

ANNUAL REPORT ON CRIME & CRIME CONTROL

Evaluating crime trends in metropolitan Washington in 2024 and the regional initiatives by law enforcement to combat crime

January 2026

Metropolitan Washington
Council of Governments

ANNUAL REPORT ON CRIME AND CRIME CONTROL

Prepared for the COG Board of Directors on behalf of the COG Police Chiefs Committee.

January 2026

ABOUT COG

The Metropolitan Washington Council of Governments (COG) is an independent, nonprofit association that brings area leaders together to address major regional issues in the District of Columbia, suburban Maryland, and Northern Virginia. COG's membership is comprised of 300 elected officials from 24 local governments, the Maryland and Virginia state legislatures, and U.S. Congress.

MESSAGE FROM THE CHAIRMAN

The Metropolitan Washington Council of Governments (COG) *Annual Report on Crime and Crime Control* is developed by the COG Police Chiefs Committee on behalf of the COG Board of Directors. This report provides the National Capital Region's (NCR) leadership and elected officials with the ability to review and evaluate crime trends from a regional perspective.

Authored by the Police Investigative Commanders Subcommittee, the report collects crime statistics from COG members, neighboring jurisdictions, and federal law enforcement agencies. The report illustrates the 2024 crime statistics and compares the offenses and arrests against the prior five years of data.

This annual report serves as an important foundation to ongoing work by COG to better understand and provide information on regional crime trends, which will enable a more effective response to reduce these crimes.

I am honored to chair the Police Chiefs Committee, excited for the law enforcement initiatives being implemented regionally, and I look forward to working collaboratively to keep the NCR a safer and more secure region.

Russell E. Hamill, III, Chair, COG Police Chiefs Committee
Chief of Police, Laurel Police Department

EXECUTIVE SUMMARY

In 2024, the NCR experienced population growth alongside a decline in crime per capita. Overall, Part I/Group A offenses decreased, though rape and larceny showed slight increases between 2023 and 2024.

Nationally, violent crime continued to decline in 2024, with a particularly strong decline in murders and other violent crime offences. Larceny, which includes shoplifting, also decreased, though motor vehicle thefts declined after previous years of increase.

As calls for service decline and staffing levels stabilize, though they remain below levels ideal for meeting operational needs, law enforcement workforce wellness continues to be a priority for the Police Chiefs Committee. With violent crime decreasing across the region, the Committee is focused on sustaining this progress through continued improvements in crime reporting and tracking. Additional priorities include strengthening regional mutual aid procedures and addressing persistent non-violent crime by identifying and promoting effective best practices.

Many law enforcement agencies in the region advanced new initiatives or strengthened existing efforts to address evolving crime and public safety challenges in 2024. Departments expanded real-time crime centers, deployed drones and advanced camera systems, and leveraged digital forensics to enhance response and investigative capabilities. Jurisdictions continued collaborations on issues such as youth recidivism, motor vehicle thefts, firearm-related offenses, fraud, and cross-jurisdictional crime, while also increasing community outreach, training, and technology-driven prevention strategies. Several agencies faced persistent staffing shortages, prompting renewed recruitment and retention efforts. Regional committees and task forces remained essential forums for information-sharing and coordination to ensure public safety throughout the National Capital Region.

The data contained in this report is utilized to update the COG Regional Crime Dashboard, which provides an overview of crime statistics and trends within the region. The dashboard can be accessed [here](#).

INTRODUCTION

The Metropolitan Washington Council of Governments (COG) *Annual Report on Crime and Crime Control* is based on crime statistics reported by 23 local jurisdictions of COG. The report also includes statistics from neighboring jurisdictions, state and federal law enforcement agencies, and local universities to highlight the trends throughout the region. This report, compiled by the COG Police Chiefs Committee, begins by focusing on Part I/Group A Offenses, as defined by the Federal Bureau of Investigation (FBI), primarily collected using the following reporting methods:

- Uniform Crime Reporting (UCR) Program, and
- National Incident Based Reporting System (NIBRS)

COG disseminated a data collection instrument requesting information from the region’s law enforcement agencies on the Police Chiefs Committee. Each agency determines its own reporting method. COG compiled the data, regardless of reporting method, and presents in this report crime trends over five years to provide a clearer picture of crime in the NCR. To gain a more comprehensive understanding of crime trends in the region, additional factors such as the economy, social stressors, legislative changes, and/or changes in police policies and resources should be taken into consideration. This additional analysis is not included in this report.

PART I/GROUP A OFFENSES

In 2024, the NCR saw a decrease in the total number of Part I/Group A offenses over the previous year. There was a 4.28 percent decrease in 2024 from 2023. Figure 1 demonstrates the five-year trend, with an overall decrease of 5,684 reported offenses between 2023 and 2024 in the NCR.

Figure 1: Total Part I/Group A Offenses, National Capital Region, 2020-2024

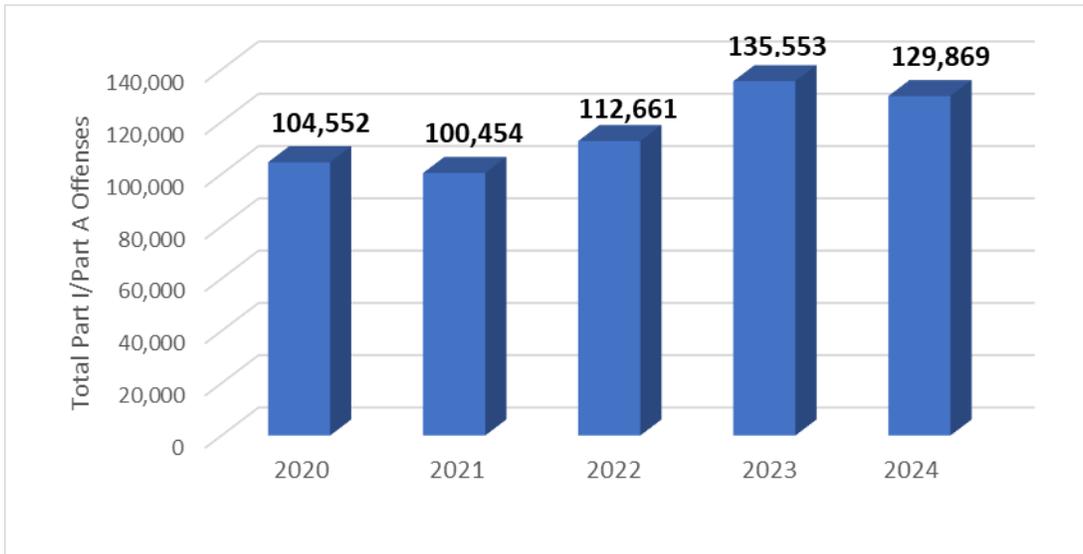

Table 1 below illustrates the breakdown of Part I/Group A Offenses for each of the reporting COG jurisdictions, as well as the crimes committed per 1,000 people. Table 2 illustrates the breakdown of offenses for the Associate Members, including neighboring jurisdictions and federal agencies.

CRIME TRENDS IN THE NATIONAL CAPITAL REGION

Crime trends in the NCR are calculated by adding the total number of historical property crimes and violent crimes and then comparing the total against the previous five years.

There was a 2.60 percent decrease in overall property crime in 2024 compared to the previous year. Figure 2 shows the historical property crime trends from 2020-2024 in the NCR. Property crime includes offenses of burglary, larceny, and motor vehicle theft. Figures 3, 4, and 5 show the historical crime trends for each of these offenses.

Figure 2: Historical Property Crime Trends, National Capital Region, 2020-2024

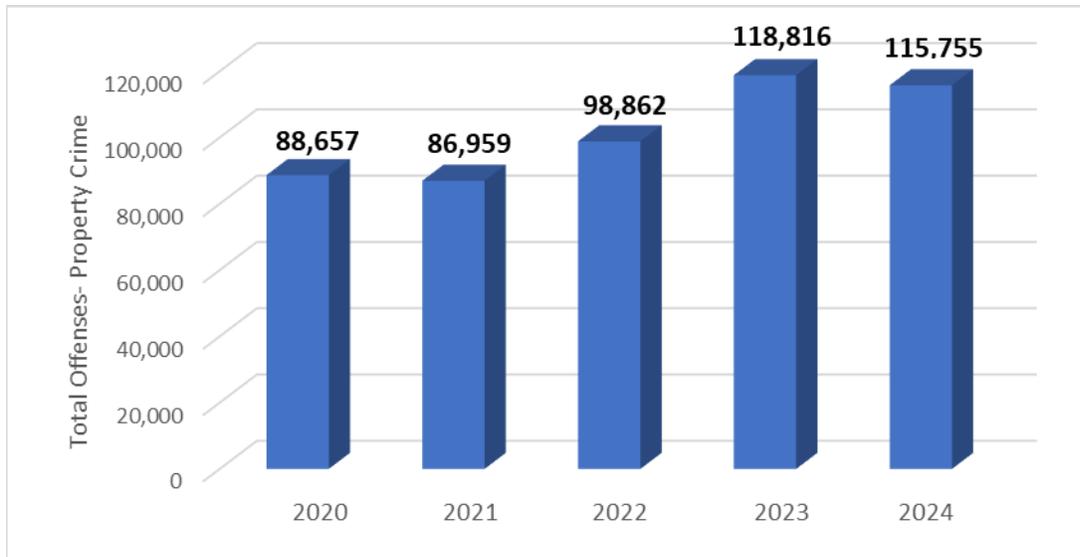

Figure 3: Historical Offenses - Burglary, National Capital Region, 2020-2024

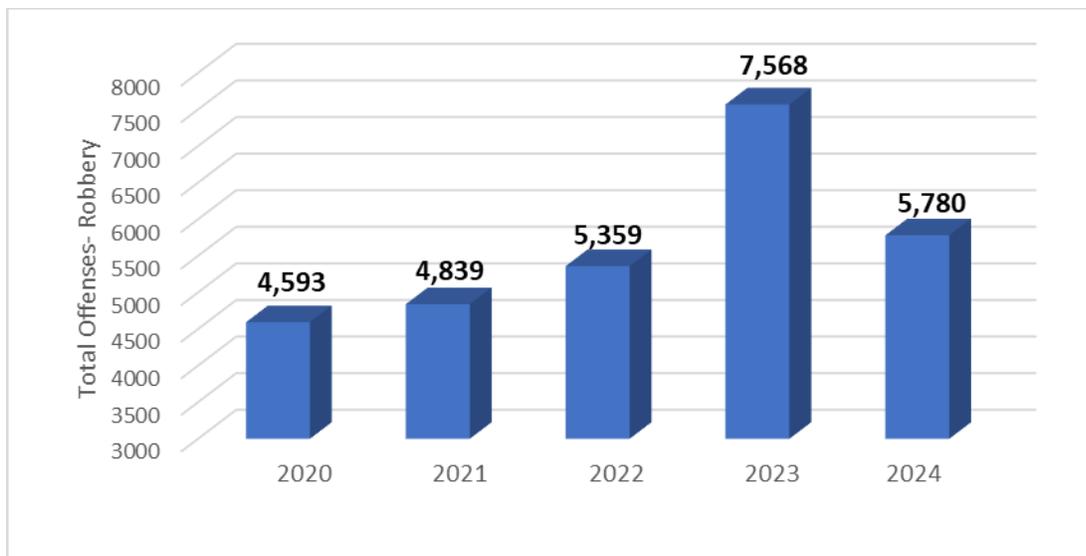

Figure 4: Historical Offenses- Motor Vehicle Theft, National Capital Region, 2020-2024

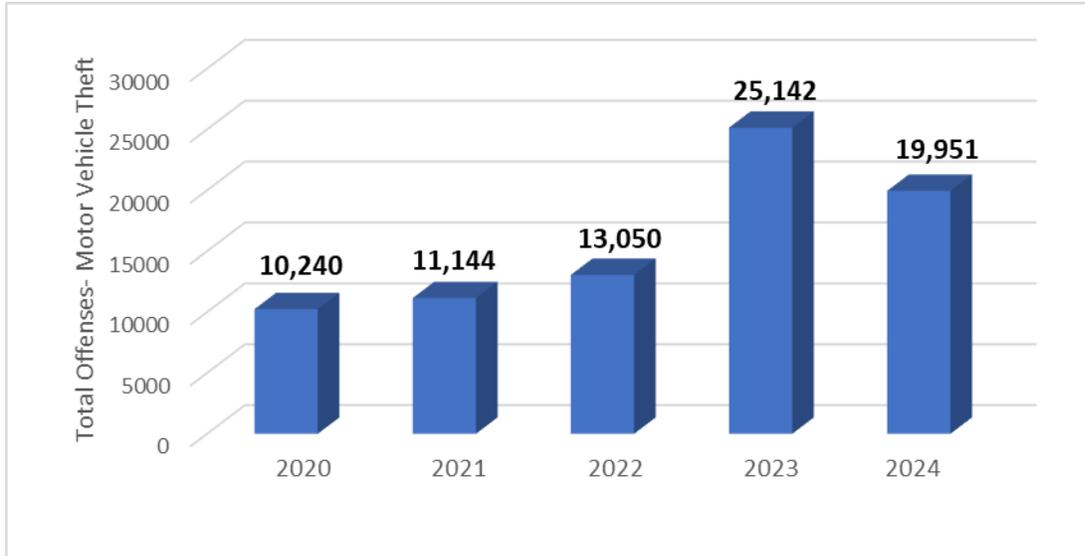

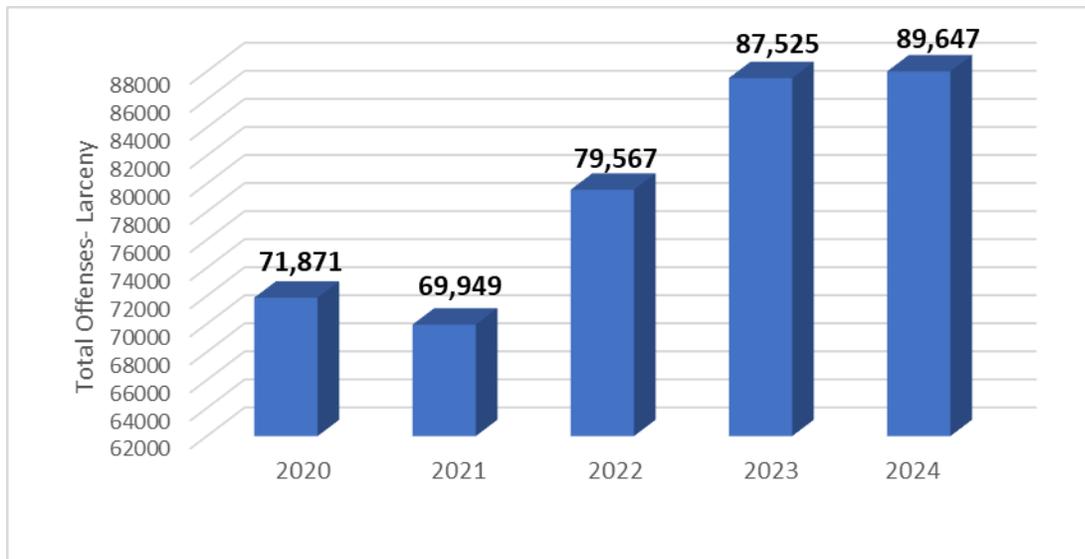

Figure 5: Historical Offenses- Larceny, National Capital Region, 2020-2024

Regionally, violent crime decreased 14.37 percent in 2024. Figure 6 shows the overall historical violent crime trends from 2020-2024 in the NCR. Violent crime includes homicide, rape, robbery, and aggravated assault. Figures 7, 8, 9, and 10 show the historical crime trends for each of these offenses.

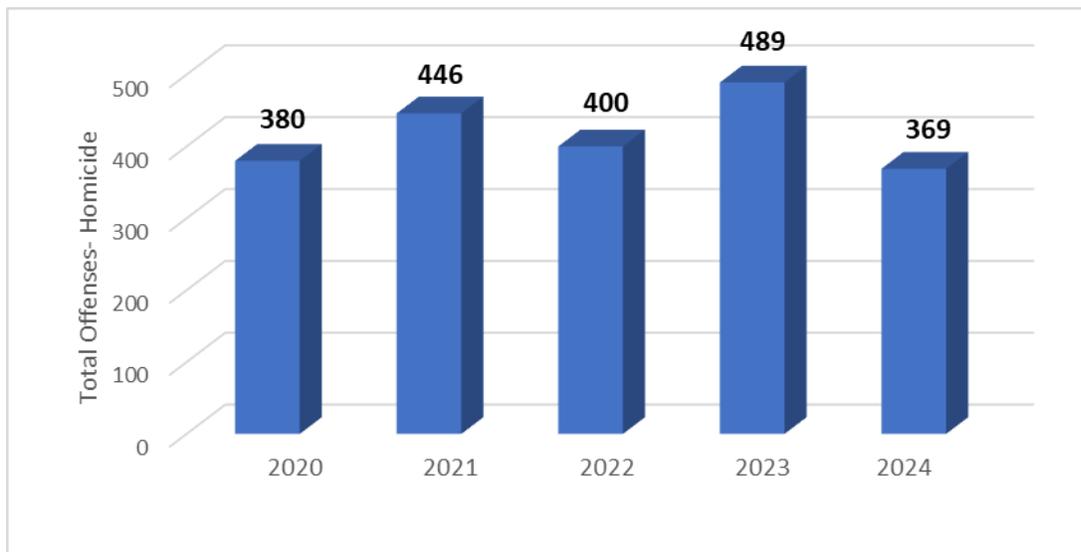

Figure 8: Historical Offenses- Robbery, National Capital Region, 2020-2024

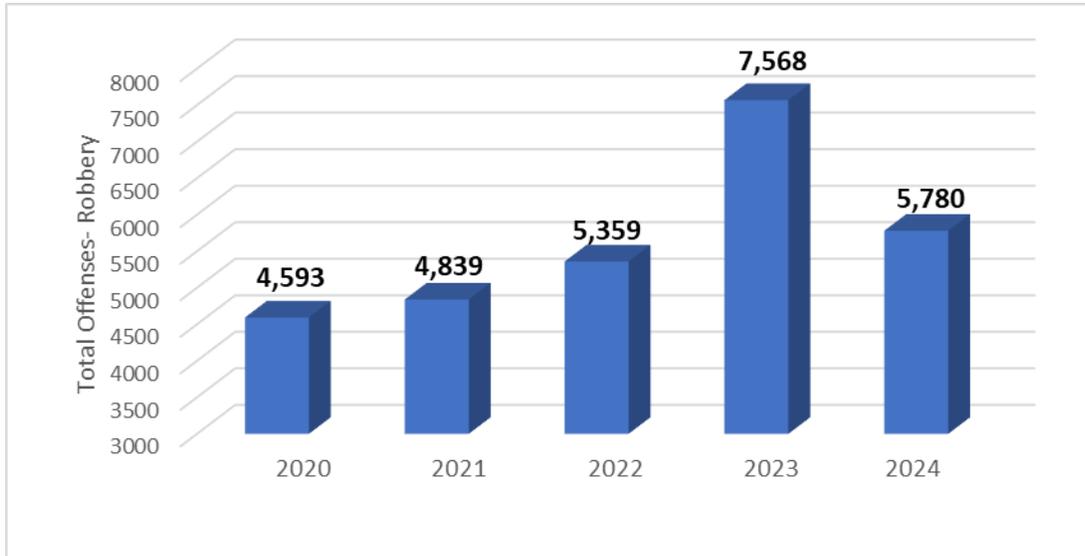

Figure 9: Historical Offenses- Rape, National Capital Region, 2020-2024

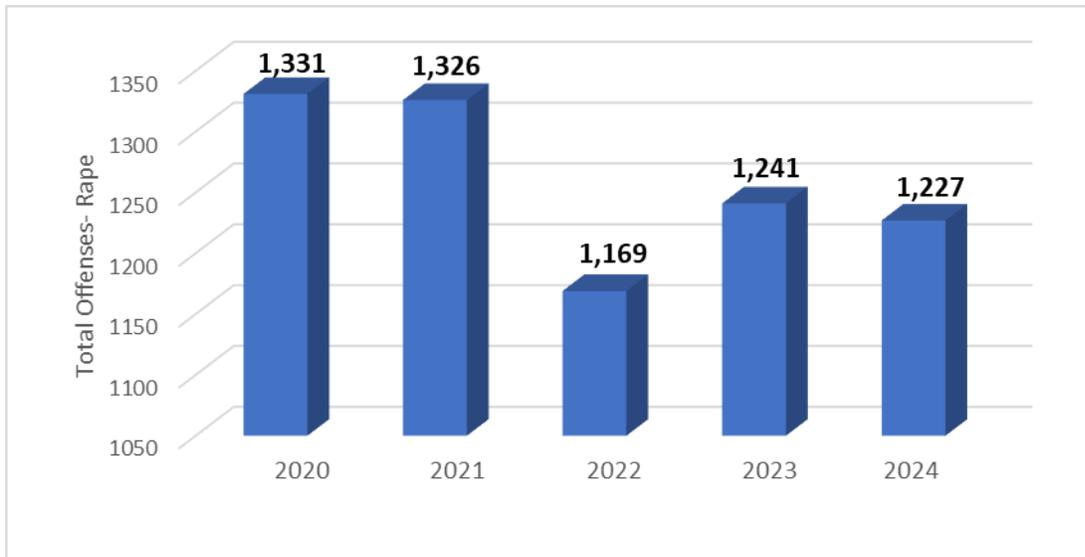

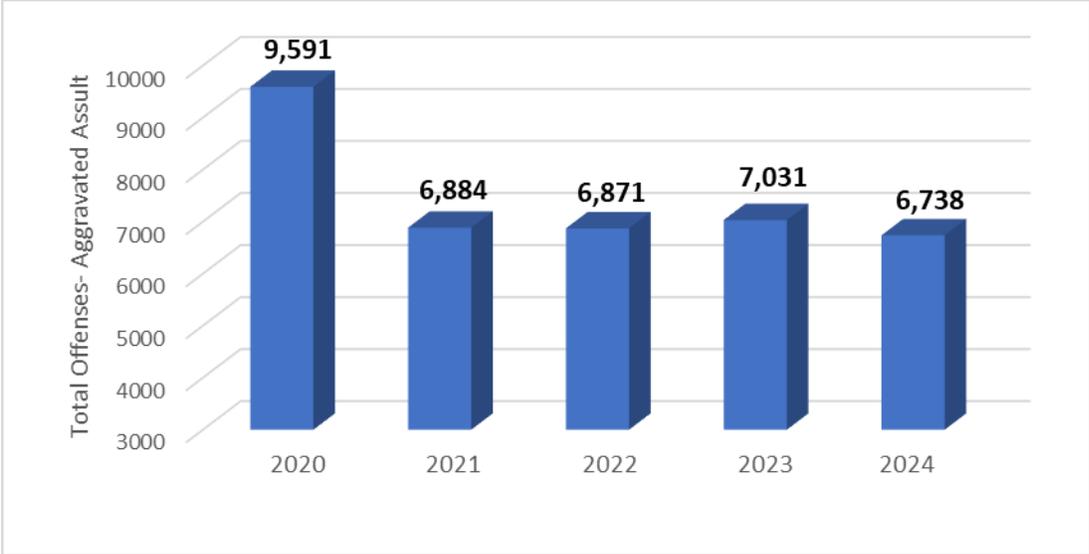

Figure 10: Historical Offenses- Aggravated Assault, National Capital Region, 2020-2024

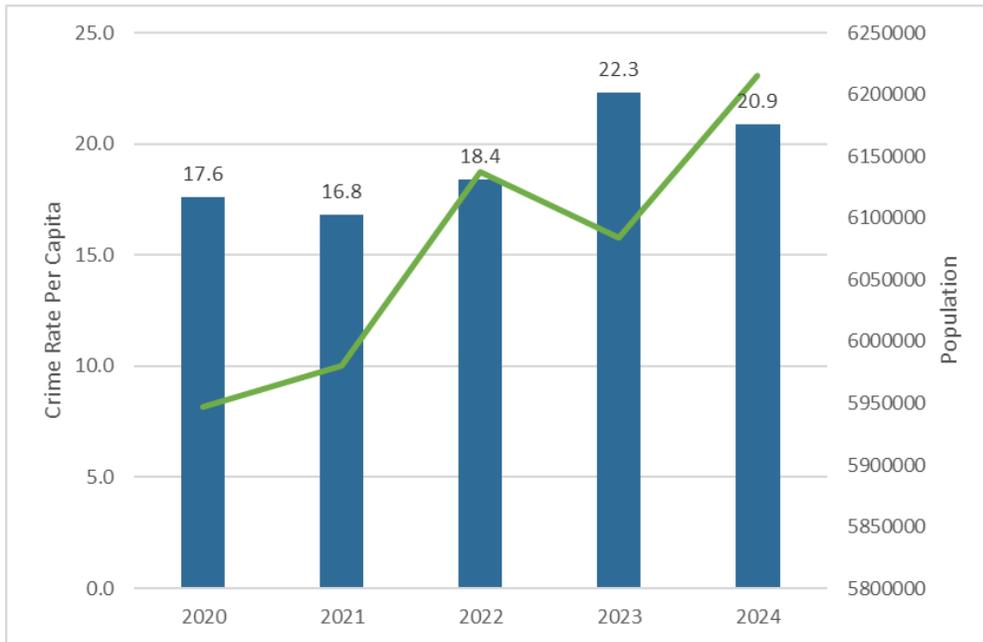

Crime Rate Per Capita

The region's population increased in 2024 to over 6.2 million and the crime rate per capita decreased. The 2024 crime rate per capita was 20.9 per 1,000. Crime rate per capita is a commonly accepted measure of crime and often serves as a basic indicator of overall crime trends. In addition to the overall crime trends, each jurisdiction closely monitors their own crime patterns, and addresses current trends using an assortment of policing, training, and specialized law enforcement.

Figure 11 illustrates the crime rate per capita from 2020-2024. The line in the figure represents population growth over the last five years.

Figure 11: Crime Rate Per Capita, 2020-2024

Calls for service and staffing levels should be included when evaluating crime rate per capita data. Calls for service numbers may not include officer-initiated calls and may only reflect dispatched calls. Table 5 provides a breakdown of the total calls for service in each reporting Primary Member and Associate Member agencies, as well as the authorized staffing levels for sworn and civilian personnel. There was a decrease of 30.36 percent calls for service for Primary Members in 2024 from the previous year.
