Protocol Compliance

- COG GHG Inventories are third party verified compliant with the [U.S. Community Protocol for Accounting and Reporting of Greenhouse Gas Emissions \(USCP\)](#) and the [Global Protocol for Community-Scale Greenhouse Gas Inventories \(GPC\)](#)
- *Verified by ICLEI, Carbon Disclosure Project (CDP)*
- *Recognized by Global Covenant of Mayors for Climate and Energy (GCoM) in 2021 and 2023*

Metropolitan Washington Council of Governments is recognized for its action on climate mitigation and adaptation!

The Global Covenant of Mayors for Climate & Energy - the largest global alliance for city climate leadership - awards the 'Compliant' badge for our leading role at the forefront of climate action.

Regional GHG Emission Reduction Results

Metropolitan Washington
GROSS greenhouse gas
emissions decreased by **19%**
from 2005 - 2023.

Metropolitan Washington
NET greenhouse gas
emissions decreased by **20%**
from 2005 - 2023.

Reduction Equivalencies

The COG Region reduced emissions by **>14 MMTCO₂e** between 2005 and 2023.
That's equivalent to....

>2.9 Million
Homes Off the
Grid in a Year

>232.7 Million
Tree Seedlings
Grown for 10
Years

>4.9 Million
Tons of Waste
Diverted to
Recycling

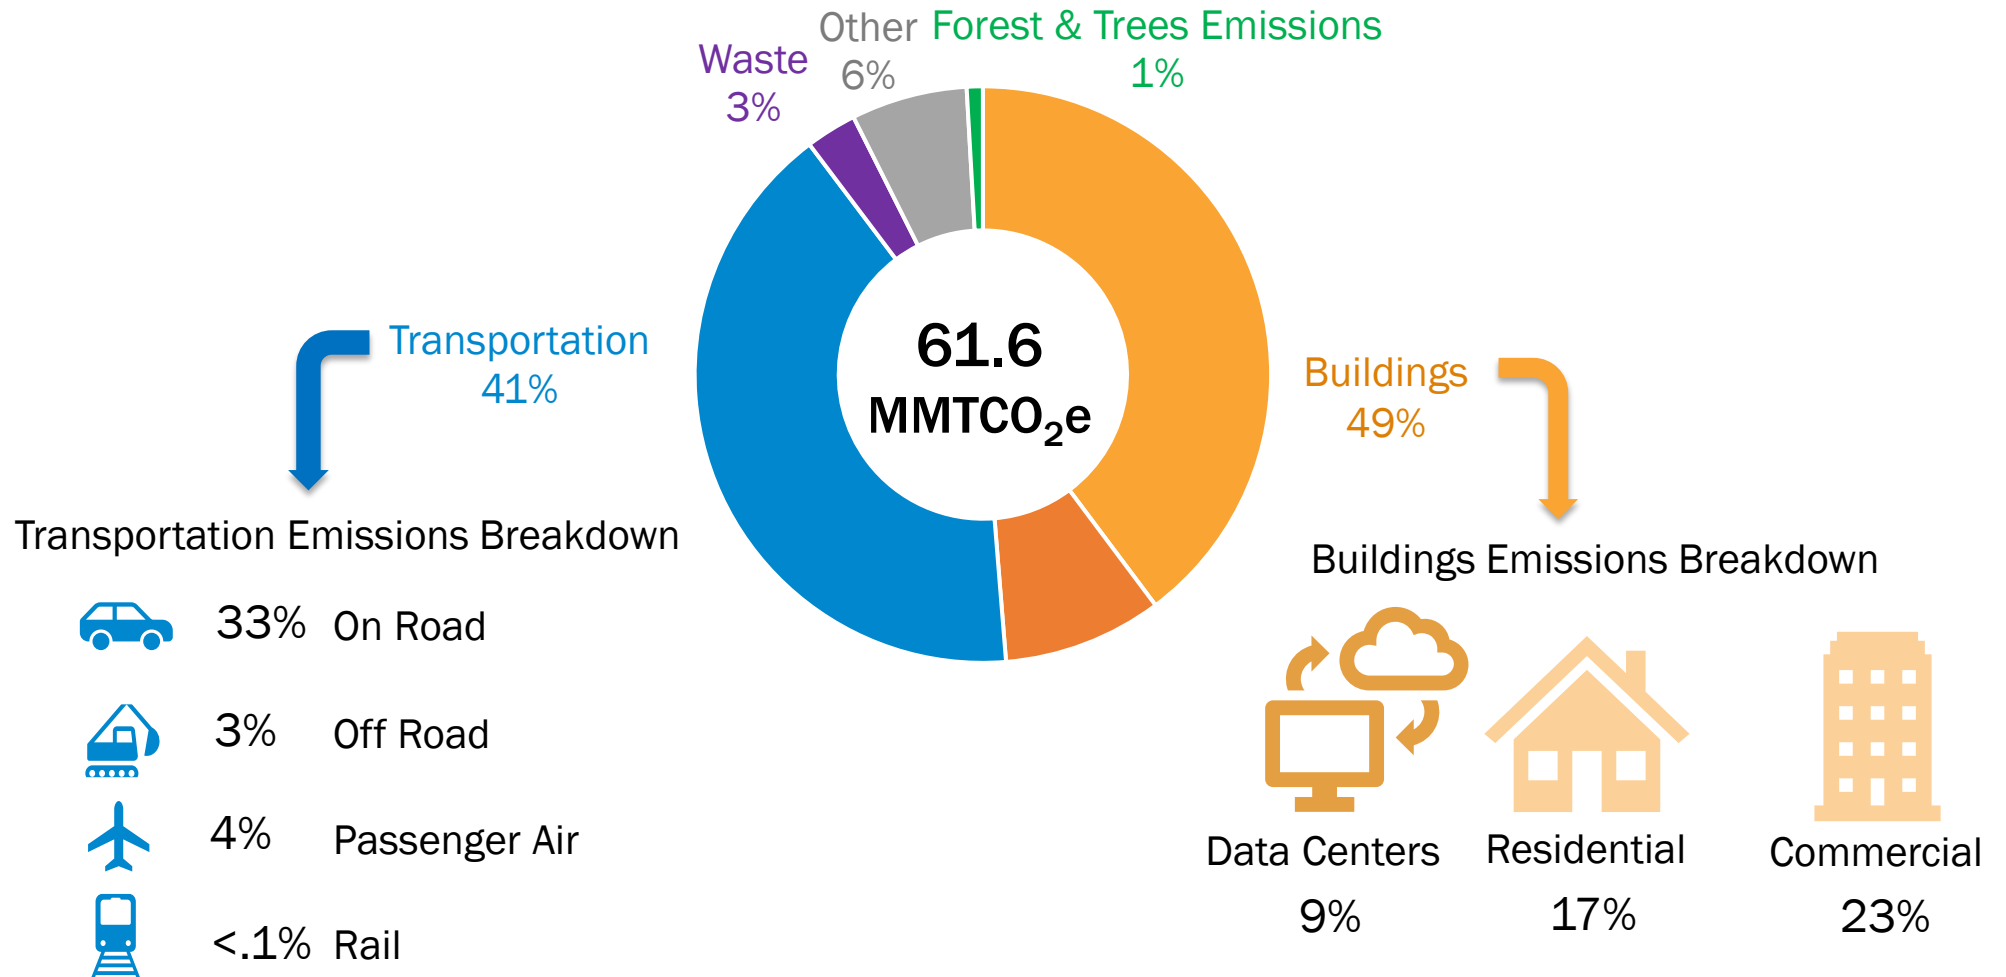

>3.2 Million
Gas Passenger
Cars Off the
Road for a Year

>15.6 Billion
Pounds of Coal
Burning Avoided

Methodology Updates

- **Global Warming Potential (GWP) Values**

- 2005, 2020 (for jurisdictions with data centers), 2023 updated with AR5, less than 0.5% difference to AR4
- All years of on-road updated to AR5

- **Built Environment**

- Data center electricity estimates for 2020 and 2023
- Updated College Park, Prince George's and Charles Counties, and COG region to eliminate double-counting of 2 natural gas plants.

- **Transportation**

- All years of on-road updated to MOVES4
- 2023 Regional Air Passenger Survey methodology update

- **Waste**

- Charles County now has a landfill gas collection system, which reduces GHG emissions
- Updated 2020 data available for District of Columbia and Frederick County
- Regional Wastewater Flow Forecast Model updated

- **Forestry**

- Forests analyzed for 2016-2021
- Trees Outside of Forests analyzed for 2013-2018

- **Population**

- District of Columbia population updates for 2018-2020 leveraging COG Cooperative Forecast 10.0

GHG Inventory Approach for Data Centers

- As part of the Climate Pollution Reduction Grant (CPRG program), we updated the 2020 MSA GHG inventory to break out data center GHG emissions from the broader commercial buildings sector. The methodology was applied to COG's 2020 and 2023 GHG local inventories.
- To inform GHG emissions and projections of data center growth in the region, COG sent out a survey to all localities in the MSA asking for information on planned and permitted data centers, and expectations for growth. In a couple cases, CoStar data was used and verified by localities.
- Data center information was compiled to estimate energy consumption per square foot, total data center electricity consumption, and associated GHG emissions.
- Draft results were presented to relevant localities and stakeholders in spring 2025, and the methodology was further refined.

CCAP DRAFT Data Center Measure

- ***Action Area 1: IT Equipment Efficiency***
 - Energy efficient/ENERGY STAR IT equipment, higher utilization levels in IT hardware, educate data center customers (operators, facilities, IT depts) on BMPs for servers/IT equipment
- ***Action Area 2: Building-level***
 - Cooling and air management, onsite efficiency improvements
- ***Action Area 3: Onsite Clean Energy***
 - Encourage onsite solar, clean more efficient back-up power, demand response programs, district energy feasibility studies
- ***Action Area 4: Data Tracking and Reporting***
 - Metering/monitoring systems, BEPS and benchmarking, comprehensive energy assessments, renewables reporting (onsite and PPAs)
- ***Action Area 5: Engagement and Advocacy***
 - Zoning and permitting, legislative advocacy, support data driven decision-making (such as through GHG inventories)
