s) to undertake accurate traffic modeling on I-495 and over the American Legion Bridge, and once that data is available, undertake a study of all the alternatives (and their respective costs) to improve the bridge including: re-decking and refurbishing; and adding train, transit, bicycle, and pedestrian access.

The region's financially constrained plan should reflect a sustainable transportation system that gives people choices—not one that perpetuates car dependency and makes it harder for people to access jobs, food, healthcare, education, and recreation. Please remove the I-495 and I-270 toll lanes project and additional highway widening projects and instead promote projects that improve and enhance public transit, transit-oriented development with affordable housing, and pedestrian and cycling infrastructure.

Sincerely,

Josh Tulkin, Director
Sierra Club Maryland Chapter

Re: **Visualize 2050 project submissions need to change to reflect adopted regional policies for climate, safety, equity, and walkable transit-friendly communities**

Dear Virginia TPB board members,

At your Wednesday, March 29 TPB working meeting and following it, the Coalition for Smarter Growth respectfully asks you to:

1. **Seriously review and revisit all projects that are not under construction or in final stages of design for consistency with regional policies.** The TPB staff classification of projects as "Funded/Committed//Exempt" is so overly broad that it includes many projects not completed until 2035 and beyond, or projects with only planning dollars identified or projects inactive for the foreseeable future. These projects should only be resubmitted if they are consistent with regional policy goals. This was the intent of the TPB board in 2021 calling for the current special update to the long-range plan.
2. **Remove many of the 1,000 new highway and arterial lane miles proposed in Visualize 2045, as this massive investment is not consistent with achieving regional policy goals – and ignores induced demand.** TPB, regional, and local policies overwhelmingly call for reducing car-dependence and prioritizing investments to foster walkable transit-oriented communities, increase travel demand management programs, and prioritize safety and climate goals.
3. **Package and submit for inclusion in Visualize 2050 the many identified local unmet needs for safe street improvements for walking, biking, and transit access.** While often smaller individual infrastructure improvements, these are regionally significant investment packages because they reduce driving demand and shift mode share, and deserve to be in the Visualize 2050 constrained element, as they are needed to achieve regional safety goals and adopted TPB priorities. Other regions include these in their plans, and Visualize 2045 included other types of small project groupings as well.
4. **Resubmit critical projects that invest in transit-oriented development, rail, and bus rapid transit.** Visualize 2045 included many important projects like the US Route 1 BRT, Tysons local street grid improvements, Duke Street BRT, and regional rail improvements. These types of projects need to be resubmitted and prioritized in Visualize 2050.

5. **Submit critical projects not included in the last plan, like Route 7 BRT.** The Route 7 BRT project will be transformative for multiple Northern Virginia jurisdictions and this regionally significant project needs to be included in Visualize 2050. Other important projects to include are the Capital Trail Network, including the Virginia components such as the Arlington Boulevard Trail and Mount Vernon Trail.
6. **Keep out destructive and wasteful proposed projects like new Potomac River highways crossings from Loudoun County and Prince William County into rural Maryland.** The Virginia Bi-County Parkway (also referred to as the 234 Bypass Extended) and Manassas Battlefield Bypass (also part of the old Tri-County Parkway), and various rural and suburban highway widening and new interchange projects, are inconsistent with TPB and COG policy goals and siphon funds from other higher regional and local priorities in safety, sustainability, and equity.
7. **Recognize that achieving the COG climate goals requires reducing per capita VMT by 20% in addition to rapidly adopting electric vehicles.** TPB's climate study found that our region needs to reduce per capita VMT of passenger vehicles 20% by 2030, in contrast to Visualize 2045, which would only achieve a 5% reduction by 2045. Achieving TPB's adopted greenhouse gas reduction goals last year requires even stronger action on your part. The reconfiguration of Visualize 2050 along the lines outlined above is a critical part of your needed actions in multiple sectors to achieve our climate target.

Note that the Coalition for Smarter Growth will submit to you more detailed comments on Visualize 2050 projects next month.

Thank you for your consideration.

Re: PBPP Draft Highway Safety Targets & Suggestions for Visualize 2050

Dear Transportation Planning Board Members,

The Washington Area Bicyclist Association (WABA) and the Coalition for Smarter Growth (CSG) – two of the region’s leading advocates for walkable, bikeable, inclusive, and transit-oriented communities – respectfully write to provide comment on the ongoing and disturbing traffic fatality and serious injury trends highlighted by TPB staff in their draft *Annual Regional Transit and Highway Safety Targets* report and presentation.

In summary:

- A 15% increase in Nonmotorist Fatalities and Serious Injuries over the past five years – and an almost 23% increase since last year – is not acceptable
- We ask TPB members to make safety investments a higher priority, particularly for vulnerable road users, in their Visualize 2050 project submissions
- Safety is “regionally significant” and packages of safe street improvements for people walking, biking, and accessing transit in each jurisdiction should be reflected in the Visualize 2050 plan

For decades, WABA and CSG have worked to transform the capital region by improving the conditions for people who bike, walk, and take transit. Our efforts to advocate for better infrastructure, pass laws that promote safe roadway behavior, and provide education programming for all road-users have resulted in a drastically different cultural and political approach to active transportation. Biking and walking can and should be an equitable, safe, low-cost, time-saving, and sustainable way to navigate our communities for all residents, especially when complemented by robust transit options.

Unfortunately, our work to promote bicycling and other modes of active transportation is seriously undercut by pernicious and persistent road safety issues sadly and succinctly captured on slide 16 of the aforementioned staff report. As we prepare to mark the [World Day of Remembrance for Road Traffic Victims](#) this Sunday, November 19th, we must soberly grapple

with the fact that our region is failing its commitments to its residents, with traffic violence increasing rather than decreasing particularly for people on foot and bike.

We cannot let past failures deter us from the opportunities to do better going forward.

Your agencies are *right now* deciding on the projects they will submit to the regional long-range transportation plan, Visualize 2050. In your project submissions next month, we ask TPB members to make safety investments a higher priority, particularly for vulnerable road users.

The previous long-range transportation plan, Visualize 2045, aimed to spend \$28 billion on creating faster, wider, roads – envisioning 900 new lane miles. So we know there are resources available; what we need now is to repurpose some of those resources and political will to support more urgent safety and other needs. While some of the \$28 billion in road expansion projects incorporate new sidewalks and multi-use paths along the right of way, most of them lead to longer crossing distances across ever wider multi-lane arterials and higher volumes of cars traveling at higher speeds on area roads.

We recognize that many small local projects are not always reflected in the regional long-range plan as they are not considered to be “regionally significant”. We would counter that safety is absolutely “regionally significant” and that packages of safe street improvements for people walking, biking, and accessing transit in each jurisdiction should be reflected in the plan. This would be one small but important way of demonstrating a renewed regional commitment to meeting the travel and safety needs of all roadway users. Local efforts remain critical, too, and we implore you to prioritize the safety needs of those on bike and foot in your individual jurisdictions’ transportation plans, infrastructure designs, and budgets.

The scourge of traffic violence cannot be solved overnight. We have taken the first step by recognizing the scope and seriousness of the problem. What must follow is a steadfast resolve to act differently, to lean further into people-centered approaches to transportation planning, and to resist the urge to fall back into the familiar ruts of a car-centered paradigm. The lives of your constituents and neighbors depend on it.

We appreciate the opportunity to provide comments and look forward to working with you towards a future without traffic violence.

Respectfully,

Michelle Shin

Vision Zero Coalition Manager | Washington Area Bicyclist Association
