What's on the Horizon?

- 1) Increased number of e-bikes. Operator's fleets will soon be required to be between 20%-35% E-bikes, which are typically ridden farther, expand the universe of potential riders, and are ridden at a higher rate than standing scooters.
- 2) Mandatory Parking Study we are hiring a consultant to look at best practices for mandatory parking areas, with an eye toward a pilot program in particularly confined parts of town.
- 3) Growing Access Program awareness. Income-qualified residents can ride for 80% off fares (with no unlock fee, limited to 4 rides daily).
