

MEMORANDUM

TO: TPB Steering Committee
FROM: Sara Stockdale, TPB Transportation Planner
SUBJECT: Adoption of Revised Amendment and Administrative Modification Procedures
DATE: October 1, 2026

This memorandum presents proposed revisions to the National Capital Region Transportation Plan and Transportation Improvement Program (TIP) Amendment and Administrative Modification Procedures. The revisions are being proposed in response to recent updates to the Maryland Department of Transportation's (MDOT) procedures and are intended to maintain consistency between the regional and state processes.

Concurrent with the adoption of the Visualize 2050 National Capital Region Transportation Plan and included as Appendix B of the FY 2026-2029 TIP, the TPB's procedures were adopted via TPB Resolution R4-2025 and TPB Resolution R5-2025 in December 2025 to establish the criteria for processing amendments and administrative modifications. At that time, the procedures reflected the state DOTs most recent State Transportation Improvement Program (STIP) agreements with federal partners from 2014 for MDOT and 2019 for the Virginia Department of Transportation (VDOT). On September 10, 2026, a new Memorandum of Understanding became effective for MDOT entitled "Procedures for Maryland Department of Transportation (MDOT) Statewide Transportation Improvement Program (STIP) Amendments and Administrative Modifications."

The TPB's procedures establish the criteria for determining how changes to projects in the Metropolitan Transportation Plan (MTP) and TIP are reviewed and approved. Amendments generally apply to more significant changes and require approval by the TPB or TPB Steering Committee, as applicable, while administrative modifications apply to changes that meet established criteria and may be approved by the TPB Staff Director or their designee without formal Board action.

The proposed revisions update and clarify the criteria and thresholds used to determine how changes to the MTP and TIP are classified and processed.

Key revisions to the procedures include:

- Adding a provision addressing MTP amendments for major changes that could affect financial constraint, air quality conformity, or other content determined to be significant by TPB staff for review by the TPB.
- Clarifying the examples of major changes that require a TIP amendment.
- Clarifying the criteria for TIP administrative modifications, including revising the calculation of total cost for MDOT projects/programs.
- Updating the procedures for submitting MTP and TIP amendments.

Adoption of the revised procedures will establish the criteria and processes for evaluating and processing future amendments and administrative modifications to the MTP and TIP while maintaining consistency with MDOT's updated procedures for the financial thresholds which trigger an amendment vs. administrative modification.

Amendments or administrative modifications made to the TPB's TIP are then included directly or by reference in the appropriate state DOT's Statewide Transportation Improvement Program in accordance with 23 CFR §450.328(b). The Steering Committee is being asked to approve TPB Resolution SR6-2027 to update the National Capital Region Transportation Plan and Transportation Improvement Program Amendment and Administrative Modification Procedures.

NATIONAL CAPITAL REGION TRANSPORTATION PLANNING BOARD
777 North Capitol Street, N.E.
Washington, D.C. 20002

**RESOLUTION TO UPDATE THE NATIONAL CAPITAL REGION TRANSPORTATION PLAN
AND TRANSPORTATION IMPROVEMENT PROGRAM AMENDMENT AND
ADMINISTRATIVE MODIFICATION PROCEDURES**

WHEREAS, the National Capital Region Transportation Planning Board (TPB), as the federally designated metropolitan planning organization (MPO) for the Washington region, has the responsibility under the provisions of the Fixing America's Surface Transportation (FAST) Act, reauthorized November 15, 2021 when the Infrastructure Investment and Jobs Act (IIJA) was signed into law, for developing and carrying out a continuing, cooperative, and comprehensive transportation planning process for the metropolitan area; and

WHEREAS, the Federal Planning Regulations implementing the FAST Act require that TPB procedures for an administrative modification or an amendment to the Metropolitan Transportation Plan (MTP) and the Transportation Improvement Program (TIP) be documented and be consistent with the Statewide Transportation Improvement Program (STIP) procedures for the District Department of Transportation (DDOT), Maryland Department of Transportation (MDOT), and Virginia Department of Transportation (VDOT); and

WHEREAS, the TPB originally adopted procedures for revision to the MTP and TIP in 2008; and

WHEREAS, the procedures have been updated over time to be compatible with the 2014 MDOT and 2019 VDOT STIP procedures as agreed to by their federal partners at the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA); and

WHEREAS, on December 17, 2025, concurrent with the adoption of the latest MTP and TIP for the National Capital Region, the TPB approved its current MTP and TIP amendment and administrative modification procedures in TPB Resolution R5-2025 Certification of the Metropolitan Transportation Planning Process, and it was also included in an appendix to the FY 2026-2029 TIP approved with the Visualize 2050 National Capital Region Transportation Plan via TPB Resolution R4-2025; and

WHEREAS, in September 2026, MDOT executed a new agreement with Federal Highway Administration (FHWA) Maryland Division and the Federal Transit Administration (FTA) Region 3 that supersedes the 2014 MDOT agreement and revised the criteria for what qualifies as an administrative modification in the STIP procedures; and

WHEREAS, the 2025 TPB procedures have been updated to incorporate the September 2026 MDOT financial thresholds and project information that qualifies as an administrative modification in the STIP and TIP along with other minor general updates and clarifications; and

WHEREAS, the TPB procedures were developed in consultation with staff at DDOT, MDOT, and VDOT and presented to the TPB Technical Committee on September 4, 2026; and

WHEREAS, the TPB reaffirms the delegation of administrative modification approval authority to the TPB staff director or their staff designee on behalf of the TPB.

NOW, THEREFORE, BE IT RESOLVED THAT the Steering Committee of the National Capital Region Transportation Planning Board approves the attached National Capital Region Transportation Plan and Transportation Improvement Program Amendment and Administrative Modification Procedures.

AMENDMENT AND ADMINISTRATIVE MODIFICATION PROCEDURES

Draft October 1, 2026

ABOUT THE TPB

The National Capital Region Transportation Planning Board (TPB) is the federally designated metropolitan planning organization (MPO) for metropolitan Washington. It is responsible for developing and carrying out a continuing, cooperative, and comprehensive transportation planning process in the metropolitan area. Members of the TPB include representatives of the transportation agencies of the states of Maryland and Virginia and the District of Columbia, local governments, the Washington Metropolitan Area Transit Authority, the Maryland and Virginia General Assemblies, and nonvoting members from the Metropolitan Washington Airports Authority and federal agencies. The TPB is staffed by the Department of Transportation Planning at the Metropolitan Washington Council of Governments (COG).

OVERVIEW OF PROCEDURES FOR REVISIONS TO THE METROPOLITAN TRANSPORTATION PLAN AND THE TRANSPORTATION IMPROVEMENT PROGRAM

The National Capital Region Transportation Planning Board (TPB) is the designated Metropolitan Planning Organization (MPO) responsible for approving the metropolitan transportation plan (MTP) and transportation improvement program (TIP) for the metropolitan Washington region. Once the MTP and the TIP have been determined to meet the financial constraint and air quality conformity requirements and are approved by the TPB, they become the Plan and TIP of record. The TPB certifies its planning and programming process meets federal requirements with each new TIP adoption.

Due to the complex nature of proposing, studying, engineering, and constructing transportation projects, details of the various project phases are always in flux. As projects evolve, implementing agencies frequently need to request revisions to the TIP, and sometimes even to the MTP, between their regularly scheduled updates. Revisions could include cost, scope, schedule changes, etc. Revisions to the MTP will, at a minimum, require action by the TPB Steering Committee and may ultimately require an off-cycle conformity analysis, which could take up to a year to process. As such, any revisions to the MTP will be considered on an individual basis and will require significant advanced notice to TPB staff. In practice, most administrative modifications and amendments are made to the TPB's TIP. This document explains how the TPB ensures that the MTP and TIP remain financially constrained.

Historical Context

The Safe, Accountable, Flexible, and Efficient Transportation Equity Act - A Legacy for Users (SAFETEA-LU) of 2005, as implemented through Federal Planning Regulations issued February 14, 2007 by the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA), required that TPB procedures for an administrative modification or an amendment to the long range transportation plan (renamed to MTP in MAP-21) and TIP between scheduled periodic updates be documented and be consistent with the District Department of Transportation (DDOT), the Maryland Department of Transportation (MDOT), and the Virginia Department of Transportation (VDOT) procedures.

According to 23 CFR 450.328, TIP Revisions and Relationship to the STIP, the MPO may revise the TIP at any time under procedures agree to by the cooperating parties; the State shall include the TIP without change, directly or by reference in the STIP; and, the State shall notify the MPO when it has included a TIP in the STIP.

On January 16, 2008, the TPB adopted procedures for processing amendments and administrative modifications to its MTP and TIP. All amendments required action by the TPB's Steering Committee and/or the full board and often required public review whereas administrative modifications were delegated by TPB to the Director of the Department of Transportation Planning of the Metropolitan Washington Council of Governments. Since 2008, MDOT in 2014 and VDOT in 2019 adopted new State Transportation Improvement Program (STIP) Procedures in agreements they had with Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). The TPB procedures were updated to reflect the new agreements.

In the metropolitan Washington region, DDOT, MDOT, and VDOT each provide the project descriptions and funding information for the development of the TPB's TIP and MTP. When it becomes necessary for a DOT to revise the TPB's TIP project information for the STIP, the DOT

must follow the TPB procedures for revising the TIP for inclusion directly or by reference in the STIP.

With each TPB TIP adoption starting in 2019, the TPB procedures have been modified as needed and included as an appendix to the TPB’s TIP. On December 17, 2025, concurrent with the adoption of the latest MTP and TIP for the National Capital Region, the TPB approved its current TPB procedures. In September 2026, MDOT executed a new agreement with Federal Highway Administration (FHWA) Maryland Division and the Federal Transit Administration (FTA) Region 3 that supersedes the 2014 MDOT Memorandum of Understanding (MOU) for its procedures and revised the criteria for what qualifies as an administrative modification in the MDOT STIP prompting this 2026 update to the TPB procedures.

TPB’S ROLE AND KEY STAFF

As noted, the TPB serves as the MPO for the National Capital Region and prepares the regional MTP and the TIP. The TPB’s role is to revise these documents ensuring their consistency with regional goals and other local members’ plans. Key staff involved with handling amendments and administrative modifications are noted in Table 1.

TABLE 1: KEY STAFF

TPB Staff	Title	Role
Kanti Srikanth	Executive Director	Staff Director for the Transportation Planning Board (TPB)
Lyn Erickson	Chief Program Director	Contributor
Cristina Finch	Program Manager	Contributor
Sara Stockdale	Senior Transportation Planner	Contributor
Marc Moser	Associate Transportation Planner	Contributor

Once the TPB approves the MTP and the TIP, TPB staff will establish a schedule of alternating periods for processing amendments and administrative modifications each month. At the beginning of each period, staff will issue a call for MTP/TIP amendments or administrative modifications via email, posted on the Project InfoTrak homepage/dashboard, and any other communication platforms in use at the time. TPB staff will assist staff from member agencies if there are any questions as to which type of action a proposed change would require.

TIP administrative modifications are reviewed by TPB staff. If the proposed actions are consistent with the criteria listed in the Defining Amendments, Administrative Modifications and Technical Corrections section, and the guidelines provided in the Establishing Financial Constraint section of this document then staff will process and approve the administrative modification request(s) on behalf of the Director. The TPB has delegated approval of administrative modifications to the

Director, Department of Transportation Planning of the Metropolitan Washington Council of Governments. Requests for administrative modifications will be submitted to the Director or their designee. The requests will be reviewed and those meeting the definition of administrative modification will be processed, approved, and emailed to the requesting implementing agency. All TPB approved requests for administrative modifications will be posted on the TPB web site. Upon receipt by the requesting state agency, the administrative modification will be incorporated into the STIP, shared for informational purposes with USDOT, and no federal action will be required.

For amendments, staff review the proposed revisions and prepare a resolution to approve the amendments to be considered by the TPB Steering Committee or the TPB itself, depending on the size and nature of the changes proposed, according to the guidelines provided in the Procedures section of the document. At the meeting where the amendments are slated for approval, TPB staff will be present to provide any notable comments during the discussion of the items prior to their approval. Following the TPB's review and consent of the Steering Committee's action at the next TPB meeting or direct approval by the TPB, staff will transmit an officially approved version of the resolution and amendment to the relevant agencies.

Role of TPB Subcommittees

Each month, the TPB Steering Committee approves amendments to the TIP that are exempt from or meet the air quality conformity requirement. The TPB Bylaws endow the Steering Committee with full authority to act on its behalf in the approval of amendments to the MTP and the TIP on non-regionally significant items. The phrase "non-regionally significant items" (and its inverse) is not the same as a project that may be considered "regionally significant" (or not) for the purposes of an air quality conformity analysis. As used in the TPB Bylaws, the term is subjective and multiple factors such as the scope and scale of the project and the additional amount of proposed funding may be considered.

ROLE OF KEY PLANNING AGENCIES

Key planning agencies include states, local jurisdictions, and transit agencies. The agencies' role is to provide the TPB with the details of their investment strategies for inclusion in the MTP or TIP and update their project or program information in the TPB's Project InfoTrak database when there is an administrative modification or amendment.

For administrative modifications, the agencies will submit a request via email to the Staff Director for the TPB or their designee. For amendments, the agencies must submit a signed letter to the Chair of the TPB.

PUBLIC ENGAGEMENT

The TPB Public Participation Plan¹ guides TPB staff on public engagement. The Participation Plan states the TPB will conduct a Public Forum on the TIP with each new adoption of a TIP. TPB staff use this forum as an opportunity to educate community members on federal, regional, state, and local transportation funding. In accordance with the Participation Plan, the TPB holds a public comment period before approval of a newly updated TIP. If any agency requests an amendment to update its entire section of the TIP, this is akin to a new TIP update for that agency; thus, also requiring a 30-day public comment period.

For revisions that require amending the TIP without updating the conformity analysis, TPB staff will prepare a resolution with accompanying materials to describe the proposed revision(s) to be reviewed and approved by the TPB Steering Committee. The resolution(s) and accompanying

¹ National Capital Region Transportation Planning Board (October 20, 2020). *Public Participation Plan*. <https://www.mwcog.org/documents/2020/10/21/tpb-participation-plan-outreach-public-comment-tpb>

materials are typically posted to the Steering Committee's next upcoming meeting page one week prior to the meeting date. A subscription-based email is sent the same day that the materials have been posted.

The TPB Steering Committee generally meets on the first Friday of the month, unless pre-empted by a holiday. Steering Committee meetings are streamed live and recorded on YouTube, where the public is invited to watch and listen. Following approval by the Steering Committee, the TPB will receive a report on the action at their next meeting, at which point any member or alternate may ask the board to review or reconsider any action taken by the Steering Committee. If no objection is raised, the action is considered final. State DOTs will incorporate the TIP into their STIPs and submit them to their federal partners for approval. Following federal approval of the amendments, TPB staff will add the approval date to the plan revision which will show on the Public Project InfoTrak website. The public has the opportunity to comment at all the TPB's regular meetings, and can provide written comments at any time.

Administrative modifications are handled by TPB staff and do not undergo separate public engagement. The administrative modification and amendment actions will be posted to the Public Project InfoTrak website after they have been approved.

In cases where a project sponsor requests an amendment to the MTP to include new project(s) that require an update to the air quality conformity analysis (40 CFR §§ 93.126 and 93.127), the TPB will review the proposal, air quality analysis results, any public comments received and then vote on the amendment. At a minimum, the public will have the opportunity to comment during a formal comment period prior to the TPB's vote on the amendment and at the beginning of any TPB meeting where the project is being discussed.

DEFINING AMENDMENTS, ADMINISTRATIVE MODIFICATIONS, AND TECHNICAL CORRECTIONS

Amendments

MTP amendments entail major changes that could impact financial constraint, air quality conformity, or other content determined to be significant by TPB staff for review by the TPB.

Amendments to the TIP are any major changes to projects or programs (TIP records) included in the TIP that exceed the parameters for administrative modifications, as defined in the following section. Major changes to records can include:

- Addition or deletion of a record or a discrete project phase;
- Major change in the record cost that exceeds the thresholds listed in the administrative modifications below;
- Major change in design concept or design scope as listed in the project description and project type (e.g. changing project termini or the number of through traffic lanes or changing the number of stations in the case of fixed guideway transit projects);
- Merits air quality conformity analysis – including if an existing project changes in scope so that the project qualifies for conformity analysis and becomes non-exempt per Transportation Conformity Rule, (40 CFR §§ 93.126 and 93.127) or changes project completion date so that it changes the conformity year.

Administrative Modifications

Administrative modifications (also called “Modifications” or “Ad-Mods”) are minor changes to projects or programs (TIP records) included in the TIP that do any one or more of the actions listed below.

1. Revise a project or program (TIP record) title or description without impacting conformity or conflicting with the environmental document;
2. Change the source of funds;
3. Change the program year of funds within the TIP years;
4. Moving funding for the years outside of the TIP where the total cost does not change;
5. Change the lead agency for a project or program;
6. Split or combine individually listed projects/programs so long as schedule and scope are unchanged, and as long as the funding amounts stay within the guidelines in number eight (8), below;
7. Add or delete component projects from project grouping records or associated component project information, so long as the total project grouping funding amount stays within the guidelines in number eight (8), below; or
8. Revise the total cost listed for a TIP record subject to the applicable definition of the funding limitations adopted by DDOT, MDOT, and VDOT/DRPT for their respective STIPs.
 - a. For projects to be included in the DDOT STIP, the additional funding is limited to 25% of the total cost.
 - b. For projects to be included in the MDOT STIP, any change to funding amounts is limited based upon a sliding scale that varies by the total cost as follows:
 - If the total cost is less than \$5 million, a Modification shall be used for an increase or decrease in cost of up to 50% of the total cost
 - If the total cost is greater than \$5 million but less than 20 million, a Modification shall be used for an increase or decrease in cost up to 30% of the total cost.
 - If the total cost is greater than \$20 million, a Modification shall be used for an increase or decrease of cost up to 25% of the total project cost.
 - c. For projects to be included in the VDOT or DRPT’s STIP, the additional funding is limited based upon a sliding scale that varies by funding source and total cost as follows:
 - For transit projects using Federal Transit Administration (FTA) funds:
 - If the Approved STIP total estimated project cost is \$2 million or less, a Modification shall be used for an increase of up to 100% of the total cost.
 - If the project cost is greater than \$2 million but is \$10 million or less, a Modification shall be used for an increase of up to 50% of the total cost.
 - If the project cost is greater than \$10 million, a Modification shall be used for an increase of up to 25% of the total project cost
 - For highway projects using Federal Highway Administration (FHWA) funds:
 - If the approved STIP total estimated project cost is \$2 million or less a Modification shall be used for an increase of up to 100% of the total cost.
 - If the project cost is greater than \$2 million but is \$10 million or less, a Modification shall be used for an increase of up to 50% of the total cost.
 - If the project cost is greater than \$10 million but is \$20 million or less, a Modification shall be used for an increase of up to 25% of the total cost.
 - If the project cost is greater than \$20 million but is \$35 million or less, a Modification shall be used for an increase of up to 15% of the total cost.
 - If the project cost is greater than \$35 million, a Modification shall be used for an increase of up to 10% of the total cost

An administrative modification can be processed to reflect requested changes in accordance with these procedures provided that the existing record does not:

- affect the air quality conformity determination;
- impact financial constraint; and
- require public review and comment.

Technical Corrections

Technical corrections are minor changes in the MTP or TIP that do not require federal approval. These corrections include typographical, grammatical, or syntactical errors that address, for example, an error in spelling, grammar, deletion of a redundant word or formatting that was inadvertently published. It does not include changes to funding amounts. Such changes are handled on a case-by-case basis through agreement between the state and federal agencies and coordinated with the MPOs as necessary.

ESTABLISHING FINANCIAL CONSTRAINT

One of the TPB's primary roles is to verify the financial constraint of the region's MTP and TIP. To do this, the TPB must have accurate estimates for all expenditures planned in the MTP and programmed in the TIP. With hundreds of records of projects and programs in the MTP and TIP and their planned expenditures, the Project InfoTrak database application is the primary tool that the TPB uses to meet this requirement.

As seen in the previous section, one of the most significant factors in determining whether a project or program revision can be processed by administrative modification is the change in total cost. Due to the variety of project and program types included in the MTP and TIP, there is no one-size-fits-all approach to determining the total cost of these records. For the purpose of determining total cost, the records in the Project InfoTrak have been sorted into three categories:

- Discrete Projects
- Project Groupings
- Ongoing Programs

This section explains how those categories and other factors are used to define the total costs of projects and programs so that financial constraint can be verified when revisions are requested.

Defining Record Types and Calculating Total Cost

The three types of MTP and TIP records are defined in Table 2. For the purpose of amending or modifying the TIP, how the total costs for these record types are calculated is described in the following sections.

In addition, the TPB utilizes an "Over-Archiving Project" or "OAP" record, for records that span both the MTP and TIP. More on OAP records and their total cost calculation is provided later in this section.

TABLE 2: RECORD TYPE DEFINITIONS

Discrete Projects	Project Groupings	Ongoing Programs
Any capital activity that has: • A set scope of work, • At a specific location with determined limits • A finite project cost • Final year of completion • Typically program funds for ○ planning & engineering, ○ right-of-way acquisition, ○ and construction phases.	Multiple discrete projects (2 – 300+) that are: • Non-regionally significant (NRS) for air quality analysis • Sub-projects are similar in type, scope, or primary funding source.	Operational or capital activities that are: • Non-regionally significant (NRS) for air quality analysis • Anticipated to continue indefinitely • Funded annually at or near the same level, typically adjusted to account for inflation. • Sub-projects may be listed individually on the Component Projects tab.

Total Cost for Discrete Projects

Ideally, discrete projects would move from the MTP into the TIP as a whole, all at once. Then any discrete project would be entirely in the MTP or entirely in the TIP.

However, sometimes agencies will advance one segment of a larger discrete MTP project into the TIP to begin programming it for construction. There may also be instances where an agency will begin studying, planning, preliminary engineering (PE) or even acquiring rights-of-way (ROW) for projects that are not expected to begin construction until much later.

Whether in the MTP or in the TIP, the total cost for any whole or partial discrete project record should cover the scope of work specifically described in the record's Agency Project Title, Project Type and Description including planning, preliminary engineering, right-of-way acquisition, construction, utilities, and any other capital expenditures through the expected completion of the project. New discrete project records for project segments should include the total cost for the scope of that segment only. Discrete project records for any pre-construction phases should capture the projected cost of that entire phase. This will then be considered the "total cost" for those phases or segments.

The TPB's Project InfoTrak database application automatically calculates the total cost for each TIP record by adding together these amounts:

- For discrete project records, the sum of all funding in years prior to the current four years of the TIP (shown at the bottom of TIP tables as "Total Prior Costs" funding, (This should equal all prior actual obligations),
- The sum of all planned obligation funds programmed in the current four years of the TIP, and
- For discrete project records, the sum of any reasonably anticipated funding that the implementing agency has scheduled beyond the final year of the TIP to complete a phase or full scope of work (shown at the bottom of TIP tables as "Total Future Cost").

This calculated "Total Programmed" amount will serve as the "total cost" for that discrete TIP project record. Consistent with practices used in the MTP financial analysis, all funding should be provided in Year-of-Expenditure (YOE) dollars.

Total Cost for Project Groupings

Project Groupings are made up of multiple discrete projects called component projects, all with varying completion dates. Because there is no start or end year for the project grouping, it is not possible to define a reasonable finite total cost as is done with Discrete Projects. Project groupings are ongoing, so **the total cost for project grouping records used for determining amendments or add-mods is the four-year total programmed in the TIP.** No prior funding or future funding should be entered. The project grouping total cost, because it is the sum of the funding programmed in the four years of the TIP, will not equal the sum of the total cost of its component projects as described below.

Project Groupings utilize the component project tab in Project InfoTrak. Each component project will show its total cost (entered manually and equal to the sum of prior, current four-year planned obligations, and future costs).

To account for all expenditures in the MTP, project groupings should have one TIP record to cover the first four years, and one MTP record that reflects the cost of the grouping beyond the final year of the current TIP through the horizon year of the MTP.

Total Cost for Ongoing Programs

Ongoing programs are anticipated to continue indefinitely with annual expenses. This continuous nature makes calculating a finite **total cost** somewhat arbitrary. **For ongoing program records, the four-year program total will serve as the total cost.** Funds shall be programmed in the four active years of the TIP only. No prior funding or future funding should be entered.

To account for all expenditures in the MTP, ongoing programs should have one TIP record to cover the first four years, and one MTP record that reflects the cost of the program beyond the final year of the current TIP through the horizon year of the MTP.

Total Cost for the TIP and MTP

Total cost is not calculated the same way for MTP records as it is for TIP records. Since no specific funding sources have been allocated to projects in the MTP, prospective revenues need only be “reasonably expected to be available.” The total cost for MTP records is provided by the funding agencies during a plan update. Staff will track the overall total through a simple addition of the expected amounts of federal, state, local, regional, private, or other funding mechanisms listed for the projects. Maintaining the total cost for MTP records as they relate to project records that have been advanced into the TIP is critical for maintaining financial constraint of the plan as well as the TIP. This section discusses how MTP records are eventually advanced, in whole or in part into the TIP, and how those related records are tracked.

Tracking TIP and MTP Records with Over-Arching Projects

A project segment or phase may be advanced into the TIP as an independent discrete project record, so long as there is no change to how the project is reflected in the most recently approved air quality conformity analysis and the action complies with all other federal requirements. A segment or phase can be amended into the TIP through TPB Steering Committee approval. Once phases or segments of a singular discrete MTP project record begin advancing into the TIP, keeping track of these multi-record projects becomes very important for maintaining financial constraint. The TPB’s Project InfoTrak system uses a type of super-record called an “Over-Arching Project” or “OAP” record. Project IDs for these records start with “G” to keep track of all records associated with the original MTP project record.

OAP records are useful for Project Grouping and Ongoing Program records as well. MTP records have been established as “companion” records for all Project Grouping and Ongoing Program records to account for the projected expenditures of those records throughout the plan year horizon.

PROCEDURES FOR SUBMITTING AMENDMENT OR ADMINISTRATIVE MODIFICATION REQUESTS

TPB staff will publish a schedule that announces in advance when submissions for MTP or TIP amendments and administrative modifications will be accepted and the associated due dates for data entry and submission of the requests. These dates are subject to change due to unforeseen circumstances, but staff will update the published schedule as far in advance as possible and make every effort to inform the implementing agencies of any such changes. Amendment and administrative modification submissions will not be accepted after the posted due dates, save for extenuating circumstances.

When it becomes necessary for an agency to revise the information for a project in the MTP and/or TIP, the agency will review the type of changes to the project and apply the above definitions to determine if it can be processed by the TPB as an administrative modification or an amendment. For an amendment, the DOT will then submit the project changes to the TPB via a letter to the TPB chair, and for an administrative modification, the DOT will send an email addressed to the TPB Staff Director.

Amendments

At the beginning of each amendment cycle, TPB staff will issue a Call for Amendments. Each agency requesting an MTP or TIP amendment must complete their data entry and submit a signed letter addressed to the Chair of the TPB by the specified deadline. The letter must be very specific for each project/program to justify approval by the TPB. The request letter will:

- Identify why the amendment is being requested,
- Note if successive administrative modifications are triggering the amendment
- Identify funds moving from the MTP (CE record) into the TIP program years,
- Identify if the project/program is a new and not previously included in the MTP,
- Specify funds that are being advanced or deducted by phase in the TIP program years, and
- Identify all sources of funding that would increase or decrease the total cost.

TPB staff will work with agency staff to determine whether that funding was included in the financial analysis of the most recently approved MTP and TIP. The requests will be reviewed by TPB staff, and a determination will be made to either present it to the Steering Committee for approval or go to the full TPB Board.

Under the TPB Bylaws, the Steering Committee “*shall have the full authority to approve non-regionally significant items, and in such cases, it shall advise the TPB of its action.*” The Steering Committee will approve the amendment or will recommend that the TPB take up the amendment for action. For agencies requesting an amendment to update its entire section of the TPB’s TIP, a 30-day public comment period is required. In such instances, agencies must provide TPB staff with notice at least 60 days in advance to ensure that the amendment can be given adequate time for technical review and be placed on the necessary agendas.

All TPB approved requests for MTP and TIP amendments will be documented for public review on the Public Project InfoTrak website and forwarded to the requesting agency. Upon receipt of the approved amendment, the requesting agency will transmit it to FHWA and/or FTA (depending on the funding sources involved) along with the request for federal approval of an amendment to its STIP.

After approval by FHWA and FTA, the amendment will be incorporated into the DOT's STIP. Upon notification to TPB staff that the amendment has been federally approved, the federal approval date will be added to the TPB's Project InfoTrak database.

Administrative Modifications

In accordance with the posted schedule, TPB staff will announce the opening of each period for accepting administrative modification requests. The TPB has delegated approval of TIP administrative modifications to the TPB Staff Director. Requests for TIP administrative modifications must be submitted via email to the Staff Director or their designee. In the administrative modification request, the submitting agency must explain the following information:

- Why an administrative modification is needed,
- The source of any new funds that increase the project cost below the acceptable TIP thresholds as noted previously, and
- Why the action qualifies as an administrative modification, citing the definitions provided above and the agency's procedures and agreements with FHWA and FTA.

TPB staff will work with agency staff to determine if the funds were included in the most recent financial analysis of the MTP and TIP and if the request meets the definition of administrative modification will be approved and posted in the Project InfoTrak system. Approved TIP administrative modifications will be forwarded to the requested implementing agency for incorporation into its STIP with no federal action required.

Cumulative Administrative Modification Totals

Since administrative modifications are not reviewed and approved by FHWA or FTA, the total cost of the most recent TIP adopted or subsequent amendments is used for determining an administrative modification. Therefore, when calculating the percentage increase in a total cost across successive administrative modification requests, the baseline total cost will always refer to the total cost most recently approved by adoption of, or amendment to the TIP. Once the threshold of successive administrative modifications is reached, the next action taken must be by amendment, regardless of the size of the administrative modification request. This will prevent a situation where successive administrative modification requests would effectively bypass the intended limit to an increase of a project or program's cost without TPB and public review.

DISPUTE RESOLUTION

If a question arises on the interpretation of the definition of an amendment, the TPB, the requesting DOT, FHWA and FTA (the parties) will consult with each other to resolve the question. If after consultation, the parties disagree on the definition of what constitutes an amendment, the final decision will rest with the TPB's federal representative at FTA for transit projects and FHWA for highway projects.
